Progress on Grand Trunk Pacific Railway continues steady. The tunnel at Kitselas will be through this month, this will expedite the laying of steel.

TERMINATION OF DISPUTE IN THE COAL FIELDS OF EASTERN BRITISH COLUMBIA AND SOUTHERN ALBERTA.—TERMS OF NEW AGREEMENT.

THE Department of Labour was informed on November 13th that an agreement had been reached in the dispute between the eastern British Columbia and southern Alberta coal mining companies and their employees which had led to the closing down of the mines of this district on March 31st last and an almost complete suspension of operations in these important coal fields throughout the intervening period of eight and a half months. The terms of the settlement were subsequently confirmed by referendum vote of the employees and were embodied in a new agreement which was signed by the parties concerned on November 17th, effective until March 31st, 1915. A copy of this agreement was received in the Department of Labour on November 22nd and is published in full in the present issue of the *Labour Gazette*. Operations throughout the coal fields area were resumed on November 20th.

This dispute resulted from the failure on the part of the coal operators and operatives concerned to agree upon any arrangement as to wages and conditions of employment, to replace the two years' agreement expiring on March 31st, 1911. An effort to negotiate a new agreement was made at a joint conference of the parties affected, in Calgary, in the month of March last. The conference referred to broke up, however, without any conclusion being arrived at, and on the last day of March the miners to the number of about 6,000 ceased work, the mines being thereupon closed down.

The continuance of this dispute throughout the spring, summer and autumn months resulted in a very considerable reduction of the domestic fuel supply in the Provinces of Saskatchewan and Alberta. The seriousness of the situation in this respect increased with the advent of cold weath-

er throughout the region affected, and would undoubtedly have led to widespread suffering and loss during the Winter if operations had not been resumed when they were.

Matters at Issue.

The matters at issue between the parties related to wages and conditions of employment, the latter including a question as to the degree of recognition which should be given by the mine owners to the United Mine Workers' Association, to whom a large proportion of the workmen belonged. The United Mine Workers' organization has been recognized for some years past by most of the companies operating coal mines in eastern British Columbia and southern Alberta, and successive agreements have been made between the companies comprising the Western Coal Operators' Association and the district officials of the U. M. W. of A., representing the employees at the various collieries affected.

Companies and Mines Affected.

The mines involved in the dispute of the present year are those controlled by the companies comprising the Western Coal Operators' Association, namely:

Bankhead Mines, Limited	...Bankhead
H. W. McNeil Co. Canmore
Alberta Irrigation Co.Lethbridge
West Canadian Coal Co.	...Blairmore
International Coal & Coke Co.	...Coleman
Royal Collieries, Limited	...Lethbridge
Chinook Coal Co., Ltd.Lethbridge
Leitch Collieries, Limited	...Passburg
Davenport Coal CompanyBurmis
Crow's Nest Pass Coal Co., Ltd.
...Ferne, B.C.
Corbin Coal & Coke Co., Ltd.
...Corbin, B.C.
The Hosmer Mines, Limited
...Hosmer, B.C.

Diamond Coal Co., Ltd. Diamond City
Canadian Coal Consolidated, Ltd.

... .. Frank, Alta.
Hillcrest Collieries, Limited, Hillcrest
The Maple Leaf Coal Co....Maple Leaf.

The Minister of Labour received from the employees on April 13 an application for the establishment of a Board under the Industrial Disputes Investigation Act to which the matters in dispute might be referred. A Board was accordingly established, being constituted as follows: Rev. C. W. Gordon, D.D., Winnipeg, Man., Chairman; Mr. Colin Macleod, Macleod, Alta., named by the operators; and Mr. A. J. Carter, Fernie, B.C., named by the employees. The Board endeavoured through conciliatory means to obtain a settlement of the matters at issue, but was unsuccessful in this respect, and accordingly embodied its findings on the dispute in a report to the Minister of Labour which was published in the August number of the *Labour Gazette** and communicated by the Department of Labour to the parties concerned. A dissenting report was also made by Mr. Carter. The operators, in a communication addressed to the Minister of Labour on July 24th, signified their willingness to negotiate an agreement along the general lines suggested by the Board in its majority report; the employees, on the other hand, signified their acceptance of the minority report of Mr. Carter, the result being that no settlement was at this time arrived at.

Remission of Coal Duties.

In view of the threatened shortage of coal throughout the Provinces of Alberta and Saskatchewan, through the continuance of this dispute, and with a view to relieving the same, an Order-in-Council was adopted on July 31st,[†] on the recommendation of the Minister of Labour, authorizing a remission of the Customs duty on bituminous coal imported into Canada at the ports on the southern frontier of the Dominion west of Sault Ste. Marie for

consumption in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia east of the 122nd meridian of longitude, such remission to become effective on entries on and after August 7th and to continue for such period as the domestic coal mines failed to produce coal sufficient in the judgment of the Governor-in-Council to meet the public requirements.

After the resumption of coal mining operations on November 20, a further Order-in-Council was adopted providing for the discontinuance of the remission of customs duties on coal entered on and after December 6. It is estimated that the importations of United States coal into Canada to which the remission of customs duties has applied is in the neighborhood of 1,000,000 tons.

A meeting of delegates of the Boards of Trade of Alberta, Saskatchewan, and eastern British Columbia was held in Macleod, Alta., on July 24 for the purpose of considering the serious situation created by the discontinuance of coal mining operations and endeavouring to effect, if possible, an adjustment of the matters in dispute. No settlement being reached through the medium of this conference, a resolution was adopted and transmitted to the Minister of Labour, setting forth that the public was already seriously affected by the shortage of coal in the agricultural regions of Alberta and Saskatchewan and in the smelting districts of British Columbia; that business generally throughout the entire district was paralysed, and that a coal famine was in prospect for the coming Winter unless a settlement was shortly arrived at. The resolution also expressed the view that an agreement should be accepted by both parties to the dispute on the basis of the report of Rev. Dr. C. W. Gordon, Chairman of the Board of Conciliation and Investigation. The conference also urged that the Government of Canada should appoint a permanent commission for the investigation of industrial disputes, composed of unprejudiced experts independent of either party. Resolu-

*See *Labour Gazette*, August, 1911, pp. 150-161.

†See *Labour Gazette*, August, 1911, pp. 169-170.

tions in similar terms were also adopted by a number of the Boards of Trade in Western Canada.

Threatened Shortage of Fuel.

In the course of the Summer and Autumn months various communications were exchanged between the Department of Labour and the district affected by the above mentioned dispute. In the month of October, in reply to an inquiry on the subject, the Department of Labour was furnished by the Department of Agriculture of Saskatchewan with detailed information gathered by the authorities of this Province relative to the shortage in the fuel supply and the steps which were being taken by the Saskatchewan Government to provide, if possible, against the occurrence of any fuel famine in the Winter months. It was estimated in the middle of October that at least 200,000 tons of soft coal would be required for domestic use in Saskatchewan in addition to the then existing stocks, of which the Souris mines then in operation might be expected to supply one-third. Inquiry was also made by the Department of Labour of the Governments of Alberta and British Columbia relative to the fuel supply in these Provinces. The reply of the British Columbia Government was to the effect that no inquiry had been instituted into the dispute referred to. In the case of the Province of Alberta no reply had been received from the Department up to the end of November.

Basis of Agreement Reached

On October 19th a message was addressed by the Deputy Minister of Labour to the employees' representatives, at Fernie, B.C., stating that the Honourable Robert Rogers, Minister of the Interior, would probably be in Lethbridge on October 25th on matters connected with the Interior Department and that the Minister of Labour had thought the employees might desire to take advantage of Mr. Rogers' presence to inform him of the

present situation of the dispute, adding that "the Minister of Labour feels assured that in the event of your doing so, the Honourable Mr. Rogers will be pleased to do what may be possible to assist in promoting a settlement of the long standing dispute." On Mr. Rogers' arrival at Lethbridge various conferences were held by him with the parties concerned and a basis of agreement was arrived at for the settlement of the various points at issue. Negotiations were thereupon resumed between the operators and operatives relative to the terms of the proposed new agreement. The negotiations in question continued from day to day until a settlement had been reached on all points involved, on November 13th.

Outline of New Agreement.

The new agreement is to continue in force until March 31, 1915, the parties to meet in conference thirty days before its expiration to discuss renewal thereof. It is understood that in drawing up the terms of settlement the report of Dr. C. W. Gordon was taken as a basis. Provision is made for what is commonly known as the "open shop" by the insertion of a clause to the effect that there is to be no discrimination on the part of the Companies against union men or on the part of union men against non union men employed. The operators agree to make deductions from union members' wages in the form of a check-off for union dues for such amounts as they have definite orders for from the individuals concerned, with a specified sum in each case as a limit of deduction. The agreement also calls for a uniform day wage scale applicable to all the mines in the Western Coal Operators' Association. The contract rates vary somewhat in the different mines and are set forth in detail in the agreement. Provision is made for the adjustment of any disputes or grievances arising under the agreement through the pit bosses, pit committees, mine superintendents, and mine managers, the final adjustment in case of disagreement to

rest with the Commissioner of the Western Coal Operators' Association and the President of District No. 18 of the United Mine Workers of America, who may, if they so desire, select an independent chairman, such chairman in the event of disagreement to be selected by the Minister of Labour. It is declared that the right to hear and discharge, the management of the mines, and the direction of the working forces, are vested exclusively in the Company, and that the United Mine Workers of America shall not abridge this right.

Text of Agreement.

The terms of the agreement are as follows:

AGREEMENT entered into between District No. 18 of the United Mine Workers of America, of the First Part, and the Western Coal Operators' Association, of the Second Part:

It is mutually understood and agreed that the following conditions and rates shall govern the parties hereto, for a period ending March the thirty-first, 1915, and that the parties hereto will meet in conference, thirty days prior to the expiration of this Agreement, to discuss a renewal thereof.

Management of Mine:

The right to hire and discharge, the management of the mine, and the direction of the working forces, are vested exclusively in the Company, and the United Mine Workers of America shall not abridge this right.

Open Shop¹

It is distinctly understood and agreed between the parties that there is to be no discrimination on the part of the Companies against Union men, or on the part of the Union men against non-Union men employed.

Settlement of Local and General Disputes:

(a) In case any disputes or grievances arise under his Agreement, or any local

agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the Company, or any person or persons employed, or by the men as a whole, then the parties shall endeavor to settle the matter, as hereinafter provided. But before any grievances or disputes shall be submitted to the Pit Committee, the person, or persons affected, shall endeavor, by personal application to the Pit Boss, Overman, or Foreman in charge of the work where the dispute arises, to settle the matter, and in the event of them agreeing, their decision shall be final.

(b) In case of any local dispute arising in any mine, and failure to agree between the Pit Boss, Overman, or Foreman in charge of the work where the dispute arises, and any employee the Pit Committee and Mine Superintendent, or Mine Manager, shall endeavor to settle the matter, and if they agree their decision shall be final.

(c) In the event of the failure of the Pit Committee, and the Mine Superintendent, or Mine Manager, to settle a dispute so referred to them, as well as in the event of other disputes arising the matter in dispute shall be referred in writing, to the General Superintendent, or General Manager of the Company, and the Officers of District No. 18, United Mine Workers of America for settlement, and if they agree the decision shall be final. Should they fail to agree, it shall be referred, in writing, to the Commissioner of the Western Coal Operators' Association and the President of District No. 18, United Mine Workers of America, for settlement. If they agree, their decision shall be binding upon both parties. In the event of their failure to agree, the Commissioner of the Western Coal Operators' Association, and the President of District No. 18, United Mine Workers of America, shall endeavor to select an Independent Chairman, and failing to agree upon an Independent Chairman the Minister of Labour shall be asked to appoint such Chairman; the decision of the Committee thus constituted shall be binding upon both parties.

(d) In the meantime, and in all cases while disputes are being investigated and settled, the Miners, Mine Laborers, and all other parties involved, must continue to work pending investigation, and until final decision has been reached, but where Miner, Miners, Mine Laborer, or Mine Laborers, has or have been discharged by the Company, he or they shall not remain in the employ of the Company, while his or their case is being investigated and settled.

If a claim be made within five days, where a man or men, has or have been unjustly discharged, the case shall be dealt with according to this article, and it is proven that he or they have been unjustly dealt with, he or they shall be reinstated if a claim is made for compensation for time lost, in cases where reinstatement has followed, it shall be left to the Commissioner of the Western Coal Operators' Association, and the President of District No. 18, United Mine Workers of America, to decide what amount, (if any) is to be paid.

(e) Any breach of this Agreement, by any of the parties hereto, is not to void the said Agreement, but the same is to be continued in full force and effect.

Duties of Pit Committee:

The Pit Committee shall be a Committee of three in each Colliery, or other plant, covered by this Agreement, selected by the employees working at such Colliery, or other plant, from among their own number, except one member may be a Check-weighman, or an officer of the Local Union, not necessarily an employee of the Company. This member must previously have been seen by a Check-weighman, or an officer amongst the employees of the foresaid Colliery, or other plant; due notice of such selection, properly certified in writing, shall be given to the company.

The duties of the Pit Committee shall be confined to the settlement of disputes, between the Pit Boss or Foreman, and any employee working in or around the mines, arising out of this

Agreement, and all agreements made in connection therewith, the Pit Boss or Foreman, and man or men, having failed to agree.

The Pit Committee, in discharge of its duties, shall, under no circumstances, go around the mine, for any cause whatever, unless called upon by the Pit Boss or Foreman, or by a Miner or Day Man, who may have a grievance, which he has first tried to, and cannot settle with the Boss.

Duties of Pit Committee:

Members of the Pit Committee, employed as Day Men, shall not leave their places of duty during working hours, except by permission of the Pit Boss or Foreman, or in cases involving the stoppage of the mine.

New Work:

Whenever any new works arises, a price for which has not been provided for in this Agreement, on the request of the Company, or the Miners, the Commissioner of the Western Coal Operators' Association, and the President of District No. 18, United Mine Workers of America, shall meet within thirty days after the said request and arrange a price. Failing to agree upon a price, an Independent Chairman shall be called in, as provided for in Clause C of "Settlement of Local and General Disputes," and their decision shall be final.

In making the prices for new work, the Committee shall be governed by existing prices in the same mine, or other mines in the neighborhood.

Meantime, if the work is continued until such price has been arranged, all men shall be paid on the day wage scale.

Employees not under Jurisdiction:

All employees connected with the management of the mine are not to be under the jurisdiction of the United Mine Workers of America, or be members thereof, and shall include the following:

Mine Manager or Superintendent, Overman or Assistant Overman, Pit

Bosses, Firebosses, Boss Driver, Stable Boss, Master Mechanic, Electricians, Weighman, Head Carpenter, Head Blacksmith, Tipple or Breaker Foreman, Leader Boss, Night Watchman, Coke Oven Foreman, Outside Foreman, and all other Foremen, Time Keepers, Coal Inspectors, and Head Lampmen.

Construction and Extensive Repairs:

It is agreed that all men working on improvements and extensive repairs, are not included in the jurisdiction of the United Mine Workers of America.

The erection of head frames, tipples, breakers, washers, buildings coke ovens, scales, machinery, railroad tracks and switches, etc., necessary for the completion of a plant, all being in the nature of construction work, and extensive repairs, or rebuilding of the same class of work, are to be considered as improvements and extensive repairs, and the employees thereon are to be excluded as above, when employed on such work only.

Union Deductions:

The Operators agree to make deductions from Union members' wages for Union dues, for such amounts as they have definite orders for from the individuals, with specified sum as limit of deduction.

Form of Order.

.....19...

To.....

.....

I authorize and empower you to deduct and pay to the *Secretary-Treasurer* of Local Union No..... U. M. W. of A., from my earnings, from month to month, \$.....or such lesser amount as may be designated by the Secretary.

Signed.....

Witness.....

Penalty for Absence from Work:

When any employee absents himself from his work, for a period of two

days, unless through sickness, or by first having properly arranged with the Pit Boss or Foreman, and obtained his consent, he may be discharged. All employees whose absence would cause any stoppage of work, must, before absenting themselves, properly arrange with, or notify the Pit Boss or Foreman, for or of their absence, otherwise they may be discharged. Any employee who habitually, to the extent of five days per month, absents himself from work, may be discharged.

Penalty for Stoppage of Work:

If any employee or employees shall cause a stoppage of work, in violation of this Agreement, he or they shall be subject to discharge by the Company without recourse.

Checkweighmen:

The Company will grant the right to the Miners to employ checkweighers, and will grant the said checkweighers every facility to enable them to render a correct account of all coal weighed, and will allow the cars to be tared from time to time, and the machine to be properly tested from time to time, and will deduct from the wages of all contract miners, such amounts as may be designated from time to time, and will pay over the same to the checkweigher or checkweighers.

Preference of Employment:

In case an employee is thrown out of employment, unless discharged, he shall be given preference over new men in other mines in the same camp, operated by the same company.

Minimum Rate:

When a miner's working place becomes deficient, owing to any abnormal conditions preventing him from earning the minimum wage of \$..... per shift, the Company shall pay him a sufficient amount to secure him the said minimum, providing he has done a fair day's work.

Miners taken to do Company Work:

The Company shall pay the sum of three dollars and thirty cents (\$3.30

per day, for all miners taken from contract work to do Company work.

Delivery of Timber:

In accordance with the Coal Mines Regulation Acts of British Columbia and Alberta, the Company will, at all times, deliver an adequate supply of suitable timber, rails, ties, planks, and sheet iron, at the nearest cross cut to the face of all raise workings, and in places where the regular pit cars go to the working face, without being handled by the miner, they shall be delivered on the cars to the working face; in other places across the pitch, the timber, rails, ties, plans and sheet iron, will be delivered at the mouth of the room.

Loading of Coal from Chutes:

In pitching seams, where chutes are used, the Company will handle all coal placed in the chutes by the Miners.

Doctor and Hospital Arrangements:

The matter of Doctor and Hospital arrangements, is to be arranged between the employees and the management, and when so arranged, the Company agree to make the collection for that purpose; this is subject, in British Columbia, to the laws of the Province.

In camps where Doctor and Hospital arrangements have already been made, and are satisfactory, the customs prevailing in such camps shall continue.

In the making of any new arrangements for a Doctor, a Committee of three representing the Local Union, and the Manager, representing the Company, shall meet and mutually agree upon a Doctor, and after the Doctor has been selected, the Committee, the Management and the Doctor, shall then meet and draw up a mutual agreement, which shall be signed by all three parties.

Store:

It shall be understood and agreed that the employees shall be at perfect liberty to purchase goods wherever they may choose to do so.

Holidays:

The following days only shall be observed as holidays:

New Year's Day.

May First.

Victoria Day.

Dominion Day.

Labor Day.

Thanksgiving Day.

District and International Election Day.

Christmas Day.

Funerals:

In the event of an instantaneous death by an accident, in the mine, or outside the mine, the miners underground, and all other employees, except in the seam where the accident occurred, shall continue to work till the day of the funeral, when it is optional with them whether they shall work or not.

Sub-Contracting:

No sub-contracting shall be allowed in any mine, operated by the Company, but this shall not apply to the employment of backhands.

Employees to Care for Mine:

In case of either local or general suspension of mining, either at the expiration of this Agreement, or otherwise, the Engineers, Firemen and Pumpmen, shall not suspend work, but shall, when mining is suspended fully protect all the Company's property under their care, and operate fans and pumps, and lower and hoist such men and supplies, as may be required to protect the Company's property, and any and all coal required to keep up steam at the Company's plant, but it is understood and agreed that the Company will not ask them to hoist any coal for sale on the market.

Single Shift:

The single shift system in rooms and pillars, shall be adhered to as far as practicable.

Wet Places:

A working place in the mine, where

water drips from the roof in quantities sufficient to wet a man's clothing, or where standing water is sufficient to wet a man's clothing above his knees, shall be considered a wet place; a place where the use of gum boots will keep a man's feet dry, shall not be considered a wet place.

Rock Miners:

Where a man is continuously engaged on rock work, where hammer and steel are used, he shall be considered a rock miner and paid rock miner's wages.

If an air drill is used, the driller shall be paid machine runners' wages, and the helper paid machine runners helpers' wages; the other men engaged shall be classed as miners or laborers, as may be.

When a man is engaged on work in both rock and coal, if the amount of rock is greater than the amount of coal, he shall be classed as a rock miner, and where the amount of coal is greater than the amount of rock, he shall be classed as a coal miner.

Brushing:

When a man is engaged on continuous brushing, either top or bottom, using the usual drills and tools, he shall be classed as a coal miner; if the brushing is done by hammer and steel he shall be classed as a rock miner.

Timbermen taking out rock while engaged in re-timbering or repairing, shall not be classed as rock miners.

Retirement:

Where any employee has drawn his time before the regular pay day, he thereby severs his connection with the Company, and any alleged grievance he may have, ceases to be a question for consideration under this Agreement.

Chinese Labour:

The United Mine Workers of America do not, in any way, prohibit the employment of Chinese in or around the mine, but where such labor is employed, they shall be paid the scale for

such work, with the following provisions, i.e., that where they are now employed at Bankhead and Canmore, the present rates shall not be interfered with, in any way, by the United Mine Workers of America, during the life of this Agreement.

Oil:

Present conditions to prevail.

Pay Day:

The Companies will pay the regular pay rolls at the several mines, for all wages earned during the previous calendar month, on the fifteenth of each month, if the said fifteenth be a Saturday, and if not, then on the first Saturday after the fifteenth, except in case of the fifteenth falling on a Sunday, when the Companies will pay on the fourteenth.

Any employee desiring to leave the services of the Company, on his request, shall be paid all moneys due him within two days after his stoppage of work.

Market Restrictions:

It is agreed that District No. 18, United Mine Workers of America, will not, in any way, restrict or interfere with the marketing of coal or coke to any person, firm, or corporation.

Turn of Cars:

The Company shall, as far as practicable, supply each and every miner with an equal turn of cars.

Backhands:

The present practice of working miners, either as partners, or with miners and laborers, as it exists in the several camps at the present time, shall be adhered to.

On all Company work, the Company shall employ such class of men as the work requires, and at the rate of wages provided for in this Agreement.

10 ft. wide, coal to be paid for in proportion, at 52½ cents per foot per lineal yard for each foot in thickness. Rock in this seam to be paid for at 10 cents per inch per lineal yard.

No. 3 Seam.

Prices to be the same as No. 1 seam. The basis of measurement to be a maximum thickness of seam at 5 feet instead of 4 feet, as in No. 1 seam.

No. 4 Seam.**Breasts:**

20 ft. wide, \$6.30 per lineal yard; 4 ft. thickness, increasing or decreasing thickness of seam to be paid proportionately at 75 cents per foot per lineal yard.

Pillars:

30 ft. wide, 4 ft. thickness, \$6.30 per lineal yard, increasing or decreasing thickness of seam to be paid proportionately at 75 cents per foot per lineal yard, down to a minimum thickness of 3 ft., including dirt or rock.

Skips:

10 ft. wide, 4 ft. thickness, \$3.15 per lineal yard, increasing or decreasing thickness, to be paid proportionately, at 25 cents per foot per lineal yard.

Carey Seam.**Gangway:**

6 ft. collar, 10 ft spread, 6 ft. 6 in. high in the clear, as driven at present, and including coal, rock, timbering, and laying of track, per lineal yard \$12.50.

Breasts: (Up the pitch)

12 ft. wide and 7 ft. thickness of coal, including timbering, chute and stairway, and brattice building, per lineal yard \$6.75.

Breasts: (Across the Pitch)

12 ft. wide and 7 ft thickness of coal, including timbering, brattice, tracklaying, and handling of coal, per lineal yard \$6.25.

Pillars:

30 ft. wide and 7 ft. thickness of coal, including timbering and handling of coal, per lineal yard \$10.00.

These prices are based upon the present system of working, if seam is more than 7 ft. or less than 7 ft., to be paid for proportionately.

The following prices to prevail in all seams:

Chute building, 50 cents per lineal yard, to be built according to present practise, 4 ft. wide un-

less otherwise ordered by the Pit Boss. First length of chute 16 ft., \$2.50.

Bulkheads, according to present practise, \$2.50. All retimbering and replacing broken timbers in breasts to be done by contract work, 8 in. or 10 in. timber at 5 cents per foot.

Gob or brattice building in breasts, 30 cents per lineal yard.

All horizontal breasts driven over 200 ft. to be paid 50 cents per yard extra, up to 300 ft.

Chutes to be driven 12 ft wide at present rates. Gangways to be driven by special contract.

BANKHEAD MINES, LIMITED.**No. 0 Seam.****Main Gangway:**

Special contract.

Counter Gangway:

10 ft. wide inside the timber, and height of seam, \$3.50 per lineal yard, including single timber lagged.

Chutes: (Between Main and Counter Gangways)

10 ft. wide and height of seam, \$3.00 per lineal yard, including timbering, building of chute, brattice, ladder way, and laying of sheet iron.

Angle Chutes:

High rib timbered and lagged, if required, 10 ft. wide and height of seam, \$3.50 per lineal yard, including timbering, building of brattice and chute, and laying sheet iron. The coal to be put into the chute, and slack and refuse to be gobbed behind wing boards, and the coal forked, if required.

Cross Cuts: (Between Angle Chutes)

10 ft. wide inside of timbers, and height of seam, \$3.00 per lineal yard, including single timber lagged. Slack and refuse to be gobbed, if required.

Pillars: (30 ft. wide)

\$5.00 per lineal yard, including timbering, building of chute, and taking up of old chute in breast or angle chute. The coal to be put into the chute, and slack and refuse to be gobbed behind wing boards, the coal to be forked, if required.

The above prices are based on the seam being 3½ ft. thick, if more or less than 3½ ft., to be paid for proportionately, except in gangways.

No. 2 Seam.**Gangway:**

Square sets, 8 ft. collar between notches, 8 ft. and 9 ft. legs, 12 ft. spread, placed 5 ft. centres, lagged top and sides, \$7.00 per lineal yard for coal, including timbering, and 75 cents per foot of thickness per lineal yard for rock, when required to be lifted.

Counter Gangway:

Single timber, lagged, with a section on the low side of at least 3 ft., 10 ft. wide from top of low side section, to inside of timbers, and height of seam. \$5.00 per lineal yard, including single timber lagged. 50 cents per set two pieces lagged; \$1.00 per set three pieces lagged.

Chutes: (Between Main and Counter Gangways)

10 ft. wide, and height of seam, \$5.00 per lineal yard, including building of ladder way, chute, and brattice, and laying of sheet iron.

Angle Chutes:

High rib timbered and lagged, if required. 10

ft. wide and height of seam, \$5.00 per lineal yard, including timbering, building brattice and chute, and laying sheet iron. The coal to be put into the chute, and slack and refuse to be gobbed behind wing boards, and the coal to be forked, if required.

Breasts: (Up the pitch)

20 ft. wide, with airway on each rib, and coal chute and gob. \$5.83 per lineal yard, including timbering, building ladder way, brattice and chute, and laying sheet iron. Coal to be put into the chute, and laying sheet iron. The coal to be wing boards, and the coal to be forked, if required.

Cross Cuts: (Between Angle Chutes or Breasts)

3 ft. section on low side, if required. 8 ft. wide from top of low side section to inside of timbers, and height of seam, \$4.50 per lineal yard, including single timber, lagged.

Pillars: (40 ft. wide)

\$8.67 per lineal yard, including timbering, building of chute, and taking up of old chute in breast. The coal to be put into the chute, and slack and refuse to be gobbed behind wing and the coal to be forked, if required.

Skips:

6 ft. wide, and height of seam, \$2.50 per lineal yard, including timbering.

The above prices are based on the seam being 8 ft. thick, if more or less than 8 ft. to be paid proportionate allowance will be made, and if less than 8 ft., a proportionate deduction will be made except in gangways.

No. 3 Seam.

Gangway:

Single timber lagged, with section on low side, of at least 4 ft. 12 ft. wide from top of low side section, to inside of timbers, and 8 ft. high, \$8.00 per lineal yard, including single timber, lagged. Where square sets are required, 8 ft collar between notches, 8 ft. and 9 ft legs, 12 ft. spread, placed 5 ft centres, lagged top and sides, \$9.00 per lineal yard, including timber and 75 cents per foot of thickness per lineal yard, for rock.

Counter Gangway:

Single timber, lagged, with a section on low side of at least 3 ft. 10 ft. wide from top of low side section to inside of timbers, and 8 ft. height of seam, \$6.00 per lineal yard, including single timber, lagged.

Chutes: (Between Main and Counter Gangways)

10 ft. wide and height of seam, \$5.00 per lineal yard, including building of ladder way, chute, and brattice, and laying sheet iron

Angle Chutes:

High rib timbered and lagged, if required. 10 ft. wide, and height of seam, \$5.00 per lineal yard, including timbering, building brattice, chute, and laying sheet iron. The coal to be put into the chute, and slack and refuse gobbed behind wing boards, and the coal forked, if required.

Breasts: (Up the Pitch)

20 ft. wide, \$5.83 per lineal yard, including timbering, building ladder way, brattice and chute, and laying sheet iron. The coal to be put into the chute, and all slack and refuse gobbed behind wing boards, and the coal forked, if required.

Cross Cuts: (Between Angle Chutes or Breasts)

3 ft. section on low side, if required. 8 ft. wide from top of low side section, to inside of timbers, and height of seam, \$4.50 per lineal yard, including single timber lagged.

Pillars: (40 ft. wide)

\$8.17 per lineal yard, including timbering, building of chute, and taking up of old chute in breast. Coal to be put into the chute, and boards, and coal to be forked, if required.

Skips:

6 ft wide, and height of seam, \$2.50 per lineal yard, including timbering.

The above prices are based on the seam being 8 ft. thick, if more or less than 8 ft. to be paid slack and refuse to be gobbed behind wing for proportionately, except in gangways.

No. 4 Seam.

Main Gangway:

Single timber, lagged, with a section on low side, of at least 4 ft. 12 ft. wide from top of low side section, to inside of timber; \$8.50 per lineal yard for coal, including single timber, lagged. 75 cents per foot of thickness per lineal yard for rock. When square sets are required, 8 ft. collars between notches, 8 ft. and 9 ft. legs, 12 ft. spread, 5 ft. centre to centre lagged top and sides, \$9.50 per lineal yard for coal, including timber, and 75 cents per foot of thickness per lineal yard for rock.

Counter Gangway: (On Upper Bench of Seam)

Single timber lagged, with a section on low side of at least 3 ft. 10 ft. wide from top of low side section to inside of timber, 9 ft. high, lagged.

Chutess (Between Main and Counter Gangways, on Upper Bench of Seam)

10 ft. wide, \$5.00 per lineal yard, including building of ladder way, chute and brattice, and laying of sheet iron.

Breasts: (Up the Pitch on Upper Bench)

20 ft. wide, including timbering, building of chute, brattice, stairway, and laying sheet iron, the coal to be put into the chute, and slack and refuse gobbed behind wing boards, and the coal to be forked, if required. \$6.50 per lineal yard.

Cross Cuts: (Between Breasts, on Upper Bench of Seam)

3 ft. section on low side, if required. 8 ft. wide from top of low side section to inside of timber, and height of bench. \$5.00 per lineal yard, including single timber, lagged.

Pillars: (40 ft. wide, in Upper Bench)

\$10.25 per lineal yard, including timbering, building chute, taking up old chute in breast. Coal to be put into the chute, and slack and refuse gobbed behind the wing boards, and the coal to be forked, if required.

Skips: (Upper Bench)

6 ft. wide, and height of seam, \$2.50 per lineal yard, including timbering.

The above prices are based on the seam being 9 ft. thick, if more or less than 9 ft. to be paid for proportionately, except in gangways.

No. 5 Seam.

Main Gangway:

Single timber lagged, with a section on low side of at least 4 ft. 12 ft. wide from top of low

side section to inside of timber, including single timber lagged \$7.20 per lineal yard for coal, and 75 cents per foot of thickness per lineal yard for rock, when required to be lifted. When square sets are required, 8 ft. collars between notches, 8 ft. and 9 ft. legs, 12 ft. spread, 5 ft. centre to centre, lagged top and sides, \$8.20 per lineal yard. 75 cents per foot of thickness per lineal yard for rock.

Counter Gangway:

Single timber lagged, with section on low side of at least 3 ft. 10 ft. wide from top of low side section to inside of timber, and height of seam, \$6.00 per lineal yard, including single timber lagged.

Chutes: (Between Main and Counter Gangways)

10 ft. wide, \$5.00 per lineal yard, including building of ladder way, chute and brattice, and laying of sheet iron.

Angle Chutes:

High rib timbered and lagged, if required, 10 ft. wide and height of seam, \$5.00 per lineal yard, including timbering, building brattice and chute, and laying of sheet iron. Coal to be put into chute, and slack and refuse gobbed behind wing boards, and the coal to be forked, if required.

Breasts: (Up the Pitch)

20 ft. wide, including timbering, chute, air tight brattice, stairway, laying of sheet iron, and the cap rock; all coal to be forked, if required, and the slack and other refuse to be gobbed behind the wing boards, and the coal to be put into the chute, \$6.50 for the coal and the rock.

Cross Cuts: (Between Angle Chutes or Breasts)

3 ft. section on low side, if required. 8 ft. wide from top of low side section to inside of timber, and the height of the seam, including single timber lagged. \$4.50 per lineal yard.

Pillars: (40 ft. wide)

\$10.67 per lineal yard, including timbering, building of chute, and taking up old chute in breast. The coal to be put into the chute, and slack and refuse to be gobbed behind wing boards, and the coal to be forked, if required.

Skips:

6 ft. wide and height of seam. \$2.50 per lineal yard, including timbering.

The above prices are based on the seam being 8 ft. thick, if more or less than 8 ft. to be paid for proportionately, except in gangways.

No. 6 Seam.

Single timber lagged, with a section on the low side of at least 4 ft. 12 ft. wide from top of low side section to inside of timber, \$8.00 per lineal yard for coal, including single timber lagged, and 75 cents per foot of thickness per lineal yard for rock, where required to be lifted.

Counter Gangway:

Single timber lagged, with a section on low side of at least 3 ft. 10 ft. wide from top of low side section to inside of timber, and 8 ft. height of seam, \$6.00 per lineal yard, including single timber lagged.

Chutes: (Between Main and Counter Gangways)

10 ft. wide and height of seam, \$5.00 per lineal yard, including building of ladder way, chute and brattice, and laying sheet iron. When the chute is built above the bottom of the seam, except for

the first length, 50 cents per yard for the extra work of lifting the coal up into the chute.

Angle Chutes:

High rib timbered and lagged, if required. 10 ft. wide and height of seam, \$5.00 per lineal yard, including timbering, building brattice, chutes, and laying sheet iron. Coal to be put into the chute, slack and refuse to be gobbed behind wing boards, and the coal to be forked, if required.

Breasts: (Up the Pitch)

20 ft. wide, \$6.50 per lineal yard, including timbering, building ladder way, brattice, chute, and laying sheet iron, coal to be put into the chute, the slack and refuse to be gobbed behind wing boards, and the coal to be forked, if required.

Cross Cuts: (Between Angle Chutes or Breasts)

3 ft. section on low side, if required. 8 ft. wide from top of low side section to inside of timber, and height of seam, \$4.50 per lineal yard, including single timber lagged.

Pillars: (40 ft. wide)

\$9.50 per lineal yard, including timbering, building of chute, taking up of old chute in breast. Coal to be put into the chute, slack and refuse gobbed behind wing boards, and the coal to be forked, if required.

Skips:

6 ft. wide, and height of seam, \$2.50 per lineal yard, including timbering.

The above prices are based on the seam being 8 ft. thick, if more or less than 8 ft. to be paid for proportionately, except in gangway.

All Seams.

Pushing and dumping coal over 200 ft., and up to 300 ft., 50 cents per lineal yard.

It is understood that the coal, in all places, is to be mined with the use of as little powder as possible.

Gangways in fault to be driven by special contract, or day work.

Skips Only:

Where coal is shovelled over 25 ft., the Company agrees to furnish a small car, or pay 50 cents per lineal yard extra.

\$2.50 will be paid per bulkhead, if required to be built by the miner.

ALBERTA RAILWAY AND IRRIGATION COMPANY.

All coal to be paid for on screened basis, one ton being considered 2,000 pounds.

Pick Mining:

Pillars and stumps . . .	68	cents per ton.
--------------------------	----	----------------

Machine Mining:

Runners (Rooms)	13½	cents per ton.
Runners (Narrow Work)	19½	cents per ton.
Scrapers (Rooms)	10	cents per ton.
Scrapers (Narrow Work)	14½	cents per ton.
Loaders (Rooms)	52	cents per ton.
Loaders (Narrow Work)	80	cents per ton.
Loaders (Bone coal over 4 ins. thick in entries and rooms), per running yard	48	cents.
Loaders, square booms in entries	20	cents per set.
Loaders, round booms in entries	40	cents per set.

Loaders, room cross cuts, per lineal yard	\$1.55	
Loaders, lifting bottom, per lineal yard for each foot in depth	77	cents.
Loaders laying rails in entries	50	cents per pair.
Loaders cutting through faults, entry width and height per lineal foot ..	80	cents.
Loaders, unweighed coal, entry width and height, per lineal foot	80	cents.
Loaders, room necks, each	\$4.00	
Loaders, entries, where necessary to use dynamite on account of water, the Company to furnish dynamite free, per ton extra	10	cents.
Machine Runners, cutting through faults, entry width and height, per lineal foot	19½	cents.
Machine Runners, unweighed coal, entry width and height, per lineal foot	19½	cents.
Machine Scrapers, cutting through faults, entry width and height, per lineal foot	14½	cents.
Machine Scrapers, unweighed coal, entry width and height, per lineal foot	14½	cents.

Other prices and conditions underground to remain as existing March 31st, 1911.

DIAMOND COAL COMPANY, LIMITED.

All coal to be paid for on screened basis, one ton being considered 2,000 pounds.

<i>Pick Mining:</i>		
Pillars and stumps	68	cents per ton.
<i>Pick Mining:</i>		
Runners (Rooms)	13½	cents per ton.
Runners (Narrow Work)	19½	cents per ton.
Scrapers (Rooms)	10	cents per ton.

Loaders, entries, where necessary to use dynamite on account of water, the Company to furnish dynamite free, per ton extra	10	cents.
Machine Runners, cutting through faults, entry width and height, per lineal foot	19½	cents.

Machine Runners, un-weighed coal, entry width and height, per lineal foot 19½ cents.

Machine Scrapers cutting through faults, entry width and height, per lineal foot 14½ cents.

Machine Scrapers, un-weighed coal, entry width and height, per lineal foot 14½ cents.

Brushing:

Clod or draw slate in entries or rooms, to be paid for at the rate of 5 cents per inch in thickness per lineal yard, when over 5 inches thick. In entries it shall be loaded in cars by the miner, or loader, without extra consideration, and in rooms stored in the gob or loaded out.

CHINOOK COAL COMPANY, LIMITED.

All coal to be paid for on screened basis, one ton being considered 2,000 pounds.

Pick Mining:

Pillars and stumps 68 cents per ton.

Machine Mining:

Runners (Rooms) 13½ cents per ton.
 Runners (Narrow work) 19½ cents per ton.
 Scrapers (Rooms) 10 cents per ton.
 Scrapers (Narrow work) 14½ cents per ton.
 Loaders (Rooms) 52 cents per ton.
 Loaders (Narrow work) 80 cents per ton.
 Loaders (Bone coal over 4 ins. thick in entries and rooms) per running yard 43 cents.
 Loaders, square booms in entries 20 cents per set.
 Loaders, round booms in entries 40 cents per set.
 Loaders, room cross cuts, per lineal yard \$1.55
 Loaders, lifting bottom, per lineal yard for each foot in depth 77 cents.
 Loaders, laying rails in entries 50 cents per pair.
 Loaders, cutting through faults, entry width and height, per lineal foot 80 cents.
 Loaders, unweighed coal, entry width and height, per lineal foot 80 cents.
 Loaders, room necks, each \$4.00
 Loaders, entries, where necessary to use dynamite on account of water, the Company to furnish dynamite free, per ton extra 10 cents.
 Machine Runners, cutting through faults, entry width and height, per lineal foot 19½ cents.
 Machine Runners, un-weighed coal, entry width and height, per lineal foot 19½ cents.
 Machine Scrapers, cutting through faults,

entry width and height, per lineal foot 14½ cents.

Machine Scrapers, un-weighed coal, entry width and height, per lineal foot 14½ cents.

Brushing:

Clod or draw slate in entries or rooms to be paid at the rate of 6 cents per inch for all clod or slate in excess of 5 inches.

THE CANADA WEST COAL COMPANY, LIMITED.

All coal to be paid for on run-of-mine basis, one ton being 2,240 lbs.

Loading to include shooting, loading of coal putting up props, and laying of track in rooms.

Machine work to be divided between machine

Machine Runner 4/7.
 Scraper 3/7.

Pick Mining:

Pillars in machine rooms, per ton 80 cents.

Pillars of 12 ft. up to 20 ft., per ton 90 cents.

Rooms Under Top Coal:

Cutting 25 cents per ton, and 30 cents per lineal yard in rooms up to 20 ft., over 20 ft. yardage to be paid in proportion.

Loading 50 cents per ton.

Rooms Taking Down All Coal:

Cutting 25 cents per ton.

Loading 50 cents per ton.

Entries and Narrow Work, Under Top Coal:

Cutting 25 cents per ton, and 50 cents per lineal yard.

Loading 50 cents per ton, and \$1.00 per lineal yard

Entries and Narrow Work, Taking Down all Coal:

Loading 25 cents per ton, and 40 cents per lineal yard.

Loading 50 cents per ton, and \$1.00 per lineal yard.

Brushing in Entries:

8 cents per inch per lineal yard if put in cars stowed in cross cuts without loading in cars.

10 cents per inch per lineal yard if put in c moved away, and stowed.

Room necks and widening out rooms, yards narrow work This applies to both c ters and loaders.

Timbering:

Flat booms, per set 20 cents.

Round booms, in centries, per set 50 cents.

Clod Scale:

Clod in entries, where there is no brushing d by miner; loading and stowing, 10 cents per i per lineal yard.

Loading, Company taking away dirt, six c per inch per lineal yard.

Stowing over one hundred yards from work face, to be paid extra.

Miners to furnish explosives.

The clod to be removed by the miner for notl for the first four inches; for five inches 1 cents per lineal yard, and 5 cents for each additi inch.

Rooms ordered to exceed sixteen feet to be extra in proportion.

THE INTERNATIONAL COAL AND COKE COMPANY, LIMITED.

No. 2 Seam.

Mining Rate: (Except in pillars)

To be 55 cents per gross ton.

Pillars to be 48 cents per gross ton.

Yardage:

Levels to be 10 ft. wide, 7 ft. high on the low side, and thickness of coal on upper side, \$1.75 per lineal yard.

Parallel airway to be 6 ft. x 10 ft. \$1.75 per lineal yard.

Crosscuts between levels 6 ft. x 8 ft. \$1.50 per lineal yard.

Room crosscuts to be not less than 8 ft. x 8 ft., not to be driven more than 25 ft. from one side. No tracks. \$1.00 per lineal yard.

Timbering:

Entry timber; maximum to be 12 in. in diameter at butt, and 14 ft. in length. \$2.00 per set, with lagging.

Room timber; maximum to be 10 in. in diameter at butt, and 16 ft. in length, \$1.00 per set. If required to set timber of larger dimensions, to be paid for in proportion, or be set by the Company.

Props:

All props, exclusive of those used to set brattice, or chutes, 5 cents per lineal foot.

Tracklaying:

All tracks to be laid by the Company, except a pair of temporary rails to the face, which should be laid by the miner, without charge.

Chutes:

30 cents per lineal yard, 5 planks, 2 in. x 12 in., 2 posts every 8 ft., with cross pieces. This includes sheet iron.

Brattice:

5 cents per lineal yard for each foot in height.

Brushing:

6 ft. wide, 5 cents per inch per lineal yard; 12 ft. wide, 10 cents per inch per lineal yard.

No. 4 Seam.

(No Powder.)

Mining Rate: (Except in pillars)

To be 50 cents per gross ton.

Pillars to be 43 cents per gross ton.

Yardage:

Levels not less than 12 ft. wide, by thickness of seam, \$1.00 per lineal yard.

Parallels; thickness of seam not less than 10 ft. wide, \$1.00 per lineal yard.

Crosscuts (Between levels). Thickness of seam, not less than 8 ft. wide, \$1.00 per lineal yard.

Crosscuts (Between rooms). Thickness of seam, not less than 8 ft. wide, not to be driven more than 25 ft. from one side, \$1.00 per lineal yard.

Timbering:

Same as No. 2 Seam.

Props:

Same as No. 2 Seam.

Tracklaying:

Same as No. 2 Seam.

Chutes:

Same as No. 2 Seam.

Brattice:

Same as No. 2 Seam.

Brushing:

Same as No. 2 Seam.

McGILLIVRAY CREEK COAL AND COKE COMPANY, LIMITED.

No. 2 Seam.

Mining Rate: (Except in pillars)

To be 55 cents per gross ton.

Pillars to be 48 cents per gross ton.

Yardage:

Main entries 10 ft. wide by 7 ft. high on low side, and thickness of coal on upper side, price \$1.75 per lineal yard. Coal from main entry 55 cents per gross ton.

Counter Entries:

To be 6 ft. x 10 ft. Price \$1.75 per lineal yard, coal from counter entries 55 cents per gross ton.

Chutes:

Between entries 6 ft. x 8 ft. \$1.50 per lineal yard, coal from chutes 55 cents per gross ton.

Room Crosscuts:

To be not less than 8 ft. x 8 ft., not to be driven more than 25 ft. from one side, no track, \$1.00 per lineal yard.

Timbering:

Entry timber, maximum to be 12 in. in diameter at butt, and 14 ft. in length, \$2.00 per set, with lagging.

Room Timber:

Maximum to be 10 in. in diameter at butt, and 16 ft. in length, \$1.00 per set. If required to set timber of larger dimensions, to be paid for in proportion, or be set by the Company.

Props:

All props, exclusive of those used to set brattice, or chutes, 5 cents per lineal foot.

Tracklaying:

All tracks to be laid by the Company, except a pair of temporary rails to the face, which shall be laid by the miner without charge.

Chutes:

30 cents per lineal yard. Five planks 2 in. x 12 in., 2 posts every 8 ft. with cross pieces, including sheet iron.

Brushing:

6 ft. wide, 5 cents per inch per lineal yard, 12 ft. wide, 10 cents per inch per lineal yard. Brushing is either rock which overlies or underlies coal seam.

Brattice:

5 cents per lineal yard for each foot in height.

THE WEST CANADIAN COLLIERIES, LIMITED. (Blairmore South Mine.)

No. 2 Seam.

Gangway:

8 ft. collar, 11 ft. spread, 7 ft. clear above rail, \$11.00 per lineal yard, including all timbering, track laying, ditching, and handling coal and rock.

Raises:

6 ft. x 10 ft., including chute and battery, \$4.20 per lineal yard, rate to be proportional with thickness.

Counter Gangway and Crosscuts:

6 ft. x 6 ft., \$3.00 per lineal yard.

Breasts and Angles:

To be driven 12 ft. to 15 ft. wide, including bratticing and timbering, 45 cents per cubic yard.

Pillars, including Timbering:

35 cents per cubic yard.

Chute Building, including Laying of Sheet Iron:

30 cents per lineal yard; if air tight brattice, 30 cents per lineal yard in addition.

(Bellevue Mine.)

No. 1 Seam.

Gangway:

To be driven 11 ft. collar, 14 ft. spread, 7 ft. clear above rail, \$14.00 per lineal yard, including all timbering, track laying, and handling of coal and rock. Rate to be proportional to length of collar, down to 8 ft.

Chutes:

To be driven 7 ft. x 10 ft., including building chutes, \$5.50 per lineal yard, first length of chute and battery, \$5.00 if not built by Company.

Counter Gangway:

To be driven 6 ft. x 6 ft. from outside and by car, \$3.50 per lineal yard, including all timbering, tracklaying, bratticing, and handling of coal and rock.

Crosscuts:

To be driven 6 ft. x 6 ft. both sides, \$3.00 per lineal yard.

Breasts: (Up the Pitch)

To be driven 10 ft. x 20 ft., including timbering, chute and air tight brattice, \$11.10 per lineal yard. Breasts of greater or less dimensions, to be paid for in proportion down to a width of 13½ feet.

Pillars:

43 cents per cubic yard, including setting of five rows of props, where necessary.

Breasts: (Across the Pitch)

To be run 10 ft. x 20 ft., including hauling coal, bratticing, and laying track, and timbering, \$12.00 per lineal yard, three piece sets, if required, \$1.00 per set. All horizontal breasts driven over 200 ft. to be paid \$1.00 per yard extra, up to 300 ft. Breasts of greater or less dimensions to be paid for in proportion down to a width of 13½ feet.

(Bellevue Mine.)

No. 2 Seam.

Gangway:

To be driven 11 ft. collar, 14 ft. spread, 7 ft. clear above rail, \$14.00 per lineal yard, including all timbering, track laying, and handling of coal and rock. Rate to be proportional to length of collar, down to 8 ft.

Chutes:

To be driven 7 ft. x 10 ft., including building chutes, \$5.50 per lineal yard, first length of chute and battery \$5.00 if not built by Company.

Counter Gangway:

To be driven 6 ft. x 6 ft. from outside end by car, \$3.50 per lineal yard, including all timbering, track laying, bratticing, and handling of coal and rock.

Crosscuts:

To be driven 6 ft. x 6 ft. both sides, \$3.00 per lineal yard.

Breasts: (Up the Pitch)

To be driven 10 ft. x 20 ft., including timber-

ing, chute and air tight brattice, \$11.10 per lineal yard. Breasts of greater or less dimensions, to be paid for in proportion, down to a width of 13½ feet.

Pillars:

43 cents per cubic yard, including setting of five rows of props, where necessary.

Breasts: (Across the Pitch)

To be run 10 ft. x 20 ft., including hauling coal bratticing, and laying track, and timbering, \$12.00 per lineal yard, three piece sets if required, \$1.00 per set. All horizontal breasts driven over 200 ft. to be paid \$1.00 per yard extra up to 300 ft. Breasts of greater or less dimensions to be paid for in proportion down to a width of 13½ feet.

(Bellevue Mine.)

No. 4 Seam.

Gangway:

To be driven 8 ft. collar, 12 ft. spread, 7 ft. clear above rail, \$11.00 per lineal yard. Rock in centre \$1.25 per lineal yard.

Counter Gangway:

To be driven 6 ft. x 6 ft., \$3.50 per lineal yard.

Chutes:

To be driven 7 ft. x 10 ft., \$5.50 per lineal yard.

Breasts:

To be driven 5 ft. x 20 ft., \$6.00 per lineal yard.

If seam is less than 5 ft. to be paid \$1.00 less for each foot in reduction, and to increase at the rate of \$1.00 per lineal yard per foot in thickness.

Crosscuts:

To be driven 6 ft. x 6 ft., \$3.00 per lineal yard.

Pillars:

45 cents per cubic yard, including setting of five rows of props, where necessary.

(Lille Mine.)

No. 1 Seam.

Gangway:

To be driven by special contract.

Breasts: (Up the Pitch)

Including board brattice, built air tight from floor to roof, and chute building, with laying sheet iron, 63 cents per cubic yard.

Breasts: (Across the Pitch)

Including handling coal, laying track, building brattice, and timbering, 60 cents per cubic yard.

Pillars: (Across the Pitch)

50 cents per cubic yard, including timbering and handling of coal and rock.

Crosscuts between Rooms:

10 ft. wide, 70 cents per cubic yard.

(Lille Mine.)

No. 2 Seam.

Gangway:

To be driven 8 ft. collar, 11 ft. spread, 7 ft. clear above rail, including timbering, \$10.00 per lineal yard.

Counter Gangway:

To be driven 6 ft. x 6 ft. from outside end by car, \$3.00 per lineal yard.

Raises:

To be driven 6 ft. x 6 ft., including timbering, chute and air tight brattice, \$3.00 per lineal yard.

Breasts: (Up the Pitch)

Including timbering, chute building, and brattice, 50 cents per cubic yard.

Room Crosscuts:

6 ft. x 6 ft., \$3.00 per lineal yard.

All Seams:

In case the Company wishes to pay on basis of cubical contents, the rate paid shall be according to existing basis of measurements and prices.

**THE CANADIAN COAL CONSOLIDATED,
LIMITED.**

(Old Mine.)

Main Gangway:

Entry shall be driven 10 ft wide x 7 ft. high, in the clear, inside the timber, and be securely timbered with sets, not exceeding 5 ft. centres, ditch to be carried on one side, to be paid for at the rate of \$11.00 per lineal yard. To include also the laying of ties and short length rails.

Parallel Airways

Shall be driven 7 ft. x 8 ft., timbered with sets 3 pieces, 5 ft. centres, to be paid for at the rate of per lineal yard.

Crosscuts:

Crosscuts or angles shall be driven 4 ft. x 4 ft., untimbered, and to be paid for at the rate of \$2.00 per lineal yard.

Breasts:

Breasts 9 ft. x 10 ft. square, including timber and chute building. Timber; two props with cap pieces, 3½ ft. from each rib, and 8 ft. centres up the pitch. Chute; sides two plank high on each row of props; bottom; two planks and sheet iron, to be paid for at the rate of \$5.50 per lineal yard.

Angle Chute:

6 ft. x 10 ft., to be paid for at the rate of cents per lineal yard, when timbered with three piece set per set. Yardage per lineal yard.

Rib Chute:

9 ft. x 6 ft., including partition and lining. Ladders and timber chutes to be built by the Company, to be paid for at the rate of \$9.00 per lineal yard.

Pillars:

All pillars to be paid for at the rate of 43 cents per cubic yard, including props at 9 ft. centres.

(Shaft Mine.)

Gangways:

Entry shall be driven 10 ft. wide by 7 ft. high in the clear, inside the timber, and be securely timbered with sets, not exceeding 5 ft. centres, ditch to be carried on one side, to be paid for at the rate of per lineal yard. To include also the laying of ties and short length rails.

Parallel Airway:

8 ft. high in the clear, 8 ft. wide, 6 in. collar, and 6 in. leg on high side, 5 ft. centres, lagged on top per lineal yard.

Wall Step Breasts:

45 cents per cubic yard. The distance between sets of timbers 5 ft. from centre of the square, timbers to be set in pick holes dug in the roof, the diameter of the timbers to be 8 in. minimum.

Sets or Angles:

7 ft. x 8 ft. without timber cents per cubic yard, when timbered with props, 5 cents per foot. Yardage per lineal yard.

Crosscuts or Raises:

4 ft. x 4 ft. untimbered, \$2.00 per lineal yard.

Pillars:

43 cents per cubic yard, including props at 9 ft. centres.

All extra props set by the contract miner, to be paid for at the rate of 5 cents per lineal foot; by extra timber is meant all timber set by the contract miner in excess of the number specified in the schedule for that particular class of work in which he is engaged.

**THE HILLCREST COAL AND COKE COMPANY,
LIMITED.**

Mining rate, except in pillars, to be 50 cents per gross ton.

Mining rate in pillars to be 40 cents per gross ton.

Yardage:

Levels to be 10 ft. wide, 7 ft. high on low side, and thickness of coal on upper side. \$1.75 per lineal yard.

Parallel Airways:

To be 6 ft. x 10 ft., \$1.75 per lineal yard.

Crosscut: (Between levels)

To be 6 ft x 8 ft., \$1.50 per lineal yard.

Room Crosscuts:

To be not less than 8 ft. x 8 ft., not to be driven more than 25 ft. from one side, no tracks, \$1.00 per lineal yard.

Timbering:

Room timber, maximum to be 10 in. in diameter at butt, and 16 ft. in length, \$1.00 per set. If required to set timbers of larger dimensions, to be paid for in proportion, or be set by the Company.

Entry Timber:

Maximum to be 12 in. in diameter at butt, and 14 ft. in length, \$2.00 per set, with lagging. If required to set timber of larger dimensions, to be paid for in proportion, or be set by the Company.

Props:

All props, exclusive of those used to set brattice, or chute, 5 cents per lineal foot. In pillars, 4 cents per lineal foot.

Tracklaying:

All tracks to be laid by the Company, except a pair of temporary rails to the face, which shall be laid by the miners without charge.

Chutes:

30 cents per lineal yard, 5 planks, 2 in. x 12 in., 2 posts every 8 in., with cross pieces. This includes sheet iron.

Brattice:

5 cents per lineal yard for each foot in height.

Brushing:

6 ft. wide, 5 cents per inch per lineal yard; 12 ft. wide, 10 cents per inch per lineal yard.

The above prices are based upon the present method of working.

MAPLE LEAF COAL COMPANY, LIMITED

No. 1 Seam.

Mining Rate:

All work, except pillar work, to be 50 cents per cubic yd.

Pillars:

..... cents per cubic yard.

Yardage:

Levels to be 10 ft. wide, 7 ft. high on low side, and thickness of coal on upper side, \$1.75 per lineal yard.

Parallel Airways:

To be 6 ft. x 10 ft., \$1.75 per lineal yard.

Crosscuts: (Between Levels)

To be 6 ft. x 8 ft., \$1.50 per lineal yard.

Room Crosscuts:

To be not less than 8 ft. x 8 ft., not to be driven more than 25 ft. from one side, no tracks, \$1.00 per lineal yard.

Timbering:

Room timber; maximum to be 10 in. in diameter at butt, and 16 ft. in length, \$1.00 per set. If required to set timbers of larger dimensions, to be paid for in proportion, or be set by the Company.

Entry Timber:

Maximum to be 12 in. in diameter at butt, and 14 ft. in length, \$2.00 per set, with lagging; if required to set timbers of larger dimensions, to be paid for in proportion, or be set by the Company.

Props:

All props, exclusive of those used to set brattice or chutes, 5 cents per lineal foot.

Tracklaying:

All tracks to be laid by the Company, except a pair of temporary rails to the face, which shall be laid by the miner without charge.

Chutes:

30 cents per lineal yard, 5 planks, 2 in. x 12 in., 2 posts every 8 ft., with cross pieces. This includes sheet iron.

Brattice:

5 cents per lineal yard for each foot in height.

Brushing:

6 ft. wide, 5 cents per inch per lineal yard; 12 ft. wide, 10 cents per inch per lineal yard.

No. 3 Seam.**Mining Rate:**

Except in pillars, 50 cents per gross ton.

Pillars:

..... cents per cubic yard.

Entry:

To be driven thickness of seam (7) seven feet clear of the rails \$1.75 per lineal yard in addition to tonnage.

Tracklaying:

All tracks to be laid by the Company, except a pair of temporary rails to the face, which shall be laid by the miner, without charge.

Timber:

Not more than 12 in. in diameter, \$2.00 per set.

Counter Entry:

To be driven thickness of seam (6) six feet clear of the rails, \$1.75 per yard, in addition to tonnage.

Timber:

Not more than 8 in. in diameter, \$1.00 per set.

Upper Entry:

Same as entry, except timber not more than 8 in. diameter, 3 piece set \$1.50, 2 piece set \$1.00, heavier timber to be same as lower entry.

Crosscuts between Entries:

To be driven thickness of seam, eight (8) feet wide, \$1.50 per yard in addition to tonnage.

Every sixth to be ten feet wide, yardage same as battery and first length of chute \$5.00.

Rooms or Breasts:

To be driven up the pitch, not less than 12 wide, not more than one man in a room in one shift. Timber; same as No. 1 Seam.

Room Crosscuts:

To be driven from each side 6 ft. x 8 ft., a not more than 25 ft. from one side, \$1.00 per yard in addition to tonnage.

Chute Building:

Or building brattice to roof Props 8 ft. apart Same as No. 1 seam Chute Building.

Stairway:

Per yard 20 cents.

Brushing:

6 ft. wide, 5 cents per inch per lineal yard
12 ft. wide, 10 cents per inch per lineal yard

THE LEITCH COLLIERIES, LIMITED.

(North Mine No. 2 Seam.)

Gangways:

7 ft. 4 in. collar between the notches, 8 ft. level, 11 ft. spread, 7 ft. high from the rail, including laying of track, digging ditch, timbering and lagging \$10.00 per lineal yard. 75 cents per inch of thickness per lineal yard for rock when required to be lifted.

Counter Gangways:

6 ft. x 6 ft. \$3.50 per yard.

Chutes: (Between Main and Counter Gangways)

6 ft. x 6 ft. \$3.00 per yard.

Crosscuts:

6 ft. x 6 ft. level. \$3.50 per yard.

6 ft. x 6 ft. angle \$3.00 per yard.

4 ft. x 4 ft. level. \$2.00 per yard.

Breasts: (Across the Pitch)

To be driven 16 ft. wide, 12 ft. high, measuring height from foot wall to roof, measuring width from low side rib to high side rib.

Allowing 6 ft. width for track, measuring width from foot wall to low side rib.

Including timbering, laying track, handling of brattice, building, dirt to be picked and left to the gob.

To be paid at the rate of \$11.52 per lineal yard. Breasts of greater or smaller dimension to be paid in full proportion.

Breasts: (Up the Pitch or Angle)

As per present practice, per cubic yard, cents.

Pillars:

Including timbering from across the pitch width per cubic yard, 50 cents.

Including timbering from up the pitch width per cubic yard, 43 cents.

(South Mine, No. 1 Seam.)**Gangway:**

7 ft. 4 in. collars between notches 8 ft. level, 11 ft. spread, 7 ft. high from rail, including laying of track, digging ditch, timbering, lagging rock work \$13.00.

Counter Gangway:

6 ft. x 6 ft. or thickness of seam, per lineal yard \$350.

Chutes:

6 ft. by 6 ft. or thickness of seam, per lineal yard \$3.00.

Angle Chutes and Cross Angles:

14 ft. by thickness of seam \$4.15. Wide

narrower angles to be paid in proportion down to 12 ft.

Wages:
Including timbering, per cubic yard, 45 cents.
avenport Coal Company:

No. 2 Seam.

angway: (10 ft. wide x 7 ft. high)

\$10.00 per lineal yard, including loading and mining coal and rock, setting posts with lagging on the high side, and laying track.

aises: (10 ft. wide)

\$3.50 per lineal yard on a basis of forty-eight square feet area of face. \$5.00 for bulkhead and first length of chute, when not put in by Company.

unter: (12 ft. wide)

\$4.50 per lineal yard. Price includes putting posts with lagging on high side of the place.

reasts: (Up the pitch)

50 cents per cubic yard, plus 2½ cents for timber Building chutes 30 cents per lineal yard.

crosscuts:

Prices as in breasts, plus \$1.00 per yard for narrow work.

Wages:
43 cents per cubic yard, plus 2½ cents for timber.

No. 5 Seam.

angway:

50 cents per cubic yard for mining coal. Yardage, \$1.75 per lineal yard. \$2.00 per set for timbers with lagging. 5 cents per inch per lineal yard for brushing.

aises:
As in No. 2 Mine, plus \$1.00 per set for timber. Bridge sets are counted as two sets of timber.

unter:
Same as in No. 2 Mine, plus \$1.00 per set for timber.

THE CROW'S NEST PASS COAL COMPANY, LIMITED.

(Coal Creek Colliery.)

Old No. 1 Mine.

ing Rate:
55 cents per gross ton.

Yardage:
Levels and Parallels, \$1.00 per lineal yard.
Crosscuts between levels, \$1.00 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

New No. 1 Mine.

ing Rate:
55 cents per gross ton.

Yardage:
Levels and Parallels, \$1.00 per lineal yard.
Crosscuts between levels, \$1.00 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

No. 1 Mine East.

ing Rate:
55 cents per gross ton.

Yardage:
Levels and Parallels, \$1.00 per lineal yard.
Crosscuts between levels, \$1.00 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

No. 1 Mine North. (Upper Bench.)

Mining Rate:
60 cents per gross ton.

Yardage:
Levels and Parallels, \$1.50 per lineal yard.
Crosscuts between levels, \$1.50 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

(Lower Bench.)

Mining Rate:
55 cents per gross ton.

Yardage:
Levels and Parallels, \$1.00 per lineal yard.
Crosscuts between levels, \$1.00 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

Provided that should the coal in the top bench merge with that in the lower, the rates now placed on the "Lower Bench" shall govern.

No. 1 Mine South.

Mining Rate:
55 cents per gross ton.

Yardage:
Levels and Parallels, \$1.00 per lineal yard.
Crosscuts between levels, \$1.00 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

Provided that the above mining rate shall include the mining out and casting back of band of slate, and that two months after resumption of work a longwall rate shall be fixed by the Commissioner of the Western Coal Operators' Association, and the President of District No. 18, United Mine Workers of America.

No. 2 Mine.

Mining Rate:
60 cents per gross ton.

Yardage:
Levels and Parallels, \$1.50 per lineal yard.
Crosscuts between levels, \$1.50 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.
Provided that two months after resumption of work a longwall rate shall be fixed by the Commissioner of the Western Coal Operators' Association and the President of District No. 18, United Mine Workers of America.

No. 3 Mine.

(No. 3 Slope, and all workings on the north side of the slope.)

Mining Rate:
Pillar and stall system, 60 cents per gross ton.
Longwall system, 60 cents per gross ton

Yardage:
Levels and Parallels, \$2.00 per lineal yard.
Crosscuts between levels, \$2.00 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

In Longwall work, the Company guarantee to keep the brushing up to within 4 ft. 6 in. of the face, and when a man failing to do so, through the Company, is put to any inconvenience, he shall have the privilege of brushing his own place on Company work, the Company to find the necessary tools.

If, at any time, the conditions become such that the miner can lift six or eight inches of bottom with the pick, without seriously affecting his work

as a coal producer, he shall be given the privilege of doing so, when required by the Company.

No. 5 Mine.

Mining Rate:

60 cents per gross ton.

Yardage:

Levels and Parallels, \$1.50 per lineal yard.
Crosscuts between levels, \$1.50 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

No. 9 Mine.

Mining Rate:

Pillar and stall system, 62½ cents per gross ton.
Longwall system, 52½ cents per gross ton.

Yardage:

Levels and Parallels, \$1.50 per lineal yard.
Crosscuts between levels, \$1.50 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

Clod:

When the Company requires the miner to take down the clod overlying the coal, they shall pay him for doing the same, including stowing, one-half cent per inch in thickness, per foot in width, per lineal yard, measurement to be taken weekly in the middle of the working place.

Brushing:

Bottom brushing to be done by the Company.

All Seams.

System of Working:

Whenever any new system is inaugurated, or radical change in the present system is made in any mine, where there is a contract price fixed thereon, the Company or the employees may ask for a price to be fixed on the work as "New Work," as, for example, a change from "Longwall" to "Pillar and Stall," or vice versa, shall be considered "New Work."

Pillar Extraction:

When pillars are extracted, the price shall be 5 cents per gross ton less, in all seams, than is paid for solid coal mining.

Michel Colliery.

No. 3 Mine.

Mining Rate:

57¼ cents per gross ton.

Yardage:

Levels and Parallels, \$1.75 per lineal yard.
Crosscuts between levels, \$1.75 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

New No. 3 Mine.

Mining Rate:

57¼ cents per gross ton.

Yardage:

Levels and Parallels, \$1.75 per lineal yard.
Crosscuts between levels \$1.75 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

No. 4 Mine.

Mining Rate:

55 cents per gross ton.

Yardage:

Levels and Parallels, \$2.00 per lineal yard.
Crosscuts between levels, \$2.00 per lineal yard.
Room crosscuts, no tracks, 50 cents per lineal yard.

No. 5 Mine.

Mining Rate:

60 cents per gross ton.

Yardage:

Levels and Parallels, 10½ ft. wide, \$2.40 per lineal yard. Levels and Parallels, 13½ ft. wide, \$2.00 per lineal yard. Room crosscuts, no tracks, 50 cents per lineal yard.

No. 7 Mine.

Mining Rate:

60 cents per gross ton.

Yardage:

Levels and Parallels, 10½ ft. wide, \$2.40 per lineal yard. Levels and Parallels, 13½ ft. wide, \$2.00 per lineal yard. Room crosscuts, no tracks, 50 cents per lineal yard.

No. 8 Mine.

Mining Rate:

55 cents per gross ton.

Yardage:

Levels and Parallels, \$1.00 per lineal yard. Crosscuts between levels, \$1.00 per lineal yard. Room crosscuts, no tracks, 50 cents per lineal yard.

It is agreed that the thickness of coal to be taken out in rooms and pillars shall be 12 ft.

All Seams.

System of Working:

Whenever any new system is inaugurated, or radical change in the present system is made, in any mine, where there is a contract price fixed thereon, the company or the employees may ask for a price to be fixed on the work as "New Work"; as, for example, a change from "Longwall" to "Pillar and Stall" or vice versa, shall be considered "New Work."

Pillar Extraction:

When pillars are extracted, the price shall be five (5) cents per gross ton less, in all seams, than is paid for solid coal mining.

Cogs:

When the Company requires the miner to set cogs the cogs shall be properly filled with rock, provide there is rock handy, which only requires to be moved once, and shall pay for the same at the rate of seventeen (17) cents per foot of height per cog 3 feet square, and twenty-two (22) cent per foot of height per cog four feet square. The Company shall set all cogs larger than 4 feet square with Company men.

Posts:

When posts measuring ten feet or more in length are required to be set, the Company shall pay thirty-three and one-third (33 1-3) cents per post. Posts in pillar work in No. 8 Mine Michigan shall be paid for as at present, thirty-three and one-third (33 1-3) cents per post.

Bridge Sticks:

When the Company requires the miner to set bridge sticks they will pay \$2.00 per bridge stick.

Tracklaying:

Tracks with 16 lb. rails shall be laid by mine in levels and parallels, and in rooms and inclines shall be laid by miners after one length of rail from frog and switch is laid by Company. Rooms at rate of thirty cents per lineal yard for double tracks will be paid for all track laid by miners.

Timbering:

\$1.00 per set, with lagging and centre post.

when required by the Company; \$2.00 per set for heavy timbers used in partings. Room timbers shall not be over 8 in. in diameter. Levels, inclines, and slope timbers shall not be over 12 in. in diameter. Anything above that size shall be considered "heavy timbers" and paid for at the rate of \$1.50 per set.

Chutes:

The Company will build the first section of chutes, miners shall build thereafter, and shall be paid at the rate of thirty (30) cents per lineal yard for all chutes built. The Company shall deliver all material to foot of chutes.

Bushing:

Five-sixths cents per foot in width per inch in depth per lineal yard.

McGintys:

For each time the McGinty is moved, and properly set, the Company will pay \$3.00; \$1.50 for each time the jig or smaller McGinty is moved and properly set; and \$5.00 each time the Bullwheel is moved and properly set. The maximum distance that any of these shall be moved at these figures is 12 feet. The Company reserves to itself the right to move the Bull-wheel with labour other than that of the contract miners.

Filling Water:

The Company will pay thirty-five (35) cents per tank for filling water.

THE HOSMER MINES, LIMITED.

No. 2 Seam.

Gangway:

8 ft. collar between notches, 11 ft. clear spread, 8 ft. and 9 ft. legs, timber not to exceed 14 in., lagged top and sides, timbers 5 ft. from centre to centre. Mining and loading coal, rock to be loaded separately, including temporary track and ditch, \$11.10 per lineal yard.

Counter Gangway:

7 ft. collar between notches, 11 ft. clear spread, 7 ft. and 8 ft. legs, timber not to exceed 12 in., lagged top and sides, timbers 5 ft. from centre to centre. Mining, loading, handling, and dumping coal into chutes, including track laying, rock to be separated and stowed. \$9.55 per lineal yard.

Chutes:

10 ft. collars between notches, 10 ft. sill between notches, three 7 ft. posts, lagged top and sides, timbers 5 ft. from centre to centre. Mining coal and putting into chute, building of chute, stairway, and air tight brattice. Company to furnish cutting machine, for the purpose of shearing the coal, to be operated by the miner. \$9.70 per lineal yard.

Breasts:

12 ft. collar and sill, three 9 ft. posts, lagged top and sides, timbers 5 ft. from centre to centre. Mining, loading, handling, and dumping coal into chutes, including track laying, and brattice. Rock to be separated and stowed. \$11.00 per lineal yard.

Where the coal is abnormally hard, the Company to furnish, when practicable, a cutting machine for the purpose of shearing the coal, to be operated by the miner.

Level:

Where powder is used, the men to furnish their own powder.

The above prices are based on the seam being 12 ft. thick, if more or less than 12 ft., to be paid for proportionately.

CORBIN COAL AND COKE COMPANY, LIMITED.

In Entries:

Collars 14 ft. between notches, posts 9 ft. high, 17 ft. clear spread at bottom, timbers not to exceed 20 in. in diameter, or square at butt. For any additional size add 50 cents per set for each inch in excess of 20 in.

Price: Tonnage per yard \$13.20; timbers 7 ft. centres, \$7.00 per set; yardage per yard \$1.75; forepoles, where necessary, 25 cents each.

B. Tunnel:

Collars 10 ft. between notches, posts 8 ft. high, 12½ ft. clear spread at bottom, timbers not to exceed 15 in. in diameter at butt, placed 4 ft. centres.

Tonnage per yard \$7.95; yardage \$1.75; timbers \$3.00 per set; forepoles, where necessary, 20 cents each, and 5 cents per cubic yard for each additional 100 ft. after 200 ft. from nearest chute where coal is dumped.

Main Raises:

Main raises to be paid for at day pay of \$3.30 per day, and a bonus of \$7.00 per yard for each yard in excess of an average of one yard per shift for two men; timbering, chutes and ladders to be placed as heretofore, suitable pulley and rope to be provided for each raise for hoisting timber.

Rooms: (Across the Pitch)

Caps 13 ft. between notches, posts 10 ft. high with 16 ft. clear spread at bottom, additional posts in centre, where required.

\$11.00 per yard, timbers \$2.00 per set, including necessary fore-poling. Timbers not to exceed 12 in. in diameter at butt.

If rooms are driven more than 200 ft. from chute where coal is dumped, an extra five cents per cubic yard of coal will be paid for each 100 ft. in excess of 200 ft.

Rooms: (Across the Pitch)

Caps 9 ft. over all, posts 9 ft. high with 12 ft. spread over all at bottom. Coal breaking and tramming, \$8.25 per lineal yard. Yardage \$1.50 per lineal yard. Timbers \$2.00 per set. Fore-poles, 20 cents each.

Rooms: (Wall to Wall)

Caps 12 ft. over all, posts 9 ft. high, 15 ft. spread over all at the bottom. Coal breaking and tramming \$10.60 per lineal yard. Timbers \$2.00 per set; fore-poles 20 cents each; tracks 15 cents per lineal yard of tracks laid.

Raises between Rooms and Levels:

5 ft. x 5 ft. in coal. \$3.25 per lineal yard, and 5 cents per foot for posts, or \$1.00 per set for timbers necessary, timbers not to exceed 8 in. in diameter.

All timbers to be framed by the Company, excepting in 13 ft. rooms across the pitch, which are to be framed by the miner. All timbers delivered at the face of main entry and B. tunnel; for raises, to be delivered by the Company at the nearest crosscut, and for rooms at the mouth of each room.

Tracks in B. Tunnel to be laid by the miner free of cost. Tracks in rooms across the pitch to be laid by the miner, for which the Company will pay 15 cents per yard. Track in main entry to be laid by the Company, excepting short lengths next to the face, which will be laid by the miner free of charge.

In abnormal conditions arising, such as rock work, or runs of coal, to be paid for by day's pay or special contract, until normal conditions prevail.

Posts:

When the Company needs extra posts (not specified) set, they shall pay the miner 5 cents per foot, or Company work for same.

Bridge Sticks:

When the Company requires the miner to set bridge sticks, they shall be paid Company work for same.

Local Conditions.**THE CANMORE COAL COMPANY, LIMITED.**

Mine run coal, \$2.50 per ton.

Screened coal, \$3.00 per ton.

Dynamite, 20c per lb.

Monobel, 30c per lb.

Water, outside tap, per house using, \$1.00 per month.

Fuse, caps and other supplies at present rates.

THE BANKHEAD MINES, LIMITED.**Penalty for Loading Impurities:**

The miners are to deliver their coal as free from rock or other impurities as it is practicable, and in case of a miner failing to do so he shall be warned for the first offence, for the second offence, or aggravated cases, he may be discharged.

Supplies, etc.:

The Company will deliver coal to their employees, residing at Bankhead, at the following prices:

Nut coal, \$3.00 per ton.

Stove or Egg coal, \$4.00 per ton.

Briguettes, \$4.00 per ton.

Electric lights, per 16 c.p. light, per month, 50c.

Dynamite 30%, 20c per lb.

Monobel powder, 30c per lb.

Caps to remain as at present.

Fuse to remain as at present.

Wash House, \$1.00 per month.

Library, 25c per month.

Company men to furnish their own tools, which the Company agrees to take back when they leave.

House rents to remain as in Agreement expired March 31st, 1911, so long as conditions in connection with houses remain the same.

ALBERTA RAILWAY AND IRRIGATION COMPANY.**Dockage:**

A loader will be fined 25 cents for each offence for sending out dirty coal, and after the third offence he may be discharged. When fined, his number will be placed on the dock board on the bank-head. The placing of his number on the dock board will be considered as due warning.

Abnormal Conditions:

An abnormal condition shall be considered as a condition where the seam is faulty, or thins out to a point less than forty-eight inches in thickness.

Inside Day Wages:

To be computed from the time at which the first workman in the shift leaves the surface, to the time the first workman in the shift returns to the surface.

THE DIAMOND COAL COMPANY, LIMITED.**Dockage:**

A loader will be fined 25 cents for each offence for sending out dirty coal, and after the third offence he may be discharged. When fined, his number will be placed on the dock board on the bank-head. The placing of his number on the dock board will be considered as due warning.

Abnormal Conditions:

An abnormal condition shall be considered as a condition where the seam is faulty, or thins out to a point less than forty-eight inches in thickness.

Inside Day Wages:

To be computed from the time at which the first workman in the shift leaves the surface to the time the first workman in the shift returns to the surface.

THE ROYAL COLLIERIES, LIMITED.**Dockage:**

A loader will be fined 25 cents for each offence for sending out dirty coal, and after the third offence he may be discharged. When fined, his number will be placed on the dock board on the bank-head. The placing of his number on the dock board will be considered due warning.

Abnormal Conditions:

An abnormal condition shall be considered as a condition where the seam is faulty, or thins out to a point less than forty-eight inches in thickness.

Inside Day Wages:

To be computed from the time the first workman in the shift leaves the surface to the time the first workman in the shift returns to the surface.

CHINOOK COAL COMPANY, LIMITED.**Dockage:**

A loader will be fined 25 cents for each offence for sending out dirty coal, and after the third offence he may be discharged. When fined, his number will be placed on the dock board on the bank-head. The placing of his number on the dock board will be considered as due warning.

Abnormal Conditions:

An abnormal condition shall be considered as a condition where the seam is faulty, or thins out to a point less than forty-eight inches in thickness.

Inside Wages:

To be computed from the time at which the first workman in the shift leaves the surface to the time the first workman in the shift returns to the surface.

CANADA WEST COAL COMPANY, LIMITED.

The Company will furnish screened coal to their workmen at \$2.50 per ton, within a radius of one mile from the mine. Beyond this radius, haulage to be charged.

Any loader sending up dirty coal shall be warned by having his name placed on the check board at the mouth of the slope. Three offences in any two months shall be considered sufficient cause for dismissal.

If a man is charged with careless shooting of coal, he shall be warned for the first two offences, and on the third offence the Pit Boss shall take up the case with the Mine Committee, and if the case is proven he may be discharged.

THE INTERNATIONAL COAL AND COKE COMPANY, LIMITED.**Dockage:**

Old cars to have 25 lbs. added to tare.

New cars to be 35 lbs. added to tare.

1st. The miner to be warned that he is sending out dirty coal.

Dockage to be as follows:

Over 40 lbs. and up to 60 lbs., 200 lbs. of coal

Over 60 lbs. and up to 75 lbs., 400 lbs. of coal

Over 75 lbs and up to 112 lbs., 800 lbs. of coal

Over 112 lbs. and up to 140 lbs., 1,600 lbs. of coal.

Over 140 lbs. the whole car (small car) or 3,400 lbs. of coal.

Large car over 206 lbs. the whole car.

Upon the ninth offence, the miner is subject to two days' lay off.

Tenth offence, discharge.

Each day upon which a miner is docked counts as an offence. The ten offences to be within one month.

Average car to be the average of the cars on the trip before the car in question for that check number.

The Company will deliver workmen's house coal at \$2.50 per ton.

Other conditions to remain as under the Agreement expired March 31st, 1911.

MCGILLIVRAY CREEK COAL AND COKE COMPANY, LIMITED.

Dockage:

There shall be 55 lbs. added to the tare of each car.

First dirty coal, warning only.

Rock over 80 lbs. and up to 120 lbs., deduct 400 lbs. coal.

Rock over 120 lbs. and up to 150 lbs., deduct 800 lbs. coal.

Rock over 150 lbs. and up to 224 lbs., deduct 1,660 lbs. coal.

Rock over 224 lbs. and up to 280 lbs., deduct 3,200 lbs. coal.

Rock over 305 lbs., deduct whole car.

Ninth offence, two day's lay off.

Tenth offence, discharge.

Each day on which a miner is docked counts as an offence. Ten offences to be within one month.

THE WEST CANADIAN COLLIERIES, LIMITED. (Blairmore, Lille and Bellevue Mines.)

Run of mine coal delivered to workmen, \$2.50 per ton.

Screened coal delivered to workmen, \$3.00 per ton.

40 per cent. dynamite, 20c per lb.

Monobel, 30c per lb.

Fuse, caps, and other supplies at present rates.

Dockage:

Miners are to deliver their coal as free from rock and other impurities as it is practicable, and in case of a miner failing to do so he shall be warned for the first offence, for the second offence, or aggravated cases, he may be discharged.

CANADIAN COAL CONSOLIDATED, LIMITED.

Mine run coal delivered to employees, \$2.50 per ton.

Screened coal (where possible) delivered to employees, \$3.00 per ton.

40 per cent. dynamite, 20c per lb.

Monobel, 30c per lb.

Caps, 1c each.

Fuse, 1c per ft.

Electric Detonators (6 ft.), 6c each.

Wash House, \$1.00 per month.

Company men and contract miners to furnish their own tools which the Company agrees to take back when they leave the service, at their then value.

Dockage:

Miners are to deliver their coal as free from rock, or other impurities, as it is practicable, and in the case of a miner failing to do so, he shall be warned for the first offence, for the second offence, or aggravated cases, he may be discharged.

House rents to remain as in Agreement expired March 31st, 1911, so long as conditions in connection with houses remain the same.

HILLCREST COAL AND COKE COMPANY, LIMITED.

The Company will deliver coal to miners, living within the limits of the Townsite of Hillcrest Mines, at \$2.50 per ton for run of mine coal, and screened coal, when possible, at \$3.00 per ton.

The Company will sell to its employees Monobel powder at 30 cents per pound.

Fuse, caps and other supplies, as at present rates.

Wash House, per man \$1.00 per month.

Water (Outside tap per house using), \$1.00 per month.

Dockage:

Same dockage clause as in existence March 31st, 1911.

House rent to remain as in Agreement expired March 31st, 1911, so long as conditions in connection with houses remain the same.

MAPLE LEAF COAL COMPANY, LIMITED.

Wash House, \$1.00 per month.

Monobel, 30c per lb.

40 per cent. dynamite, 20c per lb.

Fuse, 1c per ft.

Caps, 1c each.

THE LEITCH COLLIERIES, LIMITED.

Mine run coal to employees, delivered \$2.50 per ton.

Monobel powder, 30c per lb.

40 per cent. dynamite, 20c per lb.

Fuse, 1c per ft.

Caps, 1c each.

DAVENPORT COAL COMPANY, LIMITED.

Mine run coal, delivered, \$2.50 per ton.

Monobel, 30c per lb.

Dynamite, 20c per lb.

Caps, 1c each.

Fuse, 1c per ft.

Wash House, \$1.00 per month.

THE CROW'S NEST PASS COAL COMPANY, LIMITED.

Coal to employees, run of mine, delivered Coal Creek and Michel Collieries, \$2.50 per ton.

Coal to employees, screened, delivered Coal Creek and Michel Collieries, \$3.00 per ton.

Coal to employees, run of mine, delivered Fernie, \$2.75 per ton.

Coal to employees, screened, delivered Fernie, \$3.25 per ton.

Sanitation, per month for each house, \$1.00.

Water, per month for each house, \$1.00.

Water, per month for each shack, 50c.

Water, per month for bath for each house, extra, \$1.00.

Electric light, per month per 16 c.p. light, 50c.

Wash House, per month, \$1.00.

Tool sharpening, per month, 50c.

House rents to remain as in Agreement expired March 31st, 1911, so long as conditions in connection with houses remain the same.

Dockage:

It is agreed that a dockage clause for the mines of the Crow's Nest Pass Coal Company, Limited, shall be arranged by the Commissioner of the Western Coal Operators' Association, and the President of District No. 18, United Mine Workers of America, in the manner provided for in Section "C" of the clause in the Agreement, covering "Settlement of Disputes," within sixty (60) days after resumption of work, and in the meantime the clause in the Agreement expired on March 31st, 1911, shall be effective.

THE HOSMER MINES, LIMITED.

Penalties for Loading Impurities:

The miners are to deliver their coal as free from rock, or other impurities, as it is practicable, and in case of a miner failing to do so he shall be warned for the first offence, for the second offence, or aggravated cases, he may be discharged.

Mine run coal delivered to employees, \$2.50 per ton.

Screened coal delivered to employees, \$3.00 per ton.

Water (outside tap), \$1.00 per month.

Water (inside tap), \$1.50 per month.

Electric lights (east of C. P. Ry. tracks), per 16 c.p. light, 50c per month.

Sanitation for each house, \$1.00 per month.

Wash House, \$1.00 per month.

Keys for above, 50c each.

Tool sharpening, 50c per month.

Electric Detonators (6 ft.), 6c each.

Electric Detonators (8 ft.), 8c each.

Monobel, 30c per lb.

Dynamite, 20c per lb.

Company men to furnish their own tools, which the Company will take back when they leave.

House rents to remain as in Agreement expired March 31st, 1911, so long as conditions in connection with houses remain the same.

CORBIN COAL AND COKE COMPANY, LIMITED.

House rent to remain as at present.

Electric lights, per 16 c.p. light, 50c per month.

Coal, per ton, delivered, \$2.50.

**IMPOSITION OF CUSTOMS
DUTIES ON BITUMINOUS
COAL IMPORTED INTO
WESTERN CANADA.**

Owing to the serious coal shortage in Western Canada caused by the strike of coal miners in Alberta and Eastern British Columbia an order-in-council was passed on July 31 on the recommendation of the Minister of Labour removing the customs duty on bituminous coal imported from the United States into Western Canada.* In consequence of the settlement of this strike, an account of which appears on another page, an order-in-council was passed on November 20, restoring the duty. The text of the order-in-council is as follows:—

**AT THE GOVERNMENT HOUSE AT
OTTAWA,**

Monday, the 20th day of
November, 1911.

**HIS ROYAL HIGHNESS THE GOV-
ERNOR-GENERAL-IN-COUNCIL.**

"His Royal Highness the Governor-General-in-Council is pleased to order that the Order-in-Council on the 31st July, 1911, with reference to the remission and refund of duty on coal for use in Eastern British Columbia, Alberta, Saskatchewan, and Manitoba, shall be and the same is hereby revoked in so far as concerns the refund of customs duty on imported bituminous coal entered for duty on and after the 6th day of December, 1911.

RODOLPHE BOUDREAU,
Clerk of the Privy Council.

STRIKE OF LONGSHOREMEN AT MONTREAL—SPEEDY SETTLEMENT ARRANGED THROUGH GOOD OFFICES OF DEPARTMENT OF LABOUR.

IN November 18, through the good offices of the Department of Labour, a conference was arranged between the Shipping Companies of Montreal and the Syndicated Longshoremen of that city, which resulted in the immediate settlement of a serious strike of the longshoremen which almost completely paralyzed the business of the port. The strike in question occurred on the afternoon of November 17, and threatened grave consequences by reason of the fact that the end of navigation in the St. Lawrence was already in sight and insurance premiums on shipping about to lapse. There were sixteen ocean-going ships in port at the time, with several others still to arrive and clear again before the ice formed in the River. All of the shipping lines operating from Montreal, some twenty in number, were affected by the strike, which had its origin on one of the Canadian Pacific Steamship Company's steamships, but quickly spread along the entire water front until all the longshoremen in the harbour, to the number of 1,800, and all the freight handlers in the employ of the Dominion Transport Company and the Sheddons Cartage Company, 300 in number, had ceased work.

The occurrence of the strike was at once communicated by telephone to the Honourable T. W. Crothers, Minister of Labour, and the Minister was asked to lend the assistance of the Department in securing a settlement of the dispute and an immediate resumption of work by the longshoremen concerned. Mr. Gerald H. Brown, Assistant Deputy Minister of the Department, and Mr. Victor C. Dubreuil, one of the fair wage officers, were accordingly authorized by the Minister to proceed to Montreal, and arrived in that City on the following morning. In view of the gravity of the situation Mr. George W. Steph-

ens, Chairman of the Board of Harbour Commissioners, also returned to Montreal from New York to do what was in his power to restore harmony between the shippers and their employees concerned.

It was found on inquiry that the officers of the Syndicated Longshoremen's Union of the Port, Mr. John Ryan, President, and Mr. George Poliquin, Secretary and Business Agent, disclaimed responsibility for the strike and declared that the men were "out" before they had known anything at all of what had occurred. Both showed themselves anxious to secure an immediate settlement and consented to represent their brother longshoremen in any meeting which might be arranged with the shipping interests looking to this end. The Assistant Deputy Minister thereupon proposed to the shipping interests that a joint meeting of the employing companies and employees should be held the same afternoon for the immediate determination of the matters at issue. This proposal was accepted and a meeting was accordingly held in the offices of the Shipping Federation of Canada in the Board of Trade building at 3.15 o'clock on Saturday afternoon. Mr. Andrew A. Allan, President of the Shipping Federation, acted as Chairman. There were also in attendance representatives of the Canadian Pacific Steamship Company, the White Star-Dominion Line, Donaldson Line, Thomson Line, Leland Line, Manchester Liners, Canada Line, South African Line, Mexican Line, Black Diamond Line, and the Head Line. The Longshoremen were represented at this conference by Mr. John Ryan, President, Mr. George Poliquin, Secretary and Business Agent of the Syndicated Longshoremen's Union, and by one other member of the Union. The officers of the Department of Labour above

mentioned were also present by invitation.

The longshoremen's grievances were briefly explained by Mr. Ryan and Mr. Poliquin, and related to the number of deals which they were required by the Canadian Pacific Steamship Company to handle in a sling; also to their desire for recognition of the Syndicated Longshoremen's Union, and that the Union should have the right to appoint some one to represent the longshoremen on the wharves. The Committee's proposals were accepted by the Shipping Companies and were thereupon put in the form of a draft agreement to run current with agreements* which were entered into between the Shipping Companies and the Syndicated Longshoremen on May 13, 1910, and which have three years yet to run. The new agreement was ratified by the longshoremen at a meeting of their union on Sunday afternoon, and was formally signed by the parties concerned on Monday morning following.

A particularly gratifying fact in connection with the interruption of the loading and unloading operations in the Harbour of Montreal was the entire absence of any disorder. Ample police protection was provided along the water front, but apart from the cessation of work on the longshoremen's and the freight handlers' part there was indeed nothing to indicate the existence of any dispute.

The agreement referred to is in the following terms:

This Agreement entered into the 20th day of November, 1911,

Between

The Allan Line, Donaldson Line, Thomson Line, White Star-Dominion Line, Leyland Line, Manchester Liners, Canada Line, South African Line, Mexican Line, Black Diamond Line, Head Line, now forming the Shipping Federation of Canada, and the Canadian Pacific Railway and Steamship Company, hereinafter called

The Companies,

and

The Syndicated Longshoremen of the Port of Montreal hereinafter called

The Longshoremen,

Witnesseth

1. The Companies have already recognized the Syndicated Longshoremen of the Port of Montreal, as instanced by their contracts with that body of date of the 13th day of May, 1910, still in force and this body (The Syndicated Longshoremen of the Port of Montreal) shall have the right to appoint a representative on the wharves to be elected at a general meeting of the Longshoremen but until the close of navigation this season such representative shall be the business agent, Me. Geo. Poliquin, of the Syndicated Longshoremen.

2. The Canadian Pacific Railway Company will do the same as the other Steamship lines, members of the Shipping Federation of Canada, in the matter of the number of deals placed in the slings to be lowered into the hold.

3. It is being agreed between the Companies and the Longshoremen of the Port of Montreal that this agreement in no way affects or will affect the existing agreements between the parties but on the contrary be considered as a separate agreement, to come to and end on the termination of the agreements between the same parties above recited and of date of the 13th day of May, 1910, without prejudice to the pending case, Superior Court, No. 2722.

In witness whereof the parties have signed.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907--PROCEEDINGS UNDER THE ACT DURING THE MONTH OF NOVEMBER, 1911.

THE following applications were received in the Department during November for the establishment of Boards of Conciliation and Investigation:

On behalf of the station agents and telegraph employees of the Quebec Central Railway Company, the number of employees concerned being seventy.

On behalf of the Alberta Coal Mining Company of Cardiff, Alta., relative to a dispute between itself and the employees in its mine at Cardiff.

Report Received.

During the month of November the report was received in the Department of a Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the British Columbia Telephone Company and its linemen, installers, cable splicers and trouble men, etc.

Other Proceedings Under the Act.

The application of the station agents and telegraph employees of

the Quebec Central Railway Company above referred to grow out of a dispute between these employees and the Company, relative to the desire of the former for a new schedule of agreement covering rules and rates of pay to take the place of the schedule at present in force on this line. In the course of ensuing correspondence the Department was informed on November 20 that conferences were taking place between the operating officers of the Company and the employees for a settlement of the matters in dispute, and on November 30 word was received that an agreement had been arrived at, the application under the Industrial Disputes Investigation Act being thereupon withdrawn.

On November 20 the Department was informed of the acceptance by the employees of the findings of a Board of Conciliation and Investigation to which had been referred certain matters in dispute between the Grand Trunk Pacific Railway Company and its machinists and boilermakers, the employees' representative writing that the findings were accepted as "satis-

factory in every way, and that the employees are prepared to settle the dispute on the basis of the findings of the Board." The Company's reply was to the effect that the employees were already receiving the highest wages paid in the West and the same shop rules as were in existence on the Grand Trunk Railway system, the Company's policy being to keep shop rules uniform both in the East and in the West. For these reasons the Company declined to accept the Board's findings.*

The application of the Alberta Coal Mining Company, of Cardiff, Alta., for the establishment of a Board of Conciliation and Investigation related to a demand on the employees' part for increased wages and other changes in their conditions of employment. The number of employees concerned was eighty. A Board was accordingly constituted by the Minister, as follows:—Messrs. J. O. Hannah of Calgary, Alta., and Clement Stubbs, of Bellevue, Alta., appointed on the recommendation of the Company and employees respectively, and Mr. Norman Fraser, of Edmonton, Alta., appointed on the joint recommendation of the foregoing.

Report of Board in Dispute Between the British Columbia Telephone Company and its Employees.

The Minister of Labour received on November 28 the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the British Columbia Telephone Company and its linemen, installers, cable splicers and trouble men, etc.,† also a minority report bearing the signature of Mr. Wm. H. Barker, member appointed on behalf of the Company. This dispute related in the main to the employees' demand for increased wages and was also understood to involve the Company's attitude towards Union men. The number of employees concerned was given in the application as approximately 220. A Board was

established on November 29, Messrs. Wm. H. Barker, of Vancouver, B.C., and Chas. Enright, of Vancouver, B.C., being subsequently appointed members on the recommendation of the Company and employees respectively. The Board was completed by the appointment of Mr. John H. Senkler, K. C., of Vancouver, B. C., a Chairman, on the joint recommendation of the foregoing.

The Board in its findings deals with the subject of the cost of living on the Pacific Coast, and especially in Vancouver, and also points out that men working for the Telephone Company must be young, strong, and active, that their employment is an extra hazardous class of work, for which reason they are unable to obtain life insurance at anything like rates which they can afford to pay, also "that the Telephone Companies on the Pacific Coast, other than the Pacific Telephone Company which is apparently, so far as wages are concerned, bound by some arrangement with the British Columbia Telephone Company, pay a higher rate of wages than the latter two Companies". The report concludes, "Under the circumstances I cannot see that the men are acting unreasonably in asking for a further advance in wages of 25c per day". The report is signed by Mr. J. H. Senkler, Chairman, and by Mr. Chas. Enright, member appointed on behalf of the employees. Mr. Wm. H. Barker, in his minority report, says that "taking into consideration the facts as shown by evidence submitted, I have come to the conclusion that the employees of the British Columbia Telephone Company earn as much as the average skilled mechanic, owing to steadier work, and a raise in wages to them means demands for a raise all round or general dissatisfaction".

Report of Board.

The text of the Report of the Board of Conciliation and Investigation is as follows:—

IN THE MATTER of the Industrial Disputes Investigation Act, 1907, AND

*See *Labour Gazette*, November, 1911, pp. 443-449.

†See *Labour Gazette*, October, 1911, Page 350.

IN THE MATTER of differences between the British Columbia Telephone Company, Vancouver, B.C., and Local Union No. 213, International Brotherhood of Electrical Workers.

REPORT OF CHAIRMAN.

While I feel that the contention of the B. C. Telephone Company, taken at the preliminary hearing of this Board that a Board of Conciliation should not have been appointed by the Government upon the material contained in the Application to the Minister is very probably correct, still I and the other members of the Board felt that it was our duty to endeavor to effect some settlement between the parties, and with that end in view, we had several sessions for the taking of evidence and finally the Chairman had a meeting with the officers of the Company and endeavored in every way to effect a settlement without the necessity of the Board making a report, but without success, the Company taking the position that as they are paying the same rate of wages to their journeymen as the other largest Telephone Company on this Coast does that they could not voluntarily raise that rate of wages.

At the outset the Company took the position that as the Lemieux Act was a Canadian Act, that therefore this Board of Conciliation had no right to take into consideration any conditions existing outside of Canada. I could not agree to this. In taking evidence as to the conditions existing in Seattle, Tacoma, Portland and San Francisco, we were considering conditions as they exist in places most similarly situated to those in Vancouver, and in my opinion was the only way in which the Board could with any accuracy arrive at a conclusion in regard to the conditions here as between the Company and the men.

The Company, during the course of the proceedings did offer to pay the men for an extra hour at the same rate

if the latter would agree to work one hour per day longer, but this the men flatly refused to do, and having regard to the manner in which the British Columbia Government has dealt with the eight hour question, I could not accept that as a fair settlement of the matter, and indeed I personally am of the opinion that eight hours per day is a long enough working day.

From the evidence that was brought before the Board, there can be no doubt but that the cost of living is higher in Vancouver than in any other place on the Coast, and higher than in other Canadian cities which we have had any evidence about.

In fact I am of the opinion that whatever the cause may be, the cost of living in Vancouver is higher at the present time than it was a year ago. There is no question that from the evidence, men working for a Telephone Company must be young, strong and active men, and that as an average, they cannot employ a man over forty years of age; that his employment is considered an extra hazardous class of work, and for this reason he is unable to obtain Life Insurance at anything like a rate which he could afford to pay; that his work is quite as hazardous, if not more so, than the electrical workers who from the evidence before us, received a minimum wage of \$4.00 a day, going up as high as \$5.00 a day.

Men employed on the B. C. Electric Railway Company in this City on similar class of work, have wages of \$4.00 a day and besides, receive extra assistance by way of free car service, and a flat rate for light and heat.

The Telephone Companies on the Pacific Coast, other than the Pacific Telephone Company, which is apparently so far as wages are concerned, bound by some arrangement with the B. C. Telephone Company, pay a higher rate of wages than the latter two Companies.

Under the circumstances, I cannot say that the men are acting unreasonably in asking for a further advance of wages of 25c per day.

I must take the occasion to compliment the two parties on the eminently fair manner in which they have conducted their respective cases in this matter.

Dated at Vancouver, B.C., this 21st day of November, A.D. 1911.

(Signed) J. H. Senkler
Chairman.

(Signed) Chas. Enright,
Member of Board.

MINORITY REPORT.

The text of the minority report in the above matter is as follows:

Vancouver, B.C., November 22, 1911.

The Board of Conciliation and Investigation in the matter of dispute between *The British Columbia Telephone Company* (Employers) and *Local Union No. 213, International Brotherhood of Electrical Workers*.

Beg to report:

That they have met and taken evidence, and have had letters, lists of wages, and other written and printed matter offered as evidence, including

I find that a very large percentage of the Linemen and other employees are Americans, who have come here because there was work for them. That most—if not all—evidence submitted as to cost of living, was in comparison with American cities — principally Seattle.

While I thought it fair to take this evidence of conditions in another country, yet they are the nearest large towns, and conditions, perhaps nearer our own than those of towns and cities in the Dominion.

Yet this is a Canadian Act, to regulate conditions in Canada, and anyone coming here, comes voluntarily, and is not compelled to stay, yet, perhaps, we must in some measure be governed by evidence given.

Wages paid by the largest Telephone Companies from San Diego to Seattle are the same as paid by the B. C. Telephone Company.

Cost of living is less in Seattle than Vancouver, likely caused by dull times and keener competition. Work is harder to get, so while living is some cheaper, when work is scarce, it is as stated by one of the witnesses, "that living is mostly cheap where work is scarce."

Regarding the relative earnings of the employees and skilled mechanics, taking the testimony of the business agent of the Allied Building Trades—

Bricklayers average about.....	\$1,000	a year.
Carpenters " "	900	"
Painters " "	700	"
Plasterers " "	900	"
Structural Iron Workers	700	"

while by testimony given, the employees of the B. C. Telephone Company average from \$1,000.00 or more per year.

Evidence showing that the labor of a lineman is hazardous; I do not think it any more so than that of the Structural Iron Worker.

Carpenters and other skilled mechanics must own a costly kit of tools, while the tools necessary by linemen cost about \$15.00.

Increased cost of living has had much attention in the Dominion, Great Britain and other countries; it is the same, however, to all workers, and particularly hard on the unskilled laborer and cheaply paid clerks.

I was pleased to find that very friendly feeling exists between the B. C. Telephone Company and its employees. That in April, 1910, they voluntarily increased the wages of their employees, bringing them up to those paid by the large Telephone Companies in the Pacific Coast States.

The B. C. Telephone Company say they are willing to pay their men 47½ cents more per day if the men will work nine hours instead of eight. I think this is one way out of the difficulty. The men ask for twenty-five cents more, and the Company agree to pay them more than that if they will work for it.

Taking into consideration the facts as shown by evidence submitted,

have come to the conclusion that the employees of the B. C. Telephone Company earn as much as the average skilled mechanic, owing to steadier work, and a raise in wages to them means demands for a raise all round or general dissatisfaction.

While the cost of living here is some higher than in Seattle, it is not very

much. I will not admit that Vancouver is the most costly place to live in on the Coast.

My judgment is, to leave the pay of the B. C. Telephone Company's employees to the Company.

Respectfully submitted,

(Signed) Wm. H. Barker.

ONTARIO LEGISLATION AFFECTING LABOUR, 1911.

THE third session of the twelfth legislature of the Province of Ontario was begun at Toronto on January 25, 1911, and was prorogued on March 34. A copy of the statutes enacted was received at the Department through the courtesy of the King's Printer of the province. During the session 153 acts were passed. A summary of the more important ones relating to labour and industry is given below.¹

Protection in Building Trades.

The Building Trades Protection Act provides that in the erection, alteration, repair, improvement or demolition of any building, no scaffolding, hoists, stays, ladders, flooring or other mechanical and temporary contrivances, which are not so constructed and operated as to afford reasonable safety from accident to persons employed on the building. For the purpose of defining more clearly the duties of contractors in this respect, the following regulations are contained in the Act, which, however, do not apply to any building not more than two stories in height, nor to any farm building, nor to any work being done upon a building by the owner or occupant thereof in person.

SEC. 7. (1) The floors of all scaffolding, whether standing or suspended from overhead, shall be at least four feet wide, and there shall be a railing or guard not less than three feet nor more than four feet from the flooring on the outside of the scaffolding for the protection of persons working thereon.

(2) Where the scaffolding or staging is swung

or suspended from an overhead support, it shall be so secured as to prevent its swaying to and fro.

(3) Where poles are used in scaffolding the poles shall be securely lashed at every point of contact and where square timber is used in scaffolding the same shall be securely spiked or bolted at every point of contact.

(4) No lumber or timber shall be hoisted in a single sling.

(5) Where hoists are used for raising materials for use in buildings, the shafts or openings shall be protected at each floor by a barrier not less than three feet nor more than four feet from the level of the floor, and the barrier shall be placed not less than two feet from the edge of the shaft or opening in which the hoist is operated.

SEC. 8. (1) Where the plans and specifications require the floors to be arched between the beams thereof, or where the floors or filling in between the floors are of fireproof material, the flooring or filling in shall be completed as the building progresses to not less than within three tiers of beams below that on which the iron work is being erected.

(2) Where the plans and specifications do not require filling in between the beams of floors with fireproof material or brick work, the contractor for the carpenter work, in the course of construction, shall lay the underflooring of the building of each storey as the building progresses to not less than within two storeys below the one to which the building has been erected.

(3) Where double floors are not to be used, such contractor shall keep planked over the floor two storeys below the storey where the work is being performed.

(4) If the floor beams are of iron or steel, the contractor for the iron or steel work of a building in course of construction or the owner of such a building shall thoroughly plank over the entire tier of iron or steel beams on which the structural iron or steel work is being erected, except such spaces as may be reasonably required for the proper construction of such iron or steel work and for the raising or lowering of materials to be used in the construction of such building, and such spaces as may be designated by the plans and specifications for stair ways and elevator shafts.

SEC. 9. In the case of what are known as skeleton steel frame buildings, compliance with the following regulations shall be sufficient and it shall not be necessary to comply with the requirement of section 8:

(1) As soon as the steel frame of a building is erected to the first column splice above the first floor

¹A review of the "Industrial Education Act" passed during the session appeared in the *Labour Gazette* for April, 1911, at page 1139.

level, a flooring of two inch planking shall be laid over floor beams on the floor immediately below the first column splice, making a temporary floor over that part of the area of the building inside columns at that level, except in places where it is necessary to have openings for the passage of material for building above that point. When erection has reached a point level with the next column splice, the planking used as temporary floor at first column splice shall be removed and placed as before at second splice, and so on to the top of the building.

(2) A double flooring of two inch planking shall be laid down immediately under any derrick for a sufficient space about the derrick to protect workmen on the floors below that on which the derrick is working and to hold with safety the materials hoisted by the derrick.

(3) Rivetters' staging shall be so constructed as to secure the reasonable safety of the rivetters and a temporary floor must be provided on the girders and floor beams immediately below the portion of the floor upon which the rivetters are working, sufficient for the protection of workmen engaged below that floor.

(4) The steel work may be carried on in advance of the construction of permanent floors.

For the proper enforcement of this Act, the council of every city, town, township and village is required to appoint a sufficient number of persons to be inspectors, and in unorganized districts the Lieutenant-Governor-in-Council may appoint such inspectors.²

Use of Electricity in Mines.

The Mining Act of Ontario was amended by the addition of a number of rules governing the use of electricity in mines. For the purposes of the act three kinds of installations are recognized, the low pressure system, where the electrical energy does not normally exceed 250 volts, the medium pressure system with energy from 250 to 600 volts, and the high pressure system, with energy above 600 volts. All electrical apparatus and conductors must be sufficient in size and power for the work they may be called upon to do, and so far as practicable they must be efficiently insulated. No higher than a medium pressure shall be used other than for transmission or for motors, and wires or conductors to the motors must be enclosed in a strong metal casing connected with earth, or fixed in such a manner as to reduce their danger to person or property to a mini-

mum. A higher than medium pressure is prohibited for portable motors or for any purpose underground. No repairs of live wires, except mere wiping and oiling, shall be done when the current is on. In underground roads the trolley wires must be placed as close to the side as possible, and where men have to travel on foot all wires except signal wires must be placed on the same side of the roadway and efficiently protected. Red lights as danger signals must be connected at suitable intervals to all branch trolley circuits to indicate when the current is on. A notice of warning must be posted at the entrance to all roadways carrying exposed power wires. On surface roads the trolley wires must be at least eight feet above the rail level and efficiently guarded. Electricity from lighting or power cables shall not be used for firing shots, except when a special firing plug, button or switch is provided, which must be placed in a fixed locked box, only accessible to the authorized shot firer. Electric energy shall not be used directly to thaw explosives. The person in charge of an electric drilling machine must not leave the machine while it is working, and must see that the pressure is cut off from the trailing cables before leaving the working place.³

Milk Inspection.

The Ontario Milk Act authorizes municipal councils, not including county councils, to pass by-laws regarding the production, care, transportation, or sale, of milk, including the care of cows, the sanitary conditions of the places where cows are kept or milked, or where the milk is stored, the care and type of utensils used in handling the milk, and the making of bacteriological tests of milk. These by-laws must be approved in writing by the Minister of Agriculture. The councils are also authorized to enact by-laws regulating the granting of licenses to vendors of milk, and to appoint inspectors for the enforcement of this Act and of any regulations

²Ontario statutes, 1911, chap. 71.

³Ontario statutes, 1911, chap. 10.

made under it, and to maintain milk depots in order to furnish a special supply of milk to infants. It is forbidden to sell milk from diseased cows, or to permit any person suffering from or exposed to any contagious disease to handle the milk. A standard is set in the Act to which all "certified" milk must conform, and a treatment of milk is described to which alone the term 'pasteurized' may be applied.⁴

Inspection of Laundries.

The Ontario Factories Act was amended to bring within the scope of the Act every shop, building or room in which one or more persons are employed in carrying on the trade of a public laundry, and to make these places subject to inspection in the same manner as any other factory. No public laundry work may be done in a room used for a sleeping or living room. The Act does not apply to a female engaged in doing custom laundry work at her home for a regular family trade. The provision of the Factories Act as amended in 1903 forbidding the use of sleeping apartments on the same floor as a factory does not apply to laundries in which not more than five persons are employed.⁵

Reforestation.

By the Counties Reforestation Act, municipal councils of counties or of townships in districts without county organization are empowered to pass by-laws for acquiring by purchase, lease, or otherwise lands for reforestation purposes: for planting these lands and preserving the timber thereon: for the management of these lands and the disposal of the timber: and for the issuing of debentures from time to time by county councils to provide for the purchase of such lands: to an amount not exceeding \$25,000 to be levied at any one time. Township councils may levy by special rate a

sum not exceeding \$200.00 in any year for the purchase of such lands.⁶

Miscellaneous.

An Act was passed respecting apprentices and minors, by which some slight changes were made to former legislation on this subject.⁷

Acts were passed respecting dentistry⁸ and pharmacy,⁹ containing certain amendments and additions to previous legislation, also respecting the profession of architects,¹⁰ the Chartered Stenographic Reporters' Association,¹¹ and the Institute of Chartered Accountants.¹²

An Act was passed respecting circuses and travelling shows, consolidating the previous legislation and making a few minor changes.¹³

An Act to regulate the means of egress from public buildings was passed which repealed previous legislation and required that the doors of all public buildings should be made to open freely outwards, and that gates if not so made should be kept open while such buildings are being publicly used. The Lieutenant-Governor-in-Council is authorized to make regulations regarding the enforcement of this Act, and governing the safety and convenience of persons assembled in these buildings.¹⁴

The Theatres and Cinematographs Act authorizes the Lieutenant-Governor-in-Council to make regulations governing the erection, operation and safety of theatres, including inspection and supervision, and that the licensing and operating of moving picture machines, also to appoint a Board of Censors of picture films. Children under fifteen years of age, unaccompanied by adults are not permitted to attend any moving picture exhibition.¹⁵

¹⁵Ontario statutes, 1911, chap. 73.

⁴Ontario statutes, 1911, chap. 69.

⁵Ontario statutes, 1911, chap. 70.

The Ontario Game and Fisheries Act was amended by authorizing the Superintendent to order the taking or killing of beaver by any officer of the Department where they are causing damage. It is forbidden to hunt mink between May 1 and November 1, and the open season for various game birds is changed.¹⁶

An Act was passed to permit the establishment of special classes for backward or defective children in the public or separate schools, and for their medical inspection and supervision.¹⁷

The Local Municipal Telephone Act, 1908, was amended by empowering the Ontario Railway and Municipal Board to superintend the construction of municipal telephone lines, and by pro-

viding for the operation of any municipal telephone system by a Board of three Commissioners elected by the subscribers, upon a petition of a majority of them to the Council. In default of such a petition, the supervision of the system shall remain in the hands of the Council.¹⁸

An Act was passed providing for the licensing of embalmers on their passing an examination conducted by a Board of examiners consisting of five persons appointed by the Lieutenant Governor-in-Council. Provision is made for the granting of certificates of qualification to persons engaged in embalming in Ontario at the time of the passing of the Act upon evidence of sobriety, good character and experience.¹⁹

QUEBEC LEGISLATION AFFECTING LABOUR, 1911.

THE third session of the twelfth legislature of the Province of Quebec was begun on January 10, 1911, and was prorogued on March 24, during which period 147 Acts were passed. A copy of the Statutes has been received at the Department through the courtesy of the King's Printer of Quebec. A brief review of the more important laws enacted from the standpoint of industry and labour is given below.

Accidents in Mines.¹

Various amendments to the Quebec Mining law were made. One of these provides that if while a mine or a quarry is being worked an accident takes place resulting in loss of life or serious injury, the person working the same or his representative at such mine or quarry, shall forthwith send a written notice to the Minister specifying the nature of the accident, the number of persons killed or injured,

and their names if they are known. As mining lands and underground mining concessions sold in conformity with the Quebec mining law, the letters patent whereof are issued after July 1, 1911, are made subject to an annual tax of 10 cents per acre, which however, may be remitted upon an affidavit that at least two hundred dollars have been spent in mining work upon the concession during the year. If the taxes are not paid within two years notice to that effect may be published in the Official Gazette and in newspapers in Montreal, and if after six months more the taxes are still unpaid, the land may revert to the Crown.

Law Relating to Motor Vehicles.²

The law relating to motor vehicles was amended in several particulars. The fee for those above twenty-five horse power is increased. Non-residents whose motor vehicles have been duly registered elsewhere are exen-

¹Quebec statutes, 1911, chap. 23.

²Chap. 16.

from registration for three consecutive months in the year, provided that like privileges are granted in the place whence they came. Every manufacturer's or dealer's registration must be annually renewed. A fee of one dollar is charged for registration on change of ownership. No operator's or chauffeur's license shall be issued to any person under eighteen years of age. The revenue derived from these fees is to be applied to the improvement of the highways, less such proportion as may be applied to the payment of expenses for carrying out the Act.

Pensions of Teachers.³

The Education Act was amended by fixing the minimum pension of female teachers of primary classes at seventy-five dollars. If a teacher contributes to the pension fund for more than thirty-five years, the amount of the pension is based on the thirty-five years of highest salary.

Technical Education.

The annual grant to the Polytechnic School of Montreal is increased from twenty to twenty-five thousand dollars.⁴ A few amendments are made to the act incorporating the Quebec Technical School.⁵ Powers of incorporation are granted to the Shawinigan Technical Institute, the objects of which are the promotion of technical and commercial education at Shawinigan Falls.⁶

Moving Picture Exhibitions.⁷

Legislation with regard to moving pictures is amended by forbidding any

person in charge of a hall where moving picture shows are given, to receive at such shows any child less than fifteen years old unless accompanied by a parent, teacher or guardian specially authorized by the father or mother.

Act Respecting Bakeries.⁸

An Act relating to the sale of bread provides that bread made of good flour may be baked in loaves of any weight from one pound up, but without any fraction of a pound above one pound. In cities and towns, however, any bread may be made and sold by weight, but each loaf must bear a label mentioning the exact weight and the baker's name. Bread of not more than twelve ounces in weight need not be labeled.

Legislation Respecting the City of Montreal.⁹

The Charter of the City of Montreal was amended in many respects the powers of the municipality being extended with regard to building regulations, and the prohibition of street excavations, and the powers and duties of the building inspector being enlarged. The board of commissioners is authorized by resolution to establish, fix and change cabstands, from time to time.

Regulation of the Sale of Cocaine.¹⁰

An Act was passed governing the sale of cocaine, morphine and their compounds, making stringent regulations as to the manner of selling these drugs, and imposing a fine of not less than fifty dollars or imprisonment for not less than one month, for their unlawful sale or possession.

³Chap. 27.

⁴Chap. 31.

⁶Chap. 96.

⁷Chap. 34.

⁸Chap. 40.

⁹Chap. 60.

¹⁰Chap. 35.

NEW BRUNSWICK LEGISLATION AFFECTING LABOUR, 1911.

THE Legislative Assembly of the Province of New Brunswick met for the session of 1911 on March 2 and prorogued on April 13. The session was the fourth of the 5th Assembly of the province. The following is a review of the more important legislation of interest to industry and labour.

Workmen's Compensation.¹

An act was passed amending the Workmen's Compensation Act, which provides that an injured workman may secure compensation from his employer in a lump sum when weekly payments have been awarded him by a judge or jury. For this purpose an execution may be issued for the amount due up to the time of the issue of the execution and also for the amount of the weekly payments up to the end of the period for which they had been awarded. In calculating the aggregate amount of weekly payments the future payments are to be discounted at the rate of 4 per cent. per annum.

Boiler Inspection.²

The New Brunswick Factories' Act was amended with respect to boiler inspection and the employment of stationery engineers. It was provided that a marine engineer might be a boiler inspector as well as men of other classes mentioned in the Act, but the inspector must not be the man in personal charge of any boiler which is to be inspected. Provision was made for the constitution of a board for the examination of stationary engineers. The members of this board must be engineers of not less than ten years' experience in the management of steam engines and plant. One of the inspectors appointed under the Act shall be

the secretary of the board. The board is empowered to grant certificates of competency or of service. A certificate of competency is to be granted to any person who shall satisfy the board upon examination that he has had sufficient practical experience in the management of a stationary or portable engine or boiler, and possesses sufficient theoretical knowledge to qualify him to operate such a plant with safety. A certificate of service shall be granted to any person who shall within two years of the passing of the Act satisfy the board that during the five years immediately preceding the enactment he has actually served not less than two years in charge of a stationary engine and boiler. The applicant must also satisfy the board that he has good character especially as to sobriety. A certificate of competency or service shall be valid for two years from its date and may be renewed. Applicants are required to pay a fee of \$10 upon application and \$3 upon the granting of a certificate, and \$1 upon each renewal of the certificate. No person without a certificate will be allowed to have charge of a steam boiler or engine under a penalty of not more than \$10 for every day on which he shall have charge of a boiler or engine without possessing a certificate. The Act does not apply to locomotive motor road vehicles, boilers and engines in private residences, boilers in apartment houses, schools, churches or public buildings, when used for water or steam heating only, carrying a pressure of not more than fifteen pounds. Boilers and engines used for agricultural purposes only and all of not less than 25 horse-power are exempted, also boilers and engines in charge of a person holding a certificate as a marine engineer. Certificate must be framed and put in a conspicuous place in the engineroom or boiler room.

¹Chap. 43.²Chap. 50.

Public Utilities Commission.³

A law was passed amending the Act establishing the public Utilities Commission of 1910. By this amendment, the term of office of the commissioners is fixed at ten (10) years. If the assessments made by the Board to cover its annual expenses are not paid by any public utility these unpaid assessments may be collected by execution issued by the registrar of the Supreme Court instead of by civil action taken by the chairman of the Board. A fine may be imposed for defective or erroneous returns made by any public utility. A commission is empowered to make an investigation on motion as to any alleged act done or omitted to be done by any public utility. Every person, firm, corporation or public utility failing to obey or comply with any rule or order of the board or the Lieutenant-Governor-in-Council, made under the provisions of this Act, is liable to a penalty of not less than fifty dollars, and not more than five hundred dollars, which may be imposed by the Board, and if a fine is not paid within fifteen days the Attorney-General may take proceedings to dissolve the Public Utility in default.

The Manufacture of Pulpwood.⁴

An act was passed requiring that licenses to cut spruce and poplar and other wood suitable for the manufacture of pulp or paper on Crown Lands shall be granted only on condition that the wood be manufactured in Canada into pulp or paper, or into sawn lumber, woodenware utensils, and other articles of commerce. It is not sufficient merely to cut the wood into cordwood or other lengths. Pine and poplar are excluded from the operation of the law. In a schedule to the Act, regulations are set out with reference to the sale of timber licenses, and the Lieutenant-Governor-in-Council is authorised to make any additional regulations that may be necessary, for the proper observance of the Act.

Early Closing.⁵

By an act of the session any city of town council is authorized to make by-laws requiring all shops within their city or town to be closed on each or any day of the week except Saturdays, the day preceding a proclaimed public holiday, or on any days during the last three weeks of December, between six o'clock in the afternoon and five o'clock in the morning of the following day. For the purposes of this Act "shop" means places where goods are exposed or offered for sale by retail, but not where the trade carried on is that of a druggist, tobacconist, news agent, hotel, inn, tavern, restaurant, café, fruiterer, confectioner, keeper of an ice cream parlor or vendor of soda water where no groceries are sold or kept for sale, nor any premises wherein under licenses spirituous or fermented liquor is sold by retail, for consumption on the premises.

Exemption from Compulsory Attendance at School.⁶

The Act providing for the compulsory attendance at school was amended, by exempting any child between the age of 14 and 16 years, provided that the child produces a certificate signed by the secretary of the Board of School Trustees, certifying that the child has regularly attended school for a reasonable period and is reasonably proficient in reading, writing and arithmetic, and provided that it has passed a satisfactory examination upon these subjects, and produces a certificate to that effect, signed by the secretary of the Board of School Trustees.

Legislation re Transportation.

The following Acts were passed affecting transportation companies:—

The New Brunswick Coal and Railway Company: giving authority to borrow \$66,000.⁷

³Chap. 55.⁴Chap. 10.⁵Chap. 15.⁶Chap. 34.⁷Chap. 4.

An Act authorising the St. John Railway Company to transmit electric current for light, power, and heat throughout King's County.⁶

An Act amending the Act of incorporation of the St. John and Quebec Railway Company.⁹

An Act to amend the Act of incorporation of the St. John Valley Railway Company, and extending the time for construction.¹⁰

An Act to amend the Act of incorporation of the Kent Northern Railway Company.¹¹

An Act authorising the amalgamation of the Caraquet and the Gulf Shore Railway Company.¹²

Miscellaneous.

An Act was passed furthering aid in the development of the coal areas of the Counties of Queens and Sunbury, by the guaranteeing of bonds of railway to be completed through that section.¹³

Registration fees must now be paid by the owners of motor vehicles. Non-residents are exempted from paying these fees for a period of twenty-one days. Chauffeurs are required to take out licenses, costing \$2, and they must not be under eighteen years of age.¹⁴

Hotels exceeding two storeys in height are required to have a fire escape in each of the sleeping apartments or bedrooms above the ground floor, consisting of a rope not less than three-quarters of an inch in thickness. This is not required, however, for any hotel which has outside, stationary, or other fire escapes, or are reasonably safe and convenient. An inspector appointed under the New Brunswick Factories

Act of 1905 is authorized to see all hotels with respect to fire escapes, and to take the necessary proceedings for the enforcement of the Act.¹⁵

The provisions of the Canada Medical Act is amended providing that when there shall have been established a Medical Register for Canada under the control of the Medical Council for Canada any person duly registered in that Register as a medical or surgical practitioner, shall be entitled to be registered in the Medical Register of the Province, and it is provided that since any person who has been practising in any province of Canada for ten years may be entered in the Canada Medical Register and the Medical Council of the Province may require such person to pass a satisfactory examination in final subjects as the conditions to such registration.¹⁶

The New Brunswick "Rental Act" was amended with respect to the examination requirements of dental students.¹⁷

An Act was passed amending the law respecting the protection of woods from fire, by which railway companies are required, and were notified to do so by the Surveyor-General, to provide a motor speeder, manned by at least three men, and carrying water and appliances for extinguishing fires, between May 1st and December 1st of each year. This speeder is to follow all trains passing through forests and woodlands, within fifteen minutes of their passage, and extinguish any fires caused by said trains. Railway companies are required upon the request of the Surveyor-General to maintain a telephone line along the railway, with telephone offices at its station so that immediate notice may be given of the starting of any fire near the line of the railway.¹⁸

SASKATCHEWAN LEGISLATION AFFECTING LABOUR, 1911.

THE third session of the second legislature of the Province of Saskatchewan began on December 15, 1910 and prorogued on March 23, 1911. At this session sixty (60) acts were passed. Of these the following were the most important with respect to industry and labour.

Workmen's Compensation.¹

An act was passed providing for compensation to workmen for injuries sustained during their employment. This Act applies only to employment on, in or about railways, factories, mines, quarries, and engineering work, and in or about any building which is either being constructed, repaired or being demolished. Under the Act, a workman includes every person who is engaged in any employment to which the Act applies, whether it were of manual labour or otherwise, but does not include any person employed otherwise than in manual labour whose remuneration exceeds \$1,200 a year. An employer is liable for the payment of compensation in any employment to which the Act applies for personal injury by accident to a workman arising out of or in the course of employment, except when a workman is not disabled for a period of at least one week from earning wages at his work. Any contract made after the coming into force of this Act whereby a workman relinquishes any right to compensation by his employer is declared to be void, and any such contract existing at the coming into force of this Act shall be deemed to continue after the time at which the workman's contract for service would determine if notice of the determination were given at the time of coming into force of this Act. Compensation may be recovered by any District Court and the employer shall be liable to pay compensation whether or not:

- (a) The injury or death resulted from the negligence of any person engaged in a common employment with the injured employee; or
- (b) From the negligence by reason of any defect in condition or arrangement of the ways, works, machinery, plant, buildings or premises.
- (c) Where the workman contributes, or is the sole cause of his injury or death by reason of negligence or misconduct; or
- (d) The injury or death resulted from a risk arising out of or accidental to the nature of the employment and which the workman expressly or impliedly assumed.

In the case of subcontracts, the principal shall be liable to pay any workman any compensation under this Act, which he would have been liable to pay if the workman had been immediately employed by him, but the principal is entitled to be indemnified by any other person who would have been liable independently of this action. A workman, however, is not prevented from recovering compensation under the Act from the contractor instead of the principal. When any employer has entered into a contract with any insurers in respect of any liability under this Act to any workman then in the event of the employer becoming insolvent the rights of the employer against the insurers as respects that liability shall be transferred to and rest in the workman, but the insurers shall not be under any greater liability to the workman than he would have been under to the employer. If the liability of the insurers to the workman is less than the liability of the employer to him the workman may lay claim for the balance in the assignment or liquidation proceedings. In the case of an assignment or in the distri-

¹Chap. 9.

bution of the assets of a company which is being wound up claims for compensation under this Act to the amount not exceeding \$500 in any individual case will have priority to other debts. Provisions with respect to priority, however, shall not apply where the assignor or the company being wound up has entered into a contract with insurers as above mentioned, or where the company is wound up voluntarily merely for the purposes of reconstruction or amalgamation with another company. Action must be taken under the Act within six (6) months of the time of death. In the case of any injury, the plaintiff may at his option proceed either under this Act or independently of the Act, but shall not be at liberty to proceed both under and independently of the Act.

It is specifically declared that the Act does not apply to agriculture or to any work performed on a farm or homestead for farm purposes, and for the purposes of making improvements on such farm or homestead. But any person undertaking the construction, repair, or demolition of any building upon any farm under contract with the occupant or owner shall be liable under the Act. The amount of compensation recoverable under the Act shall not exceed either the estimated earnings during the three years preceding the injury of the person in the same grade or the sum of \$1,800, or not exceed in any case the sum of \$2,000. All actions brought under this Act shall be tried by a judge without a jury; an appeal may with the consent of the judge be taken to the Supreme Court en banc upon any question of law or mixed question of law and fact; but save as provided in this section no appeal shall lie from any judgment or order of the trial judge.

This Act came into force on November 1, 1911.

Co-operative Ownership of Grain Elevators.²

An Act was passed incorporating the

Saskatchewan Co-operative Elevator Company with power to construct, acquire within Saskatchewan, and to do all things incidental to the production, storing and marketing of grain. The amount of the capital stock is to be fixed from time to time by the Lieutenant-Governor-in-Council and is divided into shares of fifty dollars each, which can be held only by agriculturists. No person may hold more than ten shares, and no transfer of any share shall be valid unless approved by the directors.

The Company is authorized to organize 'locals' throughout the province, and cannot commence business until twenty-five have been organized. Any number of shareholders may request the directors to establish a local at any railway shipping point in the province, but the directors shall not, without the consent of the Lieutenant-Governor-in-Council establish any local unless the amount of shares held by the supporters of the proposed local is at least equal to the value of the proposed elevator. Of these shares fifteen per cent. must be paid up, and the annual crop acreage of the shareholders must represent a proportion of not less than 2,000 acres for each 10,000 bushels of elevator capacity asked for. Upon the establishment of a local and annually thereafter, the supporters of the local shall hold a meeting at which a board of management of five members shall be elected with powers and duties determined by the company's by-laws, or delegated to them by the directors. Three delegates, or such number as may be fixed by by-law, shall also be elected from among the shareholders, at this meeting, to represent the local at the general meeting of the company. At the meetings of the local each shareholder shall have one vote for each share held by him, but no person shall have more than five votes. At the general meetings each delegate has one vote, and all acts done by the majority of the delegates shall be deemed to be the acts of the company. The number of directors is to be nine, three of whom retire each

²Chap. 39.

year, so that each director is elected for a term of three years.

At the end of the financial year, if any surplus remains after payment of all charges for operation and maintenance, a dividend of not more than six per cent. to each shareholder may be declared by the company. If there still remains a balance, the company may distribute not more than fifty per cent. of it on a co-operative basis either in sums proportionate to the business which each shareholder has brought to the company, or on the basis of the aggregate relative net financial results of each local, or partly in accordance with each of these schemes of distribution. Any further sums remaining shall be set apart in a separate account to be styled "The Elevator Reserve Fund", which shall be drawn upon only in case the receipts of the company are not sufficient in any year to pay operating and maintenance expenses. The Lieutenant-Governor-in-Council is authorized to loan to the company, for the purpose of aiding in the acquisition or construction of any local elevator a sum not to exceed eighty-five per cent. of the estimated cost of the said elevator. Such loans shall be repayable in twenty equal annual installments of principal and interest.

Miscellaneous.

The Railway and Telephone Department Act was amended with regard chiefly to the method of dealing with the receipts and expenditures connected with the public telephone system, and the methods of purchase, keeping and distribution of supplies.³

The Pharmacy Act provides for the establishment of the Pharmaceutical Association of Saskatchewan, with powers of holding examinations and granting certificates to persons who wish to qualify as chemists and druggists in the Province. Special regulations are contained in the Act with ref-

erence to the sale of poisons, in which are included cocaine and eucaïne.⁴

The Dairymen's Act was amended in a few particulars, the most important provision being that no company incorporated under the Act shall erect any building in the province for the purpose of manufacturing butter or cheese until the site therefor and the plans and specifications thereof have been approved by the minister.⁵

Various amendments were made to the Statute Law, among which was an amendment to the Railway Act forbidding the operation of street cars on Sundays, except for the purpose of keeping the tracks clear of snow or ice, or doing other work of necessity.⁶

The Railway Act was amended by prohibiting the operation of street cars on Sunday in any municipality in the Province of Saskatchewan, except for the purpose of keeping the tracks clear of snow or ice, or for the purpose of doing other work of necessity.⁷

The Municipal Telephone Act is amended by adding thereto the following: the operations of the provisions of the Act is suspended save and except in respect of the towns of Carn-duff, and Melfort; and the villages of Abernethy, Belcarres and Gainsborough.⁸

An Act was passed incorporating the Saskatchewan Association of Architects, and providing for the formation of a council of management of the Association with certain powers of control over the profession of architecture in the province. Within six months after the organization of the Council all persons who are practising the profession of architecture are required to hold a certificate of registration from the Council.⁹

³Chap. 7.

Moving Picture Machines.*

An act was passed regulating the means of egress from public buildings which contains special provisions with regard to moving picture machines.

The Act provides for the licensing of film exchanges, users, and exhibitors of moving picture machines, and operators of the same the amount of the license to be determined by the Lieutenant-Governor-in-Council. It is required that every operator shall be of the full age of 18 years, and that he examine his machine and wire connections daily, and shall not permit any person to enter or remain in the cabinet during any performance except a police officer entitled to inspect the machine, no smoking or lighting of matches is allowed at any time in the cabinet, and reading matter is forbidden to be in the cabinet or on the person or operator. No operator is allowed to operate a machine while under the influence of liquor. Strict pro-

visions are made to guard against the danger of fire. The operating cabinet must be lined inside with asbestos paper and covered with metal; all wires conveying electricity into the cabinet must be properly insulated. All machines must be equipped with fireproof magazines automatic fire-shutter and asbestos covered wire lamp. All films must be kept in iron boxes and transferred from one spindle to another in a metal re-winding box. All exits from the building must be marked and the doors must open outwards and must not be locked during exhibitions. The Lieutenant-Governor-in-Council is authorised to appoint a board of censors to examine all films to be exhibited in the province, and no municipality may issue a license for any cinematograph or other similar apparatus, until the applicant produces a license from the Department of the Provincial Secretary. The duty of enforcing these regulations is assigned to the chief of police and chief constable in any incorporated village or town.

*Chap. 11.

PRICES, WHOLESALE AND RETAIL, CANADA, NOVEMBER, 1911.

I. WHOLESALE PRICES.

THE Department of Labour Index Number of wholesale prices stood at 130.8 for October as compared with 130.5 in the preceding month, and 122.0 in the corresponding month last year. The numbers, it will be understood, are percentages in each case of the average price level prevailing during the decade, 1890-1899, the period selected by the Department as the standard of comparison throughout its investigation into wholesale prices. Over 200 articles, carefully selected so as to represent Canadian production and consumption, are included in the calculation.

It will be seen that wholesale prices as a whole are on practically the same

level as in the preceding month, but are considerably higher than at the same period of 1910. The chief increases during the past year contributing to the latter result occurred in grains and fodders, miscellaneous foods, and metals, there having been a decrease in animals and meats, while the other groups for the most part have remained steady. A rise in grain prices and a fall in meats were also features of the past month.

The following is a table of the Department's Index Numbers arranged by the various groups of commodities into which the investigation has been divided, showing the average price level for October, 1911, compared with that of the previous month and with that of the same month last year:—

TABLE SHOWING INDEX NUMBERS BY GROUPS OF COMMODITIES FOR NOVEMBER, 1911, OCTOBER, 1911, AND NOVEMBER, 1910.

(AVERAGE PRICES 1890-1899=100.)

	Number of Commodities.	Index Numbers.

(c) Sundries.....	5	110.8	110.8	108.8
Average of all commodities.....	213	130.5	130.5	122.0

The chief features of the price movement during November, as compared with the preceding month, were as follows:—

Grains and fodders.—The most significant feature in this group was the continuance of the upward trend of all grains at Toronto with, however, a slight recession in the price of wheat, oats, and barley at Winnipeg, while flax fell considerably on returns of a good crop. The demand for milling and for feed continued strong both east and west, but unfavorable weather and crop reports in October had probably great effect in raising prices during that month in Western Canada. Bran, shorts, and straw advanced in price.

Animals and meats.—A decline in the prices of all hog products came as a result of the lower prices of hogs last month and of a decline in the English market. Live hogs, however, have advanced again. Cattle were upward at Toronto, but slightly downward at Winnipeg. Both beef and mutton were lower, and sheep fell slightly in price. Lard was slightly higher on account of a temporary scarcity, while fowl were lower with the marketing of the autumn supplies. Veal and turkeys were steady.

Dairy products.—The continuance of the advance in the price of butter and

eggs was the chief feature in this group. The index number, however, is only one point higher than for the same month last year. In accordance with the annual arrangement, the wholesale price of milk at Montreal was raised for the winter months on November 1st. Cheese declined slightly, but the export and home demand continues strong as stocks are low. It is reported that the high price of cheese is lessening the production of butter, which is reported scarce.

Fish.—Whitefish and salmon trout declined, other fish remaining firm.

Foods, miscellaneous.—Canned goods, especially tomatoes, have been very high. Poor crops both in Canada and the United States are given as the cause. Flour has again advanced in price. Glucose and honey were higher. Sugar remained firm. Pepper is again higher. Apples, bananas, and beans have advanced, but potatoes are slightly lower.

Textiles.—Another fall in the price of cotton, with increases in wool, raw silk, jutes and hessians, were incidents of the month. No changes in manufactured goods were reported.

Hides, leather, etc.—Increases in prices of horsehides and tallow were the only changes noted.

Metals, etc.—The feature of the

month was a further advance in the price of lead. Foreign spelter has also increased in price.

Fuel and lighting.—No changes were recorded.

Building materials.—Lumber and miscellaneous building materials were steady.

Paints, Oils, etc.—A drop in the price of turpentine of 4c after a long period of high prices is the important feature of this group. The fall is reported due in part to the use of substitutes in the manufacture of paint on account of the high price of turpentine. Linseed oil has advanced again, 1c per gallon. A decrease is expected when the product from the new crop of flax comes on the market.

House furnishings were steady throughout the month.

Drugs and chemicals.—No changes were recorded.

Miscellaneous.—Malt again advanced on account of the high price of barley. Hops and rubber are down, while laundry starch is up. Pulp and paper are lower, following improved manufacturing conditions resulting from higher water in the streams.

II. RETAIL PRICES.

THE chief movement during November in retail prices was in the nature of a continuance of the general advance in eggs and butter which began in September. Cheese was also upward in price at several cities. Potatoes declined somewhat in several localities, good crops being reported in the west, but the price increased in many of the cities. The price of pork declined in several cities, apparently as a result of the decline in the price of hogs last month, though hogs are now reported upward in price. Milk also advanced in many of the cities for the winter months.

Notes on Retail Prices.

Beef.—The price of sirloin steak decreased at Amherst and Sydney, N.S.; St. Hyacinthe, Que.; Brandon, Man.,

and Lethbridge, Alta. At Winnipeg, Man., the price rose in sympathy with the rise in the price of cattle. Medium shoulder roast declined in price at St. Thomas, and Sault Ste. Marie, Ont.; at Brandon, Man., and Vancouver, B. C. At Toronto, Ont., the price increased.

Veal advanced in price at St. John, N.B., London, Ont., and Brandon, Man., declining at Sydney, N.S., and Sault Ste. Marie, Ont.

Mutton declined in price at Sorel and St. Hyacinthe, Que., also at Chatham and Sault Ste. Marie, Ont. The price rose at Westville, N.S., St. Thomas, Ont., and Winnipeg, Man.

Pork.—Fresh roasting pork declined in price at Charlottetown, P.E.I., St. John and Newcastle, N.B.; St. Hyacinthe, Maisonneuve, and Montreal, Que.; Peterborough, Toronto, Hamilton, St. Thomas and Chatham, Ont.; and at Vancouver, B.C. The price rose at Winnipeg, Man., and Nelson, B.C. Salt pork decreased in price at Westville, N. S.; Charlottetown, P.E.I.; St. John, N. B.; St. Hyacinthe, Maisonneuve, and Montreal, Que.; Peterborough, and Sault Ste. Marie, Ont., and at Vancouver, B.C. The price increased at Brandon, Man.

Bacon declined in price at Sydney and Westville, N.S.; at Peterborough, Hamilton, St. Thomas and Port Arthur, Ont. Increases in price took place at London, Ont., Winnipeg, Man., and New Westminster, B.C.

Fish advanced in price at St. John, N. B., and Vancouver, B.C.

Lard increased in price at Amherst, N.S.; Guelph, St. Thomas, and Port Arthur, Ont., decreasing at Sherbrooke and Hull, Que., and Peterborough, Ont.

Eggs.—The price of fresh eggs advanced at thirty-four of the cities and the price of packed eggs also increased at twenty-six cities. Kingston, Ont., reported a decline in fresh eggs.

Milk.—The price of milk was raised at Sydney and Amherst, N.S.; Charlottetown, P.E.I.; at Quebec, Maisonneuve and Hull, Que.; at Peterborough,

Toronto, Niagara Falls, Brantford, Woodstock, St. Thomas, Windsor, Sault Ste. Marie, and Port Arthur, Ont.; at Regina, Sask., and at Nelson and New Westminster, B.C.

Butter.—The price of dairy butter advanced in twenty of the cities, while creamery butter advanced in eighteen of the cities. Both dairy and creamery butter declined in price at Brandon, Man., Vancouver and New Westminster, B.C. Dairy butter declined at Hull, Que.

Cheese.—Both old and new cheese advanced in price at Amherst, N.S., Hull and St. Hyacinthe, Que., and at Peterborough and Niagara Falls, Ont. The price of old cheese advanced at Westville, N.S., and London, Ont. New cheese rose in price at Toronto, Ont., Regina, Sask., and New Westminster, B.C. Stocks of cheese are reported comparatively low.

Bread.—At Sault Ste. Marie, Ont., bread rose from six to seven cents per loaf of one and a half pounds.

Flour.—The price of flour advanced at St. John, N.B.; at Peterborough and Toronto, Ont., and at Victoria, B.C. The only decline in price reported occurred at Sydney, N.S.

Rolled oats advanced in price at Toronto and St. Thomas, Ont., and at Vancouver and New Westminster, B.C. A decline is reported at Nelson, B.C.

Rice.—Increases in the price of rice took place at Hull, Que., Winnipeg, Man., Lethbridge, Alta., and at Nelson and Victoria, B.C.

Beans.—At Sherbrooke, Hull and Sorel, Que., and at Nanaimo and New Westminster, B.C., the price advanced.

Apples, evaporated. — Decreases in price occurred at Sherbrooke and Sorel, Que.; at Peterborough and Sault Ste. Marie, Ont., and at Lethbridge, Alta.

Prunes.—The price of prunes decreased at Montreal and Hull, Que., St. Thomas, Ont., and Lethbridge, Alta. Increases occurred at Sorel, Que., Stratford, Ont., Brandon, Man., and New Westminster, B.C.

Sugar.—The price of granulated

sugar rose at Moncton, N.B., Three Rivers, Sorel and St. Hyacinthe, Que.; Stratford, Ont., and Brandon, Man. Yellow sugar advanced at Moncton, N. B., Three Rivers, Sherbrooke, and St. Hyacinthe, Que.; Port Arthur, Ont.; Brandon, Man., and at Vancouver, Victoria, and New Westminster, B.C. Both granulated and yellow sugar declined in price at Amherst, N.S., St. John, N.B., and Peterborough, Ont.

Tea.—Both black and green tea advanced 5c per pound at Berlin, Ont. Black tea increased in price at Regina, Sask.

Coffee.—At Regina, Sask., coffee advanced from 35c to 40c per lb.

Potatoes.—Increases occurred at Halifax, N.S.; Charlottetown, P.E.I.; Quebec, Three Rivers, Sorel, St. Hyacinthe and Maisonneuve, Que.; at Peterborough, Toronto, St. Catharines, Brantford, Berlin and London, Ont.; at Winnipeg, Man., and at Nelson and Vancouver, B.C. Decreases took place at Sydney, N.S., Westville, N.S.; Kingston, Chatham and Sault Ste. Marie, Ont.; Brandon, Man.; Lethbridge, Alta., and at Nanaimo and New Westminster, B.C.

Vinegar.—At New Westminster, B.C., there was an increase in price.

Starch.—Laundry starch advanced in price at Regina, Sask., Lethbridge, Alta., and New Westminster, B.C.

Coal.—Anthracite coal advanced in price at Amherst, N.S.; Moncton and Newcastle, N.B.; Sherbrooke, Que.; St. Catharines, Woodstock, Stratford, Port Arthur, Ont.; at Lethbridge, Alta.; Nelson, B.C. Bituminous coal advanced in price at Nelson and Vancouver, B.C. Bituminous coal declined at Newcastle, N.B.

Wood.—The price of hard and soft wood advanced at Brandon, Man., on account of the difficulty of transportation and shortage of cars. Soft wood also rose in price at Vancouver, B.C.

Coil oil.—The price of coal oil rose at Sorel, Que., Woodstock, Ont., and New Westminster, B.C.

Rent.—No changes were reported

RETAIL PRICES OF STAPLE ARTICLE

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month into the cost of living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a quarter of each locality usually occupied by workmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and in order that the statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* quoted, etc., from the Department.

Tracklayers (ordinary)	1.50	"	"

THE CANADIAN FEDERATION OF LABOUR—THIRD ANNUAL CONVENTION.

THE third annual convention of the Canadian Federation of Labour was held in the city of Quebec, Que., on Tuesday, November 7, and the three following days, between thirty and forty delegates being present, from Toronto, Ottawa, Montreal, Quebec and Nova Scotia. In the absence of the President, the chair was occupied by Mr. John Moffatt, delegate of the Grand Lodge of the Provincial Workmen's Association of Nova Scotia. The sessions were held in the Bourse du Travail. The Department of Public Works and Labour of the Province of Quebec was represented by Mr. P. J. Jobin, Inspector of Factories, and Mr. Felix Marois, Secretary of the Provincial Arbitration Committee. The first day was occupied with the appointment of a committee on credentials, the adoption of its report, and the formation of committees on Ways and Means, Resolutions, Audit, Resolutions and Thanks. The report of the Secretary-Treasurer showed a balance on hand, and he stated that there were good prospects for the coming year.

The second day of the Convention was given up to a general discussion, each delegate being allowed fifteen minutes in which to present the views of the organization which he represented. The discussion embraced a wide variety

of topics, and many suggestions then made were subsequently embodied in resolutions adopted by the Convention.

It was stated by Mr. S. B. McNeill of the Provincial Workmen's Association, that there were twenty-seven lodges of this association in the province, with more than 5,000 members.

The discussion and adoption of the reports of the various committees, and the election of officers occupied the remaining sessions of the Convention.

Other Proceedings.

A visit was paid by the delegates to the Technical School, over which they were shown by Professor Vesey. Other activities of the delegates were of a social nature, including a banquet and a visit to the theatre.

Resolutions Adopted.

The following is a copy of the resolutions adopted by the Convention:—

1.

Believing that the time was never more opportune than now for the expansion of Canadian trades unionism through the Canadian Federation of Labour, *Resolved*, that this Convention heartily and unreservedly affirm its belief in the principle of Canadian trades unionism, and is determined to set forth the aims and objects of the Canadian Federation of Labour before the workmen of Canada, with the hope that they will see the wisdom of

joining our ranks. *Be it further resolved*, that the Constitution Committee of this convention recommend such changes in the constitution as will in their judgment put the Federation on a better business basis, and place it in a position to more fully carry out the principles we advocate, so that they will appeal more forcibly to the wage earners of this country.

2.

That in order to advance the interests of this Canadian Federation of Labour, good organizers be placed in such provinces or places as this convention or the Executive Council may see proper.

3.

That a printing trades group be formed, to include all branches of the printing and paper trades.

4.

(1) That the Federal Government be requested to employ on its steamships none but duly qualified captains.

(2) That ship owners or companies employing persons not qualified in accordance with the maritime laws of the Dominion be prosecuted, and dealt with to the utmost rigor of the law.

(3) That each official be compelled to live up to the conditions mentioned in his certificates.

(4) That the members of the Quebec Pilots' Association be prohibited from acting as captains in steamships plying on the St. Lawrence River, as the practice injures the licensed captains.

5.

That the Canadian Federation of Labour endeavour to obtain a favourable solution of the request made by the Canadian Union of Marine Department Employees for an increase of salary and the redress of some grievances.

6.

That the government of the Province of Quebec be requested to appoint an inspector of boilers vested with the authority of issuing certificates to stationary engineers.

7.

That American trades unions offering sick or death benefits to their members be prevented from doing so until they have obtained a license from the government and given necessary guarantees.

8.

That the Federal government be petitioned to pass a law prohibiting the circulation in our cities of open cars with footboards, as they are a constant danger to the employees and the public generally.

9.

That the Executive be a Committee to consolidate the constitution of the Federation in accordance with changes already adopted by the conventions of last year and this, the Committee also to revise and submit a constitution for the consideration of the next convention of this body.

10.

Whereas, this convention of the Canadian Federation of Labour, after due deliberation, finds that the provincial systems of certificated workmen, such as stationary engineers, mining and other classes, is inimical to the best interests of Canadian workmen, limiting the scope of their usefulness to one province, and depriving them for a time at least, if they move from their own to another province, from pursuing the occupation for which they are qualified by certificate, *be it hereby resolved*,

That the attention of the provincial governments be called to this matter, and that they be requested to enact such legislation as will render the certificates granted by any province valid in all provinces of Canada.

11.

That the Quebec Provincial Government be requested to amend the law on Sunday observance, so as to include the bakers among those exempt from work on Sunday.

12.

That the convention congratulate the Quebec government for establishing technical schools in this province, and also that a request be made to the same government asking for the appointment on the board of commissioners of said school of a union man, and also to add to said technical school a museum of devices for the prevention of accidents in industrial establishments.

13.

That in view of the fact that the employees of the McKeen Boot and Shoe Company have withdrawn their allegiance from the Canadian Federation of Labour, the Executive of the Canadian Federation of Labour be requested to withdraw the label from said factory.

14.

That the Federal Government be petitioned to so amend the law as to make compulsory the inspection of raw hides and skins.

15.

That the Quebec Government be requested to amend the Municipal Act so as to make it mandatory on the part of city corporations to appoint scaffold inspectors.

16.

That the Legislative Committee be composed of five members, the President, Vice-president, Secretary-Treasurer, and two members to be elected by the convention.

17.

That the Federal Government be petitioned to maintain in the cities of Quebec agencies of the Marine Department.

Election of Officers.

The following officers were elected for the ensuing year:—

President—John Moffat, Sydney, N.S.

Vice-President—L. C. Laroche, Quebec.

Secretary-Treasurer—Geo. G. Mercure, Ottawa.

Members of the Executive Committee:
Charles G. Pepper, Ottawa.
Omer Brunet, Quebec.

Vice-Presidents by Provinces:

Nova Scotia—S. B. McNeill.

Ontario—James C. Wigglesworth.

Vice-Presidents to other provinces to be named later.

ALLEGED VIOLATION OF INDUSTRIAL DISPUTES INVESTIGATION ACT.—CASE AT EDMONTON, ALTA.

Four miners, arrested at Edmonton, on Nov. 10, on complaint of the Alberta Coal Mining Company, charged with violating the provisions of the Industrial Disputes Act, were found guilty by Inspector Worsley at the Mounted Police Barracks this afternoon, and each was fined \$40 and costs, or thirty days in jail. The defendants, through their council, C. A. Grant, gave notice of appeal.

One of the accused miners was acquitted on the ground that he gave a reasonable explanation for quitting work on November 9th, when about seventy-five men, it is charged, went on strike at the Cardiff mine. Notwithstanding the application of the coal company for a board of conciliation, the miners, after giving thirty days' notice of a demand for increased wages, refused to settle their differences in the manner provided by law.

Inspector Worsley prepared a written decision in the case, reading as follows:

"I find Thomas Evans, Archie Benson, John Clelland and R. G. Brown to be guilty of the offence. In the case of George Reid, I am doubtful of his guilt and give him the benefit of such doubt. I base this decision on the following: That the defendants signed a document asking for an increase of wages, and afterwards a letter was written Geo. S. Montgomery, signed by W. Wilcox, John Provick and Thomas Evans, in behalf of the men, that the notice expired on November 8th and refusing a board of conciliation. On November 9th the men ceased work. I cannot from these various reasons, come to any other conclusion than that there was an organized strike on the part of the employees, contrary to the Industrial Disputes Act. The manager applied for a conciliation board, naming a certain person as representing the owners. The miners decline to accept a conciliation board. The means provided by the Lemieux Act seem to be perfectly fair to both parties and the only business way of settling such disputes."

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior.

THE total immigration to Canada during the seven months from April to October, inclusive, was 265,833, compared with 227,775 in the corresponding period of 1910, an increase of about seventeen per cent. Of the total arrivals

during the seven months, 172,260 were at ocean ports, compared with 142,529 in the corresponding months of last year. There was an increase in the number of arrivals from the United States from 85,246 during the months from April to October, 1910, to 93,573 during the same months of the present year. The following table shows in detail the immigration to Canada during these periods:—

IMMIGRATION TO CANADA, FROM APRIL TO OCTOBER, 1911—SEVEN MONTHS, COMPARED WITH THAT OF THE CORRESPONDING MONTHS OF 1910

Notes.

An important movement has been inaugurated by the Duke of Sutherland with a view to encouraging British immigration to Canada. At Brooks, Alta., about 2,000 acres of land have been purchased and divided into small holdings of 80 to 160 acres. Houses have been erected on these holdings and ready-made farms are prepared. 2,000 acres were also purchased by the Duke from the Canadian Pacific Railway Company between Medicine Hat and Strathmore, Alta., and seventeen farms have been laid out by the Company and are in working order. A large tract of land, consisting of about 2,500 acres, was purchased at White's Landing, on the Fraser River, and it is proposed to establish there a large demonstration farm and to divide up the property into farms where Scottish and British farmers will be sent. At Clyde, a few miles from Edmonton, the Duke purchased 2,500 acres where a large party of British labourers will be put to work and be given a chance to secure for themselves some of the land they clear.

Mr. Arthur Hawkes has been appointed by the Minister of the Interior a Special Commissioner of Immigration, to investigate immigration conditions in Canada, Great Britain and the United States.

A Canadian Highways Association was formed in British Columbia during November, and its first meeting was held at New Westminster early in the month. Resolutions were passed urging the Dominion and Provincial governments to begin the construction of a section of a trans-Canada highway in British Columbia, and asking aid for the improvement of the road from Vancouver to Seattle. A resolution was also passed requesting the Government of British Columbia to collect and publish data as to the best kinds of road for different parts of the Province, and the methods of construction.

Early in December a deputation of

the United India League and the Khaler Divan Society, of Vancouver, B.C., waited upon the Dominion Government and presented a petition on behalf of the Hindustanese domiciled in Canada, requesting the modification or repeal of certain immigration regulations which affected them. The restrictions which they desired to be removed were a regulation making it impossible for the wives and children of the Hindustanese residing in Canada to join them; the regulation requiring a continuous journey from the country of origin, which they declared was impossible in their case; and the restrictions imposed on students, merchants and tourists from India. They declared that they were prepared to co-operate with the government as to undesirables, and would give bonds to the immigration authorities that no Hindustani would become a public charge. The request was also made that the amount required for Hindus entering Canada should be uniform with other nationalities, and not as at present \$200.

ONTARIO LUMBER CUT, 1910.

ONTARIO still produces a little over one-third of the quantity of the lumber cut annually in Canada, but its annual cut, while increasing, is increasing more slowly each year. Ontario's 1909 cut was 17 per cent. greater than that of 1908; its 1910 cut was only 7.5 per cent. more than that of 1909. The Forestry Branch of the Department of the Interior has compiled statistics showing that 1,642,191,000 feet of timber worth \$30,011,000 was cut in Ontario during 1910, but that British Columbia will be Canada's leading lumber producing province in a short time. The diversified forests of Ontario have enabled this province to hold its supremacy up to the present, as illustrated in 1910, when the chief cut of seventeen species came from Ontario. White Pine to the value of \$17,743,074 came from Ontario forests and formed 85 per cent. of Canada's white pine cut. Nearly half of

the hemlock cut in Canada in 1910 was cut in Ontario, as was over 90 per cent. of the red pine. Ontario contributed over 70 per cent. of the hardwoods. Of the total made up by 23 species cut in Ontario, over one-half was white pine. Red pine contributed 10 per cent., hemlock 12 per cent., leaving 25 per

cent. to be equally divided among the hardwoods and less important conifers. To arrive at the correct amount cut by lumber mills of Ontario in 1910, there must be added to the above lumber cut 1,976,000,000 shingles worth \$3,557,211, and 851,953,000 laths worth \$1,943,544.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of British Columbia, to the office of the factories inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 286 individual work people in Canada during the month of November, 1911, were reported to the Department of Labour. Of these, 95 were fatal and 191 resulted in serious injuries. In addition, one fatal accident was reported as having taken place prior to the beginning of the month, information not having been received by the Department before November, 1911.

In the preceding month there were 111 fatal and 243 non-fatal accidents reported, a total of 344, and in November, 1910, there were 140 fatal and 267 non-fatal accidents, a total of 407. The number of fatal accidents reported in November, 1911, was, therefore, 6 less than in the preceding month, and 45 less than in November, 1910. The number of non-fatal accidents reported in November, 1911, was 52 less than in the preceding month and 76 less than in November, 1910. Altogether there were 58 less industrial accidents reported in November, 1911, than in the preceding month, and 120 less than in the same month of the preceding year.

Of 226 returns received during the month giving the ages of the victims of industrial accidents, 17 referred to persons under twenty-one years of age, 63 to persons between twenty-one and forty-five, and 36 to persons over 45. 100 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and groups of trades:—

STATEMENT OF ACCIDENTS DURING THE
MONTH OF NOVEMBER, 1911, BY
INDUSTRIES AND GROUPS
OF TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture	11	19	30
Fishing and hunting..	1	1
Lumbering	7	7	14
Mining	5	8	13
Railway construction..	4	4	8
Building trades	6	13	19
Metal trades	6	45	51
Woodworking trades..	2	14	16
Printing and allied trades
Clothing trades	2	2
Textile trades	1	2	3
Food and tobacco preparation	3	3
Leather trades	1	1
<i>Transportation:—</i>			
Steam Ry. Service.	11	23	34
Electric Ry. Service.	1	5	6
Navigation	17	7	24
Miscellaneous	3	11	14
Public employees	2	5	7
Miscellaneous skilled trades	6	8	14
Unskilled labour	12	14	26
Total	95	191	286

NATURE OF FATALITIES AND ACCIDENTS.

The chief disaster of the month in which more than one employee met death occurred on November 16, when the barque *Antigua*, bound for Scotland with a cargo of spoolwood, foundered off the St. Martin River during a gale and snowstorm. The captain and eleven sailors were drowned out of a crew of fifteen.

Record by Industries and Groups of Trades.

A detailed record of the industrial accidents of the month, by industries and groups of trades, is as follows:—

Agriculture.—There were eleven fatal and nineteen non-fatal accidents recorded during the month of November, 1911, as compared with twenty-one fatal and twenty-five non-fatal accidents in October and twenty-one fatal and thirty-five non-fatal accidents during November, 1910. Of the fatal accidents, three each were caused by railway trains and falls; two by machinery, and one each by live stock, run-over and a runaway.

Fishing and hunting.—There was one fatality recorded during November, 1911, compared with one fatal accident in October, and eight fatal and one non-fatal accidents in November, 1910. The fatality was caused by drowning.

Lumbering.—There were seven fatal and seven non-fatal accidents recorded during November, 1911, compared with six fatal and ten non-fatal accidents in October, and eight fatal and six non-fatal accidents in November, 1910. Of the fatalities three were caused by drowning, two by falling trees, and one each by railway train and flying piece of wood.

Mining.—There were five fatal and eight non-fatal accidents recorded during November, 1911, compared with four fatal and five non-fatal accidents in October, and sixteen fatal and twenty-three non-fatal accidents in November, 1910.

Of the fatalities, three were caused by fall of coal and rock, and two by falls.

Railway construction.—There were four fatal and four non-fatal accidents recorded during November, 1911, compared with six fatal and eleven non-fatal accidents in October, and one fatal and one non-fatal accident in November, 1910. Of the fatalities, two were caused by victims being run over, and one each to an explosion of dynamite and suffocation in a cave-in.

Building trades.—There were six fatal and thirteen non-fatal accidents recorded during November, 1911, compared with ten fatal and thirty-nine non-fatal accidents during October, and twelve fatal and twenty-four non-fatal accidents during November, 1910. Of the fatalities, five were caused by falls, and one by machinery.

Metal trades.—There were six fatal and forty-five non-fatal accidents recorded during November, 1911, compared with five fatal and thirty-eight non-fatal accidents in October, and seven fatal and thirty-eight non-fatal accidents in November, 1910. Of the fatal accidents, three were caused by falling material, and one each by a fall, electrocution, and machinery.

Woodworking trades.—There were two fatal and fourteen non-fatal accidents recorded during November, 1911, compared with thirteen non-fatal accidents during October, and one fatal and sixteen non-fatal accidents in November, 1910. One of the fatal accidents was caused by flying material and the other by machinery.

Printing and allied trades.—There were no accidents recorded during November, 1911, compared with none in October, and two non-fatal accidents in November, 1910.

Clothing.—There were two non-fatal accidents recorded during November, 1911, compared with one non-fatal accident in October, and one fatal and three non-fatal accidents in November, 1910.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer.....	Starbuck, Man.....	Nov. 14	1	Mangled in threshing machine
".....	Beelon, Ont.....	" 3	1	Struck by a train
".....	Asquith, Sask.....	" 21	1	"
".....	Mill Bay, B.C.....	" 14	1	Kicked by a horse
".....	Madock, Ont.....	" 7	1	Fell from a box in barn
".....	Brandon, Man.....	" 19	1	Fell into a well
".....	Cainsville, Ont.....	" 29	1	Struck by a train
Farmhand.....	Lion's Head, Ont.....	" 7	1	Fell under wagon
".....	Galt, Ont.....	" 13	1	Dragged by a runaway team
".....	Gilbert Plains, Man.....	" 1	1	Caught in gearing of threshing machine
".....	Quebec, Que.....	" 28	1	Thrown from wagon
Fishing and Hunting—				
Fisherman.....	St. Stephen, N.B.....	" 18	1	Drowned, fell overboard
Lumbering—				
Lumberman.....	Richards, N.B.....	" 10	1	Struck by falling stump
".....	Webbwood, Ont.....	" 11	3	Drowned
".....	Lake des Cygnes.....	" 9	1	Struck by falling tree
".....	Cumberland, B.C.....	" 16	1	Killed by logging train
*Sawmill employé.....	Campbelltown, N.B.....	" 7	1	Struck by piece of wood
Mining—				
Driller.....	Kingston, Ont.....	" 9	1	Fell 40 feet
Miner.....	Cobalt, Ont.....	" 25	1	Fell down shaft
".....	Cumberland, B.C.....	" 13	1	Fall of rock
".....	".....	" 21	1	Fall of coal
Quarry hand.....	Outremont, Que.....	" 3	1	Crushed by falling rock
Railway Construction—				
Labourer.....	Waterdown, Ont.....	" 13	1	Buried under gravel in cave-in
".....	Pointe aux Trembles.....	" 18	1	Run over by cars
".....	Prince Rupert, B.C.....	" 13	1	Explosion of mis-fired blast
".....	St. Jean, Que.....	" 22	1	Run over by train
Building Trade—				
Carpenter.....	Toronto, Ont.....	" 11	1	Fell from scaffold
".....	Stellarton, N.S.....	" 21	1	Caught in machinery
".....	Babcaigeon, Ont.....	" 15	1	Fell from a ladder
Rivetter.....	Levis, Que.....	" 1	1	Fell from scaffold
Roofer.....	Winnipeg, Man.....	" 14	1	Fell from roof
Builder's labourer....	Port Colborne, Ont.....	" 10	1	Fell from scaffold
Metal, Engineering, and Shipbuilding trades—				
Metal worker.....	Hamilton, Ont.....	" 7	1	Crushed by a steel plate
".....	Lachine, Que.....	" 10	1	Struck by falling piece of timber
Lineman.....	Bowmanville, Ont.....	" 27	1	Fell from pole
Electrician.....	Stratford, Ont.....	" 25	1	Electrocuted
Steel worker.....	Sault Ste. Marie, Ont.....	" 16	1	Caught in machinery
Ship carpenter.....	Midland, Ont.....	" 10	1	Struck by hopper door on —
Woodworking trades—				
Mechanical foreman (furniture factory)...	Berlin, Ont.....	" 14		Caught in belting of machinery
Wood worker.....	Campbelltown, N.B.....	" 8	1	Struck by piece of scantling
Textile trades—				
Cotton worker.....	Victoriaville, Que ..	" 15	1	Caught in machinery

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1911.

Trade or Industry.	Locality.	ate.	No.	Cause of fatality.
<i>Steam Railway service—</i>				
Fireman	Redcliffe, Alta.	Nov. 8	1	Rear-end collision
Brakeman	Cobourg, Ont.	" 7	1	Fell off train and run over
"	Redcliffe, Alta.	" 8	1	Rear-end collision
"	Copetown, Alta.	" 2	1	Fell off car and run over
"	Winchester, Alta.	" 17	1	Knocked down and run over
"	Sharbot Lake, Ont.	" 24	1	Crushed between car
Yardman	Berlin, Ont.	" 3	1	Stepped in front of train
"	Regina, Sask.	" 22	1	Crushed between engine and car
"	Toronto, Ont.	" 7	1	Struck by switch engine
Labourer	Winnipeg, Ont.	" 6	1	Boiler plate fell
Mechanic	Montreal, Que.	" 4	1	By falling bar of steel
<i>Electric Railway service—</i>				
Conductor	New Westminster	" 4	1	Runaway interurban train
<i>Navigation—</i>				
Deckhand	St. Henri, Que.	" 7	1	Fell into hold of steamer
Captain and 11 men	Martin River, Que.	" 10	12	Barque "Antigua" foundered in Lower St. Lawrence
"	Great Salmon River	" 15	1	Crushed by steel hawser
Deckhand	Cornwall, Ont.	" 17	1	Crushed between lock wall & steamer
"	Sydney, N.S.	" 13	1	Fell into hold of steamer
Marine engineer	Halifax, N.S.	" 2	1	Caught in machinery
<i>Miscellaneous—</i>				
Teamster	Vancouver, B.C.	" 2	1	Struck by electric tram
Driver	Montreal, Que.	" 2	1	Run over by vehicle
*Hostler (very stable)	Woodstock, N.B.	" 10	1	Burned to death
<i>Public Employés—</i>				
Cement worker	Montreal, Que.	" 4	1	Caught in a mixer
Conductor	Edmonton, Alta.	" 3	1	Struck by cement car
<i>Miscellaneous (skilled trades)</i>				
Joiner	Sydney, N.S.	" 8	1	Electrocuted
Machinist (starch works)	Port Credit, Ont.	" 7	1	Caught in machinery
Machinist (cement works)	Calgary, Alta.	" 24	1	Collapse of roof
Papermaker	St. Catherine's, Ont.	" 7	1	Caught in shafting
Elevator employé	Lethbridge, Alta.	" 22	1	Caught in machinery
Blacksmith	Portage La Prairie	" 7	1	Kicked by a horse
<i>Unskilled Labour—</i>				
Labourer	Brandon, Man.	" 1	1	Struck by piece of frozen earth
"	Montreal, Que.	" 2	1	Buried in collapse of sand-bin
"	New Westminster, B.C.	" 8	1	Buried in landslide
"	Hagersville, Ont.	" 7	1	Fell off load of lumber
"	Markham, Twp., Ont.	" 28	1	Struck by falling bucket, whilst clearing out well
"	New Westminster, B.C.	" 3	1	Buried in cave-in
"	Hull, Que.	" 14	1	Breaking derrick boom
"	Montreal, Q.C.	" 22	1	Fell into basement of building
"	Papineauville, Que.	" 28	1	Collapse of roof in demolition of bldg
"	Montreal, Que.	" 22	1	Killed by explosion of dynamite
"	Parry Sound, Ont.	" 19	1	Struck by ballast cable
"	Campbelltown, N.B.	" 10	1	Falling material

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO
THE DEPARTMENT IN NOVEMBER, 1911.

Brakeman	Sackville, N.B.	Oct.	30	1	Crushed in collision
----------------	----------------------	------	----	---	----------------------

Textile.—There were one fatal and two non-fatal accidents recorded during November, 1911, compared with one non-fatal accident in October, and one fatal and two non-fatal accidents in November, 1910. The fatality was caused by machinery.

Food and tobacco preparation.—There were three non-fatal accidents recorded during November, 1911, compared with one fatal and five non-fatal accidents in October, and three fatal and eight non-fatal accidents in November, 1910.

Leather.—There was one non-fatal accident recorded during November, 1911, compared with one non-fatal accident in October, and none in November, 1910.

Steam railway service.—There were eleven fatal and twenty-three non-fatal accidents recorded during the month of November, 1911, compared with eighteen fatal and thirty-eight non-fatal accidents in October, and twenty-three fatal and twenty-six non-fatal accidents during November, 1910. Of the fatal accidents three were caused by victims being run over, and two each by collisions, crushing, falling material and being struck by engines.

Electric railway service.—There were one fatal and five non-fatal accidents recorded during November, 1911, compared with six non-fatal accidents in October, and none in November, 1910. The fatality was caused by the derailment of cars.

Navigation.—There were seventeen fatal and seven non-fatal accidents recorded during November, 1911, compared with two fatal and three non-fatal accidents in October, and twelve fatal and six non-fatal accidents in November,

1910. Of the fatal accidents, twelve were caused by drowning, two by crushing, two by falls, and one by machinery.

Miscellaneous.—There were three fatal and eleven non-fatal accidents recorded during November, 1911, compared with nine fatal and twenty-three non-fatal accidents in October, and three fatal and twenty non-fatal accidents in November, 1910. Of the fatal accidents, one was caused by victim being run over, one by electric car, and one person was burned to death.

Public employees.—There were two fatal and five non-fatal accidents recorded during November, 1911, compared with one fatal and six non-fatal accidents in October, and seven fatal and twenty non-fatal accidents in November, 1910. The two fatal accidents were caused by machinery.

Miscellaneous skilled trades.—There were six fatal and eight non-fatal accidents recorded during November, 1911, compared with eleven fatal and ten non-fatal accidents in October, and six fatal and fourteen non-fatal accidents in November, 1910. Of the fatalities, three were caused by machinery, and one each by electrocution, falling material, and live stock.

Unskilled labour.—There were twelve fatal and fourteen non-fatal accidents recorded during November, 1911, compared with six fatal and fourteen non-fatal accidents in October, and thirteen fatal and twenty-three non-fatal accidents in November, 1910. Of the fatal accidents, six were caused by falling material, two by suffocation, two by falls, and one each by an explosion and machinery.

TRADE DISPUTES DURING THE MONTH OF NOVEMBER, 1911.

THERE were more trade disputes in Canada during November than is usual in that month, but owing to the termination of the strike of coal miners in Alberta and Eastern British Columbia, with the signing of an agreement on November 17, there was an improvement in the situation as compared with October. A general strike of longshoremen at Montreal, Que., threatened a tie up of shipping at that port, but a speedy termination of the dispute enabled the vessels to clear the harbour before the close of navigation. The only other dispute of importance which began during the month was a strike of cotton mill operatives at Magog, Que., where about two-thirds of the employees in that industry stopped work.

Analysis of Trade Disputes During the Month.

Number and magnitude.—The number of trade disputes reported to have been in existence in Canada during November was fourteen, being four more than in October, and seven more than in November, 1910. About forty-three firms and 11,936 employees were involved in these disputes, about 32 firms and 3,578 employees being involved in new disputes.

Loss of time in working days.—The loss of time to employees through trade disputes during November was approximately 140,600 working days, compared with a loss of about 191,200 days in October, and 38,200 days in November, 1910.

Trades affected by new disputes.—The following table shows the trades affected by new disputes of the month, and the number of employees affected in each group of trades:—

Trade.	No. of Disputes.	No. of Employees.
Mining	1	80
Building trades	3	98
Metal trades	1	200
Textile trades	2	720
Clothing trades	1	350
General transport	2	2130
Total	10	3578

Localities affected by new disputes.—Of the new disputes of the month, six took place in the Province of Quebec, one in the Province of Manitoba, two in the Province of Alberta, and one in British Columbia.

Causes of disputes.—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages	1
Against reduction in wages	2
For higher wages and changes in conditions	1
For longer hours	1
Alleged violations of Union rules	1
Against conditions of employment	2
Against action of a foreman	1
Sympathetic	1
Total	10

Methods of settlement.—Of the fourteen disputes in existence during November, nine were terminated, leaving five still unsettled at the close of the month. Two disputes were settled by conciliation, one by reference to a board under the Industrial Disputes Investigation Act, three by negotiations between the parties concerned, two by the resumption of work without negotiation and one by the places of strikers being filled.

Results of disputes.—The employees were successful in three of the disputes that were terminated, and the employees

in three. One ended in a compromise, and in the remaining two the results were indefinite, one dispute being referred to a Board, while in the other case work was renewed pending negotiations.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.

The trade disputes in existence in Canada during November, which began in previous months, comprised strikes of coal miners in Alberta and Eastern British Columbia, machinists and boiler makers between Westfort, Ont., and Edson, Alta., iron moulders at London, Ont., and pulp mill hands at St. George, N.B.

Settlement of Strike of Coal Miners in Alberta and Eastern British Columbia.

After a cessation of work since April, owing to a strike, operations were resumed on November 20 in the coal mines in Alberta and Eastern British Columbia owned by the companies comprising the Western Coal Operators' Association. The cause of the dispute was failure to reach an agreement to take the place of one which expired on March 31. After a number of conferences between representatives of both parties, at which the Hon. Mr. Rogers, Minister of the Interior, assisted, the basis of a settlement was reached on November 13, and a new agreement, in the nature of a compromise, was signed on November 17, to be in force until March 31, 1915. The agreement provided for an increase of about ten per cent. in wages, and for a number of changes in conditions of employment. Sixteen companies and about 5,000 men were involved in this dispute.*

Strike of Machinists and Boilermakers of the Grand Trunk Pacific Railway.

No settlement was reported in a strike of machinists and boilermakers of the

Grand Trunk Pacific Railway, which took place on October 10, and extended from Westfort, Ont., to Edson, Alta. The actual cause of the dispute was failure to reach an agreement as to hours, wages, and conditions of employment, but the strike was declared immediately after a notice of the Company that the shops at Rivers, Man., would be closed. About 180 machinists and boiler-makers were employed at this place, and 120 others went out on strike.

Strike of Iron Moulders at London, Ontario.

No settlement was reported in a strike of iron moulders at London, Ont., which began on June 5, on account of the refusal of three firms to grant the same minimum wage for a nine hour day as had been paid for a day of ten hours. About sixty men were originally involved in this dispute, but prior to the beginning of November only six men were reported to be still in receipt of strike pay, and eight had secured employment at other kinds of work. Of the remainder the majority had obtained work in other shops on the terms demanded, while some had left the town.

Strike of Pulp Mill Hands at St. George, N.B.

No change in the situation was reported in a strike of fifty-two employees of a pulp mill at St. George, N.B., who went out on April 26, on account of the refusal of the employer to grant a demand for an eight hour day, in place of days of thirteen and eleven hours, with an increase in the minimum wages.

NEW DISPUTES.

Strike of Cotton Mill Workers at Magog, Que.

A strike occurred in the mills of the Dominion Textile Company at Magog, Que., on November 20, which resulted in the closing down of the cotton mill and a considerable reduction of the working force in the print works. Out of a total

*An account of the settlement of this dispute with the terms of the agreement is given in a special article on another page.

of about 900 employees, including the office staff, it was estimated that about 600 were out of employment owing to the dispute. Of these about 400 were strikers, the remaining 200 being indirectly affected. The dispute arose out of a reduction in wages of approximately ten per cent., which was made in May, 1908. The employees demanded the restoration of this ten per cent., but the Company asserts that it has since been unable to restore it owing to unfavourable market conditions.

On November 21, Mr. DuBreuil, Fair Wages Officer of the Department, proceeded to Magog to assist if possible in arriving at a settlement of the dispute. The employees submitted to the manager of the mills at Magog, through Mr. DuBreuil, a proposition for a settlement of the dispute on the basis of a ten per cent. increase to those earning \$1.25 or less per day and to all those employed on piece work, with an increase of five per cent. to all other operatives, a permanent board of arbitration to be established to deal with all other disputes. As an alternative it was demanded that the Company should grant an increase of ten per cent. all round from May 1, 1912. Neither of these demands, however, were granted by the Company.

On the suggestion of the Fair Wages Officer, a committee of the Magog Municipal Council visited Montreal on November 24, in an endeavour to effect a settlement of the dispute, but they were informed by the President that the company was not in a position to accede to the men's demand. No change in the situation was reported at the close of the month.

Strike of Longshoremen at Montreal.

On November 17, a strike of longshoremen took place at Montreal, Que., in which about 1,800 men were involved. About 300 freighthandlers were also indirectly affected. All the shipping companies of the port were concerned in the dispute. The cause of the strike was dissatisfaction with certain conditions of

employment, the men desiring recognition of the Syndicated Longshoremen's Union, and permission to have some one appointed by the Union to represent them on the wharves. The men also demanded a reduction in the number of deals required by the Canadian Pacific Steamship Company to be handled in a sling. On November 18, a conference was arranged between representatives of both parties through the good offices of the Department of Labour, and two days later an agreement was signed by which the demands of the men were granted.*

Strike of Garment Workers at Montreal, Que.

On November 21, a strike of garment workers took place at Montreal, Que., in which about 150 male and 200 female operatives were involved. The dispute was due to the withdrawal by the Company from the men of the privilege of using the elevator. It was claimed by the employers that this step was taken on account of numerous complaints as to the conduct of the men having been made by the female operatives, and on account of the practice of the employees to fill the elevator beyond its proper capacity. No settlement of the dispute was reported during the month.

Strike of Boilermakers at Montreal.

On November 13, a strike of about 200 boilermakers of the Locomotive Works Company took place at Montreal, Que. The cause of the strike was the refusal of the men to work on the boilers of the Grand Trunk Pacific Railway and the New York Central Railway, on account of the boilermakers of these two lines being on strike, the men of the former railway being out in western Canada, and the men of the latter in the United States. It was reported that work was resumed on November 25, under the conditions prevailing before the strike.

*A further account of this dispute is given in a special article on another page.

Strike of Coal Miners at Cardiff, Alta.

On November 9, a strike of 80 coal miners of the Alberta Coal Mining Company took place at Cardiff, Alta., on account of failure to reach an agreement with reference to wages and conditions of employment. At the time of the strike steps were being taken to establish a Board under the Industrial Disputes Investigation Act, 1907. The Board was subsequently constituted, and the matters in dispute were referred to it. Work was resumed after the strike had lasted ten days.

Strike of Cotton Mill Hands at Hochelaga, Que.

On November 2, about 120 female cotton mill operatives at Hochelaga, Que., stopped work, the alleged cause being their dissatisfaction with a foreman. The trouble was settled by the Superintendent of the mill, and they returned to work on November 6.

Strike of Plasterers at Montreal, Que.

On November 4, a strike of plasterers took place in Montreal, Que., in which about thirty men were directly affected and fifteen indirectly. The dispute arose on account of the men desiring to work eight hours a day instead of seven and a half, the employer claiming that on account of the shortness of the hours of daylight it was not possible for them to work the full eight hours. On November 7 it was reported that the men had returned to work without any change in conditions.

Strike of Plasterers at Brandon, Man.

On November 18, a strike of plasterers

took place at Brandon, Man., in which eighteen men were directly affected, and six indirectly. It was alleged by the men that the strike was declared because the Superintendent of Works on a building had violated the rules of the Operatives Plasterers' Union. Work was resumed on November 22, the grievance of the men having been adjusted in a way satisfactory to them.

Strike of Carpenters at Calgary, Alta.

On November 16, a strike of about twenty-nine carpenters took place at Calgary, Alta., on account of a reduction in wages from 50 to 45 cents per hour. It was stated by the employers that the carpenters had changed from good to rough work, and that the wages ruling during June, July and August were restored. The places of the strikers were subsequently filled.

Strike of Longshoremen at Prince Rupert, B.C.

On November 1, about thirty or forty longshoremen at Prince Rupert, B.C., stopped work on account of an announcement made by the Grand Trunk Pacific Railway Company and the Pacific Coast Stevedoring Company that wages would be reduced from fifty cents to forty cents an hour. Work was resumed a few days later at the old rate of wages pending negotiations.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of November, and which have been reported to the Department:—

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES C, No. 134.

TABLE OF TRADE DISPUTES DURING THE MONTH OF NOVEMBER.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.				Date of commencement.	Date of termination.	Result.
			Directly.	Indirectly.	Directly.		Indirectly.				
					Males.	Females.	Males.	Females.			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.											
<i>Mining—</i> Coal mines	Alberta and Eastern British Columbia.	Failure to reach new agreement.....	16	7,000	April 1	Nov. 20	Work resumed Nov. 20, on agreement resulting from negotiations terminable March 31, 1915—compromise as to questions at issue.				
<i>Metal Trades—</i> Iron moulders.....	London, Ont.	Men demanded that a minimum wage for a ten-hour day be paid for a day of nine hours.....	3	6	June 5	No settlement reported at end of month.					
<i>Railway Service—</i> Machinists and boiler-makers	Westfort, Ont. to Edson, Alta.	Failure to reach an agreement as to hours, wages and conditions of employment....	1	300	Oct. 10	No settlement reported at end of month.					
<i>Miscellaneous trades</i> Pulpmill hands.....	St. George, N.B. ..	For day of eight hours, instead of thirteen and eleven with increase in minimum wages	1	52	April 26	No settlement reported at end of month.					

DISPUTES WHICH BEGAN DURING THE MONTH.

<i>Mining—</i> Coal miners.....	Cardiff, Alta.....	For higher wages & changes in conditions.....	1	30	Nov.	5 Nov.	20	Work resumed, dispute referred to Board under I.D.I. Act.
<i>Building trades—</i> Carpenters.....	Calgary, Alta.....	Against reduction in wages..	1	29	Nov.	16	Places of strikers were filled.
Plasterers.....	Montreal, Que.....	For day of eight hours in stead of seven and a half..	1	30	15	Nov.	4 Nov.	7	Work resumed, no change in hours.
Plasterers.....	Brandon, Man.....	Strikers alleged Superintendent violated rules of union	1	18	6	Nov.	18 Nov.	22	Settlement satisfactory to strikers reached and work resumed
<i>Metal Trades—</i> Boilermakers.....	Montreal, Que.....	In sympathy with striking boilermakers.....	1	2	200	Nov.	13 Nov.	25	Work resumed, no change.
<i>Textile trades—</i> Cotton mill hands.....	Hochelaga, Que.....	Against action of a foreman..	1	120	Nov.	2 Nov.	6	Settled by Superintendent, work resumed on advice of Labour Council.
Cotton mill hands..	Magog, Que.....	For increase of ten per cent. in wages.....	1	300	200	Nov.	20	No settlement reported at end of month.
<i>Clothing trades—</i> Garment workers..	Montreal, Que.....	Men refused permission to use elevator ..	1	150	200	Nov.	21	No settlement reported at end of month.
<i>General transport—</i> Longshoremen.....	Montreal, Que.....	Against conditions of employment.....	20	1,800	300	Nov.	17 Nov.	20	Work resumed on compromise through mediation of D. Department of Labour.
Longshoremen.....	Prince Rupert, B.C.	Against proposed reduction in wages.....	2	30	Nov.	1 Nov.	1	Work resumed at old rate pending negotiations.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention, moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during November, 1911:

DOMINION REPORTS.

Work of the Mines Branch.

Summary Report of the Mines Branch for the calendar year ending December 31, 1910. Ottawa: King's Printer, 1911. Pages, 252; price, 10 cents.

THE Summary Report of the Mines Branch of the Dominion Department of Mines contains an interesting account of the various activities of this branch during 1910, and it is pointed out that the work is becoming more and more practical. The recent progress that has been made in the electric smelting of iron ores is described, and it is claimed that by this means a better quality of steel is produced than under the Bessemer or open hearth processes, while the labour required is much easier and safer. The hope is expressed that Canadian manufacturers may utilize the electric furnace wherever suitable iron ore deposits and metallurgical fuel are near cheap water power. The development of the peat industry is described and it is shown that the Government experimental plant at Alfred, Ont., has succeeded in producing a satisfactory fuel for domestic purposes. The cost of producing peat fuel at the bog is estimated at \$2.00 per ton. During the autumn of 1910, about 500 tons of peat fuel manufactured at the Alfred plant were sold at \$3.25 to \$3.50 per ton to private individuals at Ottawa. Satisfactory experiments were conducted at Ottawa for the purpose of rendering the low grade iron ores of Canada suitable for smelting, by means of the Swedish Krondal separating system, power being derived from the gas producer plant of the peat fuel testing station.

Following a petition signed by the zinc producers of East and West Kootenay, British Columbia, an appropriation of \$50,000 was made for investi-

gating the processes used in the production of zinc and for making experiments in the manufacture of zinc and zinc products from Canadian ores, and a metallurgist was appointed to carry out this investigation, an eminent metallurgist of London, England, was also commissioned to investigate and report on various new European processes, but it appeared that none of these processes were yet ready for investigation.

A portion of the report deals with inquiries instituted with regard to powder explosions, and the best method of storing explosives, including a report on the explosives industry in the Dominion of Canada, by Captain Arthur Desborough, H. M. Inspector of Explosives, proceedings of a conference on proposed legislation regarding explosives, and reports of explosions at Hull, Que., Sand Point, Ont., and Bellevue Mine, Alta.

A preliminary report on the mineral production in Canada during 1910, shows a total production of over \$105,000,000, being an increase of more than fourteen per cent. over the previous year. The value of the total metallic product amounted to \$49,169,826 an increase of \$5,012,985 over 1909. Silver was produced to the value of \$17,106,604, nickel to the value of \$11,181,310, and gold to the value of \$10,224,910. Of the non-metallic minerals there were produced \$12,796,512 tons of coal valued at \$29,811,750, an increase of \$5,030,514, clay produces to the value of \$7,600,000, and cement to the value of \$6,414,315.

Insurance Statistics.

Report of the Superintendent of Insurance of the Dominion of Canada for the year ended December 31, 1910. Vol. 1. Insurance Companies other than life. Ottawa: King's Printer, 1911. Pages, 650; price, 40 cents.

In the report of the Superintendent of Insurance it is stated that during the year 1910, the business of fire in-

surance in Canada was carried on by 60 companies, of which 25 were Canadian, 19 British and 16 American. The cash received for premiums amounted to \$18,725,531, and there was paid for losses the sum of \$10,292,393. The ratio of losses to premiums was \$54.96 per cent., which is 8.67 below the average for the past forty-two years. The gross amount of policies, new and renewed taken during the year was \$1,817,055,685, which is greater by \$237,079,818 than the amount taken in 1909.

Accident insurance was transacted by seventeen companies, of which nine were Canadian, three American, and five British. Of these all but two Canadian companies transacted employers' liability insurance. For this class of risks the total premiums received amounted to \$1,644,252, and the losses paid to \$714,977. The total premiums for personal accident business amounted to \$1,815,571, representing policies to the value of \$296,236,458. The claims paid amounted to \$603,331, and the unsettled claims at the close of the year to \$118,868.

Guarantee insurance was transacted by four Canadian, three British and four American Companies. The total premiums received were \$298,940, guaranteeing an amount of \$90,780,163, and the net amount paid for claims was \$46,709, with unsettled claims amounting to \$40,140. The business of sickness insurance was carried on by seventeen companies, two American, five British and ten Canadian. Statistics of these companies, however, are not given.

Other forms of insurance in Canada, particulars of which are contained in the report, are plate glass, burglary, steam boiler, automobile, weather, title, live stock, and inland transportation.

Indian Affairs.

Annual Report of the Department of Indian Affairs for the year ended March 31, 1911. Ottawa: King's Printer, 1911. Pages, 181. Price, 40 cents.

The report of the Department of In-

dian Affairs shows satisfactory progress in the conditions of the native races of the Dominion during the last fiscal year. The total Indian population is estimated to be 103,661, and the Eskimo population, 4,600. The net increase of births over deaths in the districts where returns were made was 346. As a proof that the Indians are not dying out, it is shown that the Six Nation Indians have steadily increased from 3,204 in 1880 to 4,402 in 1910. The health of the aborigines was well maintained, and good results are expected from the adoption of a textbook on hygiene for use in their schools. There has been a steady improvement in their dwellings, and the Indian houses in the western provinces begin to compare very favourably with those erected by the first settlers.

The Indians are more and more entering into the industrial life of the country. In 1911, the amount received by them in wages was \$1,540,021.10, compared with \$1,344,599.00 in 1910, and their receipts from various industries amounted to \$852,944.63 in 1911, against \$727,905.00 in the previous year. Their total income from industries was derived from the following sources:

Agriculture	\$1,459,962.46
Beef	236,753.36
Wages	1,540,021.10
Fishing	691,629.60
Hunting and trapping	819,424.25
Various industries	852,944.63

There was a total of 324 schools in operation during the year, with an enrollment of 11,190 pupils, compared with the previous year there was an increase of ten day schools, a decrease of one industrial school, and an increase of 565 pupils.

ONTARIO REPORTS.

Vital Statistics.

Report relating to the registration of births, marriages and deaths in the Province of Ontario for the year ending December 31, 1909, (being the 40th annual report. Toronto: King's Printer, 1911. Pages, 317.

In the report on vital statistics of the Province of Ontario for the year

ending December 31, 1909, it is stated that during that year there were 54,465 births; 22,366 marriages; and 32,628 deaths; compared with 57,155 births; 21,058 marriages, and 32,714 deaths in 1908. Estimating the population of the province at 2,233,264 the birth rate was 24.4 per thousand; the marriages 10 per thousand, and the deaths 14.6 per thousand. An analysis of the deaths according to ages shows that 6,933 of the deaths were infants under one year, being 22.76 per cent. of the total birthrate, excluding stillbirths. The total infant mortality under five years of age was 8,558 or 27.88 per cent. of the birth rate. It is pointed out that in New Zealand provision is made by the Government for the payment of a fixed sum to needy mothers for expenses of childbirth.

Of the causes of deaths, 2380 were from tuberculosis. The percentage of deaths from this disease has declined from 15 per cent. in 1871 to 11 per cent. in 1890-1901, and to 7 per cent. in 1909. 1,597 persons died from cancer in 1909, an increase of 549 since 1902. Bright's disease caused 817 deaths; typhoid fever 669, diphtheria 430, and whooping-cough 262.

Farmer's Institute Clubs.

Annual Report of the Farmers' Institutes of the Province of Ontario, 1910. Appendix—Farmers' Institute Clubs. Toronto: King's Printer, 1911. Pages, 31.

An important movement was set on foot in Ontario three years ago during a series of Farmers' Institute meetings, when steps were taken to organize Farmers' Institute Clubs at a few of the most suitable points in the Province. About sixty clubs were formed during the winter of 1907-08, and in 1910 the number had grown to 219. The objects of these clubs are to hold meetings at which farmers may receive and give information, suggestions and experiences relating to their work, and thus improve the standard of agriculture in their district. Addresses are given by agricultural experts in their special lines, and in

other ways the clubs aim to stimulate the ambition of their members, and to increase their interest in the larger questions, not political or religious, which affect the social life and financial position of the farmer.

UNITED STATES REPORTS.

Women in Laundries.

Report on condition of Women and Child Wage-earners in the United States. Vol. XII: Employment of Women in Laundries. Washington: Government Printing Office, 1911.

The twelfth volume of the report on women and child wage-earners in the United States, prepared by the United States Bureau of Labour, deals with the employment of women in laundries. The report is based on results of an investigation made of the laundries in Chicago, New York, Brooklyn, Philadelphia, and in Rockford, Ill. In these cities there were 2,500 American and 2,000 Chinese laundries. 315 laundries employing a total of 6,417 persons were visited in New York, Chicago, Brooklyn and Philadelphia. Of these employees, 5,142 or 80.1 per cent. were women. In New York and Brooklyn hand laundries are predominant. The investigation showed that in all the cities there were large motor laundries or model plants, with rest and dining-rooms for the employees, and good ventilating systems. Such establishments, however, are not numerous. Other establishments of all grades and sizes down to the basement laundry with no sanitary conveniences comprise the major portion of the laundries. Unsanitary conditions were found in many of the hand laundries. They were found in poorly ventilated rooms with only a low partition or curtain separating the workroom from the living room. The hours of work in the nine large laundries in Chicago range from 48 to 60 per week, and the wages from \$5.62 to \$15.35 per week. With regard to the health of laundry employees, it is stated that the use of acrid and caustic chemicals in the bleaching process of the laundrying gives rise to catarrh of the throat. The

use of the old-fashioned flat irons cause rheumatic pains and hand ironers also suffer from gastric ulcer and other diseases of the stomach caused by bending over their work and pressing with their bodies. The use of foot levers by body ironers frequently cause displacement of the left kidney. A peculiar feature is the relative rarity of tuberculosis among laundry workers, and continuous standing is given as another cause of ill health among laundry workers.

The report contains brief particulars relating to 539 individual laundry workers, giving in each case the age, nationality, education, wages, and home conditions.

Free Employment Bureau in Milwaukee.

Bulletin of the Milwaukee Bureau of Economy and Efficiency, No. 6, Citizens' Free Employment Bureau. Milwaukee, Wis. September 1, 1911.

A bulletin of the Milwaukee Bureau of Economy and Efficiency has been issued describing the work of the free employment bureau during the first three months of its existence, from April 1 to June 30, of the present year. The Bureau was established by a general committee, composed of representatives of the City Council, the County Board of Supervisors, the Merchants' and Manufacturers' Association, the Federal Trades Council the Chamber of Commerce, and the Press Club. This committee was formed at a public meeting called to deal with the problem of unemployment. The number of men out of employment was great, and the cause of this situation was attributed largely to the general depression in the metal trades throughout the country, which was felt especially in Milwaukee. It was believed that the objects of the Bureau, which were in a measure realized, were to obtain a more exact estimate of the actual number of unemployed and to relieve their fruitless search for jobs, and open up new avenues of employment by keeping in touch with employers of labour in the neighboring local-

ities, and finally securing work for the heads of families and individuals in particularly distressing circumstances. During the existence of the Bureau, 3,850 individuals were registered. 1,100 men, chiefly semi-skilled and unskilled workers, or one in 3.5 persons who applied secured work in the city or in the neighboring localities.

The expense of maintaining the Bureau which was borne entirely by the Merchants and Manufacturers' Association was \$340, or 31 cents for each man given work. At least 34 per cent. of those placed obtained permanent employment.

The concluding pages of the report contains comments as to the best system of conducting such an office. It is stated that in times of industrial depression such agencies should be established for the benefit chiefly of semi-skilled and unskilled workmen, who have no union organization to aid them in securing work. It is stated that the business of such an office should be carried on in an aggressive manner by keeping in close touch with employers and following up information as to the opportunities for employment. A careful system of registration on the card index plan should be followed; and the names, and addresses and the occupations of the applicants should be carefully kept. Without a free employment bureau unemployed workmen are compelled either to wander about looking for employment themselves or depend on a private agency which is often open to charges of graft and incompetency.

Industrial Disputes of Indiana.

Thirteenth Biennial Report of the Bureau of Statistics of Indiana, for 1909 and 1910. Indianapolis, 1911. Pages, 1,266.

The report of the Bureau of Statistics of the State of Indiana for the years 1909 and 1910 contains an account of the establishment and work of the free employment bureau which was formed under an Act passed in March, 1909. This Act, which is given in the report, also provides for the

licensing and inspection of private employment agencies, which are placed under the supervision of the Chief of the Bureau of Statistics. It is stated that as a result of this legislation, the systematic robbing of the poor by unscrupulous persons in charge of private employment agencies has been practically done away with in Indiana. During the year 1910 the Bureau filled 2,387 places with persons who had applied for work, and filed complaints in eight cases against private agencies, securing convictions in each case, with jail sentences in four cases. In six cases sentences were suspended on condition that the agencies quit business. It is recommended that branch free employment bureaus be established in the larger cities of the State, in view of the success of the one in Indianapolis.

The report contains also statistics relating to taxation, agriculture, county and civic finances, court business, coroners' inquests, county poor farms, liquor licenses, county option elections, and industrial statistics of cities and towns.

OTHER REPORTS RECEIVED.

Canada.—Department of Mines. Annual report on the Mineral Production

of Canada during the Calendar Year, 1909. By John M. McLeish, B.A.

Report on the Gypsum Deposits of the Maritime Provinces. By William F. Jennison, M.E.

Bighorn Coal Basin, Alberta. By G. S. Malloch.

The Clay and Shale Deposits of Nova Scotia and Portions of New Brunswick. By Heinrich Rees, assisted by Joseph Keele.

Reports, Returns and Statistics of the Inland Revenues of the Dominion of Canada, for the year ended March 31, 1911. Part II, Weights and Measures, Gas and Electricity.

Ontario.—Annual Report on Highway Improvement, Ontario, 1911. Ontario Department of Agriculture, Bureau of Industries. Municipal Bulletin No. 5. Municipal Statistics.

Great Britain.—Annual Statement of the Navigation and Shipping of the United Kingdom for the year 1910, with comparative tables for the years 1906 to 1910.

Australia.—Vital Statistics of the Commonwealth for the quarter ended 31st March, 1911.

United States.—Bulletin of the Milwaukee Bureau of Economy and Efficiency, No. 8. The Newsboys of Milwaukee.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

QUEBEC CASE.

Pension for Labourer.

In an action tried in the Superior Court at Montreal, before Mr. Justice Greenshields, the judge awarded \$60 a year for life to George Green, a laborer, who, while shovelling snow on the Grand Trunk tracks in the Point St. Charles yards, was run down by an engine resulting in the amputation of three fingers. He claimed that he was

thus deprived of 50 per cent of his earning power. His wages, he said, were \$2.25 a day, and under the Workmen's Compensation Act, he was entitled to receive half his wages while off work and \$25 a month. The defendant's plea that Green's wage was only \$1.50 a day, and that they had already endeavored to come to a settlement with him but were unsuccessful.

ONTARIO CASES.

Work and Labour Expended on Lost Boat—Insufficient Evidence.

Appeal by the defendant, Laurie,

from the judgment of Chief Justice Meredith in favor of the Polson Company, of Toronto, for the recovery of \$500 upon their claim for work done by them upon the Knapp Roller Boat, and dismissing Laurie's action and Laurie's counter-claim in the Polson Company action for damages for the loss of the boat. The Divisional Court, to whom the appeal was taken, ordered a new trial, the costs of the former trial and of the appeal to abide the event of the new trial.

Mr. Justice Riddell, who gave written reasons for judgment, said that there was no doubt about the law; the Polson Company having the custody of the boat were bound to use reasonable care for its safety and to prove that they had used such care, referring to *Pratt v. Waddington*, 23 O. L. R. 178. The evidence given at the trial did not enable the court to determine whether such care was in fact used, and on this point he thought that there should be a new trial at which all facts could be fully developed. The new trial should be general. The other members of the court agreed in the result. *Polson Iron Works Limited v. Laurie; Laurie v. Polsons Iron Works, Limited*, 3 O. W. N. 213.

Master and Servant—Inquiry to Servant Negligence.

Appeal by the plaintiff from the judgment of Judge Snider, judge of the County Court of Wentworth, who (by consent) tried the action, which was in the High Court, and dismissed it. The action was brought by a workman to recover damages for injuries sustained by him while in the employment of the defendants. The plaintiff had his leg fractured in two places. Negligence on the part of the defendants was charged; but the trial Judge found that there was no actionable negligence. While dismissing the action, he assessed the plaintiff's damages, provisionally, at \$1,500.

The following were the facts: The plaintiff and four fellow-workmen were moving an iron beam, which

weighed two and a half tons, from one side of the defendants' works to the other, using power hoists. Hooks, resembling ice-tongs, with a ring in the top, were spread across the beam and hooked over the edge on each side. A hook let down from the hoist was hooked into this ring, and the beam then lifted, to be carried, thus suspended, to its destination. A pile of iron stringers lay on the floor, in the direct course of the moving beam. The hoist would not raise it high enough, with the long hooks at first in use, to pass it over the pile of stringers, and so the defendants' foreman handed a shorter pair of hooks to the plaintiff and his fellow-workmen to be substituted for the long hooks. The plaintiff was in the act of placing the hook of the block of the hoist in the ring attached to the pair of shorter hooks, when those hooks slipped or spread, and the beam fell, injured the plaintiff.

The appeal was heard by Chancellor Boyd and Justices Britton and Middleton, each of whom gave reasons for holding upon a review of the evidence, that the cause of the injury was the use of hooks which were too short, and that the defendants were liable, the foreman having directed the hooks to be used. Appeal allowed with costs, and judgment to be entered for the plaintiff for \$1,500 with costs.

Smith v. Hamilton Bridge Works Co., 3 O. W. N. 177.

\$6,000 for Loss of Arm.

The closing case at the last Barrie assizes, before Sir John Boyd, was an action for \$10,000 damages, by Roy Stone of Barrie against the C. P. R., for the loss of his right arm while in the company's service on March 8th of this year. The plaintiff fell between the cars at Bolton, Ont. The company, at the time of the accident, offered to have the plaintiff removed to a hospital in Toronto and pay for amputation of the limb. The family thought the limb must be saved, and sent their own physician to the city to bring the injured man to his home town, where

amputation of the limb finally took place. The jury rendered a verdict for \$6,000 damages for the plaintiff.

MANITOBA CASE.

Master and Servant—Negligence— Injury to Servant.

The plaintiff was a labourer residing in Winnipeg. In August, 1910, he was in the employ of the defendants at the gas works situate in Gladstone street, Winnipeg, and was employed to carry coal and coke in a wheelbarrow and to trim banks of coal and coke, and to do such other work as he was required to do.

He was ordered by the foreman (McNaughton) to release the brakes on a car standing on a siding and to move or "spot" it to a chute into which the coal from the cars was unloaded.

It was his duty to go upon the top of the car by means of a ladder attached to the side of the car, and to release the brakes, then to descend to the ground, and, by means of a bar applied to the wheels of the car, to start the car towards the chute, and, while it was in motion, to ascend the ladder and apply the brakes in order to stop the car at a point opposite the chute. He did as he was told, but was caught in the space between the car and the building, thrown to the ground and his left hip and leg were crushed and dislocated. He brought this action to recover damages for his injury.

The defendants denied any liability, and contended that the accident arose by reason of the plaintiff's own negligence and carelessness, and not by reason of any negligence on their part.

The action was tried before Mr. Justice Robson and a jury. In answer to questions, the jury found that McNaughton was a person in the service of the defendants to whose orders the plaintiff was, at the time of the injury, bound to conform; that McNaughton gave the plaintiff orders (specifying the orders); that the plaintiff conformed to those orders; that injury resulted to the plaintiff from so conforming;

that negligence on the part of McNaughton caused the injury (specifying the negligence); and that the plaintiff, by the exercise of reasonable care, might have avoided the accident. The jury were not asked in what respect the plaintiff omitted to take reasonable care.

The trial judge held that it was not necessary to ask that question, there being evidence upon which the jury might find that the plaintiff was guilty of negligence or contributory negligence; and that, upon that finding, supported by the evidence, the action should be dismissed.

Shondra v. Winnipeg Electric R. W. Co., 19 W. L. R., 13.

SASKATCHEWAN CASES.

Work and Labour in Road-making.

In an action to recover the value of work done by the plaintiff for the defendants and the value of extra work, it appeared that the plaintiff did work for the defendants, making roadways, etc., under a contract. There was a dispute as to an item for grading, which included covering the roads with cinders, watering, and rolling. The work was to be finished and ready for acceptance by the 15th July, 1910. The grading was done in good time, but the defendants failed to supply the cinders; and, before they did supply them, the engineer's final certificate had issued, and this action had been begun to recover the amount due under the contract and a sum for extras.

Judge Brown, the trial judge, held that, as the defendants had failed to supply the cinders as agreed, the plaintiff was entitled to recover the contract price, deducting therefrom what it would cost to complete the work. In finding the cost of completion, the Court had to look outside the certificate of the engineer and consider the evidence; and, upon the evidence, four cents per square yard would be sufficient to complete the work.

The other item in dispute was an extra; it was not provided by the con-

tract, but was ordered by the engineer and the building committee some time after the execution of the contract. As to this it was held, that the terms of the contract as to payment, measurement and engineer's certificate, did not apply to this item; and, upon the evidence, 25 cents per cubic yard was allowed for 1,504 cubic yards of cutting, filling, and grading.

Judgment was given for the plaintiff for \$1,187.91 and costs. *Ross v. Regina Agricultural and Industrial Exhibition Association*, 19 W. L. R. 53.

Master and Servant—Summary Order as to Wages.

An appeal by George A. Anderson from an order or conviction by Hugh Maher, a Justice of the Peace, under the Masters and Servants Act, whereby the appellant, the master, was ordered to pay to Joseph P. Bissonnett, the servant, the sum of \$55.75, being a part of two months' wages claimed by Bissonnett, and costs.

The appeal was heard by District Court Judge Maclean. He held that under the Provincial Masters and Servants Act, the servant cannot obtain from a Justice of the Peace a summary order for payment by the master of wages that may be due to him, if he has not performed his part of the agreement; and where it was found that the servant had broken his contract, without lawful excuse, by leaving his master's employment before the period of hiring has expired, he was held not entitled, upon a summary complaint under the Act, to an order for the wages he had earned during the period he had served.

The decision in *Merritt vs. Rossiter* in the Manitoba Reports, in the time of Chief Justice Wood, was specially referred to. The appeal was allowed and the conviction quashed with costs. *Re Anderson & Bissonnett*, 19 W. L. R. 73.

ALBERTA CASE.

Aliens—Naturalization—Requirements of Naturalization Act.

Upon an application by G. C. and other aliens for certificates of naturalization under the Naturalization Act, Judge Winter, District Court Judge, held that strict compliance with the form B., in the schedule to the statute, is required. The direction as to the particulars to be inserted is imperative.

When an alien desires to be naturalized in Alberta, he must obtain from an official, designated by the Act, a certificate in form B. containing: (a) the name and description of the person before whom the oaths of residence and allegiance have been taken; (b) the name of the alien, his former address in the foreign country from which he came and of which he is subject or citizen; (c) the present address of alien; (d) the occupation or addition of the alien; and the certificate must be filed with the clerk of the Court, and the clerk must post up a copy of it in his office for two weeks; if objection is made, the judge has to decide the question in a summary way; if no objection is made, he is to direct the issue of a certificate of naturalization.

It is essential that all the particulars referred to as (a), (b), (c), and (d) should be included in the certificate of the official who administers the oaths of residence and allegiance; if any are omitted, the certificate is defective; the copy posted must correspond with the original certificate in all these essential particulars—the omission of any would make it defective. *Re Cabulak*, 19 W. L. R., 171.

UNITED STATES CASE.

Dases under Employer's Liability Policy.

In the case of *Mason-Henry Press vs. Aetna Life Insurance Company*, de-

cided by the Appellate Division of the New York Supreme Court for the Fourth Department, it appeared that an employer's liability policy provided that it did not cover loss or expense arising on account of, or resulting from, injuries or death to any person employed in violation of law, and that if any suit should be brought against the insured to enforce a claim for damages on account of an accident covered by the policy, the insurer would, at his own cost, defend such suit in the name and on behalf of the insured. An injured employee brought an action against the insured, claiming that he

was under sixteen years of age, and that the insured negligently hired him in violation of the labour law. While notifying the insured that it was not liable the insurance company defended the action. A judgment was recovered against the insured for negligence in violation of the labour law. The court held that in defending the suit the insurer did not waive the right to rely upon the exception in the policy, it having insisted upon the non-liability if the hiring was in violation of law, and having defended merely to protect itself and comply with its agreement.

LABOUR GAZETTE

JANUARY, 1912.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF
DECEMBER, 1911.

1.—GENERAL SUMMARY.

DURING December unusually mild weather prevailed throughout the whole of the Dominion, permitting outdoor occupations to be carried on until a later date than in many previous years. In nearly all parts of the country the farmers were able to continue their fall ploughing, and in the Northwest Provinces, where threshing operations had been delayed by the weather in certain districts, the farmers were able to complete their threshing before the winter cold set in. Building operations were carried on to a far greater extent than usual at this time of the year in nearly all localities. The absence of snow delayed work in the lumber camps, but there was a fair demand for men. Mining operations were actively continued, particularly in the coal mines of Nova Scotia, Alberta and British Columbia, and in the metalliferous mines of British Columbia. Navigation continued until an unusually late date in the River St. Lawrence, and in the inland rivers and lakes. Immigration continued to show an increase compared with the previous year.

Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during December, 1911:

Building trades.—Plumbers at Berlin, Ont., were granted a rate of thirty-five cents per hour and an eight-hour day.

General transport.—Street railway employes at Kingston, Ont., received an increase in wages from \$1.50 per day to \$1.55 for new men, and \$1.70 per day for old employees. Conductors and motormen at London, Ont., received an advance in wages, to date from January 1, 1912, forty-two relief men being granted an increase from eighteen to nineteen cents per hour, and fifty-six day or fourth-year men from twenty to twenty-two cents an hour.

Public employes.—Civic firemen (34) at London, Ont., received an advance of ten cents per day from a rate of \$1.95 to \$2.52 $\frac{2}{5}$ per day to a rate of \$2.05 to \$2.62 $\frac{2}{5}$ per day.

Other industries.—Hospital nurses at Hamilton, Ont., received an advance from a rate of \$4., \$6 and \$8 per month to a rate of \$5, \$7 and \$10 per month.

Interruptions to Industry.

The number of strikes and lockouts which were reported to the Department to have been in existence during December was six less than in the previous month and two less than in December, 1910. The loss of time to employees through trade disputes during December was approximately 39,930 working days, a decrease of over 100,000 days compared with the previous month, and a decrease of about 1,350 compared with December, 1910.

Among industrial establishments, &c., destroyed by fire or through other causes during November, 1911, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Hotel at Halifax, loss \$65,000; dry goods establishment at Yarmouth, loss \$5,000.

New Brunswick.—Barns, with stock and season's crops, at Fredericton; jewelry store at Gibson, loss \$3,000; business section of Moncton, loss \$25,000; butter factory at Petitcodiac, loss \$4,000; McLaughlin building (commercial block), loss \$20,000, and cotton mill at St. John, loss \$9,000.

Quebec.—Power house at Cartierville, loss \$10,000; woollen factory at Chambly, loss \$100,000; harness and dressmaking establishment, Coaticook, \$2,500; lumber mill at Granby, loss \$3,000; at Montreal the following fire losses were recorded: spinning factory, loss \$4,000; cigar factory, loss \$5,000; 2 shoe warehouses, loss \$10,000; cigar factory, loss \$15,000; chemical works, loss \$20,000; motor cycle company's warehouse, loss \$30,000; garage, loss \$75,000; garage at Quebec, loss \$15,000.

Ontario.—Cold storage plant at Aylmer, loss \$4,000; hotel at Barrie; hotel at Brockville, loss \$75,000; evaporator at Burlington, loss \$3,000; business centre of Clinton; Canadian Pacific Railway Company's roundhouse at Carleton Place, loss \$20,000; portion of Frankford wiped out; cereal factory at Guelph, loss \$30,000; business centre of Golden City (Porcupine), loss \$50,000; Bloomfield mills, at Fergus, loss \$30,000; meat packing establishment at Fort William, loss \$25,000; business portion of Huntsville, loss \$10,000; biscuit factory (Perrin's) at London, loss \$20,000; hotel barns at Niagara Falls, loss \$2,500; jewelry store at North Bay, \$5,000; 2 grain elevators with 1,000,000 bushels of grain, rolling stock and engine-house of Can. Pac. Ry., loss \$1,000,000; also a dry-kiln, loss \$15,000; farm with contents at Rockfield; bakery and confectionery store at Stratford, loss \$5,000; cheese factory at Sparta, loss \$4,000; planing mill at St. Marys, loss \$10,000; at Toronto the following fires occurred: warehouse, loss \$2,500; jewelry factory, loss \$17,000; Aged Women's Home (partial), loss \$10,000; 2 stores, loss \$3,000; planing mill with stock of lumber, loss \$40,000; store and stable at Underwood, loss \$10,000; barn with contents near Windsor, loss \$10,000; business centre of Westport.

Manitoba.—Grist mill at Glenboro, loss \$45,000; bank and other business places at Ninga, loss \$60,000; general store at Oakburn, loss \$6,000; hotel and livery stable at Shoal Lake, loss \$6,500; 4 stores at Winnipeg, loss \$4,000.

Saskatchewan.—Court House at Arcola; business centre at Canora, loss \$20,000; hotel at Ceylon, loss \$25,000; business centre of Hawarden, loss \$50,000; business section of Milburn, loss \$50,000; flour mill at Moosejaw, loss \$500,000; flour mill at Rosthern, loss \$17,000.

Alberta.—Lumber at Coaldale, loss \$5,000; church at Magrath, loss \$5,000.

British Columbia.—Roller skating rink at Victoria, loss \$12,000; factory and woodworking plant, Fairview, loss \$25,000.

Conditions in the Industries and Trades.

Conditions of employment during December in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received from other sources, may be briefly summarized as follows:—

Agriculture.

A long period of mild weather, which was especially marked in the first half of the month enabled farmers to complete their ploughing in many localities, and to continue their threshing in Western Canada. Elsewhere farmers were chiefly engaged in marketing their produce and caring for their live stock. High prices prevailed for all agricultural produce, especially for dairy products and live stock, though there was a slight decline in the price of wheat, oats, and other field crops.

A serious car shortage was reported at some points in Southern Saskatchewan, about the middle of the month, but at other places the situation appears to have been well met. It was estimated by the Department of Agriculture of Manitoba that the grain crop of that province for 1911 was more than 160 million bushels, the oat crop alone reaching 73 million bushels. The increase of wheat over the previous year was nearly 22 million bushels, and of oats over 30 million bushels. There was a great increase in all other farm products, the potato crop being especially large in that province.

Heavy exports of apples were made from Nova Scotia, the quantity and quality of the fruit having been superior to that of any other season.

Fishing.

Good catches of smelt were made off the New Brunswick coasts and there were fair catches of herring reported off Louisburg and Main-a-Dieu, Nova Scotia. High prices were obtained by the fishermen. Quiet conditions prevailed in other parts of the Dominion in the fishing industry.

The international fur seal treaty was ratified at Washington, D. C., by the United States, Great Britain, Russia and Japan for the protection of seals in the North Pacific and Behring Sea for a period of fifteen years. It was reported that the United States Congress would appropriate a sum of \$200,000 to compensate Japanese and Canadian

dealers for abandoning pelagic sealing.

It was announced that the Canadian Sardine Company, Ltd., St. Andrews, N. B., proposed to erect a large sardine plant at Chamecook, N. B., comprising packing and can making factories. The buildings are to be ready for packing next summer.

Lumbering.

In the provinces of Ontario and Quebec the lack of snow impeded the hauling of logs in the lumber camps, but there was a fair demand for men for the shanties. Unusual activity prevailed in the lumber camps of Manitoba, the weather being favourable.

Mining.

Steady production continued in the coal mining regions of Nova Scotia, Alberta and British Columbia. With the close of the shipping season in Nova Scotia, the mines were banking their coal. In the Province of Quebec, asbestos mining, which usually ceases in the winter months, was continued much later than in other years, owing to the mild weather. There was increased activity in the metalliferous mines of British Columbia, especially in the Kootenay District, a number of new mines becoming regular shippers, while many of the older ones increased their output. The Granby smelter resumed operations about December 20, having been closed during the strike of coal miners in the Crow's Nest Pass district.

Manufacturing.

The manufacturing industries throughout the country continued to be well employed, with the exception of a few that were affected by seasonal causes. Factories making goods for the holiday trade were especially busy.

Railway Construction.

Railway construction was not carried on so vigorously as in the earlier months, but the mild weather enabled better progress to be made than usual

in December. The successful tenderer for the first section of the Hudson Bay Railway, which is to run from Le Pas, Man., was notified by the Dominion government to proceed with the work at once.

The plans for the Canadian Pacific Railway shops at Calgary, Alta., as placed before the mayor and commissioners of that city, involve the construction of twenty buildings and twelve miles of trackage, occupying an area of 120 acres of land. When the shops are completed, they will give employment to over 2,000 skilled workmen.

General Transport.

The railways continued very busy hauling grain from the West, and the holiday passenger traffic was unusually heavy. Railway earnings continued to show large increases over the corresponding months of the previous year, the Canadian Pacific Railway Company showing net profits of \$3,737,122.26 for the month of November, a gain of \$250,244.23 over November, 1910.

The season of navigation closed very late. The last ocean-going steamer left Quebec on December 8, and the last vessel in in the coasting trade reached Quebec on December 23. In the Great Lakes navigation continued until late in the month, and the rivers were free from ice during the greater part of the month.

A feature of the month was the announcement of an issue by the Canadian Pacific Railway Company of new stock of the par value of \$18,000,000.

A new departure has recently been made by the Canadian Pacific Railway Company in constructing buildings at Winnipeg, Man., Calgary, Alta., and Vancouver, B. C., for the free accommodation of their employees when they are compelled to stop over night at those points. In a communication kindly furnished by the Company it is stated that each building contains, in addition to the necessary sleeping rooms for cooks, waiters, pantrymen,

TABLE SHOWING STATE OF EMPLOYMENT

This table is based largely on the reports of the correspondents of *The Gazette* as published of employment in the several trades and industries throughout the Dominion. The table has reference phenomena treated under separate headings in *The Gazette*. In tabulating the information in questions were favourable or unfavourable, as follows: (1) fair, active and very active; (2) quiet and

CANADA DURING THE MONTH OF DECEMBER, 1911.—Continued.

present issue and is intended to present, in brief and accessible form, a generalized statement as to the state the amount of employment prevailing, no account being taken as to wage changes, trade disputes and kindred terms employed are divided into two groups, the order indicating in each, the degree to which general condition.

[illegible]

conductors, etc., separate toilet facilities for each class, as well as a large living or recreation room. A man and wife are housed on the premises as caretakers, and paid a monthly wage for looking after the place. The Company does all the laundry work, and furnishes bedding and equipment.

The Trades.

Building.—Building operations were carried on more extensively during December than for many years past at the corresponding period, and the exteriors of many more buildings were brought to the stage where inside work could be carried on during the winter. The following is a partial list of the number of building permits issued in Canada during December, with the estimated value they represent:

Locality.	No. of Permits	Value.
Halifax, N.S.	42	\$ 95,600
Maisonneuve, Que.	35	207,475
Hamilton, Ont.	68	92,300
Brantford, Ont.	18	15,980
London, Ont.	38	187,553
Chatham ...	3	55,350
Calgary, Alta.	698,160

The total number of permits for six municipalities was 204 and the estimated value represented by permits in seven municipalities was \$1,352,418.

Metal and woodworking trades.—These trades were on the whole well employed, and the month compared favourably with December, 1910.

Printing and allied trades.—The printing and allied trades had a busy month, and there was a slight improvement over November in the amount of employment.

Clothing trades.—Journeyman tailors, garment workers and boot and shoe workers were fairly well employed.

Textile trades.—Cotton and woollen mill employees had steady work:

Leather trades.—Tanners, curriers, trunk and bag makers were generally busy.

Miscellaneous trades.—Retail clerks, hotel and restaurant employees and delivery men were very busy, the holiday season causing great activity in these trades. Barbers and laundry workers had a good month.

Unskilled labour.—Unskilled labour was very well employed for the greater part of the month, as municipal road improvements, sewer construction, etc., were carried on to a much later date than usual. In the last two weeks of the month, however, work was slack, as there was practically no employment in the clearing of snow.

Canadian Trade and Revenue.

During November, 1911, there was an increase in the total value of imports entered for consumption into the Dominion of Canada, of \$6,456,309, over the corresponding month of 1910. During the first eight months of the fiscal year, ending November 30, there was an increase of \$42,223,191 over the corresponding period of 1910. The total value of domestic exports during November, 1911, showed an increase of \$1,599,632, over November, 1910. The total value of domestic exports during the first eight months of the fiscal year, ending November 30, showed an increase of \$44,589,182 over the corresponding period of 1910. During November, there were increases in the exports of agricultural products and manufacturers, and decreases in the exports of the products of mines, fisheries, the forest, animals and their produce and miscellaneous merchandise. The accompanying table contains the latest official summary of Canadian foreign trade.

Canadian Trade, November, 1911.

In the reports of the trade commissioners and commercial agents of the Department of Trade and Commerce, it is pointed out that Canadian exporters, in common with exporters of the United Kingdom, enjoy a preferential tariff in the markets of New Zealand and South Africa over all foreign competitors. By these tariff arrangements valuable concessions have been made to Canada many of which have not been available to any considerable extent.

Attention is called to the increasing demand in Great Britain for cereal breakfast foods such as prepared oats, wheat kernels, barley crisps, shredded wheat, &c. The total imports of oatmeal into Great Britain last year amounted to \$923,610 of which \$734,435 worth came from Canada. There is also an unlimited demand for barley and the large brewers of the Midland counties have expressed a desire to receive samples of Canadian barley.

Domestic trade.—Wholesale trade was generally rather quiet, as is customary at this season of the year, but the Christmas trade of retail shops was very active, especially in the larger centres of population, and was said to have been better than in the previous year. Fur dealers were adversely affected by the mild weather. Collections were fairly well met, though in Western Canada payments were rather slow.

The bank statement for November showed an increase of \$1,209,009 in paid up capital over the previous month, the total at the end of November being \$107,472,558. Notes in circulation amounted to a value of \$101,943,056, a decrease of \$3,911,965 compared with the previous month. Deposits in Canada, payable on demand showed an increase of \$9,758,703 over the previous month, and current loans in Canada an increase of \$1,864,411.

The following are the returns from the Canadian Clearing Houses for the month of December, 1911:—

*Correct to thousands.

Many of the important Canadian chartered banks issued their annual statements during the month, all of which were of a favourable nature. The Merchants' Bank announced net profits of \$1,179,581.03, an advance of over \$120,000 over the previous year. The sum of \$500,000 was transferred to the reserve fund, and \$100,000 was contributed to the Officers' Pension

Fund. The net profits of the Bank of Ottawa amounted to \$595,228.59. \$100,000 was carried to the rest account, and \$10,000 was transferred to the Officers' Pension Fund. The Union Bank showed net profits of \$662,537.04, being fourteen per cent. on the average paid up capital during the year. In addition the sum of \$457,060, was received as premium on new stock, and with \$200,000, was transferred to rest account, \$10,000 was contributed to the Officers' Pension Fund. The Quebec Bank showed net profits of \$276,391.89, to which was added a balance of \$30,580.95 to credit of profit and loss account. Of this sum, \$175,000, was paid in dividends, \$5,000 was reserved for the Pension Fund, and \$100,000 was transferred to the Contingent Account.

An important announcement was made that the directors of the Eastern Townships Bank had approved of an agreement to amalgamate with the Canadian Bank of Commerce. The consolidation of these two companies will produce a bank with a capital of \$15,000,000, a rest of \$12,400,000, deposits amounting to \$165,475,000, total assets of \$211,000,000, and branches to the number of 332.

Canadian Revenue.—Canadian revenue for the month of November, 1911, amounted to \$11,595,670.63, compared with \$10,061,060.41 in November, 1910. The total revenue from April 1 to November 30 amounted to \$87,886,848.69, compared with \$75,875,446.69 in the corresponding period of 1910. The total expenditure on capital account during November, 1911, was \$945,355.33, as against \$3,145,526.62 in November, 1910. The total expenditure on capital account from April 1 to November 30, 1911, was \$15,835,194.82, compared with an expenditure of \$19,123,941.11 in the corresponding period of 1910. The items of expenditure during November, 1911, compared with \$839,403.39 on public works, including railways and canals, and \$105,952.00 on railway subsidies.

Notes.

Steps were taken by the Niagara Navigation Company of Toronto toward the purchase of the Hamilton Steamship Company, 1,002 shares of new stock being issued for this purpose.

A Bill was introduced into the House of Commons to appoint a harbour commission at Hamilton, Ont., for the purpose of administering the navigation laws there and of making regulations for the control of navigation.

A Hydro-Electric power transmission line was under construction from St. Thomas to Port Stanley. It was reported that a number of small motors have been contracted for by fishermen at Port Stanley for cutting ice, which will be utilized for packing ice.

Messrs. T. Chase Casgrain, K.C., C. A. Magrath, and H. A. Powell, K.C., were appointed by the Imperial government the three Canadian members of the International Waterways Commission, which is to settle disputes relating to the waters lying on the boundary between Canada and the United States.

The annual report of the Canadian Car and Foundry Company of Montreal showed gross sales of over 12½ million dollars, with unfilled orders amounting to ten million dollars. There were net profits of \$622,137.58 on the year's operations from which after the payment of a dividend of 4 per cent. on common stock there is a surplus of \$467,137.58.

It was reported that a merger of implement manufacturing companies operating in western Canada was in the process of formation; the new organization to be known as the M. Rumeley Company, and will include the present Rumeley Company, the Gaar Scott Company, and the Advance Threshing Company. Confirmation was given to the

report by the Saskatchewan managers of the above companies.

The announcement was made by the Board of Education of London, Ont., that an industrial school will be opened on January 2, 1911, in the new Alexandria School building. It is proposed to hold evening classes three times a week until April 30 when the Spring term closes. The courses for boys and men are divided into three groups as follows: Group 1, Machine Shop Practice, Forging, Woodworking; Group 2, Mechanical Drawing, Architectural Drawing; Group 3, Business English. The courses for girls and women are also divided into three groups, as follows: Group 1, Sewing, Dressmaking and Cookery; Group 2, Home Economics; Group 3, Practical English. Each student is to select one subject from each group. The fees charged are \$3 for the term of four months, or \$1 per month, for instructions on two or three evenings per week; and \$1.50 for four months, or 50 cents per month. It is estimated that the total cost of these classes will amount to \$1,361, with a return of \$300 in fees, thus making the net cost \$1,061.

A statement of the electric power generated by five Hydro-Electric Companies for the year ended March 31, 1911, calculated on the horse-power year basis, is as follows:—

Canadian Niagara Power Company.....	
.....Niagara Falls, Ont.	48,093
Ontario Power Company	
.....Niagara Falls, Ont.	49,881
Electrical Development Company	
.....Niagara Falls, Ont.	20,875
Ontario and Minnesota Power Company	
.....Fort Francis, Ont.	2,332
Maine and New Brunswick Electrical Power Company	
.....Arvastock, N.B.	282
	<hr/>
	121,373

Of this amount (121,373), 82,378 horse-power years was generated for export.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Except in the building and allied trades, which are usually affected by the approach of winter, general activity prevailed in the Sydney district during the month. The weather, however, was open and mild and permitted the continuation of much outside labor until the end of the year. Both the coal and steel industries were active, and prospects are bright for these larger trades. Business men reported a large volume of business done during the month, and they look forward to a busy year in 1912.

The closing of the St. Lawrence shipping season usually brings more or less idleness to the collieries, but while there were a few idle days at the larger Cape Breton collieries both in the Glace Bay and Sydney Mines districts, there was not sufficient idleness to affect labour to any extent.

The Dominion Coal Company began banking coal at Nos. 2 and 8 Collieries, and intend to continue banking until they have placed three hundred thousand tons of coal in the heaps. The system of banking coal is beneficial to the workmen in that it provides employment when the shipping season ceases.

The Dominion Steel Company had a busy month in nearly all departments and report large orders ahead for steel rails and rods. A large supply of ore and dolomite is now in the bins for winter use. During the month a large number of men, mostly natives from farms, left Marble Mountain for the winter and early in January the force employed will be further reduced, a sufficient number only will be kept for development work in preparation of a busy year, beginning next Spring. The men not needed at Marble Mountain will not be thrown out of employment, however, as the Company intend to find them work elsewhere during the

winter season. About sixty men are now being employed in the lime-stone business at Ball's Creek but the force will be increased to one hundred later on, as the material is taken by rail from Ball's Creek to the Sydney Steel plant. The building trades had a fair month but as in the case of the lime-stone workers, quite a number of carpenters left for their homes for the winter. The amount of finishing in progress being larger than usual, carpenters had a fair month. Woodworkers in factories continued active and the outlook for the winter season is regarded as very favorable. Railway traffic was of fair volume but will grow heavier as shipping decreases. Shipping was fairly brisk, the absence of hard frost and heavy storms being favourable to this business. The Cape Breton Electric Company reported a year of progress, employing about one hundred and sixty men on the regular operating staff. During the busy season, however, when adding to their power house and installing an auxiliary plant and making other improvements, they employed as high as two hundred and fifty men. The Company is at present building power lines to furnish motive power for the operation of the new briquetting plants of the Mackay and Colonial Mines. Other improvements are also being made. The Sydney Cement Company employ about sixty men and had a good year, their sales being largely in advance of 1910. Improvements were made during the year by which the capacity of the plant was increased and an improved product turned out. The outlook for the coming year is most encouraging. Chappell Bros., woodworkers and builders, employed on an average of one hundred and fifty men during the last eight months and paid out in that time \$80,000 in wages. They report a very prosperous year, indeed the best since the business started, and in anticipation of another good year in 1912 are

stocking heavily. Shaw & Mason, iron and brass founders, had a satisfactory year, and at present are employing upwards of sixty men. They report prospects favorable. The Saunderson Manufacturing Co., while not making extensive improvements, increased their business during the year.

The Nova Scotia Steel & Coal Company report the following outputs for the year.

Coal	780,000 tons
Pig Iron	85,000 "
Coke	100,000 "
Steel	85,000 "

The amount of pig iron made exceeds the amount made in 1910 by 20,000 tons. The amount of coke exceeds that of 1910 by 10,000 tons. The amount of steel exceeds that of 1910 by 12,000 tons. The output of coal is about 60,000 tons less than the output of 1910. This was caused by the disastrous explosion at No. 3 Colliery in January of this year, and no output of coal was received from the colliery for a few months after the explosion, as the mine had to be put in good condition before active operations could begin. The foundations for the fluid compression plant for the compressing of ingots at the open hearth furnaces are near completion, and the machinery will be installed and in operation in the early Spring months. The prospects for 1912 are fair and barring accidents, both the steel and coal outputs will be increased. The Inverness Collieries will be busy all winter, and new development work to locate another seam will be started, as the Canadian Northern Railway will be able to consume at the new machine shops being constructed more than the output of the present colliery. Both the wholesale and retail business were very active during the month. Fair catches of herring were made along the Louisbourg and Main-Dieu Coasts.

WESTVILLE, N.S., AND DISTRICT.

The conditions of labour continued

very brisk in all the various departments with the exception of those that are governed by the weather conditions. Building operations were carried on in many places notwithstanding the lateness of the season. The collieries were very active. The shipments for the month of November for the district were about 54,000 tons being an increase of about 3,000 tons for the month over the corresponding month of 1910. The increase for the eleven months ending November 30 for this district was about 95,000 tons. The outside industries such as brick-making, farming and excavating were quiet. So far there has not been much frost or snow in this district for the woodmen, but the lumbering industry has a favourable outlook. All the various manufacturing industries were well employed in this district.

AMHERST, N.S., AND DISTRICT.

The general condition of the labor market was very favourable. Fine weather prevailed during the whole of the month, giving builders and contractors a splendid opportunity of finishing their season's operations. The Canada Car Company continued to add to its number of workshops. During the month a 40x60 new galvanizing shop was erected and the machinery installed therein, and it is now in active operation. Extensions were also made to the cabinet and forge shops. Where formerly a floor space would only allow for fifteen cars, the passenger shop, will when completed, have a capacity of thirty-five cars. There was unwonted stir in lumber circles and a strong demand for men to go into camps for the winter. Labour has never been so well employed for the past four or five years. Business men both in wholesale and retail branches report exceptionally good trade during the Christmas season. In every instance the trade was larger than in the previous year. At Springhill mines new men are being constantly added to the working staff and the total amount of

wages paid is now about up to the standard prior to the strike. The output for the current month will total about forty thousand tons of coal which is slightly over the average formerly produced. The Dominion Coal Company which is now operating these mines, is planning great development work in the coming spring.

At this season of the year there is little being done in agriculture save that the farmers are disposing of their products. Prices in our local markets were very satisfactory to the farmer; indeed so much so that the consumers in Amherst and other industrial centres of the County are complaining of the high prices of poultry, beef, pork and other foodstuffs. Taken in all the farmers throughout Cumberland have had a very satisfactory season and the prices for the produce are abnormally high.

There is little or no fishing being done in Cumberland at this season of the year. The harbours not yet being frozen over, but little has been done in the smelt industry.

Earlier in the season it was anticipated that lumbering operations would be rather dull this winter but the upward turn of prices has stirred up our lumbermen into more than ordinary activity. Large transfers of lumber properties have taken place during the month and it looks now as if the cut this winter would be exceedingly heavy.

All industries have been steadily employed during the month. A number of them have increased the number of their employees and there will be no reduction made during the winter months. Indeed the tendency will be the other way. Every industry in town is working to about its full capacity and finding a ready market for the products of the different workshops. Mining operations at Springhill, the Joggins and River Hebert have been active during the month. The Joggins colliery intends at an early date to install electrical coal cut-

ting machines. One machine was installed some seven months ago and has been working very satisfactorily. The management now feels that the experimental stage has been passed and other machines will be introduced in the near future. This will be followed by an increased output in the Joggins colliery without any decrease in the number of hands. The demand for coal has been very steady during the month.

HALIFAX, N.S., AND DISTRICT.

December shows a decided improvement industrially over the corresponding month of 1910. The weather was milder than usual, and building operations were carried on with greater facility than is customary at this time of the year, and good progress was made on many of the contracts. Work along the water front, while not up to the highest winter average, showed much activity, with prospects for the coming months most promising. Several tons of grain were shipped.

Local fishermen reported small catches. Manufacturing was fully up to the standard.

The heavy apple shipments still continued. Last year the total shipments amounted to about 278,000 barrels, while so far this year the figures have reached about 900,000 barrels. Following were shipped from Halifax from September 1 to December 18, 1911 (exclusive of some 1861 half-barrels and 9,907 boxes):

London	332,333
Liverpool	151,323
Glasgow	134,281
Hamburg	133,673
Bristol L.....	13,430
Newfoundland	6,736
South Africa	2,675
Manchester	3,701
Total	778,152

Besides the above, 100,000 barrels were sent to Western Canada, and shipments were made to Hull, Eng., (17,574 barrels), St. John, N.B., and elsewhere.

The Christmas trade in certain lines was extremely large, confectioners, fancy makers and poultry dealers reporting big sales, while leading jewellers reported the biggest sales in their history.

The annual report of the Acadia Sugar Refinery shows a net profit of \$96,012.45 for the year, disposed of as follows: Two interim dividends of three per cent. on preferential stock of \$40,000 each, and two of two and a half each on the ordinary stock of \$34,066.67 each and a balance of \$46,119.11.

Shelburne.—On December 9 there was launched from the yard of Joseph McCall a fishing schooner, built for Captain Abraham Inkpen, Burin, Newfoundland. She is 105 ft. over all, and registers 96 tons. Another fishing schooner for Newfoundland parties is under construction, as well as a steamer for the new Burrell-Hanson Iron Company of Yarmouth.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

The condition of the labour market during the month of December was not little changed from that of November, the supply being in excess of the demand. The fine weather during the greater part of the month enabled more outdoor work to be done than usual. In Charlottetown, good progress was made on the new Zion Church and throughout the country the Government contracts, including the Tracadie seawater were concluded for the winter. The merchants report a brisk trade during the Christmas holidays and the month closed with business on a whole on a sound basis.

Conditions in agriculture were normal during the month; a considerable amount of produce was shipped from the Western end of the Province. Fish-operations were quiet with the exception of smelt and eel fishing which was carried on successfully. The few factories were working under normal conditions. The demand for labour was about equal to the supply. Railroad construction was concluded during the month for the season and the

Autumn time table remained in force, the usual number of trains being run.

MONCTON, N.B., AND DISTRICT.

A considerable decline in the demand for carpenters, masons, painters and unskilled labourers was noticed. This however is usual at this season of the year. Trade and commerce have been active and fully up to last year's standard. Building operations have been quieter, but the unusually mild weather throughout the entire month was very favourable to the completion of contracts. The number of building permits issued within the city for 1911 total 95 representing \$82,835.00 as compared with 76 permits representing \$95,455.00 for 1910. This list includes 29 dwelling houses, the balance being for outbuildings and remodelings. On December 1 the Moncton Tramways Company began operating a street car line extending from King street along Main, High and John streets to the Intercolonial railway shops. About December 19 the natural gas was turned on into the gas pipes throughout the city and is in use at several establishments. The J. A. Marvin Ltd., biscuit factory, employing a staff of 50 hands intend operating actively all winter, \$6,000 of new machinery has been installed during the season and the output largely increased. The New Brunswick Wire Fence Company report an increase of 50% in sales to farmers during the season. An additional weaving machine was also installed. The Maritime Hat Company employing a staff of ten male and thirty female operatives is also in active operation with encouraging outlook. At the Record Foundry, the Cotton factory and Humphrey Woollen Mills normal conditions prevail and no probable change is in sight. Incorporation has been asked for the George McSweeney Company, Limited, capitalized at \$49,000 divided into 980 shares to take over the Brunswick Hotel property; also for the International Automobile Company, Ltd., cap-

italized at \$50,000 divided into 500 share. Customs collections for the Port of Moncton during the month of November show import value \$73,266 and duty \$11,453 as compared with import value \$50,332 and duty \$4,009 in November, 1910. Bank collections reported fair.

Farmers have had a quiet month owing to absence of snow roads, work being limited to the marketing of produce and the usual daily routine winter work. Considerable hay was moving at from \$7 to \$8 per ton loose. Pork was slacker than last season averaging about 7½¢ per lb. per carcass. Xmas turkeys sold at 25¢, ducks at 20¢, geese at 20¢ per lb.

Good catches of smelt are reported along Kent County shore. Prices have also been high ranging from 4½¢ to 5½¢ per lb. In many cases the yield from the nets were as high as 3 tons consequently good money was made. The outlook for lumbering is much quieter than last season. Locally but little is being done, larger operations being confined to the northern parts of the Province. Steady conditions prevailed in all local manufacturing concerns and no material reductions in staffs or curtailment of operations being so far in evidence.

Railroad construction has been confined to the ordinary work upon road-bed as is usual at this season. Repairs have been made upon the section of road between Hillsboro and Albert and the Salisbury and Harvey train is again operating between those points.

Outside the regular runs of the railway service considerable special work has been done and consequently the demand for operating crews has been very good.

The demand for unskilled labour has fallen off materially from last month. Wages were \$1.50 per day. Transients have departed, the local supply being in excess of the demand.

ST. JOHN, N.B., AND DISTRICT.

The labour market was only fair dur-

ing December, several of the buildings under construction having been finished as far as bricklayers were concerned, and work on the new Armory ceased for the winter. The building outlook for spring is considered good, as it is anticipated that several new industries will be started.

A new wholesale millinery company has been started under the name of Washburn, Nagle, Earle Company, Limited. The company is capitalized \$10,000. The Union Bank of Canada has decided to open a branch in Fredericton at the first of the new year. The Telegraph Publishing Company has closed its job printing office and business. Up to December 23, there have been filed at the Customs House cargo manifests for eleven steamships in connection with the winter port service. These vessels took away Canadian goods valued \$1,121,997, and foreign goods valued \$1,252,264, making a total valuation \$2,374,261. The shipments of wheat consist of 822,216 bushels. Bank clearings for the five weeks ending December 23 were \$8,074,090, and for the corresponding period last year \$7,481,326, being \$592,764 greater in 1911 than in 1910 and \$1,828,125 in excess of the five weeks ending November 23 of the current year.

Traffic on the Canadian Pacific Railway and the Intercolonial has been very heavy, especially during Christmas week, and trains were invariably behind schedule time in arriving.

FREDERICTON, N.B., AND DISTRICT.

Employment was more general during December than is usually the case at this season of the year. The building trade, especially had favourable weather, and much outside work was engaged in. The holiday trade showed a considerable increase over previous years, giving temporary employment to many as well as help towards the end of the month. The discontinuance of civic work and lack of snow in the woods caused a general slackening of industrial activity.

pecially affecting unskilled labour. Busy conditions continued in practically all of the factories, and skilled labour was fully employed. The Hart Boot and Shoe Company was inquiring for more help, and the John Palmer Larrigan Works was working overtime. In fact, there has been no shortening of the hours of labour in any of our industries as has been the common practice at this season in former years. The New Brunswick Foundry, which was destroyed by fire some months ago, has been reconstructed on an enlarged scale, and will soon give employment to a much larger number of men than formerly. The renovation of Christ Church Cathedral, also gutted by fire, has given employment to a large number of workmen, especially carpenters and painters, while the construction of Intercolonial station house kept bricklayers and masons busy in the early part of the month. Wholesale and retail dealers reported business to have been more brisk during Christmas week than ever before at this season. Surveying parties are now out on the St. John Valley Railway route, and the line which is to run from Gibson to the coal fields at Minto, and active construction is promised on both lines as soon as the snow leaves in the spring. The construction of these railways should be a great stimulus to labour for years to come, and citizens generally look for increased prosperity from their operation.

There was a good demand for farm produce and good prices prevailed in the country market during Christmas week. Turkeys retailed at 25 to 30 cents per pound; geese \$1.50 to \$2.00 each; chickens 15 to 20 cents per pound; beef 7 to 8 cents; pork 8 cents; lamb 10 cents; potatoes \$2.00 per barrel; butter 23 to 28 cents per pound; eggs 35 to 40 cents per dozen.

There promises to be a great curtailment in lumber operations this year on account of large stocks left over from last season, and lack of snow in the woods has also interfered to some extent with the work. Wages, however,

have ruled about the same as last winter. The mills in this district are all closed down for the winter, most of the employees going to the bush.

NEWCASTLE, N.B., AND DISTRICT.

The labour market was dull and the supply much greater than the demand. It has been one of the finest seasons for outside work ever known here. The only employment now is fishing. Smelt fishing has been very good and hundreds of men were engaged at that work and were doing well, some of them making from one hundred to one hundred and fifty dollars a night. The bass fishing is much better than it has been for several winters and is giving a great many men steady employment. All other work is limited. Not nearly as much lumber is being cut this winter as last. The price was low all summer, and there is, therefore, a heavy stock of sawn lumber on hand. The cut will not be more than 60 per cent. of that of the winter before.

QUEBEC, QUE., AND DISTRICT.

The weather in the early part of the month was cold and stormy and greatly retarded outside work. Christmas retail trade appears to have been very heavy. Navigation closed very late, the last ocean-going steamer to leave Quebec being the Bray Head which sailed on the 8th of the month, and in the coasting trade the last vessel was the steam barge Carleton, which arrived in Quebec from Anticosti on December 23.

Farmers were busy putting meat upon the market, and the prices of the Christmas trade ruled high. Beef by the quarter sold for 7 to 8 cents; mutton (carcase) 8 to 9 cents; pork (carcase) 9 to 9½ cents; turkeys 18 to 20 cents; chickens 13 to 15 cents, and ducks and geese 14 to 16 cents per pound. In the lumbering industry the heavy snowfall in the early part of the month gave good roads at the very start for logging operations. In railroad construction a num-

ber of gangs were laid off as the weather conditions were unfavorable.

SHERBROOKE, QUE., AND. DISTRICT.

Labour was exceptionally well employed during the month, outside work being carried on with but slight interruption, owing to the very mild weather. The different works were all running to full capacity, and more machinists would have found employment. The Jencks Machine Company propose to double their plant. They now employ from 350 to 375 hands. This number they will increase by 250, providing a by-law is ratified by the electors under which the municipality would give the company a loan of \$100,000, to be paid back in ten annual payments. The company will also be exempt from taxation for ten years.

An agreement subject to the ratification of the ratepayers has also been made with the Canadian Brakeshoe Company, Limited, a branch of one of the strongest companies in that line of business in England. The company agrees to employ not less than one hundred hands to start with, and to add each year not less than twenty-five more. The plans call for an expenditure of between \$40,000 and \$50,000 on the building. They also agree to pay not less than \$1,000 a week in wages. The city will give the company a site which will cost \$11,000, and exemption for ten years from taxes.

Another company that has decided to settle here, is the Cosmopolitan Clothing Company, which agrees to employ between seventy-five and one hundred hands to begin with. The city agrees to purchase for it the old carpet company building, and to give exemption from taxes for a number of years.

The Paton Manufacturing Company have not been so busy in years as they are at present. Within the month between twenty-five and thirty employees, who were thrown out of work through the destruction of the mills at Chambly Canton have secured work with the Paton Company.

Retailers reported that although country people could not come to town in such numbers as when there is good sleighing, the Christmas trade was above the average.

Farmers were given a good opportunity to finish their season's work. Owing to the mild weather, ploughing was engaged in up to Christmas, which is somewhat unusual. The heavy rain during the month filled the wells and brooks, so that there will be no shortage of water as was anticipated at the first of the month. Lumbering operations were handicapped for the want of snow. All branches of manufacture were fully employed during the month, and there was work for all. The open season allowed work to be proceeded with in the asbestos region much later than is generally the case.

ST. HYACINTHE, QUE., AND DIS- TRICT.

The condition of the labour market during December was generally satisfactory. The building trades were not active during the month, no new building being started. Sash and door factories had a good month, employing their full staffs. The confectionery industry had one of its best months in the year, the volume of business being more than twice that of last year. All the other industries were busy. In the retail trade business was brisk on account of the Christmas season, with the exception of furs. Prices of meats and farm products were very firm, stocks being limited and rapidly absorbed by an active demand. Wholesale business was quieter, but the month was altogether satisfactory. Banks reported a good month with easy collections. There was no change in the rates of wages or hours of labour and relations between employers and employees were most cordial. Work on the farm was quiet, and the labour supply was amply sufficient to meet the demand.

The building trades were quiet with the exception of plumbers and steam

and gas fitters. The other skilled trades were all active. Unskilled labour was fairly well employed.

SOREL, QUE., AND DISTRICT.

December was an active month for all branches of labour. Manufacturers were crowded with orders and good men readily found work in all departments, with wages ranging from \$2.00 to \$2.50 and \$3.00 for a ten hour day. Shipyards were busy repairing the two hundred boats wintering in the harbour. Nearly 900 men were employed in the government shipyards. Trade was in a flourishing condition on account of the holiday season. Building operations were at a standstill, not a single permit being taken out during the month. Banks received less deposits than during the same month of last year, and larger amounts were withdrawn than last year. There is some uncertainty as to employment next spring, which causes some anxiety among the working classes.

The local market was fairly well stocked, in spite of the bad condition of the country roads. The price of everything was high. Turkeys sold for 22 cents per pound, other fowls 15-16 cents, beef 13-15 cents, pork 12-13 cents, fresh eggs 50-55 cents per dozen, case eggs 35 cents, butter 30-35 cents per pound, farmers' lard 19-20 cents, etc.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

The labour situation continued active, the open weather permitting building operations to go on. Three building permits were taken out during the month. Work is expected to be fairly abundant in the various manufactures throughout the winter. Business, wholesale and retail, suffered somewhat from the fact that the country people did not come to make their purchases as usual, owing to the bad roads. Banks reported a satisfactory month. There was no sign of trouble between employers and employees.

Farmers were much hampered by bad roads in marketing their products, and prices were very high in consequence, turkeys selling as high as 35 cents per pound, geese from 22 to 28 cents, chickens 20-22 cents, and fresh eggs 45-50 cents a dozen. The lumber cut is almost finished, and it is feared it will be hard to get it out. Railroad construction work is over for the season.

The building trades had a good month, as well as the metal and engineering trades. Shipbuilders and caulkers were quiet. The other skilled trades were active. Unskilled labour was well employed.

MAISONNEUVE, QUE., AND DISTRICT.

December was one of the best months for several years in the building trades and several other industries. Business was very active except in furs and heavy clothing, on account of the very mild weather during the month. There was no strike or change in wages. Building operations were carried throughout the month, and several residences were even started during December.

All the skilled trades were actively employed, with men in demand in many instances. Unskilled labour had a good month.

MONTREAL, QUE., AND DISTRICT.

Although there was much activity displayed in building operations, the result is far below that of last year. From January 1st to December 1, 1911, there were issued 3,609 building permits valued at \$13,957,210, while for the same period of last year the number of permits issued was 3,404, representing a total value of \$15,859,059. Bank clearings for November amounted to \$244,282,078, as against \$217,715,346 for the same month of last year, or an increase of \$26,566,732. Customs receipts at the harbour of Montreal for November were \$1,750,494, or an increase of \$184,508 over November, 1910. Internal revenue

returns showed an increase of \$125,-279.82 over November of last year.

Manufacturing establishments were generally busy. Railway construction was quiet, but all other industries had an active month.

The skilled trades were active with the exception of iron ship builders, shipwrights, caulkers, ice cutters and drivers and steamboat men and steamboat firemen. Unskilled labour was quiet.

HULL, QUE., AND DISTRICT.

The labour market for December was not very active on account of the large industries at Chaudiere Falls and elsewhere on the Ottawa and Gatineau Rivers having closed operations at a much earlier date than usual through low water.

All steam factories were working full time, but the Mica industries were shut down after a pretty busy season. Owing to the winter being late in setting in, the contractors for the extension of the water works and sewage services have not yet closed their operations, and about 250 laborers, mostly from the lumber mills in and around Hull, were still employed during the month at a fair salary varying from \$1.75 to \$2 per day.

Although navigation officially closed on November 29, it was kept up until Christmas by most of the small crafts engaged in gathering and piling logs into various booms to insure the early opening of operations next Spring. The Dupuis-Fleming & Co.'s steam barge was kept hauling sand from the shores of Kettle Island until January 1, thus establishing a record for the closing of navigation in the Ottawa River. The Ottawa Forwarding Company will employ the usual number of men all winter, building and repairing canal barges. Several of the most important merchants in Hull declare that their business during the usual thriving holiday season has not been so good as last year, and that collection

is poor. Money is scarce and will likely be until next Spring.

Labour was brisk amongst tradesmen, in almost every trade. The traffic on the railways was larger than in November. The farmers are glad to see the prices of their products going up. They have had a splendid fall through which they have been able to prepare their ground for next Spring. They have good winter roads to drive to the city.

All through the district the labour situation is about the same as in Hull.

KINGSTON AND DISTRICT.

December, 1911, was very active, industrially, at Kingston, and in the surrounding district. Exceptionally mild and favourable weather gave those engaged in railway construction and extension, the regular building trades mariners, and others, a chance to rush their work towards completion.

Up to the close of the month men were engaged in the unusual occupations of roofing public and private buildings sailing schooners laden with coal, ploughing, etc. Mariners declared December weather to be far more favourable than that of November.

The customs revenue for the month of November totalled the sum of \$25,765.62. The revenue for the eight months of the fiscal year shows an increase of \$38,390.06 over the same period last year. This means an increase of business among Kingston merchants of at least a quarter of a million dollars for the eight months.

During the season of navigation just closed, the amount of grain that was passed through the canal office at Kingston, en route for Montreal, was 16,040,262 bushels. During the season there was reported at the canal office 3,761 tons of flour, 212 tons of merchandise, and 32,085 tons of coal. According to the report of the chief of the fire department there were 78 alarms received and answered up to December

15th. The loss was \$11,020. Insurance, \$265,000.

Several by-laws affecting industry are to be submitted to the qualified electors in January. One, to make the assessment of the Canadian Locomotive Works Company a fixture at \$100,000. It is proposed to double the capacity of the works. Another is to grant certain concessions to encourage the erection of a box factory that will give steady employment to a number of people.

As the result of friendly interviews between the management of the electric street railway company and its employees several increases in salaries were granted. Heretofore the pay of the employees was \$1.50 per day, but they were paid for overtime work. For the future their pay will be \$1.70 per day, for old employees. New men will be increased to \$1.55 per day.

PETERBOROUGH, ONT., AND DISTRICT.

Labour conditions continued active, as the mild weather favoured outdoor operations, and a large amount of inside finishing work on uncompleted contracts gave carpenters and builders a steady month. Building permits for November totalled \$12,300 being an increase of \$3,730 over the same month of 1910. The Trades and Labour Council have leased for a number of years the premises on George street formerly used by the S. A. S. A by-law will be submitted to the people on January, as to whether they are in favour of a supply of electric power from the hydro-electric Power Commission of Ontario. Operations for overhauling machinery at the Cordage Works are proceeding as rapidly as possible and considerable work is being given local firms. The task is a big one and manufacturing may be held back till the first of the year. The electrical superintendent of the International Harvester Company has arranged for the supply of electric power. The Quaker General Electric Com-

pany are very busy and find it hard to get girls to do the work. Both of these firms have been advertising for help all this month. Navigation has been open most of the month. Sewer construction work has been going on all this month owing to the mild weather. A large number of teams and men were at work on the new government wharf on George street.

Retail merchants reported business light for this time of year owing to the mild weather and absence of snow.

Farmers reaped a rich harvest during the latter part of the month. Poultry reached from 20c. to 25c. per lb. Eggs sold for 40c. per doz. Hay was selling at \$14 per ton and first class hay is scarcely procurable. Oats in this section of the country were the poorest crop in many years, the straw is short but good for feeding purposes. All other grains were the same, the failure being attributed to the dry season at the beginning of the year.

Active conditions prevailed in lumbering. Some difficulty was experienced in securing efficient men to go into the woods.

Factories as a rule were busy, with prospects of steady work for some time to come.

Lindsay.—The R. M. Beal Leather Company have been making important improvements and additions to their tannery and are now advertising for additional hands as they wish to double the staff of the Larrigan factory. Busy conditions prevailed at the Sylvester foundry, over one hundred men are employed at the present time, and the firm are willing to take on more mechanics at any time.

TORONTO, ONT., AND DISTRICT.

The favourable condition which prevailed during the previous month continued throughout December. The open weather permitted building and other outdoor operations to be carried on freely during most of the month, so that the building trades and unskilled labourers were much more generally employed

than is usual at this season. The Christmas trade set in early and was very active, affording many temporary employment as extra help, and putting a large amount of money in circulation. Skilled labour in nearly all lines was actively employed, the number out of work being few as compared with previous seasons, and mainly confined to recent arrivals. A large number of Italian labourers employed here during the summer have returned to Italy.

The water front property of the city, including the sea wall and Lake Shore boulevard, the wharf properties at Yonge and Bay street, and the Ashbridge Bay area, valued at \$2,937,648, has been transferred to the new Board of Harbour Commissioners.

The investigation by Sir William Meredith, acting as Commissioner for the Provincial Government in connection with the question of compensation for injuries to workmen, was resumed at the Parliament Buildings on the 27th and following days. Frederick Bancroft, representing the Dominion Trades Congress, presented the proposition adopted by that body and other labour organizations embodying their views as to the basis of the proposed legislation. These include proposals that the Act to be adopted shall cover all employment; that the doctrine of contributory negligence shall be abandoned; that the entire cost of compensation shall be borne by the employer, who shall be compelled to insure by a yearly tax levied upon the industry or occupation; and that a Provincial Department of Insurance should be created to administer the Act.

Farmers were able to continue field work to a much later date than usual, but towards the end of the month were mainly occupied with the care of stock and marketing produce.

Nearly all manufacturing plants were busy, especially those engaged in catering for the holiday trade. Orders in staple lines came in freely, giving every prospect of a continuance of activity. The automobile trade is particularly good, large shipments being made to the

Australian market, and new orders from that country are being continually received.

NIAGARA FALLS, ONT., AND DISTRICT.

The year closed with generally satisfactory conditions in all lines of industry. The building trades were active and nearly all manufacturing establishments were employing full staffs. A factory for the manufacture of machinery for tailor shops and clothing factories has located here. A building has been secured and the plant is being installed. The city council directed the construction of another section of sewers.

Christmas trade was very good and commercial and financial conditions generally satisfactory.

Late mild weather enabled farmers to resume ploughing. Rough and uncertain weather prevented fishermen from working for long periods.

Railway employment was steady.

Welland.—The Pittsburg Nut, Bolt and Nail Company will establish a plant here. The John Deere Company has appropriated a million dollars for extension of its branch here. Ratepayers will vote on by-laws to provide \$20,000 for a waterworks filtering plant and to grant concessions to a preserving factory.

Bridgeburg.—A factory to manufacture a "patent lighter" has been started. Twenty hands—chiefly females—will be employed.

Chippawa.—The new school was well advanced and the lighthouse nearly completed.

Port Colborne.—Two of the largest grain-carrying lake vessels lay up here for the Winter with full cargoes for the mill. The Grand Trunk Railway's business here has greatly increased during the year. The flour mill ships 25 carloads of flour per day, and the cement works from 15 to 40 cars per day.

ST. CATHARINES, ONT., AND DISTRICT.

The labour market continued active and labour generally was well employed. Although only three building permits were filed at the City Buildings totalling \$2,400.00, as compared with 15 permits for November, totalling \$18,475, there was no lack of work for the building trades, as many buildings for which permits had been issued in earlier months had begun. Never before have there been so many buildings in course of erection at this season of the year, and although the building trades are doing their best to handle the work much will be left incomplete owing to severe weather conditions. And still the demand for new houses continues.

During the month the canning factories were closed down after a very busy season. Operations on civic work such as concrete sidewalks, curbing, paved roads, have ceased for the winter, sewer construction being the only line of such work giving employment. The new water main is progressing favourably. Notwithstanding adverse conditions of roads and weather, the Christmas trade was the best ever experienced by many merchants, and was generally reported to have been good.

Most of the mills and factories were running full time.

Port Dalhousie.—Labour was well employed for the month.

Merriton.—Favourable conditions prevailed for the employed of labour, which was active to busy.

Thorold.—The labour market was active to busy with conditions of employment good. Work on the new basket factory was begun this month.

Grimsby.—A new factory for Grimsby will be The Grimsby Soap Works, Ltd., capitalized at \$50,000.

HAMILTON, ONT., AND DISTRICT.

Active conditions prevailed during the month in nearly all lines of indus-

try. Owing to the exceptionally mild weather building operations were carried on more extensively than usual during December. Hamilton has secured another big automobile industry, namely The Schacht Motor Car Company of Canada, which has purchased a modern three-storey brick factory on Sanford avenue, and expects to be in a position in its first year of operation to reach an output of 250 pleasure and 75 commercial cars.

Industrial Commissioner Henderson has been negotiating with the proprietors of a large gas and coke concern in New York City, and it is expected that a Canadian branch of the industry will be established here early in the new year. One of the local steel firms has promised to use 75 per cent. of the product as soon as it can be made. The city will make an active start shortly on the construction of the municipal power plant. It expects by February 15 to be in a position to supply house customers as well as factories in East Hamilton. The city will also begin the underground work in the centre of the city as soon as the weather breaks in the spring. The Hydro-Electric Board has accepted the tender of the Standard Underground Cable Company for 165,000 lbs. copper wire, involving an outlay of about \$25,000 by the city.

About \$20,000 will be spent remodeling the City Hall and installing a new heating system. The Inksetter and Myers Company, Limited, have taken out a permit for frame and corrugated iron factory building on Strachan street, in which to make ice, at a cost of \$40,000.

A permit has been taken out by the Magnetic Cream Separator Company for the erection of a factory for the manufacture of cream separators that will cost \$35,000. It will be located on Sherman avenue north. The Steel Company of Canada, Limited, will immediately proceed with the erection of two new open hearth furnaces of fifty tons capacity each, and ground is now being broken for the blooming mill, the continuous billet mill, and the combination rod and bar mill. The contract for the

erection of these buildings has been given to the Hamilton Bridge Company, which undertakes to have the structures completed by April 1. Contracts have also been made for the open hearth furnaces and it is hoped to have the mill in operation by October 1. A large number of skilled workmen will be employed in the mill.

Custom collections for the port of Hamilton during the month of November amounted to \$224,367.61, an increase of \$15,728.01 over the corresponding month a year ago. It has been decided by the retail grocers of this city not to make Wednesday afternoon closing an all-the-year feature of the business. A vote taken on the proposition resulted in 109 in favor of Wednesday afternoon closing and 63 against. The association felt that the sentiment was not strong enough, and that a success could not be made of the movement against the active opposition of 63 grocers. Wholesalers found trade a little quiet toward the end of the month. Many of the large retail establishments report the Christmas trade as having been the largest in the history of their stores.

The Hospital Governors have increased the salaries of the nurses at the City Hospital from \$4, \$6 and \$8 per month to \$5, \$7 and \$10.

The members of the local Cement Workers' Union are endeavouring to have the rules governing the local cemeteries amended so as to allow the erection of cement tombstones therein.

Farmers in this locality were occupied mainly with the care of stock and marketing produce. The Christmas market was one of the best held in many years, good prices being realized for produce. Turkeys sold readily at 25 cents per lb., and chicken, ducks and geese also advanced in price.

Nearly all the mills and factories were working full time and some of them have found overtime necessary to keep abreast of their orders for outside points.

The navigation season of all the Hamilton steamers closed on Dec. 8, after

one of the best years in the history of the various companies.

The Merchants' Mutual Steamship Company have purchased a portion of Lansdowne Park, and it is expected that a dock will be built abutting on the new site.

Burlington.—About 25 hands were thrown out of employment by a fire which completely demolished the evaporating building of J. C. & M. C. Smith.

Dundas.—A wire fence factory has taken a lease of the old glove factory on Cross street and will shortly commence the manufacture of wire fences of all kinds.

BRANTFORD, ONT., AND DISTRICT.

Labour was not so well employed as in the preceding month or the corresponding month of last year. The building trades were busy for this time of the year, and should favorable weather continue, there will be considerable work. The iron trades were not so busy, with one or two exceptions, and some men have been laid off. Two new companies were organized recently. The Brantford Oven and Rack Company, Limited, with a capital of \$50,000 and the Brantford Cold Storage Company, Limited, with a capital of \$40,000. The former expect to erect buildings soon. Merchants report a brisk Christmas trade, the volume of which would have been increased by more seasonable weather.

Paris.—The fabric mills were busy, but the iron trades were slack, a number being out of work.

GUELPH, ONT., AND DISTRICT.

Local conditions for the mass of the workers showed a decided improvement over the same period of last year. Finishing contracts kept those engaged in the building trades actively employed. Contracts were awarded for the new factory of the Guelph Stove Company and work on the foundation commenced, the open weather of the past

month being favourable for all outdoor work. A number of sewers are being laid making considerable work for labourers. Nearly all the factories were working full time with full staffs, some working over time. The prospects are that similar conditions will continue throughout the winter.

The financial statement of the Guelph Radial Railway showed net profits for the year 1911 of \$7,499.83. Out of this the directors have declared a dividend of $4\frac{1}{2}$ per cent. on capital account.

The new branch of the Radial Railway running into St. Patrick's ward, was opened during the month and is proving a great convenience to the working class of that district.

The customs revenue for the month of November was \$18,942.74 an increase of \$29.96 as compared with the corresponding month of last year.

Wholesale and retail merchants reported an excellent Christmas trade.

Farmers were occupied mainly with the care of stock and marketing produce, though many took advantage of the open weather during the fore part of the month to finish up fall ploughing.

The large addition to the Provincial Winter Fair building was completed and the Fair which was held from the 12th to the 15th of the month proved to be the best on record. There was an attendance of 33,508, with the number of entries in all classes larger than ever.

The different associations holding their annual meetings at the same time were largely attended.

BERLIN, ONT., AND DISTRICT.

The month of December was a busy one in labour circles, with but few exceptions. The mild weather was favourable to the building trades and good progress was made on the new buildings under construction. Manufacturing establishments in nearly all branches were busy and working over-

time, with a demand for help in the cabinet-making trade. The Dominion Sugar Company completed its season's run during the latter half of the month, and reports having had a good season.

Wholesale and retail trade was exceedingly good and merchants reported that their sales exceeded those of the same period of 1910. Plumbers received an increase in wages under an agreement providing for a rate of 35 cents per hour and an eight hour day. The Trades and Labour Council have undertaken to start a co-operative store, and are selling shares for \$2.50 each. By the end of the month they had sold and collected over \$1,000, and they expect to be able to ask for a charter early in January, 1912.

Waterloo.—All classes of labour were well employed, manufacturing establishments were all busy and some working overtime. Good progress was made on the new Post Office and other new buildings during the month.

WOODSTOCK, ONT., AND DISTRICT.

Industrial and business conditions were probably as satisfactory this year as they have been for any December in the history of the place. Most of the factories were working full time, and several of them overtime. The furniture, the wagon, and the musical instrument industries were particularly busy. The Canada Furniture Manufacturers are completing an important addition to their local factory. And one of the local organ factories reports that it will take weeks yet to fill the Christmas orders.

Some of the merchants reported the best Christmas business in their experience. There is apparently no scarcity of money. The chairman of the relief committee of the City Council reports that the demands on the charity funds have been unusually light so far this year. There is some demand for work, mostly from people who have but recently come to the country; but not a great deal. And so far it has not been diffi-

cult to supply work for practically all those seeking it, and really wanting it. There is no demand, however, for unskilled labour, and there is not likely to be any during the rest of the winter. For skilled men in both woodwork and iron work there is usually some demand.

STRATFORD, ONT., AND DISTRICT.

Labour conditions continued active, all classes being fully employed, especially those working in the Grand Trunk shops, and in the woodworking and clothing factories. There was considerable inside work done on many buildings this month. The wholesale and retail merchants reported an excellent trade and most of them had to employ extra help for the holidays.

The ratepayers are asked to vote, at the municipal elections on a by-law to authorize the corporation of the City of Stratford to guarantee payment of ten thousand dollars, to organize a company to establish a factory for the manufacture of piano supplies, if carried, they agree to employ forty hands. The customs returns for the month of November totalled \$12,465.55, a slight increase on the figures for the same month last year.

The farmers were marketing their produce, for which they received the following prices:—

Turkeys, 18c to 20c per lb.
Ducks, 70c to 75c each.
Geese, \$1.25 to \$1.50 each.
Chickens, 60c to \$1.00 per pair.
Eggs, 30c to 50c a doz.
Butter, 27c to 29c per lb.
Potatoes, \$1.10 to \$1.25 a bag.
Apples, 75c to \$1.00 a bag.
Wheat, 88c a bush.
Oats, 40c a bush.
Barley, 65c a bush.
Peas, \$1.00 to \$1.10 a bush.
Hay, \$16 to \$18 per ton.
Live hogs, \$5.75 to \$5.90 per cwt.

LONDON, ONT., AND DISTRICT.

Another disastrous fire visited this city on the night of December 15, and partially destroyed the factory of the D. A. Perrin Company, manufacturers

of biscuits and candies, at a loss of about \$150,000, throwing out of employment about 450 employees. This is the second large fire in two months with a loss of over one million dollars. The bake shop was completely destroyed, but the candy shop will open again at the first of the year, and temporary quarters have been secured for bake shop, which will be opened as soon as necessary machinery can be installed.

The weather during the month was the mildest in years, with hardly any snow, and outside work was carried on to a large extent. Building permits were taken out for two new stores on the site of the fire a month ago. Seventeen feet in the burned area was sold at \$1,000 per foot. Work has commenced on these structures. A contract for a five-story addition to Darch & Sons harness factory has been let for \$17,000 and work will be commenced at once. Work is also being rushed on the \$45,000 Masonic Temple building. The factories and foundries of the city are very busy, and a great amount of overtime is being worked. Retail trade was exceptionally good, and a number of the stores were almost sold out by the Christmas shoppers. City Firemen and Street Railway Employees were both granted increases in wages during the month.

Wingham.—Work on the extension of the Wingham Stove Works is being rushed, and residences on the site of the new factory are being razed. The building will be 80 x 100 feet and three stories in height.

Strathroy.—The Nicholas factory, for the purpose of manufacturing kitchen cabinets, screen doors, windows, etc., has been granted by the council a loan of \$12,000 without interest for 15 years, to be repaid in annual installments of \$800. They will erect a two-story factory 50x60, with 13,000 square feet of floor space.

ST. THOMAS, ONT., AND DISTRICT.

The general condition of the labour market in the city and district was

quieter than during the preceding month. Open weather permitted outside work to be continued, but there was a falling-off in the amount of work done. Only one building permit was issued during December, totalling \$2,100. A considerable number of vacant houses were in evidence, these being for the most part houses without the modern improvements.

Ratepayers will be asked to vote on the proposed extension of the St. Thomas Street Railway to Port Stanley. A largely signed petition has been presented to the City Council asking that the question be submitted to the ratepayers.

The Gaso-Electric Motor Co., Ltd., of St. Thomas, has been gazetted, with a capital of \$1,000,000. The Company is to manufacture motor vehicles, aeroplanes, motor boats, electric and gaso line engines and dynamos.

Traffic men on the railroads entering the city report that regular men had a good month. A number of spare men were added to the extra list.

Railway shop employees were well employed.

Christmas markets were well attended, and a good supply of fowl was offered.

Very little work was done in this district by farmers during the month, aside from the care of stock. The city markets were well attended with buyers and sellers.

This season's catch of fish at Port Stanley has been heavy.

Local industries report an average month.

CHATHAM, ONT., AND DISTRICT.

Unfavourable weather prevailed during the greater part of the month and was a serious draw back to outside work. Many labourers and mechanics were unable to work more than three quarters of time.

Factories generally were running full time with a few exceptions. Three building permits were issued for the month. School \$25000 one addition to

the Palmer Baking Company for \$30,000 and one small farm building for \$350.

Merchants report the Christmas trade far below that of 1910 principally owing to the unfavourable condition of the roads which prevented farmers marketing their produce; as a result produce has reached the highest price recorded on the Chatham market.

On January 1 milk dealers propose raising the price of milk from 7 cents to 8 cents per quart.

The Board of Education at the last meeting raised the salaries of the heads of the different departments \$100. Each to take effect in January. All branches of trade employed inside here fairly busy, a number of the factories closed down during the Christmas holidays and a larger number were idle for a few days.

Railway officials reported a heavy holiday passenger traffic.

Prospects look bright for 1912 in all branches of trade. During 1911 the volume of building permits in Chatham amounted to about \$17,000.

WINDSOR, ONT., AND DISTRICT.

Labour was well employed in this city and district. Weather conditions were fine for outdoor work, and the building trades were just as brisk as at any time during the year owing to the mild weather. Dry goods and hardware merchants were complaining about the dullness in their trade. The Bell Telephone Company had a large gang of men employed putting all the wires under ground. All manufactures in the city were running full time with full staffs, which is unusual at this time of the year.

SAULT STE. MARIE, ONT., AND DISTRICT.

The supply of labour was slightly in excess of the demand during the month. This is usual at this season owing to cessation of building operations and

municipal work, and to the closing of navigation.

Unfavourable weather conditions and lack of snow had a bad effect on the retail clothing and shoe trades. Merchants on the whole however reported good holiday business.

Lumbering operations were somewhat hampered by the bad weather conditions.

The Algoma Central Railway expect to connect with the Canadian Pacific Railway this winter and will continue through to the Canadian Northern Pacific Railway and Grand Trunk Pacific as quickly as possible.

The Lake Superior Paper Company expect to start manufacturing in their new paper mill early in the spring they will also have their rebuilt and enlarged pulp mills ready at the same time. The steel plant and blast furnaces were operating steadily with orders well ahead.

WINNIPEG, MAN., AND DISTRICT.

During the last month of the year there has been a minimum of unemployment compared with previous years. Outdoor work has to a large extent ceased because of weather conditions. In the building trades inside work is keeping a more than usually large number employed. In manufacturing trades generally there has been seasonal slackness. In some of the larger factories the hands have been put on short time. This is the case with the railroad shops. Activity in business generally has been very marked, due to the large crop receipts and the exceptionally heavy holiday trade. All the railroads have been exceptionally busy. Bank clearings for the month were much heavier than they have hitherto been.

Receipts of grain at Winnipeg continue to be of larger volume than in any previous year, and this is keeping the rolling stock of the railroads fully employed. Some threshing is still being done and very little of the crop in Manitoba remains in the fields. Work in the

lumbering camps and the cordwood camps has been facilitated very much by the character of the weather. The early freeze up made trail-making easy. More than the usual number of men are employed in this work.

In the building trades work is confined almost entirely to inside work. A special effort is being made to complete during the present month the new building for the Publicity Bureau, and many men are being employed despite the severity of the weather.

In the metal and engineering trades the class most active are the electrical workers. The installation of the electrical distribution system of the City of Winnipeg is giving employment to large numbers, and the low rates for electric current now in effect is stimulating the use of it for many purposes. The rate for current for electric light purposes is three cents with a minimum charge of fifty cents per month. For heating, cooking, and operation of purely domestic appliances the price is one cent per kilowatt hour with a minimum charge of 75 cents per month. This rate applies to such utensils as electric irons, electric cooking stoves and electric radiators.

The manufacturing jewellers are also very busy.

In the woodworking trades business generally is quiet at this season.

In the printing trades there has been during December unusual activity, and orders ahead indicate that during the early months of the year business in these trades will be good. During the month many people have been pressed into service in the stores for the holiday season. It has been an exceptionally good one from the standpoint of the stores. The mild weather made shopping easier, and it started earlier than usual this year, and continued heavy until the close of the season.

In transportation circles all hands available for train operation have been in request, and the outlook for the early months of the year indicates heavy traffic.

BRANDON, MAN., AND DISTRICT.

The labour market during December was quieter than during the previous month. Owing, however, to exceptionally fine weather much building has been done that otherwise would have been left till spring.

Nearly all exterior building operations have ceased for the winter with the result that members of the building trades were unemployed, excepting plasterers and carpenters engaged on interior finishing.

The Hanbury Manufacturing Company was still working overtime in its factory, also, the McDiarmid and Clark sash and door factory.

The former company has removed all its sash and door machinery and will use the whole plant for the manufacture of hardwood interior finishes and cabinet work, a branch of the business which has greatly increased at this point. As usual there has been considerable activity in the retail trades and business was better than in preceding years.

The Hanbury Manufacturing Company has decided not to cut any logs in its reserve north west of here, in consequence there is no demand at this point for lumbermen.

REGINA, SASK., AND DISTRICT.

The demand for labour, especially in the building trades, has steadily decreased from the beginning of the month. Although excellent weather prevailed, a large percentage of the building trades were idle, especially carpenters, many finding it difficult to secure employment. This in some respects may be attributed to the closing down for the winter of a few of the large buildings in the course of construction.

On December 16, street railway operations were terminated,—the year's programme having been completed on this date, which comprised the laying of seven miles of trackage, poles and wiring, etc.

Increased trade was reported both in wholesale and retail circles, it being the general opinion that the trade had more than doubled compared with the corresponding period of last year.

Threshing was carried on steadily in Southern Saskatchewan. The frosty nights and clear days were favourable to the work, and farmers reported that the grain was not damaged to any great extent by the heavy frosts of a few weeks ago.

Some threshers purchased horse power machinery and substituted this for the steam or gasoline engines and reported making much headway. It was expected that the rest of the wheat and oats would soon be threshed but the flax would not be threshed until spring.

One of the greatest drawbacks which the farmers have experienced this season has been the car shortage in many places the situation being serious in consequence.

CALGARY, ALTA., AND DISTRICT.

The general condition of the labour market was good for December the open weather permitting building operations to be rushed. The supply did not equal the demand in the case of plasterers and plasterers labourers and steamfitters. The outlook for the building trades during the winter months is far better than in the corresponding period of last year.

The contract for the Canadian Pacific Railway car shops have been let to the Westinghouse-Kerr Company, and preparatory work is now under way. The concrete basement of the Canadian Pacific Railway \$1,000,000 hotel is about complete, the steel work is expected to arrive shortly, and erection of same will commence immediately on arrival. The excavation for the west wing of the station is also complete and the concrete work started. The upper work of the structure will be built simultaneously with that of the hotel.

Work on the superstructure of the Molson's bank has recently commenced and is being vigorously prosecuted.

The Dominion Bridge Company, which has purchased land immediately adjacent to the city limits has commenced the preliminary work of laying out the ground for work shops to employ about 300 men.

The City Commissioners closed down all public works under their charge on the 24th for at least one week.

Wholesale, retail merchants report trade this month has far exceeded that of last year and in many instances it has increased by 50 per cent.

EDMONTON, ALTA., AND DISTRICT.

The general condition of the labour market continued active and the prospects are that it will remain so till late in the winter.

Weather conditions being favourable, the building trades had an active month which would compare well with the previous month and the corresponding month a year ago.

Transportation companies and wholesalers reported exceptionally heavy business. Retailers and distributors were very active and reported collections good. Edmonton has been made the general headquarters of the new Western Division of the Canadian Northern Railway, with a General Superintendent in charge.

The estimates in preceding reports as to the favourable results of the 1911 crop in the district is receiving confirmation.

Recent enquiry among local millers elicits the information that never before have there been such fine offerings of wheat of good milling grades. Considerable inconvenience and some loss has been caused by the unfortunate delay to threshing owing to the abnormally late harvest, but the magnificent weather which has prevailed has en-

abled great progress to be made with threshing.

Lack of snow has delayed lumbering operations.

The threatened strike in the coal mines was fortunately averted and conditions are again normal, every mine in the district producing up to full capacity, though the total output is still only a fraction of the amount the available market could take. General activity prevailed in all trades, and while a large number of unskilled labourers returned from construction camps the demand was about equal to the supply.

LETHBRIDGE, ALTA., AND DISTRICT.

December was a rather poor month for labour in the city, but in the outlying districts conditions were better. The farmers were very busy threshing and found employment for a large number of men. This work is almost finished. Coal miners were very busy and there was a great demand for coal. At the Bridgend mines there is great activity in house building for the miners and others. At the Chinook mines forty-eight cottages are being built for miners. Both mines are finding work for men as fast as they are developed. The building trades were very dull compared with conditions in December, 1910. The estimated cost of buildings erected in Lethbridge up to the first of December was \$910,350.00. The overhead traffic bridge is almost completed. The frost has stopped most of the city work on the streets. Bank clearings showed a falling off. The wholesale and retail trades were fairly active with better prospects. Flour and feed mills were very busy. The two in Lethbridge were working a double shift and a quantity of the flour was being sent to Japan.

NELSON, B.C., AND DISTRICT.

The general condition of the labour market in this district has been good for the season.

Coal and coke are now coming in from the Crows Nest District but not nearly up to the normal quantity yet.

The rush of the building trade and other city improvements being mostly over for a season, teamsters and transfer men are beginning to find business getting slack. The Provincial Government is building a large bridge of cement and iron, over the Columbia at Trail. The contractors, Messrs. Armstrong and Morrison of Vancouver have a large crew of men at work. A new public school has been built by Messrs. John Burns & Son of Nelson, costing \$40,000.

There was exceptional activity in the mining industry, with every prospect of good times ahead. From all quarters come reports of new mines becoming regular shippers and many of the older mines increasing their output, notably the Standard and the Van Roi at Silverton, and the Molly Pibson at Kokanee.

The Granite Poorman mines near Nelson continued to be regular shippers. The action of the Consolidated Mining and Smelting Company in bringing coke from Pennsylvania during the protracted coal strike, kept the Trail Smelter in operation and furnished a ready market for all the ores of the Kootenay.

Part of the Kaslo and Steam Railway was burned in a forest fire some time ago, which has stopped operations for a time on some of these mines.

The lumber industry comes next to mining in this part of British Columbia but most of the sawmills are now shut down for the winter, except where planers are kept going—and the logging camps are the centres of industry. The past season if not quite up to expectation is generally admitted to have been fairly good.

The Nelson foundry has had a busy season and added considerably to the extent of their works and equipment. The two jam factories have also done a good season's work—and have given a great stimulus to the fruit growers. The soda water factory does a steady

and growing business, and so do the marble polishing works. The granite quarries close to the city supply an unlimited amount of good building stone and give work to a regular crew of men. Railroad construction has almost been at a standstill in this district for some years, but now the Canadian Pacific Railway is building the Kootenay Central from Golden to Fort Steele, via Windermere and some mining branches and Spurs around Sandon and Three Forks.

NEW WESTMINSTER, B.C., AND DISTRICT.

The weather during the month was so wet that very little outside work has been done. Building road grading, land clearing, etc., were practically at a standstill, and consequently there are many idle men. At least half the month has been lost time on all outside work. There is for the time of year more building going on than usual, however, two large schools and an eight-storey steel business block being in course of construction, besides a number of dwellings. Building permits totalled \$60,000 for November, and will be about the same for December, but an accurate statement is not available.

Trade, in both wholesale and retail, was brisk, the holiday trade being exceptionally heavy.

Many people are arriving daily from all parts, but mainly from Great Britain and our prairie provinces, some with means, but many in search of employment, which at this season is difficult to obtain.

Agriculture at this season is practically at a standstill. Fishing was also very slack. Lumbering is carried on the year round here with little variation, and the usual amount of logs were cut in the camps during December.

Railway construction is going very slowly this month, though traffic on the B. C. Electric is increasing so rapidly that they report taking on new men every day.

VANCOUVER, B.C., AND DISTRICT.

The bank clearings closed the ante-holiday season with a new record, and the total for the six-day period ending December 22nd showed the high figure of \$12,898,320, an increase of 27.58 per cent. over the corresponding period of a year ago, and 88.08 per cent. over 1909. Wholesale grocers reported a splendid run of orders. The business from Kootenay points was larger than usual, as the reopening of the mines has restored the confidence of the retail merchants. The city and suburban trade was also brisk, repeat orders being placed by several grocers. Business in the fruit line was poor owing to the bad weather, this also applying to vegetables. Potatoes, cabbage, turnips, etc., were badly frosted in basements, and will have to be replaced.

The prevailing conditions of the labour market in general were very unsettled, and the outlook disappointing, owing principally to the bad weather. The work in hand is on heavy construction, namely, steel and concrete buildings. The only work for carpenters on there slow burning buildings is laying floors. Interior finish in many cases is of marble, steel, or tile. The interior wood finishings when used are imported in sets, already cut to measure. Consequently carpenters are only required to do assembly work and a large number of carpenters are out of work on this account.

To December 22, 995 applications for work were received at the civic free labor bureau, and of these 215 secured employment. The Elevator Constructors reported their members all employed. The unions reported that their memberships were being increased. The civic employees are agitating for a work-week of 44 hours and a minimum wage of \$3 a day. It was given out here that the British Columbia Federation of Labour will meet at Victoria on January 22nd next. There will be 100 delegates present from all parts of the province. The United Mine Workers, District 18, will send a fraternal delegate, and the Western Federation of

Miners at Yueir decided to affiliate. At this convention an amendment to the Workman's Compensation will be asked for to allow a layman to conduct his own case if he so desires without the aid of a lawyer. Also a provincial act will be requested making \$3 for an 8 hour day the minimum wage.

While the volume of work in hand at present is a great deal larger than it was a year ago, the number of unemployed were almost double what it was then owing to the great influx of immigrants.

VICTORIA, B.C., AND DISTRICT.

The general condition of the labour market showed little change from that of November, there being a very considerable number of men out of employment, mostly labourers and men connected with the building trades. The weather conditions proving more favourable than last month, the paving contractors were able to complete some unfinished work, while the contractors for several of the concrete blocks being erected have made fair progress with their work. There are nineteen brick or concrete blocks in various stages of construction, comprising hotels, office buildings, apartment houses, schools, etc. The School Board has let a contract for the erection of a new High school at a cost of \$360,000, not including site or furnishings. The City Council has awarded a contract for furnishing a supply of water from Sooke Lake for \$1,700,000. Both of these contracts are subject to the ratepayers voting the necessary money at the forthcoming municipal elections. The firm of the Uplands, Limited, has let a contract for \$280,000 for the development of their residential district at Cadboro Bay. The contract awarded will include grading, asphalt paving, sewers, etc.

Wholesale and retail trade continued in a healthy condition. Retail merchants reported the Christmas trade better than in any previous year. Poultry is plentiful, with prices higher than last year. Turkeys ranging from 28c to 35c per lb.

for Eastern, and 40c per lb. for local birds. Other poultry in proportion.

The British Columbia Telephone Company has given notice of its intention to raise the rates on business telephones from \$4 to \$5 per month, commencing on April 1, 1912.

The shareholders of the Victoria Labour Temple Company held their annual meeting recently. The auditors report showed that the affairs of the Company were in a flourishing condition, there being a balance of over \$10,000. The Company hope to be able to commence the erection of the new Labour Temple in the near future, a lot having been purchased several months ago.

The real estate market is somewhat quiet, with prices remaining firm. A Real Estate Exchange has recently been organized among the leading firms of the city, with a large membership.

The British Columbia Government have made arrangements to give a series of lectures on fruit growing, vegetable raising, etc., by specialists in these departments, to fruit growers and farmers living in the southern portion of Vancouver Island.

The pelagic sealing treaty came into effect on December 15th, which stops all seal hunting in the North Pacific for a period of fifteen years. It is estimated that Canada will receive upwards of \$2,000,000 during the life of the treaty as her share of the seal herds taken on the Pibyloff Islands, Copper Island and Japanese Island rookeries, as the skins are likely to increase in value each succeeding year. Whale fishing on the west coast of Vancouver Island has ended for the year, and the ten whaling steamers have paid off their crews, and the four stations of the Canadian Northern Pacific Fisheries Company closed down until next spring. The past season was the best in the history of the industry, over 6,000 whales being taken. The British Columbia Fisheries, Limited, has been formed for the purpose of developing the deep sea and coast fisheries of northern British Columbia. The Company has a large cold storage plant at Prince Rupert. Tenders are being invited in Eng-

land for the construction of sixteen halibut fishing steamers to be used in the industry next year, when operations will be carried on on a large scale.

The lumbering industry is in a very healthy condition, the local demand being large during the past year.

All the various manufacturing firms are having a steady and healthy trade, and working full time.

NANAIMO, B.C., AND DISTRICT.

The month was not very favourable for labour largely owing to bad weather which affected outside work. Business men wholesale and retail report the holiday trade to have been very good.

The herring fishing was in active operation but the run is not as large and is more scattered than in former years. The sawmills of the city and district are running steadily. The logging camps are not working as steadily as they have been owing to wet weather. The coal mines of the city and district are working full time trying to keep up with the demand and the two principal companies are doing a very large amount of development work so that they can increase their output.

Very little railroad construction was done during the month outside of clearing the right of way.

There was much activity in the city, during the month in finishing up work for the season.

PRINCE RUPERT, B.C., AND DISTRICT.

General outdoor labour was not hindered to any extent by weather conditions, but no special activity can be recorded. The laying of plank sidewalks on main streets has kept rough carpenters and assistants well employed. Retaining wall construction, and the completion of street grading continues to afford steady employment, but the bulk of the street grading contemplated for the present will be finish-

ed in a few weeks. Work will then, begin probably, on the excavation of pipe-line within the city for the new water supply, and the completion of the reservoir in the centre of the city. The pipe line is to be let out to station gangs and the reservoir will be done by day labour. There is enough labour available locally for all the works in sight for the next month or two.

New buildings in progress are the City Hall, City Fire Station, Methodist Church, and a new theatre. These are all advancing rapidly but not keeping fully employed all the constructional labour available. Completion of the new Provincial Government wharf affords employment for a fair number, and the letting of contracts for warehouses, etc., is anticipated shortly.

The coming of winter has reduced activity in mining in the district. Local retail trade became more active owing to the Christmas and New Year season but wholesale houses were quiet as transportation to the interior is practically at an end until spring. The regular train service of the Grand Trunk Pacific Railway for one hundred miles in land, however, continues; and trains are busy with freight and pass-

engers. Railway construction proceeds steadily with no marked activity as yet within the city limits. Good progress inland is reported by the Grand Trunk Pacific officials. Employment among longshoremen was light, not more than about forty or fifty being at work at any one time. A movement was set on foot to establish a Trades and Labour Council in the city.

Labour is generally in a settled condition. The trouble with the Longshoremen and their employers the G. T. P. and Pacific coast stevedoring company is quiescent, the men having returned to work at the old rate of wages (50 cents per hour) pending promised consideration by the G. T. P. of a demand by their union for wages at the following rates: Day work (general freight) 50 cents per hour. Coal handling and night work 60 cents per hour. Sundays and legal holidays time and a half. It is noteworthy that the G. T. P. officials here do not recognize the men's union which number 125 members according to secretary's estimate. Employment in longshoring is light at present, probably not more than 40 to 50 men being actively employed at any one time.

INDUSTRIAL AND LABOUR CONDITIONS IN CANADA DURING 1911.

THERE was a continuance of prosperity in Canada during 1911 in nearly all branches of industry, and at the close of the year, the outlook was considered very promising. The immigration movement was greater than in any previous year, it being estimated that 40,000 more immigrants entered Canada than in 1910. Building operations were carried on throughout the country to an extent greater than in any previous year. Many new industries were established, while important additions were made to many old ones. While some anxiety was felt as to the grain crops in Western Canada, owing to unfavourable weather at a critical period, the yield proved to be heavier

than in any former season, and the high prices obtained made up for a lowering of the grade of wheat. Railway construction was actively carried on, especially in Western Canada, and the demand for labour was so great that the immigration regulations were relaxed for a time, in order to allow the freer entry of men for this class of work. The fishing industry had a fairly good year, especially in the case of whaling in the Pacific, and fishing off the "banks" in the Atlantic. The lumbering industry was not quite so prosperous as in the previous year in the Eastern Provinces, but in Manitoba and British Columbia the industry had a good year. Coal mining was actively

carried on in Nova Scotia and on the Pacific coast, but there was almost a complete cessation for nearly eight months in Alberta and the Crow's Nest Pass district of British Columbia. In Ontario and Quebec the metalliferous mines had a prosperous year, but in British Columbia they were impeded to some extent by the strike of coal miners, several smelters being compelled to close down. Great activity prevailed in all of the manufacturing industries, and in many localities there was a demand for skilled artisans and female labour. There was general activity in nearly all lines of trade as shown in increased exports and imports, and in the reports of financial institutions.

Immigration.

Immigration returns for 1911 showed a total immigration of about 351,000, compared with 311,084 in 1910. There were 175,000 immigrants from Great Britain, and 130,000 from the United States. A remarkable feature was the great increase in the number of immigrants from the United States during the last quarter of the year.

There was a decrease in the number of homestead entries compared with 1910.

Wages and Prices.

The upward tendency of wages, which began in 1909, continued during 1911. No decrease in the rates of wages was recorded, and in the few cases where a decrease in weekly earnings occurred this was due to a reduction in the number of working hours. The wages of farm labourers in Manitoba advanced about \$10 a month. Coal miners in Alberta and Eastern British Columbia to the number of about 7,000 received increases averaging about five per cent. Many increases in wages were granted in the building trades, especially during the months of April, May and June. In the metal trades and in the various branches of railway service the tendency was also upward.

There was a general upward trend in the cost of living, which was especially marked in the case of farm products.¹

¹A special article on Prices in Canada during 1911 appears on another page of this issue.

Trade.

The following statistics of bank clearings for the years 1910 and 1911 afford an indication of the increase in the volume of trade throughout the country during the past two years:—

City.	1910	1911	Year's Increase.	Percentage of Increase.
Ontario.....	\$2,088,558,596	\$2,306,783,375	\$218,224,809	10.44
Quebec.....	1,593,851,254	1,838,950,530	244,999,276	15.38
Manitoba.....	1,374,114,888	1,455,419,212	81,304,324	5.92
British Columbia.....	123,710,055	132,531,368	8,821,313	7.15
Alberta.....	101,226,496	124,307,293	23,080,797	22.80
Atlantic.....	95,855,316	87,621,484	-8,233,832	-8.59
John.....	77,843,546	76,866,726	-976,820	-1.25
London.....	67,154,297	71,330,392	4,176,095	6.22
Minneapolis.....	952,415,182	1,170,605,864	218,190,682	22.09
Vancouver.....	444,988,818	539,859,610	94,870,792	21.32
Calgary.....	150,677,031	219,245,879	68,568,848	45.53

Montreal.....	71,635,122	122,649,238	51,014,116	71.24
St. John.....	50,739,159	72,487,159	21,748,000	42.89
St. Catharines.....	19,004,823	60,051,791	41,046,968	216.00
Port of Spain.....	21,278,869	39,675,683	18,396,814	86.46
London.....	29,377,842	35,223,623	5,845,781	19.90
Chbridge.....		28,530,298		
Total.....	\$6,193,701,338	\$7,272,953,182	\$995,426,980	

¹Two months. ²Nine months. ³Four months.

Conditions in the Industries and

General conditions of employment in the various industries may be briefly summarised as follows:—

Agriculture.

The winter of 1910-11 was a very favourable one, very little damage being caused by frost. Vegetation was somewhat delayed by a late spring, but this was made up by the unusually warm weather during the latter half of May and June, combined with plenty of showers. The summer was very dry in Ontario and hay and small fruits suffered in consequence. Threshing was delayed to some extent in the western provinces by rains, but mild weather until late in December enabled the farmers to complete their threshing without loss.

A large acreage of grain was sown. It was estimated by the Census and Statistics Bureau that the total area in wheat was 10,503,400 acres compared with 9,294,800 acres in 1910. A heavy crop was produced and good prices were obtained, but the quality of the Western wheat was impaired by rains during the harvesting season. An unusual quantity of alfalfa was sown. The yield of hay in Southern Ontario was short owing to the drought, but there was a fair crop in other places. There was an increase of nearly 300,000 acres devoted to flax.

It was estimated by the Department of Agriculture of Manitoba that the total grain crop of that province for 1911 was more than 160,000,000 bushels, the oat crop alone amounting to 73,000,000. Compared with 1910, there was an increase of nearly 22,000,000 bushels in wheat and an increase in oats of over 30,000,000 bushels.

A very small quantity of fruit was winter-killed, and British Columbia was the only province where any damage was done by frost. The fruit district of Nova Scotia had an unusually good year, and in Ontario there was a fairly good crop of peaches, plums and

grapes, but small fruits suffered from the drought and some damage was caused to the apple crop by violent storm early in October. The potato crop in the Maritime Provinces was very good but in Ontario it was light.

Light pastures in Ontario owing to the small rainfall diminished the quantity of dairy products, but this was counterbalanced by high prices.

The production of maple sugar in the Eastern Townships was greater than for several years past. There was an unusually good demand for farm labour in the spring, but during the summer the supply was good and wages were somewhat lower than in the previous year, except in Manitoba where there was an advance of about \$10 per month. High prices were obtained for agricultural products especially dairy and grain products. The prices of livestock, however, had a tendency to decline.

Fishing.

During the early part of the year there were fair catches of smelts and other winter fish off the Atlantic coast, but winter fishing on the whole was slightly below the average. In the months of March and April drift ice interfered with off-shore fishing, and the lobster catch was consequently light, but their price being high the season was more prosperous than in several previous years. The weather continued unfavourable in May, and mackerel and cod were scarce. Later on, however, fair catches of mackerel were made, and in August and September there were good runs of herring.

There was a very large increase in the number of vessels sailing from Lunenburg, N. S., for the "banks". The catch for the season totalled 216,400 quintals, against 209,205 in the previous year. During December very good catches of smelts were made. In British Columbia good herring and halibut catches were reported in February. The spring salmon run was light in Southern British Columbia, but

in the northern rivers it was exceptionally good. The total pack of spring salmon was 750,000 cases as compared with 762,200 in 1910, and of sockeye 265,000 cases, compared with 566,000 cases in 1910. Whaling was better than in 1910, upwards of 1,450 whales having been taken off Vancouver Island.

Steps were taken towards the better conservation of fisheries by an amendment to the fisheries regulations by which trawlers will be prevented from participating in bounties and by the putting into force of a new set of regulations. The trapping season of 1910-11 in Manitoba, Saskatchewan, and Alberta was reported to have been a poor one.

Lumbering.

In certain districts of Ontario and Quebec the lumber camps closed earlier in the spring than usual, but in Manitoba the winter of 1910-11 was reported to have been the best for many years for bush work. During the early months of the year low water in some localities curtailed the operations at the mills. The drives in Ontario and Quebec and the Maritime provinces were delayed by the backward spring and by dry weather. In the months of July and August forest fires in Nova Scotia and Ontario did much damage. The lumbering industry in British Columbia had a fairly prosperous year, but the prospects for the winter of 1911-12 were for a diminution in the cut, attributed in part to the dullness of the British market. The export of lumber was hampered during August by the scarcity of steamers in Nova Scotia and by a shortage of cars in Ontario. The great strike in the transportation trades in England also delayed shipments in the Maritime Provinces. The prices of lumber were firm in the early part of the year, but they gradually declined as the season advanced.

A Bill was passed by the New Brunswick Legislature prohibiting the export of pulpwood cut on Crown Lands.

Mining.

The coal mines of Nova Scotia had an exceptionally prosperous year. The miners found steady employment during the winter months of January, February and March. In the spring, operations were slightly curtailed owing to the delay in the opening of navigation, but there was increased activity in May and a continual increase in activity from that time on. With the settlement of the strike of coal miners at Springhill, N.S., towards the end of May there was a still greater improvement in the coal mines. In the Provinces of Ontario and Quebec there was the usual winter dullness at the beginning of the year in the various metalliferous mines, but there was some activity in the silver, nickel and copper mines. In February and March the production of the Cobalt mines was somewhat low owing to the lack of power. During the spring active development work was carried on in the Porcupine District, but great damage was done there by forest fires in July. In the month of May the asbestos mines and metalliferous camps resumed full activity and continued with a steady production during the rest of the year.

In the Province of Alberta there was a heavy output in the coal mines during the early part of the year, although in some districts operations were curtailed owing to the interruption of traffic. From April to November, however, conditions were very dull owing to a general strike of coal miners. With the settlement of this dispute in the latter month normal conditions were resumed and a steady output was maintained until the close of the year. The coal mines of the Crow's Nest Pass District of British Columbia were affected by the general strike above referred to. On Vancouver Island the coal mines produced steadily throughout the year. Activity prevailed in the metalliferous mines of British Columbia, and towards the end of the year there was increased activity in the Kootenay and Slocan districts, a number of old

July. In the month of May the asmines in which operations had ceased for several years having been re-opened.

Manufacturing.

The year was a very prosperous one for nearly all branches of manufacture, especially for the iron and steel industry and farm implement factories. In some places, however, low water interfered with progress. In a number of localities there was a demand for labour especially for female labour. Many new factory buildings were erected and many others were enlarged to meet the growing business. Many establishments worked overtime in order to keep up with orders.

Railway Construction.

Railway construction was carried on to a great extent during the winter of 1910-11, the abundant snow-fall affording facilities for the transportation of supplies during March. Construction gangs were augmented owing to the number of important contracts which were awarded. These included undertakings to the value of \$17,000,000 on the Grand Trunk Pacific Railway and \$800,000 on the Canadian Northern Railway; and for the first section of the Quebec and Saguenay Railway. The demands for construction labourers was so great that the immigration regulations, with reference to money qualifications, continuous journey, etc., were relaxed until October 1, with respect to immigrants from countries from which immigration is sought. About 720 miles of new track were laid in the Province of Saskatchewan. The contract for the first section of the Hudson Bay Railway was awarded, and the successful tenderer was authorised in December to proceed immediately with the construction.

The railway mileage in the province of Manitoba, Saskatchewan and Alberta increased from 8,650 in 1910 to 10,109 in 1911, showing that 1,459 miles of railway were constructed during the past year.

General Transport.

Railway traffic was heavier than in 1910, all the principal companies showing steadily increasing earnings. The field crops in the Northwest provinces were far greater in quantity than in any previous year, and the railways were taxed to their utmost capacity in moving them. Notwithstanding considerable additions to the rolling stock of the railways operating in Western Canada, numerous complaints were made of a car shortage at various points in Southern Saskatchewan. An enquiry instituted by the Board of Trade of Regina, brought out the fact that in December there was a shortage of 6,855 cars at sixty-six points tributary to Regina.

The transatlantic shipping season exceeded that of any previous year, in the number of vessels engaged, and in the number of passengers and quantity of freight carried. The statistics of the port of Montreal show that 398 trans-Atlantic liners and 352 coastwise vessels were accommodated at that port during the season, making a total of 750 ocean-going ships, as against 715 in 1910. The increase in freight is indicated by the customs returns of Montreal from May to November, inclusive, which amounted to \$11,638,763.01 in 1911, compared with receipts of \$10,833,191.67 during the same period of 1911.

Traffic on the Great Lakes showed great increase over the previous year. An unusual quantity of coal was brought to the head of Lake Superior and the lateness of the season of navigation permitted the shipping of more grain at Port Arthur and Fort William than in many previous years.

The Trades.

Building.—There was increased activity in the building trades in nearly all the important centres of population. Labour in all branches, both skilled and unskilled, was well employed up to within two or three weeks of the close of the year, and wages were firm with an upward tendency. The only

locality in which a serious interruption took place through trade disputes was Vancouver, B.C., where a general strike in the building trades caused a cessation of work for about seven weeks.

Complete returns of building permits issued in the Dominion in 1911 were not available, but the following figures show the advance over the previous year. In Regina, Sask., the building permits issued in 1911 represented a value of \$5,089,340, compared with \$2,351,288 in 1910. At Hamilton, Ont., during the year ending October 31, there were issued 1,333 permits representing a value of \$4,173,105, an increase over the previous year of 415 in the number of permits and \$1,626,825 in the value represented. At Moncton, N. B., there were issued in 1911, 95 permits to the value of \$82,835, as against 76 permits to a value of \$95,455 in 1910. During the first eleven months of the year, according to the Financial Post, permits issued in twenty-seven of the principal cities of the Dominion represented a value of \$119,455,471, as against \$93,258,041, in the corresponding period of 1910, being a gain of 28.1 per cent.

Metal and woodworking.—The employees in the metal and wood-working trades had an active year, and there were few interruptions from industrial disputes. Manufacturers of agricultural implements, and of structural materials, were especially busy. Many factories were working overtime and in some localities skilled labour was in demand.

Printing.—The printing and book-binding trades were steadily employed, the supply of labour about equalling the demand.

Clothing.—Journeymen tailors had a normal year. Garment workers were actively employed, with a demand for female labour in some localities. Boot and shoe factories had a fair year, with quiet conditions for a time at Quebec.

Textile.—Cotton mill hands were steadily employed, with wages the

same as in the previous year. Almost the only interruption was caused by a strike at Magog, Que., which lasted about ten days.

Leather.—The leather trades had an active year in nearly all localities, with quiet conditions prevailing in Calgary, Alta.

Food and tobacco preparation.—Bakers and confectioners were well employed. Cigar makers and tobacco workers also had a good year.

Miscellaneous.—Retail clerks and delivery employees had a busy year owing to the general buoyancy of trade. Hotel and restaurant employees were also busy, the tourist and general passenger traffic being heavy. Laundry workers and barbers had a good year.

Unskilled labour.—The year was very favourable to unskilled labourers, owing to the large amount of building and municipal improvements carried on in the principal cities. The fine weather also enabled outdoor work to be carried on to a much later date than usual.

Labour Legislation.

The following is a brief summary of the more important enactments relating to labour which were passed by the Dominion Parliament, and by the Legislatures of the several provinces during 1911.

Dominion legislation included an amendment to the Fisheries Act requiring licenses of persons engaged in the manufacture of commercial products from sea lions, hair seals, sharks or dog fish, fixing the annual license fee for salmon canneries in British Columbia at \$50, and imposing a license fee for lobster canneries. The Railway Act was amended with respect to returns of accidents and casualties, the acquiring of lands, liability for fires, and rates to be charged for electrical power. The Post Office Act was amended, increasing the salaries of superintendents and of railway mail clerks.

Nova Scotia legislation included an Act regulating the use of lamps in coal mines, one extending the operation of the Mines Regulation Act of 1908 to mines of stratified ironstone, shale or fireclay, as well as coal. Acts were also passed incorporating the Dominion Coal Company Employees Benefit Society, and the Co-operative Association, Limited, of Sydney, N. S.

In *New Brunswick* the Workmen's Compensation Act was amended by allowing an injured workman to secure compensation from his employer in a lump sum, when weekly payments have been awarded him. The New Brunswick Factories Act was amended with reference to boiler inspection and the employment of stationary engineers. City and town councils were authorized to make by-laws for early closing of shops, except in the case of certain classes of establishments. An Act was passed requiring the manufacture in Canada of all wood suitable for pulp or paper cut on Crown Lands.

In *Quebec* an Act was passed requiring the notification of accidents in mines and quarries. The grant to the Polytechnic School of Montreal was increased. The minimum pension of female teachers of primary schools was increased. The powers of the City of Montreal were extended with regard to building regulations, and an Act was passed regulating the sale of bread.

The Building Trades Protection Act passed by the *Ontario* Legislature during the last session compels contractors to adopt measures according reasonable safety from accidents to persons employed on their buildings, and contains regulations for this purpose which must be observed by the contractors. Provision is also made for the proper enforcement of this Act by inspectors. The Mining Act of Ontario was amended with respect to the use of electricity in mines. Public laundries were brought within the scope of the Ontario Factories Act. Municipal councils were authorized to pass by-laws regarding the production, handling and sale of milk. Slight changes were

made in the legislation respecting apprentices and minors. An Act was passed providing for the licensing of embalmers. Another Act authorizes the Lieutenant-Governor-in-Council to make regulations governing the erection, operation and safety of theatres, and the licensing and operating of moving picture machines.

In *Manitoba* the Children's Protection Act was amended with reference to the employment and adoption of children, making it unlawful to employ any child under twelve years at night, or to employ any child under sixteen years in any occupation injurious to life, limbs, health, education and morals. An amendment to the Charities Aid Act provides for the recovery from employers of the cost of maintenance of an employee when admitted to a hospital, in cases where deductions are made from the salary or wages of employees for medical attendance. The Motor Vehicle Act was amended with reference to the licensing of chauffeurs. The Municipal Act was amended with reference to building permits and plumbing inspectors.

The most important labour legislation passed in *Saskatchewan* was a Workmen's Compensation Act. An Act was passed regulating the licensing and operation of moving picture machines. Amendments were made to the Dairy-men's Act; to the Railway Act, forbidding the operation of cars on Sundays, and to the Municipal Telephone Act.

In *British Columbia* an Act was passed authorizing the Provincial Board of Health to make regulations respecting the health of lumber, mining and railway construction camps, saw-mills, and other places where labour is employed. By an amendment to the Health Act, the Board of Health was authorized to make regulations with regard to the sanitary conditions of boarding houses, tenement houses and lodging houses, and the compulsory registration of these houses; the construction, inspection and purifying of theatres, dance

halls, barber shops butcher and baker shops, and other buildings; the licensing and regulating of plumbers; and the regulating and repairing of plumbing.

Notes.

The census of Canada, taken on June 1, 1911, showed a population of 7,192,338 persons, compared with a population of 5,371,315 at the time of

the previous census in 1901. The figures for 1911 are subject to slight correction.

According to Bradstreet's the business failures in Canada during 1911 numbered 1,399 as against 1,459 in 1910. The assets of these firms amounted to \$6,399,647 compared with \$6,961,147 in 1910, and their liabilities were \$12,799,001 in 1911, and \$15,525,104 in the previous year.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907--PROCEEDINGS UNDER THE ACT DURING THE MONTH OF DECEMBER, 1911.

DURING the month of December the report was received of the Board of Conciliation and Investigation appointed to inquire into certain matters in dispute between the Alberta Coal Mining Company, Limited, and its employees at Cardiff, Alta.

An application was received during the month of December for the establishment of a Board of Conciliation and Investigation on behalf of the station agents, telegraph and telephone operators, and towermen, members of the Order of Railroad Telegraphers, employed by the Michigan Central Rail-

road Company on its lines in Canada. In the application it was stated that the matters in dispute related to the refusal of the Company to adopt certain amendments to the existing schedule of rules and rates of pay. The number of employees affected by this dispute was given as 115 directly and 3,000 indirectly.

A Board of Conciliation and Investigation was established by the Minister of Labour on December 26, Mr. J. G. O'Donoghue, of Toronto, Ont., being appointed a member thereof on the recommendation of the employees concerned.

REPORT OF BOARD IN DISPUTE BETWEEN THE ALBERTA COAL MINING COMPANY, LIMITED AND ITS EMPLOYEES, AT CARDIFF, ALTA.

THE Minister of Labour received on December 12 the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Alberta Coal Mining Company, Limited, and its employees at Cardiff, Alta.

The application for the establishment of this Board was made by the Alberta Coal Mining Company, and stated that the differences in question related to the refusal of the Company to accede to the employees' demand for

increased wages and improved conditions of employment. The number of employees affected by the dispute was given as 80.

A Board was established by the Minister on November 8, and was constituted as follows: Messrs. J. O. Hannah, of Calgary, Alta., and Clement Stubbs, of Bellevue, Alta., members appointed on the recommendation of the Company and the employees respectively, and Mr. Norman Fraser, of Edmonton, Alta., Chairman, appointed by the Minister on the joint recommendation

of the foregoing members of the Board.

The Board met at Edmonton on December 1st and completed its work of investigation on December 7, having in the meantime visited the Company's mines at Cardiff, Alta., for the purpose of investigating conditions there.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

539 16th Street, Edmonton, Alta.,
7 Dec., 1911.

To the Minister of Labour, Ottawa:

In the matter of "The Industrial Disputes Investigation Act, 1907," and of a dispute between the *Alberta Coal Mining Co.* (Employer) and *Miners, Mine Labourers and Others* (Employees).

We, the undersigned members of the Board, having carefully gone over the evidence submitted by both parties, and having made a thorough inspection of the mines of the above named Company, and having investigated the wages and conditions existing at other mines in this Competitive Field, make and submit to you the following findings and recommendations:—

That all the findings of the Board as reported on March 24th, 1910, be carried into effect, together with the following provisions and further recommendations:—

1. *General Increase on all Present Contract Prices for Narrow Work.*

In comparing the present narrow work rates, with similar work paid for in this competitive field, and investigation of average earnings of miners engaged in this class of work at the Alberta Coal Company's mine, would recommend that the yardage rates remain as at present, except in the case of room turning and that this be increased to \$1.25 per yard for four yards.

2. *Increase in Present Mining Rate.*

Investigation shows that the average daily earnings of the contract miners at this mine are up to the average standard of this field. While it is true that retail prices for coal have advanced during the past year yet from the statement of the Manager of the Alberta Coal Co., that owing to his Company being under contract they did not receive any advantage from this increased price, would recommend that the present mining rate remain the same.

3. *Increase in Price of Timbering.*

That the present price of timbering is reasonable, would recommend that they remain the same.

4. *Payment for Removing Bone.*

That the recommendations of the former Board in regard to this matter be carried into effect and would further recommend that the price paid be 42 cents per lineal yard where the bone is over four inches in thickness.

5. *Payment for Laying of Track.*

That as the payment for laying track is included in the mining price would recommend that this be continued, except that would recommend that the Company lay track in all main haulage entries, and lay all switches.

6. *Increase to all Day Labourers of 25 cents per Day.*

That the scale of wages, as per schedule attached, which has been submitted by the Company since meeting of the Board, be accepted with the following additions and changes: Timbermen \$3.25; Track-layer \$3.25.

7. *Payment of Miners taken from Working Face to Perform Company Work.*

That as the average daily wages for contract miners was found to be higher than the wages of underground day laborers, would recommend that when a miner is taken from his working place to perform Company work that he be paid at the rate of \$3.25 per day

of eight hours, while actually engaged in such work.

8. *Removal of Water from Working Places.*

Would recommend that when practicable the Company remove the water from the working places, and when the miner removes the water from his working place that he be paid at the rate of \$3.25 per day of eight hours while actually engaged in such work.

9. *Relative to Pay Days, etc.*

That as it has always been the custom at this mine for wages to be paid once a month, and as the present arrangements for pay day does not give sufficient time to make up the pay-rolls and issue statements to employees prior to pay day would recommend that the pay day be on the 10th of each month, the pay periods to cover from the first to the last of each month, and that statements be issued to the employees at least three days prior to pay day.

In making the change in the date of pay day we would suggest that a special pay should be made covering the period from the 20th, (which is the present regular date for making up accounts) to the last of the month, and that payments for work done during this single period immediately preceding the change being made should be made on the 10th of the succeeding month, making the first regular pay-day on the new date.

Further demands submitted to Board:

- A. Recognition of U.M.W. of A. agreement with same and check off by assignment.
- B. Minimum rate for deficient places.

Relative to Section A, it is clear that when the employees are organized more harmony between employer and employees should result, through the handling of matters in dispute through the employees' committees and representatives, than would otherwise result, and we would consider it advis-

able that such methods of handling disputes and grievances should be followed out.

B. In connection with the minimum rate we believe that some provision should be made in the case of a miner performing work which was not anticipated in the fixing of contract prices, through changes or deficiencies that would reduce his earning power, and as this principle is already acknowledged between the mine workers and operators in the coal fields of Southern Alberta, but as, also, the sum to be considered as the minimum rate is at present being made the subject of reference to an Arbitration Board between the Western Coal Operators' Association and District 18 of the United Mine Workers of America we would suggest that the decision in that case should be the basis of settlement in the present dispute.

(Sgd.) NORMAN FRASER.

Chairman of Board.

I agree with the foregoing reports with the following provisions:

1st. That the following be substituted for recommendation No. 2. As the miners at a number of the mines in this field have already received slight advances, and as the market prices have been enhanced while the mining rates have remained the same, would recommend that the mining rate be increased 10 cents per ton.

2nd. That the following be added to recommendation No. 6, drivers, Spike Team, \$3.50 per day 8 hours.

In connection with the "Monthly Pay" it should be noted that while it now exists at the Alberta Coal Mining Co.'s mine, the employees at most of the mines in the vicinity, and practically all other trades are paid semi-monthly and my opinion in the matter is that this method should prevail throughout the Province.

As, however, there is considerable agitation to have this made a Legislative matter it is possible that some change in this way be made by Legis-

lative action in the near future, thereby avoiding disputes on this account.

(Sgd.) C. STUBBS,
Representative of Employees.

In the matter of scale of day wages would note an objection to the recommendation of the Board in this respect, and having carefully considered the scale of wages submitted by the Company, condition of employment, etc., it is my opinion that this scale submitted

is reasonable and fair and should be adopted at the mine.

(Sgd.) JOS. HANNAH,
Representative of Employer.

DAY WAGES SCHEDULE.

ALBERTA COAL MINING COMPANY.

Inside Labour—

Track layers	\$3.00 per day of 8 hrs.
Drivers	3.00 per day of 8 hrs.
Hooker-on	2.75 per day of 8 hrs.

Outside Labour—

Blacksmith	3.50 per day of 9 hrs.
Timber Sawyer	2.50 per day of 9 hrs.
Box car shovellers ..	2.60 per day of 9 hrs.

REPORT OF COMMITTEE OF ARBITRATION ON MATTERS IN DISPUTE BETWEEN THE WESTERN COAL OPERATORS' ASSOCIATION AND EMPLOYEES.

IN connection with the agreement which was signed on November 17 by representatives of the coal mining companies of Southern Alberta and Eastern British Columbia, comprising the Western Coal Operators' Association, and the officers of District 18 of the United Mine Workers of America, representing the employees, the terms of which will be found in the December, 1911, number of the *Labour Gazette*,¹ it would appear that certain points involved in the dispute were, by agreement, left for subsequent adjustment. A Committee of Arbitration was accordingly constituted for this purpose in December, composed of Mr. W. F. MacNeill, Calgary, for the Western Coal Operators' Association, Mr. W. B. Powell, of Coleman, Alta., for the employees, and Mr. H. Bentley, of Lethbridge, Alta., as Chairman. The appointment of a Chairman was made on request by the Minister of Labour, the other members of the Board being unable to agree upon anyone to act in this capacity. The report of the Committee of Arbitration was made on December 19, and was communicated to the Minister of Labour on December 26, in the following terms:

Lethbridge, Alta., Dec. 19th, 1911.

To the Honorable,
The Minister of Labor,
Ottawa, Ont.

Dear Sir:—

I have the honor to report that:—

Regarding certain matters which were left for settlement, at the signing of a certain agreement between the United Mine Workers of America, District 18, and the Western Coal Operators' Association, on November 17th last,

The Committee to settle the matters met me at Lethbridge, Alberta, Tuesday, December 19th, 1911, and the points to consider were as follows:

- (1) Amount to insert in Minimum Rate Clause.
- (2) The making of prices on five classes of contract work in the mines of the Canadian Coal Consolidated Company, Limited, of Frank, Alberta.
- (3) The making a price for pillar work of The Maple Leaf Coal Company, Limited, of Bellevue, Alberta.

¹See pages 541-564.

Regarding minimum rate, I found the following clause had been agreed to by the parties interested:

Minimum Rate:

"When a miner's working place becomes deficient, owing to any abnormal condition preventing him from earning the minimum wage of \$—— per shift, the Company shall pay him a sufficient amount to secure him the said minimum, providing he has done a fair day's work."

For the above I inserted \$3.00 as the amount.

Regarding contract rates at the Canadian Coal Consolidated Company's mines, I found the following specifications:

Parallel Airway: (Old Mine)

Shall be driven 7 x 8 feet timbered with sets 8 pieces 5 ft. centres, to be paid for at the rate of \$—— per lineal yard.

Angle Chute: (Old Mine)

6 ft. x 10 ft., to be paid for at the rate, of—— cents per lineal yard when timbered with three piece sets—— per set. Yardage—— per lineal yard.

Main Gangway: (Shaft Mine)

Entry shall be driven 10 feet wide by 7 feet high in the clear, inside the timber, and to be securely timbered with sets, not exceeding 5 ft. centres, ditch to be carried on one side, to be paid for at the rate of \$—— per lineal yard. To include also the laying of ties and short length rails.

Parallel Airway: (Shaft Mine)

8 ft. high in the clear, 8 ft. wide, 6 inch collar and 6 inch leg on high side, 5 ft. centres, lagged on top—— per lineal yard.

Raises or Angles: (Shaft Mine)

7 feet x 8 feet without timber—— cents per cubic yard, if timbered with props—— cents per foot. Yardage——.

In the Parallel Airways (Old Mine) I put a rate in of \$6.35.

In Angle Chutes (Old Mine) I put in the rates of \$3.50, 60c. and \$1.75 respectively.

In Main Gangway (Shaft Mine), I put a rate in of \$11.00.

In Parallel Airway (Shaft Mine) I put in a rate of \$5.90.

In Raises or Angles (Shaft Mine) I put in the rates of \$.50, \$.05 and 1.75 respectively.

Regarding price for pillar work at Maple Leaf Company's mine, I found the following specifications:

Pillars:

———per cubic yard for which I put in a rate of \$.43.

In arriving at the figures for the various rates, I was governed almost entirely by the rates paid in the same and neighboring mines, keeping in mind any differences there were in the local conditions as between one mine and another.

Yours truly,

(Signed) H. BENTLEY.

REVIEW OF TRADE DISPUTES IN CANADA, DURING 1911.

THE total number of strikes and lock-outs in existence in Canada during 1911 was 104 compared with 87 in the previous year. Of these, 98 commenced in 1911, while six (6) were in existence in the previous year. There was a large increase in the estimated number of

working days lost being more than last year. This was largely caused by the continuance of the strike of coal miners at Springhill, N. S., until May 27 of this year, and the existence of a strike of coal miners involving 7,000 men in Alberta and eastern British Columbia

for nearly eight months. These were the two most important disputes during the year, the only other one in which industrial conditions were largely affected was a general strike of the building trades in Vancouver, B.C., which impeded building operations there from June 5 to July 25.

Magnitude of Trade Disputes.

There were approximately 28,918 employees involved directly and indirectly in trade disputes which began during 1911, compared with 19,554, in 1910. The following table shows the number affected according to the months in which each dispute began.

TOTAL NUMBER OF EMPLOYEES INVOLVED
IN TRADE DISPUTES WHICH BEGAN
DURING 1911.

	Directly	In-directly	Total
January.....	302	69	371

The following diagram illustrates the variations from month to month of the total number of employees involved in trade disputes during each of the years from 1907 to 1911 inclusive:—

Loss of Time in Working Days.

The loss of time to employees through trade disputes during 1911 amounted approximately to 2,018,740 working days, compared with a loss of approximately 718,745 days in 1910. An estimate of the loss of time by months is given in the following table:—

TABLE SHOWING LOSS OF TIME IN WORKING DAYS TO EMPLOYEES THROUGH TRADE DISPUTES BY MONTHS DURING 1911.

Approximate Loss in Working Days.		Approximate Loss in Working Days.	
January	29,100	July.....	303,100

Disputes by Localities Affected.

Of the 98 disputes which began in 1911, 42 took place in the Province of Ontario and 19 in the Province of Quebec. In the Province of Alberta there were 13, and in British Columbia 8, while more than one province was affected in five disputes. No strike or lockout was reported in the Provinces of Prince Edward Island or Saskatchewan. The following table shows the number of disputes by provinces according to the month in each they began:—

¹First dispute affected Ontario, Manitoba, Saskatchewan and Alberta; second, affected same provinces with the addition of British Columbia.

²Dispute took place in Quebec and Ontario.

One dispute took place in Quebec, Ontario and Manitoba, and the other in Alberta and British Columbia.

⁴Disputes affected all the provinces except Prince Edward Island and Nova Scotia.

⁶Dispute took place in Alberta and British Columbia.

⁷One dispute took place in Quebec and Ontario, and the other in Manitoba, Saskatchewan and Alberta.

⁸One dispute took place in Alberta and British Columbia, and the other in Ontario, Manitoba, Saskatchewan and Alberta.

Disputes by Months.

The following table shows the number of disputes which have occurred in each month during the past ten years, from which it may be seen that the greater number took place in the months of April, May and June:—

TABLE SHOWING TRADE DISPUTES IN CANADA BY MONTHS DURING 1902, 1903, 1904, 1905, 1906, 1907, 1908, 1909, 1910 AND 1911.

Causes of Disputes.

Of the 98 disputes which took place during 1911, 42 arose from demands for higher wages. The question of wages also entered into 21 other disputes. The following table shows the causes of trade disputes during 1911 according to the months in which they began:—

TABLE SHOWING CAUSES OF TRADE DISPUTES IN CANADA DURING 1911.

PRICES IN CANADA DURING 1911.

THE Department is unable at the close of December to issue final statistics with regard to the general level of prices in Canada during 1911. Sufficient analysis, however, has been made of the data collected during the year to warrant the belief that prices in general were higher throughout the Dominion in the second half of 1911 than in any previous period of which official record has been kept. The index number of the Department dates from 1890, and the only other year within that period in which prices were at all on comparable

levels was 1907. From general information as to the level of prices prior to 1890 it may be stated that never since the first six years of Confederation have wholesale prices been so high in Canada.

Comparing the year 1911 with 1896, in which prices were at their lowest within the past forty years, a rise of 45 per cent. is shown. If the calculation took into account the relatively high importance of agricultural products in Canada, the rise shown would doubtless be increased to 50 per cent. or over.

The more important elements combin-

ing to affect the above general result are as follows: Undoubtedly the rapid increase in grain prices in the past few months has been the most widespread of all the changes of the year in general influence. The gain was particularly noticeable in the case of barley and oats. Wheat was firm to upward. The prevailing scarcity of feed caused a rapid increase in the price of bran, shorts and hay during the autumn months. On the whole grains and fodder would seem to have advanced nearly thirty per cent. during the past twelve months. On the other hand, dairy products, animals and meats, though firm in some lines, have been on the whole lower than last year. The price level of fish was considerably

higher than in 1910. Tea, coffee, sugar, fresh fruits, vegetables and canned goods have all been higher, though flour has been somewhat lower. Raw cotton has been downward, but other textiles were steady to strong. Hides advanced very rapidly, and leathers considerably. Most of the metals, with the exception of iron, were upward. Coal was very firm, but coal oil was lower. Lumber prices were steady on the whole, with some weakness showing in a few lines during the autumn. Bricks and miscellaneous building materials advanced, but linseed oil and turpentine were downward. Housefurnishings, drugs and chemicals and furs were steady. Raw rubber declined.

PRICES, WHOLESALE AND RETAIL, CANADA, DECEMBER, 1911.

I. WHOLESALE PRICES.

THE Department of Labour Index

Number of wholesale prices stood at 130.8 for December as compared with 130.8 in the preceding month and 123.0 in the corresponding month last year. The numbers, it will be understood, are percentages in each case of the average price level prevailing during the decade, 1890-1899, the period selected by the Department as the standard of comparison throughout its investigation into wholesale prices. Over 200 articles, carefully selected so as to represent Canadian production and consumption, are included in the calculation.

It will be seen that wholesale prices as a whole are on practically the same level as in the preceding month, but are considerably higher than at the

same period of 1910. The chief increases during the past year contributing to the latter result occurred in grains and fodders, dairy products, fish, miscellaneous foods, hides, leather, metals, drugs and chemicals, furs and liquors, there having been a decrease in animals and meats, textiles, paints and oils. The features of the past month were a slight decline in grain and fodders, animals and meats, paints, oils, etc., with a rise in dairy products, fish, metals, fuel and lighting.

The following is a table of the Department's Index Numbers arranged by the various groups of commodities into which the investigation has been divided, showing the average price level for December, 1911, compared with that of the previous month and with that of the same month last year.

TABLE SHOWING INDEX NUMBERS BY GROUPS OF COMMODITIES FOR DECEMBER, 1911
NOVEMBER, 1911, AND DECEMBER 1910.

(AVERAGE PRICES 1890-1899-100)

	Number of Commodities	Index Numbers

XIII. (a) Furs.	4	337.9	337.9	285.9
(b) Liquors and tobacco.	4	127.1	127.1	117.1
(c) Sundries.	6	102.8	102.8	108.8
Average of all commodities.	225	130.8	130.8	122.0

The chief features of the price movement during December as compared with the preceding month were as follows:—

Grains and fodders.—Barley declined about ten cents per bushel at both Toronto and Winnipeg, oats also declining somewhat at both markets. Manitoba wheat showed a slight decline, while Ontario wheat was steady. Hay and shorts were up, but corn was down. Bran, straw, peas and rye were steady.

Animals and meats.—The price of cattle advanced at both Winnipeg and Toronto; sheep also were higher while hogs were lower. Hams and barrelled pork declined, while dressed hogs were upward. Bacon, beef, mutton and veal were steady, but fowl and turkeys were lower.

Dairy products.—Butter, cheese and eggs were all higher in December than in the preceding month.

Fish.—Cod, haddock and mackerel again advanced in price.

Miscellaneous foods.—The general level of prices in this group was only slightly upward as winter apples, evaporated apples, and turnips were lower, though raisins, beans, potatoes, canned

corn and canned tomatoes were higher.

Textiles.—There was a slight decline in the price of wool. Cotton declined still lower than in November. Jute and hessians also were lower.

Hides, leather, etc.—Leathers were reported slightly upward, on account of the high price of hides.

Metals.—The feature of this group was the continued advance in lead, spelter and zinc. Brass, copper and steel billets advanced. Implements were steady.

Fuel and lighting.—Bituminous coal was slightly higher at Montreal.

Lumber.—In this group prices were steady except N. B. shingles which advanced on account of alleged scarcity. Miscellaneous building materials were steady.

Paints, oils, etc.—The feature in this group was another advance in white lead on account of the continued rise in the price of lead. Linseed oil and turpentine again declined.

House furnishings, drugs and chemicals, furs, liquors and tobacco were all steady. Rubber showed a slight advance.

OF CONSUMPTION, CANADA, DURING DECEMBER, 1911.

month preceding the present issue of the *Labour Gazette*, of the more important staple commodities entering statement is given of the rental of a representative workingman's dwelling of the better class in the every care has been taken to ensure that the quotations in each case refer to the same class of commodity, representative of every Province in the Dominion.

in the respective localities, under detailed instructions as to sources of information, quality of goods to be

¹In British Columbia a bag of potatoes is 100 lbs.

²At Prince Rupert, B.C., canned milk is principally used, \$5.00 per case.

³Per case of 10 gallons.

II. RETAIL PRICES.

DURING December the chief features in Retail Prices were the continued upward tendency in the price of butter and eggs, and a general advance in the price of potatoes after the drop in October when the fall crop was marketed. Butter and eggs are probably only slightly higher than for the same month last year, but potatoes are from 25% to 60% higher, except in the Maritime Provinces. In Ontario and Western Canada milk is on the whole one cent per quart higher than for December last year. Meats fluctuated somewhat in various localities as compared with November, the general level being about the same as last year, in Ontario a little higher, with the exception of bacon, which is somewhat lower. Hard coal and wood advanced in several cities.

Notes on Retail Prices.

Beef.—Both sirloin steak and medium shoulder roast declined in price at Newcastle, N. B., Sorel, Que., and Brandon, Man., and rose at Lethbridge, Alta., and Nelson, B.C. Shoulder roast alone increased in price at Sault Ste. Marie, Ont., and Vancouver, B. C.

Veal advanced at Maisonneuve, Que., St. Thomas, Ont., Sault Ste. Marie, Ont., Lethbridge, Alta., and Nelson B. C., declining at Brandon, Man.

Mutton declined in price at Westville, N. S., Newcastle, N. B., Sorel, Que., and increased in price at Maisonneuve, Que., St. Thomas, Ont., and Sault Ste. Marie, Ont.

Pork.—The price of roast pork advanced at Newcastle, N.B., Sorel, Que., St. Catharines, Ont., St. Thomas, Ont., and at Edmonton, Alta., and declined at Hull, Que., Brantford, and Sault Ste. Marie, Ont., and at Nanaimo, B. C. Salt pork increased in price at St. John, and Newcastle, N. B., decreasing at Sorel and Hull, Que.

Bacon.—The price of bacon declined

at Newcastle, N.B., St. John, N.B., Berlin and London, Ont., Brandon, Man., and at Nelson and Nanaimo, B. C., Westville, N. S. reported an advance in price.

Fish.—The price of fresh fish declined at Sorel, Que., but rose at Vancouver and Victoria, B.C.

Lard.—Increases in price were reported at Amherst, N. S., Newcastle, N. B., Sherbrooke and Hull, Que., and at Winnipeg, Man., decreases occurring at Sorel, Que., St. Thomas, Ont., and Nelson, B. C.

Eggs.—Both fresh and packed eggs advanced in price at 17 of the cities, and fresh eggs alone advanced at 16 cities. At Nelson, B. C., both fresh and packed eggs declined in price as larger supplies were brought in from the country.

Milk.—The price of milk was raised at Amherst, N. S., Moncton, N. B., Three Rivers, Que., Maisonneuve, Que., Winnipeg, Man., and Victoria, B. C. At Toronto the price in December was almost universally 10c per quart, whereas in November 9c prevailed to a great extent. A decline occurred at Nelson, B.C.

Butter.—Both dairy creamery butter advanced in price at 18 of the cities, creamery butter alone advanced at 8 cities, dairy butter alone increased in price at Sorel, Que., and decreased at 5 cities.

Cheese.—The price of old cheese rose at Halifax, N. S., Newcastle, N. B., Sorel, Que. St. Thomas, Ont., and Nanaimo, B. C., declining at Brantford and London, Ont. New cheese advanced at Lethbridge, Alta., while both old and new cheese increased in price at St. Johns, Que., St. Catharines, Ont., and Brandon, Man., decreasing at Toronto, Ont.

Bread.—At Three Rivers, Que., bread advanced two cents per three pound loaf.

Flour declined at Sorel, Que., St. Catharines, Ont., and New Westminster, B.C.

Rolled oats decreased in price at Sorel, Que., Toronto, Ont., St. Thomas, Ont., and increased at Vancouver, B.C.

Rice.—The price of rice advanced at St. John, N.B., Sherbrooke, Que., Sorel, Que., and Nanaimo, B.C., declining at Lethbridge, Alta.

Beans increased in price at Halifax, N.S., Sherbrooke, Que., Brandon, Man., and Nanaimo, B.C.

Apples, evaporated.—Decreases in price occurred at Westville, N.S., Charlottetown, P.E.I., Newcastle, N.B., Hull, Que., and at New Westminster, and Nanaimo, B.C. Increases took place at Sherbrooke and Sorel, Que., and at Nelson, Vancouver and Victoria, B.C.

Prunes advanced in price at Halifax, N.S., London, and St. Thomas, Ont., declining at St. Johns, Que., and Sault Ste. Marie, Ont.

Sugar.—The price of both granulated and yellow sugar rose at Maisonneuve, Que., St. Thomas, Ont., and at Nelson and Nanaimo, B.C., declining at Berlin, Ont. Yellow sugar advanced at Sorel, Que., and declined at Moncton, N.B., and Vancouver, B.C.

Tea was upward at Maisonneuve, Que.

Coffee.—No changes were reported.

Potatoes.—At 26 of the cities the price of potatoes rose. Stratford, Ont., and Winnipeg, Man., reported the price lower.

Vinegar.—No changes were reported.

Starch.—No changes were reported.

Coal.—The price of anthracite coal advanced at Halifax, N.S., Moncton, N.B., Quebec, Que., Montreal, Que., and Toronto, Ont. Soft coal increased in price at Quebec City and Brandon, Man. At Lethbridge, Alta., there was a decline in price on account of the termination of the coal strike. The price of hard coal decreased at Port Arthur, on account of local competition.

Wood.—Both hard and soft wood advanced in price at Toronto and Brandon, and jack pine rose \$1.00 per cord at Winnipeg. Fir wood declined 50c at Vancouver, B.C.

Coal oil.—No changes were reported.

Rentals advanced \$5.00 per month at Nelson and Victoria, B.C. At Lethbridge, Alta., rents were lower for houses without sanitary conveniences. At Amherst, N.S., rent was somewhat higher.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior.

THE total immigration to Canada during the eight months from April to November, inclusive, was 281,898, compared with 243,071 in the corresponding period of 1910, an increase of about sixteen per cent. Of the total arrivals dur-

ing the eight months, 180,206 were at ocean ports, compared with 150,618 in the corresponding months of last year. There was an increase in the number of arrivals from the United States from 92,453 during the months from April to November, 1910, to 101,692 during the same period of 1911. The following table shows in detail the immigration to Canada during these periods:—

IMMIGRATION TO CANADA, FROM APRIL TO NOVEMBER 1911, INCLUSIVE, COMPARED WITH THAT OF THE CORRESPONDING MONTHS OF 1910

TRADE DISPUTES DURING THE MONTH OF DECEMBER, 1911.

THERE was a marked decrease in the number and magnitude of strikes and lockouts in Canada during December, compared with the previous month, and industrial conditions were not seriously affected by them in any part of the country. With the termination of a strike of cotton mill operatives at Magog, Que., early in the month, the only dispute of consequence which continued was a strike of railway machinists and boilermakers in Western Canada on the line of the Grand Trunk Pacific Railway.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The number of trade disputes reported to have been in existence in Canada during December was eight, being six less than in November, and two less than in December, 1910. About ten firms and 1,424 employees were involved in these disputes, about three firms and 115 employees being involved in new disputes.

Loss of time in working days.—The loss of time to employees through trade disputes during December was approximately 39,930 working days, compared with a loss of about 140,600 days in November, and 41,270 days in December, 1910.

Trades affected by new disputes.—The following table shows the trades affected by new disputes of the month, and the number of employees affected in each group of trades.

Trade.	No. of Disputes.	No. of Employees.
Building trades	1	50
Metal trades	1	65
Clothing trades	1
Total	3	115

Localities affected by new disputes.—One dispute occurred in each of the

provinces of New Brunswick, Quebec and Ontario.

Causes of disputes.—The cause of one dispute was a demand for an increase in wages, and that of another was a demand for shorter hours. The cause of the third dispute was not reported.

Methods of settlement.—Of the eight disputes in existence during December, four were reported to have been terminated, leaving four still in existence at the close of the month. Two were settled through negotiations between the parties concerned, in one by the resumption of work without negotiations, and in one by the resumption of work on the part of some strikers and by the places of others being filled.

Results of disputes.—Two disputes resulted in favour of the employers, in one a compromise was reached, and in one the result was not reported.

Disputes Which Commenced Prior to the Beginning of the Month.

The trade disputes in existence in Canada during December which began in previous months comprised strikes of cotton mill hands at Magog, Que., machinists and boilermakers between Westfort, Ont., and Edson, Alta., garment workers at Montreal, Que., pulp-mill hands at St. George, N. B., and iron moulders at London, Ont.

Strike of Cotton Mill Workers at Magog, Que.

A strike of cotton mill workers, employed by the Dominion Textile Company at Magog, Que., which began on November 20, was reported to have been terminated during the first week of December, when the employees returned to work under the conditions prevailing before the strike. The cause of the dispute was the refusal of the Company to grant a demand for an advance of ten per cent. in wages, which would restore the rate to that which prevailed prior to May, 1908. About

400 employees were directly affected by the dispute and 200 indirectly.

**Strike of Machinists and Boilermakers
of the Grand Trunk Pacific
Railway.**

No settlement was reported in a strike of machinists and boilermakers of the Grand Trunk Pacific Railway, which took place on October 10, and extended from Westford, Ont., to Edson, Alta. The matters in dispute between the employees and the company related to hours, wages, and conditions of employment. About 300 men in all were thrown out of work by the dispute.

**Strike of Garment Workers at
Montreal, Que.**

No definite settlement was reported in the case of a strike of garment workers at Montreal, Que., which began on November 21, but by December 1, it was reported in the press that many of the strikers had returned to work and the places of others were filled. The cause of the dispute was the withdrawal from the men of the privilege to use the elevator. About 150 male and 200 female employees were involved in this dispute.

**Strike of Pulp Mill Hands at
St. George, N.B.**

No change in the situation was reported in the case of a strike of fifty-two pulpmill hands at St. George, N.B., who stopped work on April 26, on account of the refusal of the employer to grant a demand for an eight-hour day instead of thirteen and eleven hours; with an increase in the minimum wages.

**Strike of Iron Moulders at London,
Ont.**

No settlement was reported in a strike of iron moulders at London, Ont., which began on June 5, on account of the refusal of three firms to grant the same minimum wage for a nine hour day as had been paid for a day of ten

hours. Out of sixty men, however, who were originally involved in the dispute, only six were still on strike during December.

New Disputes.

The new disputes of the month comprised strikes of machinists at St. John, N.B., cement workers and labourers at Wingham, Ont., and garment workers at Montreal, Que.

Strike of Machinists at St. John, N.B.

On December 7, a strike of machinists of the nail factory of James Pender & Company took place at St. John, N. B. The cause of the dispute was a demand of the men for a nine hour day instead of ten. It was stated by the employers that about two months previously they had been first asked to grant shorter hours. At that time the manager proposed that the men should try a bonus system for a couple of months, which consisted in paying them a certain percentage of their wages additional provided they averaged a certain number of kegs per machine for the week. This was done, with the result that the bonus was earned three times during the two months, and would have been earned oftener but for a breakdown. In the meantime it was ascertained by the manager that the Western factories worked ten hours per day except on Saturdays, when they only worked five, but that they were operating on a tonnage basis, while this factory was on a day work basis, and it was claimed that the former method produced a decidedly greater output. The men were then told that as soon as the mill was put on a tonnage basis, they would be granted the Saturday half holiday, but that it would take perhaps two or three months to make this change. In the meantime the men were given the option of taking $5\frac{3}{4}$ days' pay for 53 hours' work, by starting at 8 a.m. instead of 7 a.m., or full pay for full time, that is 59 hours per week. Both offers were refused, the men demanding nine hours a day or a half holiday

<i>C. Trades—</i> ulpmill hands.....	St. George, N. B..	For day of eight hours instead of thirteen and eleven with increase in minimum wages.....	1	52	April 26	No settlement reported at end of month.

* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike must be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mentioned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mentioned a record of the continuance of such a dispute might be misleading.

The list of trade disputes published in the present table, therefore, includes mentioned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mentioned a record of the continuance of such a dispute might be misleading.

Mention, moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike might be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned there can be no doubt that the dispute must be treated as having terminated at once.

The list of trade disputes published in the present table, therefore, includes mentioned a record of the continuance of such a dispute might be misleading. The list of trade disputes publishing on the basis of the date of the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention, moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

on Saturday at once, and the demand not being granted, they walked out. Two days later, on December 9, the men decided to accept the offer which had been made to them, and work was resumed on December 11. On account of the loss through the strike, they agreed to work full time for the rest of the year, and after that to work 53 hours per week for which they would receive pay for 57½ hours. This would continue until the new system was put into operation.

Strike of Cement Workers and Labourers at Wingham, Ont.

It was reported in the press that on December 19, about fifty cement workers and labourers declared a strike at Wingham, Ont., on account of the refusal of the employers to grant a demand for an increase in wages from sixteen to twenty cents per hour. No

settlement of this dispute was reported during the month.

Strike of Garment Workers at Montreal, Que.

A strike of garment workers took place at Montreal, Que., during the week ending December 23. The dispute, which affected the Montreal Dress Stay Company, was reported in the press to have been settled on December 26, by friendly negotiations between the parties concerned. The terms of the settlement were not reported.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of December, and which have been reported to the Department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF DECEMBER, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of British Columbia, to the office of the factories inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 276 individual work people in Canada during the month of December, 1911, were reported to the Department of Labour. Of these, 82 were fatal and 194 resulted in serious injuries. In addition, 3 fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before December, 1911.

In the preceding month there were 95 fatal and 191 non-fatal accidents reported, a total of 286, and in December, 1910, there were 154 fatal and 197

non-fatal accidents, a total of 351. The number of fatal accidents reported in December, 1911, was, therefore, 13 less than in the preceding month and 72 less than in December, 1910. The number of non-fatal accidents reported in December, 1911, was 3 more than in the preceding month and 3 less than in December, 1910. Altogether there were 10 less industrial accidents reported in December, 1911, than in the preceding month and 75 less than in the same month of the preceding year.

Of 230 returns received during the month giving the ages of the victims of industrial accidents, 25 referred to persons under twenty-one years of age, 80 to persons between twenty-one and forty-five, and 14 to persons over 45, 111 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and groups of trades:—

Nature of Fatalities and Accidents.

The disasters of the month involving more than the death of one workmen were:—the suffocation of three miners in a chute of a mine at Middlesboro, B. C.; the death of three employees through an explosion in the mixing room of a powder factory at Departure Bay, Vancouver, B. C.; the death at Toronto of two workmen by a fall of eighty feet, due to the breaking of a plank on which they were working; the drowning of two post office employees (one the postmaster) while on duty at Oka, Que., in the upsetting of a launch on the Lake of Two Mountains during a severe gale and snow-storm; the asphyxiation of two well-diggers near Keithville, Sask., by gas while digging a well; the scalding to death by escaping steam, of two workmen, at Winnipeg, while working in a trench.

Record by Industries and Groups of Trades.

A detailed record of the industrial

accidents of the month by industries and groups of trades, is as follows:—

Agriculture.—There were five fatal and thirteen non-fatal accidents recorded during the month of December, 1911, compared with eleven fatal and nineteen non-fatal accidents in November, and twenty-five fatal and fifteen non-fatal accidents in December, 1910. Of the fatal accidents, two each were caused by falling material and fire, and one by machinery.

Fishing and hunting.—There was one fatal and one non-fatal accident recorded during December, 1911, compared with one fatal accident in November and four fatal accidents during December, 1910. The fatality was caused by the accidental discharge of a shot gun.

Lumbering.—There were four fatal and eight non-fatal accidents recorded during December, 1911, compared with seven fatal and seven non-fatal accidents in November, and seven fatal and twelve non-fatal accident in December, 1910. The four fatalities were caused by falling material.

Mining.—There were fourteen fatal and fourteen non-fatal accidents recorded during December, 1911, compared with five fatal and eight non-fatal accidents during November, and forty-one fatal and seventeen non-fatal accidents during December, 1910. Of the fatalities, three each were caused by suffocation, explosions, falling material and crushing by cars, and two by falls.

Railway construction.—There was one fatal and one non-fatal accident recorded during December, 1911, compared with four fatal and four non-fatal accidents during November, and three fatal and one non-fatal accidents in December, 1910. The fatality was caused by an explosion of dynamite.

Building trades.—There were nine fatal and thirty-one non-fatal accidents recorded during December, 1911, compared with six fatal and thirteen non-fatal accidents in November, and five

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF DECEMBER 1911

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	Fenella, Ont.	Dec. 19	1	By falling tree
"	Strathcona, Alta.	" 6	1	Caught in belting of machine
"	Metcalfe's Corner, Ont.	" 29	1	Burned to death

fatal and seventeen non-fatal accidents in December, 1910. Of the fatalities, seven were caused by falls, one each by electrocution and falling material.

Metal, Engineering and Shipbuilding trades.—There were five fatal and forty-two non-fatal accidents recorded during December, 1911, compared with six fatal and forty-five non-fatal accidents in November, and ten fatal and forty-one non-fatal accidents in December, 1910. Of the fatalities. Three were caused by electrocution, and one each by cars and machinery.

Woodworking trades.—There was one fatal and seven non-fatal accidents recorded during December, 1911, compared with two fatal and fourteen non-fatal accidents in November, and eight non-fatal accidents in December, 1910. The fatality was caused by falling material.

Printing and allied trades.—There were two non-fatal accidents recorded during December, 1911, compared with none in November, and one non-fatal accident in December, 1910.

Clothing.—There were two non-fatal accidents recorded during December, 1911, compared with two non-fatal accidents in November and none in December, 1910.

Textile.—There was one fatal and two non-fatal accidents recorded during December, 1911, compared with one fatal and two non-fatal accidents in November, and three non-fatal accidents in December, 1910. The fatality was due to victim being crushed by an elevator.

Food and tobacco preparation.—There were two fatal and two non-fatal accidents recorded during December, 1911, compared with three non-fatal acci-

dents in November, and two fatal and seventeen non-fatal accidents in December, 1911. One fatality was caused by machinery and the other by crushing.

Leather.—There were no accidents recorded during December, 1911, compared with one non-fatal accident in November, and none in December, 1910.

Steam railway service.—There were eleven fatal and twenty-six non-fatal accidents recorded during December, 1911, compared with eleven fatal and twenty-three non-fatal accidents in November, and fourteen fatal and twenty-eight non-fatal accidents during December, 1910. Of the fatal accidents, six were caused by collisions, two each by machinery and cars and one by scalding.

Electric railway service.—There were three non-fatal accidents recorded during December, compared with one fatal and five non-fatal accidents in November, and six non-fatal accidents in December, 1910.

Navigation.—There were seven fatal and three non-fatal accidents recorded during December, 1911, compared with seventeen fatal and seven non-fatal accidents in November, and twenty-six fatal and three non-fatal accidents during December, 1910. Of the fatalities, five were caused by drowning, and one each by burning and falling material.

Miscellaneous.—There were four fatal and seventeen non-fatal accidents in December, 1911, compared with three fatal and eleven non-fatal accidents in November, and four fatal and thirteen non-fatal accidents in December, 1910. Of the fatalities, one each was caused by runover, fall, blood poisoning and falling material.

Public employees.—There were two

fatal and one non-fatal accident recorded during December, 1911, compared with two fatal and five non-fatal accidents in November, and two fatal and eight non-fatal accidents in December, 1910. The fatalities were caused by drowning.

Miscellaneous.—There were ten fatal and sixteen non-fatal accidents recorded in December, 1911, compared with six fatal and eight non-fatal accidents in November, and five fatal and seven non-fatal accidents in December, 1910.

Of the fatalities, four were caused by suffocation, three by explosions, and one each by a street car, burns and a fall.

Unskilled labour.—There were five fatal and three non-fatal accidents recorded during December, 1911, compared with twelve fatal and fourteen non-fatal accidents in November, and six fatal and thirteen non-fatal accidents in December, 1910. Of the fatalities, two were caused by scalds and falling material and one by a fall.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF DECEMBER, 1911.

The following is a list of contracts awarded by the Department of Public Works and the Department of Marine and Fisheries which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

THE general clause for the protection of Labour was inserted by the Department in the following contracts awarded during December.

Construction of Three Dump Scows, Vancouver, B. C.; Installation of Electric Light, Public Building, Sherbrooke, Que.

Construction of three (3) 260 cu. yd. dump scows at Vancouver, B.C. Name of contractor, Charles Moore of Vancouver, B.C. Date of contract, November 28, 1911. Amount of contract, \$22,200.

Electric light wiring, fixtures, etc., public building at Sherbrooke, Que. Name of contractor, J. A. Choquette & Co., Sherbrooke, Que. Date of contract, December 19, 1911. Amount of contract, \$950.

FAIR WAGES CLAUSES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent work-

men in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the contractor.

Public Building at Port Perry, Ont.

Public building at Port Perry, Ont. Name of contractor, W. J. Trick, of Oshawa, Ont. Date of contract, November 29, 1911. Amount of contract, \$22,475.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during December, 1911:

DOMINION REPORTS.

Work of the Department of Labour.

Report of the Department of Labour for the fiscal year ended March 31, 1911. Ottawa: King's Printer, 1911. Pages, 158.

Report of the Proceedings under the Combines Investigation Act for the year ended March 31, 1911. Appendix to Report of Department of Labour. Ottawa: King's Printer, 1911. Pages, 22. Price, 5 cents.

THE report of the Department of Labour for the fiscal year ended March 31, 1911, was issued during the month of December. The report is divided into fourteen parts, dealing respectively with the following subjects:

- I. The Labour Gazette.
- II. Wholesale Prices. Special report by the Department on the course of prices during 1910. Distribution of the special report issued on wholesale prices 1890-1909, &c.
- III. Royal Commission of Inquiry on Industrial Training and Technical Education.

- IV. Fair Wages Regulations of public authorities in Canada. Statement of steps taken by Government and Municipal bodies. Work of Dominion air Wages Officers for the year.
- V. Special Inquiries. (1) Conditions in construction camps along the line of the Grand Trunk Pacific Railway west of Edmonton, Alta. (2) Alleged non-payment of wages.
- VI. An Act to Prohibit the Importation and Use of Opium and other Drugs.
- VII. A Bill to Prohibit the Manufacture and Importation of Matches made with White Phosphorus.
- VIII. Strikes and Lockouts in Canada during 1910, with comparative statistics for the years 1901 to 1910 inclusive.
- IX. Industrial Accidents in Canada during 1910, with comparative statistics for the six preceding years.
- X. Re-organization and Enlargement of the Labour Statistics Branch of the Department of Labour. Outline of the field covered by the Branch.
- XI. The Library of the Department.
- XII. The circulation of the *Labour Gazette*.
- XIII. The distribution of the *Labour Gazette* and other publications.
- XIV. Inquiries, correspondence, and other departmental work.

The chapter on Wholesale Prices contain a summary of the reviews which appeared in the leading economic journals of the special report issued by the Department on the course of Wholesale Prices during 1910, and the special report on wholesale prices in Canada for twenty years, from 1890-1909. The chapter on Fair Wages shows the great extension of the application of this principle by the public authorities throughout Canada, fair wages regulations having been adopted by all the provinces of the Dominion with the exception of Nova Scotia and Prince Edward Island. In Nova Scotia, in place of such regulations, a provision is inserted in Government contracts providing that if a contractor does not pay the amount due by him for wages the Government may pay the workers and charge the amount against the contractor. A great many municipal fair wages regulations also exist, forty-two of the principal cities and towns of the Dominion having adopted the principle. The chapter on strikes and lockouts shows that in 1910 there was an increase in the number of strikes, but the number of employees

affected had considerably decreased, and there was also a decrease in the number of working days lost compared with the previous year.

In an appendix to the annual report, issued as a separate column, an account is given of the Proceedings under the Combines Investigation Act for the year ended March 31, 1911, in which a summary is given of the proceedings taken with regard to the United Shoe Machinery Company of Canada, which were still pending in court at the close of the fiscal year.

Post Office Department.

Report of the Postmaster General for the year ended March 31, 1911. Ottawa: King's Printer, 1911. Pages, 632. Price, 40 cents.

The report of the Postmaster General for the fiscal year ended March 31, 1911, shows considerable expansion both in the service and in the transactions of the Post Office. There was an increase over the previous year of 437 post offices, 284 postal note offices, 189 money order offices and 18 savings bank offices. There was an increase of 670 miles in the extent of the system over which mails are carried by railway. The number of letters and post-cards sent during the year is estimated at 52,357,000, which is over ten per cent. more than the figures of 1909-1910. The value of postage stamps sold during the year was \$11,011,042.90 as against \$9,942,435.90 in the preceding year. The amount of deposits in the post office savings banks was \$9,957,016.17, compared with \$8,816,511.71 in the previous year. The amount of withdrawals was \$11,470,360.24, compared with \$11,699,649.54 in the year 1909-1910. On March 31, 1911, there was a balance to the credit of depositors to the amount of \$43,330,579.19 being a decrease of about \$250,000 compared with the previous year.

Public Works.

Report of the Minister of Public Works on the works under his control for the fiscal year ended March 31, 1911. Vol. I. Ottawa: King's Printer, 1911. Price, 50 cents.

The report of the Department of Public Works for the last fiscal year shows that the revenue amounted to \$537,529.65 an increase of \$51,644.69 over the previous year. The revenue was derived from the following sources:—

Slides and booms	\$114,870 16
Graving docks	42,076 09
Rents	37,652 37
Telegraph lines	169,585 15
Casual revenue	173,345 88
Total	\$537,529 65

The expenditure amounted to \$11,807,035.42, about one-half million dollars in excess of that of the preceding year. The increase was for the most part in outlay in connection with dredging. The expenditure of the various branches was as follows:—

Harbours and rivers	\$2,975,059 21
Dredging, plant, &c.	4,471,203 61
Slides and booms	190,187 77
Roads and bridges	90,061 49
Public buildings	3,090,665 78
Telegraphs	568,493 48
Miscellaneous	421,364 08
	\$11,807,035 42

Experimental Farms.

The annual report on Experimental Farms for the year ended March 31, 1911.

In the report on experimental farms for the past fiscal year a summary is given of the production of grain and root crops in Canada during 1910. Sites for new experimental stations were selected at Scott, Sask., Cap Rouge, Que., Ste. Anne de La Pocatière, Que., Kentville, N.S., and Invermere, B. C. In addition to the experimental farm work conducted on the farms, co-operative experiments were also conducted by 43,385 farmers, among whom samples of seed of a high quality were distributed. These samples consisted of oats, barley, wheat, peas, Indian corn and potatoes.

Office of the Secretary of State.

Report of the Secretary of State of Canada for the year ending March 31, 1911. Ottawa: King's Printer, 1911. Pages, 641. Price, 40 cents.

The report of the Secretary of State

of Canada for the year ended March 31, 1911, shows that in that period there were 544 charters issued under the "Companies' Act", compared with 493 charters in the previous year. The total capitalization of the new companies was \$458,415,800 and the capitalization of existing companies was increased by \$24,715,600, the whole amounting to \$483,131,400 as compared with \$348,377,800 in 1909-10. During that period 16,348 persons were granted certificates of naturalization, of these, 5,854 were from the United States, 2,865 were Russians, 1,902 Austrians, and 813 Italians.

MANITOBA REPORT.

Public Works.

Report of the Department of Public Works for the year ending December 31, 1910. Winnipeg: King's Printer, 1911. Pages, 80.

In the report of the Department of Public Works of the Province of Manitoba for 1910 it is stated that the work in all branches continued to increase rapidly. Early in the year a highway commissioner was appointed to co-operate with the various municipalities for the improvement of roads. There was a large demand on the part of municipalities for the services of engineers of the Department in order to carry out public works and the majority of requests for this service was complied with. A notable feature was the tendency to construct permanent bridges of steel or re-inforced concrete instead of wooden bridges which were almost universal a few years ago. A succession of dry seasons created a demand for Government well drills and during the year 141 wells were bored. Under the Steam Boiler Inspection Act 2,320 boilers were inspected. Only six factory accidents were reported by the factory inspector for the province during the year, of which four were of a slight nature and two were fatal. Only two cases of children under age in factories were reported. It is stated in this connection, however, that many complaints are received that

children under age are working, but on investigation they are found to be employed in stores over which the inspector has no control. Only six permits were issued for overtime work and these were only for five days each. Two of them were for bag factories, one for a dressmaker, one for a milliner and two for candy factories. Sanitary conditions in the factories are stated to be improving each year, and with improved machinery the danger to the employees is being lessened.

BRITISH REPORTS.

Expenditure of Wage-earning Women and Girls.

Board of Trade (Labour Department) accounts of expenditure of wage-earning women and girls. London: Wyman & Sons, Ltd. Pages, 96. Price, 5d.

The Labour Department of the Board of Trade has issued a detailed analysis of the expenditures of thirty wage-earning women and girls, who furnished weekly accounts for a whole year. These were obtained from various organizations such as the Women's Co-operative Guild, the Social Service Branch of the Young Women's Christian Association, the Women's Labour League, the National Organization of Girls' Clubs, and the Association of Teachers of Domestic Subjects. The report is of some interest as showing the mode of living of representative women wage-earners, but on account of the small number who furnish complete accounts no generalization is possible. Of the thirty correspondents who kept complete records twenty-three lived at home with one or both parents, two were boarders, two lived with sisters also working, one shared rooms with a friend, and two lived alone. Nearly all living at home with parents were quite self-supporting. The weekly earnings range from 4s. 10½d. to 28s. 10¾d. An interesting feature of the expenditures was the extent to which they contribute to insurance funds, and the amount devoted to educational, political, and propagandist

objects. Twenty-two out of the thirty correspondents contributed to some form of insurance, including under this heading trades unions, sick and burial funds. The same number also spent various sums under the heading of "Educational, Political and Propagandist." The Department expressed the desire to obtain returns from workers earning not more than 3s. per week in such numbers that it would be possible to classify the results in the following groups of correspondents:—

1. Women and girls living at homes with parents—
 - (a) Paying less than the cost of their board and lodging.
 - (b) Paying as much as the cost of their board and lodging.
 - (c) Contributing to the support of other members of the family.
2. Boarders in families.
3. Boarders in boarding-houses.
4. Occupiers of tenements, or lodgers—
 - (a) Sharing expenses with sisters or friends.
 - (b) Living alone.
 - (c) Living with dependents.

The principal subjects on which a large collection of records might throw light are stated to be:—

1. The value of the unpaid service and other advantages received by the daughter living at home considered apart from cash expenses.
2. The increased cost of living and the decreased social opportunities of self-supporting women when excluded from family life.
3. The deficiency in the supply of food, clothing and bright surroundings necessitated by low wages and the resulting inefficiency of the worker.
4. The relative importance to the worker herself of the present compared with the future; of dress compared with food; of decency compared with warmth; of giving to friends compared with saving for oneself.

Abstract of Labour Statistics.

The fourteenth abstract of Labour Statistics of the United Kingdom 1908-1909. London: Wyman & Sons 1911. Price, 1s. 4d.

The fourteenth abstract of Labour Statistics of the United Kingdom contains figures relating to a large number of subjects among which may be mentioned fluctuations in employment labour bureaux and employment ex

changes, board of trade labour exchanges, changes in wages and hours of labour, wholesale and retail prices, trade disputes, industrial diseases and accidents, agriculture, profit sharing, earnings in the various trades, trade unions, co-operative societies, friendly societies, occupations of the industrial population, and pauperism. Comparative statistics are given for each year from 1901, the latest statistics relating usually to the year 1909, although certain preliminary figures relating to 1910 are given in some cases. The tables of employment, as based on returns received from trade unions, show that the percentage not returned as unemployed amounted to 94.9 in 1901, compared with 91.3 in the previous year. The index number of employment was 97.3 where the number for the year 1900 represented 100. The statistics of retail prices show a steady advance from the year 1906 and wholesale prices of wheat also increased in that period from 26s. 9d. per Imperial quarter, to 31s. 8d.

AUSTRALIAN REPORT.

Year Book of New South Wales.

The official year book of New South Wales, 1909-10. Pages, 641.

The official year book of New South Wales for 1900-10 contains a large amount of information with regard to industrial and labour matters. An account is given of the principal industries of the State, including agriculture, pastoral, dairying and mining industries, and manufacturing; a chapter on the social conditions of the people, statistics relating to harbours and other works supported by the Government. The chapter on employment and arbitration contains an account of the industrial and arbitration laws in force in New South Wales, and the operation of the industrial laws. An account of the workings of the Industrial Disputes Act of 1908 and the amending Acts of succeeding years is given. There is also a brief statement of the legislation in force in other countries

with regard to trade disputes and a brief analysis of the principal industrial laws in force in New South Wales.

NEW ZEALAND REPORT.

Industrial Conditions in New Zealand.

Twentieth annual report of the Department of Labour, 1911. Wellington, King's Printer, 1911. Pages, 180.

The report of the Department of Labour of New Zealand contains reports of the Secretary of the Department, the Inspector of Factories and Awards, the Inspector of Scaffolding and the Conciliation Commissioners. The report also contains a statement of the Department for the year's returns under the Factories and Shops Acts, important legal decisions under the Factories, Shops and Offices Act, and return under the shearers' Accommodation Act. The report shows that there was an improvement in industrial conditions in the years of 1910-11, compared with the previous years. The number of persons assisted, who applied to the Government for employment was 7,102 in the year ended March 31, 1911, compared with 8,506 in the previous year. There were 12,768 factories registered on March 31, 1911, an increase of 466 over the previous year and there were 78,790 factory workers, an increase of 984.

UNITED STATES REPORTS.

Industrial Conditions in Massachusetts.

Forty-first annual report on the statistics of labour of Massachusetts for the year 1910. Boston: State Printers, 1911. Pages, 342.

The report on the Statistics of Labour for Massachusetts for 1910 comprises three parts:—

1. Prevailing time-rate of wages and hours of labor in selected occupations, October 1, 1910.
2. Strikes and lockouts.
3. Living conditions of the wage-earning population in certain cities of Massachusetts.

The statistics of wages and hours of labour are based on replies received from 1,030 labour organizations in the State. Of this number 843 reported the prevailing time-rates and hours of labour, 92 reported that there was no standard time-rate in their trade, and 95 reported that there members worked on a piece-rate basis.

The report on strikes and lockouts showed an increase in the number of labour disputes and the number of employees involved. There were 242 strikes lasting more than one day, affecting directly or indirectly 27,176 employees. The approximate amount of time lost by all strikes in progress during the year was 312,674 working days.

Under past III. of the report, that dealing with living conditions of the wage-earning population, comparison is made as to wages and hours of labour, rents, housing and retail prices with those obtaining in the United Kingdom.

Labour and Industrial Conditions in Virginia.

Fourteenth Annual Report of the Bureau of Labour and Industrial Statistics for the State of Virginia, 1911. Richmond: State printer. Pages, 195.

In report of the Bureau of Labour on the labour and industrial statistics for the State of Virginia, it is stated there has been a steady advance in the industrial growth of the State. The calendar year of 1910 showed a net gain in product value of \$15,979,162.18, while only seven showed decreases in product value to the amount of \$920,320.09. The report contains many other interesting statistics relating to nearly all the principal industries of the State, showing for each branch of industry an increase over the year 1909. The value of the product, aggregate yearly wages and the average daily wages for each class of employee, also the average monthly pay to office help, are shown. An account is given of the factories inspectors and a sum-

mary of the court decisions affecting labour, and the laws affecting labour in force in the State.

OTHER REPORTS RECEIVED.

Canada.—Report of the Minister of Agriculture for the Dominion of Canada, for the year ended March 31, 1911. Ottawa: King's Printer, 1911. Pages 255. Price 15 cents.

The Canadian Oyster Industry by M. J. Patton, M.A., Assistant Secretary of the Commission of Conservation. Reprinted from the Report of the Commission of Conservation, entitled "Lands, Fisheries, Game and Minerals, 1911." Ottawa: 1911.

Forty-fourth annual report of the Department of Marine and Fisheries, 1911,—Marine—Ottawa: King's Printer, 1911. Price 25 cents.

Report of the Department of the Naval Service for the fiscal year ending March 31, 1911, Ottawa: King's Printer, 1911. Price 10 cents.

Ontario.—Annual report of the Farmers' Institute of the Province of Ontario, 1911. Part I. Farmers' Institutes, and Part II. Meetings and Statistics. Toronto: King's Printer, 1911.

Great Britain.—Report from Standing Committee "B" on the National Insurance Bill (part II.) with the proceedings of the Committee. London: Wyman and Sons, Ltd., Price 4d.

Australia.—Trade and Customs and Excise Revenue of the Commonwealth of Australia for the year, 1910. Melbourne: King's Printer, 1911.

Shipping and Oversea Migration of the Commonwealth of Australia for the year 1910. Melbourne: King's Printer, 1911.

United States.—Living conditions of the wage earning population in certain cities of Massachusetts with some comparisons between the United States and the United Kingdom. Part III. of the

Forty-first annual report on the Statistics of Labor. Boston: State Printer, 1911.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

QUEBEC CASES.

Unemployment not Vagrancy.

RULING that the mere fact that a man is unemployed for a certain part of the year did not constitute sufficient grounds to have caused his arrest and conviction on a charge of vagrancy, the Court of King's Bench (criminal side) sitting in appeal at Montreal, reversed a judgment of the Magistrate's Court, and liberated a prisoner sentenced to six months' imprisonment by the lower tribunal. It was proved that though the man was in reality unemployed during the winter months preceding his arrest by reason of his avocation, he worked all summer and was thrown into unemployment at the approach of each winter. It appeared that he had been taken into custody charged with theft. The charge was not substantiated in the course of the hearing, and he was promptly rearrested as being without visible means of support. As a matter of fact, the man had not been working throughout the winter preceding his arrest, but the attorneys for the defence pointed out that this was owing to the nature of his employment. The accused worked on the wharves as a longshoreman, unloading coal barges, and at the close of navigation was of course rendered idle. Counsel for the appellant pointed out that, if one were to accept the principle that a man who was employed for only a part of the year could be said to be amenable to arrest for lack of visible means of sub-

sistence during the time he was idle, chaos would ensue. Seamen, navigators, teachers, college professors, and even judges were employed but a part of the year.

ONTARIO CASES.

Master and Servant.—Workmen's Compensation Act.

Appeal by the Defendants to the Court of Appeal from the judgment of Chief Justice Falconbridge, in favor of the plaintiff, upon the findings of the jury, in an action for damages for injuries sustained by the plaintiff, while in the employment of the defendants as car repairer. The plaintiff and one T. were both employed by the defendants. The plaintiff was assisting T. in repairing a car standing on a track in the defendants' yard, when the yard-engine propelled other cars against the car under repair, and injured the plaintiff, who brought this action to recover damages for his injuries, under the Workmen's Compensation for Injuries Act. The plaintiff alleged negligence on the part of T., a person in a position of superintendence to whose orders the plaintiff was bound to conform and did conform, in not placing a flag or flags in a position to give warning that work was going on upon the track. At the trial, the jury, in answer to questions, found: (1) that the plaintiff's injuries were caused by negligence of the defendants; (2) that the negligence was the neglect of T. in not placing the flag for protection; (3) that the injuries were caused by the negligence of a person in a position of superintendence over the plaintiff, and to whose orders

he was bound to conform; (4) that T. was that person, and his negligence consisted in not placing the flag: (5) that the plaintiff's injuries were not caused by his own want of care; "it was no part of his duty to place these flags"; and they assessed the damages at \$1,980:

The Court held (Mr. Justice Meredith dissenting) that, notwithstanding that the jury had not found that T. was exercising superintendence at the time of the injury, and had not found that the plaintiff did conform to T.'s orders, yet, having regard to the evidence and the Judge's charge, the findings were sufficient, under the Workmen's Compensation for Injuries Act, to support a judgment for the plaintiff. *Marley v. Osborn* (1894), 10 Times L. R. 388, was specially referred to.

After counsel had addressed the jury, and when the Judge was about to begin his charge, a discussion arose about the frame of two of the questions proposed to be submitted to the jury, in the course of which the defendants' counsel suggested another question: "Did the plaintiff voluntarily perform the acts which caused his accident, knowing of the dangers which he ran?" This defence was not set up in the pleadings nor previously at the trial; and no application was made for leave to amend, or to reopen, the case, or postpone the trial. The judge declined to submit the question, saying that he did not think it fair to introduce it at that stage.

The Court held (Mr. Justice Meredith dissenting), that this was a proper exercise of discretion. The judgment in favor of the plaintiff was up-

held and the appeal dismissed, Mr. Justice Meredith dissenting. (*Brulott v. Grand Trunk Pacific R. W. Co.* 24 O. L. R. 154.)

Deck Hands in Court.

Seven deck hands, all of Toronto, were recently charged at the police court in the city of Hamilton with refusing to obey the orders of Captain Henderson, of the "Macassa". The prisoners refused to help to "coal" the steamer. Magistrate Jelfs told them they were liable to from four to twelve weeks' imprisonment, but he allowed them to go, as the steamboat company did not want them sent to jail.

Motor Vehicles Act.—Unauthorized use of Motor by Servant.

An appeal by the defendants from the judgment of Chief Justice Falconbridge in favor of the plaintiff, after trial without a jury, in an action for damages for injury to a taxi cab owned by the plaintiff, owing to a collision with a motor car of the defendants. The trial judge gave judgment for the plaintiff for \$570, with the right to either party to have a reference to increase or diminish the damages.

It appeared that a demonstrator employed by the defendants took, for his own purposes, an automobile from their sale-garage, without their knowledge or permission and contrary to instructions; and, while driving it upon a highway in the city of Toronto brought it into collision with the plaintiff's taxicab. In an action for the damage thus sustained, the trial Judge found that it was caused by the direct impact of the defendants' auto-

mobile; that the defendants had failed to prove that this damage did not arise through the negligence or improper conduct of the driver; and that, as the defendants' vehicle was not one for hire or private use, but was, by the terms of the permit, held for sale only, there was an obligation to take care that it was not taken out by a servant for any unauthorized purpose, and that there was negligence, in not effectively providing against such unauthorized use. The evidence shewed that the damage would not have been done had the defendants' vehicle been running within the statutory rate of speed (ten miles an hour, sec. 6):

The Divisional Court held, that the evidence supported the findings; and that the defendants were liable in two aspects: first, because the damage was occasioned by the use of their vehicle in contravention of the statutory provisions as to rate of speed (secs. 6 and 13); and, second, because the vehicle was allowed to be handled recklessly on the highway by their servant (sec. 18). The provisions of the Motor Vehicles Act, 6 Edw. VII. ch. 46, abrogate to some extent the common law rule that the master of a vehicle is exempt from responsibility if his servant does an injury with the vehicle when, outside of the duties of his employment, he is out at large on an errand or frolic of his own. Though the owner may not be responsible in a penal aspect for a violation of the Act unless he is personally present, he does become personally responsible in damages where there has been a violation of the Act by his vehicle. (Sec. 19*d* (added by 9 Edw. VII. ch. 81), read with sec. 13.) *Verral v. Dominion Automobile Company*, 24 O. L. R. 551.

MANITOBA CASES.

Workman's Compensation Act.— Master and Servant.

Action under the Workmen's Compensation for Injuries Act, and at common law, for damages for injuries sustained by the plaintiff, while employed in the defendants' works, by reason of the negligence of the defendants or the plaintiff's fellow-servants. The plaintiff was doing work as a carpenter for the defendants upon the roof of a building. A joist upon which he was walking, in the performance of his duty, broke in the middle, and he was thrown to the ground and seriously injured. He sued for damages for his injuries, alleging a defective system and negligence of the foreman in charge, so as to bring the case within the common law or the Workmen's Compensation for Injuries Act. Chief Justice Mathers, who tried the action, held, upon the evidence, that the method of placing the joists adopted by the defendants was a reasonably safe method of procedure, and that there was no negligence in requiring or permitting the plaintiff to do the work he was engaged in without a scaffold; but even if the evidence justified the opposite building, the absence of a scaffold was not the cause of the injury. To establish liability for an injury, a direct connection must be found, with evidence to sustain it, between the injury sustained and the negligence found. *Thompson v. Ontario Sewer Pipe Co.*, 40 S. C. R. 396, 397. followed. The Chief Justice also held, that the absence of a ladder, to enable the plaintiff to descend directly from the beam on which he was working, did not constitute a defect in the system adopted

by the defendants or their foreman, or negligence for which the defendants would be liable at common law or under the statute. He also held, that the weakness of the joist was the direct cause of the accident; and the circumstances cast upon the defendants the onus of exculpating themselves from blame; and the defendants had satisfied that onus by shewing that, in the selection of the joists, they took reasonable care to provide against defective materials being used. The master does not warrant the soundness of his materials; his utmost duty is to take reasonable care. The proper conclusion from the evidence was, that the breaking of the joist was due to a later or concealed defect not discoverable on reasonable inspection. Finally he was of opinion and gave judgment accordingly, that there was no negligence for which the defendants were responsible, and the action failed. (*Lafvendal v. Northern Foundry and Machine Co.* 19 W. L. R. 350.)

BRITISH COLUMBIA CASES.

Employer's Liability Act.—Injury to Servant.

Appeal to the Court of Appeal by the defendants from the judgment of Mr. Justice Clement, upon the findings of a jury, in favor of the plaintiff, in an action for damages for personal injuries sustained by the plaintiff while in the service of the defendants owing to their alleged negligence.

The plaintiff was injured when at work in a lumber mill, of the defendants, and the jury found, in answer to questions, that the defendants were guilty of negligence, "in not taking sufficient precautions under the cir-

cumstances," and that such negligence caused the injuries complained of by the plaintiff. The jury did not answer questions asked them as to whether the plaintiff was guilty of contributory negligence. They assessed the plaintiff's damages under the Employer's Liability Act; and the trial judge entered judgment for the plaintiff;

The Court held, regarding the findings as a general verdict in favour of the plaintiff, that there was evidence to sustain it, and no such evidence of contributory negligence as should induce the Court to interfere; Mr. Justice Irving dissenting, being of opinion that there should be a new trial, because the jury did not answer the questions as to contributory negligence. (*Mitchell v. Rat Portage Lumber Company*, 19 W. L. R. 314.)

Damages for Injured Hand.

A special jury empannelled before Mr. Justice Gregory, at Victoria, recently returned a verdict for the plaintiff and \$800 damages, in the case of *Hodgson v. Westholme Lumber Company*, an action brought under the Provincial Employers' Liability Act. The action was based upon injuries to the hand sustained by plaintiff while employed in the workshop of the defendant company. When operating a saw, owing to alleged defects in its construction, the board which he was cutting buckled, bringing his hand in contact with the unguarded machine, his thumb being amputated and two fingers injured.

Injury to Servant in course of Employment.

An appeal to the Court of Appeal from the judgment of Chief Justice

Hunter, setting aside the verdict of the jury in favor of the plaintiff for \$3,700, in an action tried at Victoria, B.C. Plaintiff, a workman in the defendants' employment, lost the sight of an eye through being struck with an iron splinter from the ring of a wooden hammer used in caulking operations. The condition of the tool was brought by plaintiff to the foreman's notice immediately before the accident, not in the sense of its being dangerous, as similar tools in similar condition were often used, but as to its condition to do the work effectively. The foreman directed plaintiff, as time was important, to try to do the work with the

hammer, and the accident occurred. There was no question of the foreman's competence, or that the tool as supplied by the employers was defective or dangerous.

The Court of Appeal held, affirming the judgment of Chief Justice Hunter, setting aside the verdict of the jury in favour of the plaintiff, that there had been no negligence on the part of the defendants; that if there was any negligence it was on the part of the foreman, a fellow servant, and it was shewn that he was a competent person for the position. (*Kellett v. British Columbia Marine Railways Company, Limited.* 16 B. C. R. 196.)

**DOMINION COAL CO. AND
AGREEMENT WITH EMPLOYEES
—RESOLUTION BY MINERS
AT SPRINGHILL, N.S.**

At a regular meeting of Local Union No. 469 United Mine Workers of America, held on November 2nd, 1911, the following resolution was unanimously passed. The secretary was instructed to send one copy to the press and one to the Dominion Coal Company, Ltd.

Resolution.

To the Dominion Coal Company Ltd.,
at Springhill:

"Whereas we, the employees of the Dominion Coal Company at Springhill, and being formerly employees of the Cumberland Railway and Coal Company, and members of the Provincial Workmen's Association up to December, 1908;

"Whereas, by unanimous vote of 97 per cent. we, the employees in and around the mines, turned over to the U.M.W. of A., which was organized on December 17th, 1908;

"And whereas, the members of Local Union No. 469, U.M.W. of A., having been on strike from August 10th, 1909, to May 27th, 1911, owing to many differences existing in and around the mine regarding the condition and wages paid prior to August, 1909;

Whereas, we, the members of Local Union No. 469 U.F.W. of A., decided to return to work on May 27th, 1911, owing to an agreement entered into by the Dominion Coal Company at Springhill through the Hon. George R. Murray, premier of Nova Scotia;

"And whereas, we represent 90 per cent. of the employees in and around the mines at Springhill, we recognize

only one organization and the U.M.W. of A.

“Therefore, be it resolved that Local Union No. 469 U.M.W. of A. protests against being bound by any agreement entered into by any members of the de-

funct P.W.A. and the Dominion Coal Company at Springhill.”

Signed on behalf of Local Union No. 469 United Mine Workers of America.

C. A. BONNYMAN, President.
J. B. TAYLOR, Secretary.

LABOUR GAZETTE

FEBRUARY, 1912.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JANUARY, 1912.

1.—GENERAL SUMMARY.

A FEATURE of the month which had a widespread influence on industrial and labour conditions was the exceptionally cold weather which, to a great extent, put a stop to out-door construction work. Apart from this the month was very active. The railways were exceptionally busy hauling grain. Agriculturists, at numerous points in Western Canada, still complained of a shortage of cars, but the situation was somewhat improved towards the end of the month. Elsewhere the farmers were chiefly engaged in marketing their produce, for which high prices were obtained. Prices generally showed an advance over December. With the arrival of the snow there was increased activity in the lumbering camps, and prospects for the season's output were brighter. The mining industry was more active than is usual in January. Factories throughout the country were nearly all working full time, and general trade conditions were active. Unskilled labourers secured a fair amount of employment in removing snow from the streets and in harvesting ice.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during January, 1912.

Metal Trades.—Heaters (32) in rolling mills at Montreal, Que., sustained a reduction of ten per cent. in their wages.

Clothing Trades.—Cloakmakers (55) at Toronto, Ont., received an advance in piecework prices amounting to from ten to fifteen per cent.

Railway Service.—Street railway conductors and motormen at London, Ont., were granted an advance of ten cents a day in their wages. Teamsters at Nelson, B.C., had their hours reduced from nine to eight per day, their wages remaining \$80.00 a month.

Civic Employees.—Civic firemen (70) at Ottawa, Ont., received an advance in wages of \$50.00 per year, and were granted one day off in eight instead of one in twelve or fourteen. Civic firemen at London, Ont., received an advance of ten cents a day. Civic firemen and police constables at Peterborough, Ont., also received advances. Cement finishers at Nelson, B.C., were granted by the municipality an advance in wages from \$4.00 to \$4.50 per day.

Unskilled Labour.—Street labourers (1,800) at Montreal, Que., received an advance in wages from \$2.00 to \$2.10 per day. Street labourers (300) at Toronto, Ont., received an advance from \$2.00 to 2.25 per day. Labourers at Nelson, B.C., were granted an increase in wages from \$3.00 to \$3.20 per day and a reduction in hours from nine to eight per day.

Interruptions to Industry.

Among industrial establishments, etc., destroyed by fire or through other causes during January, 1912, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Twelve office buildings at Halifax, loss \$300,000; barn and twenty head of cattle at Lunenburg; theatre at Sydney.

New Brunswick.—Store gutted at Campbellton; business block damaged at Fredericton, loss \$5,000; barn, together with a quantity of live stock, at Stanley, loss \$3,000; and hotel at Woodstock, loss \$15,000.

Quebec.—Store and several houses at Amqui; college and two stores damaged at Farnham, loss \$110,000; convent damaged at L'Aslingan, loss \$50,000; storehouse at Limoullou; at Montreal the following fires were recorded: button factory, loss \$20,000; laundry and factory buildings, loss \$35,000; sash and door factory, loss \$25,000; lumber yard, loss \$80,000; business block, loss \$40,000; two hotels, loss \$125,000; warehouse gutted, damage \$60,000; furniture store, loss \$25,000; publishing house, loss \$30,000; business block, loss \$50,000; office building, loss \$7,000; business block, loss \$30,000; glass factory, loss \$5,000; sash and door factory, loss \$4,000; clothing store, loss \$2,500; boot and shoe store, loss \$20,000; St. Matthias church; car barns at Quebec, loss \$10,000; barn and four horses at Sherbrooke; mine hoist house at Thetford Mines; and mills and electric plant at West Stewarton.

Ontario.—Gristmill, two woolen mills, machine shop and electric light plant at Bancroft, loss \$14,000; barns and stock at Belleville, loss \$6,000; store, loss \$60,000; gas works at Cobalt; livery stable at Dresden, loss \$2,000; school at Eastwood, loss \$4,000; roller mill at Ethel, loss \$7,000; grain elevator at Goderich, loss \$50,000; general store at Golden City; business block at Hamilton, loss \$10,000; vinegar works at Hamilton, loss \$15,000; barn, grain, implements and nine cows at Harwich; construction camp at Hawke Lake, loss \$15,000; business establishment at Kenora, loss \$18,000; boot and shoe repairing establishment at Kingston; asylum at London, loss \$35,000; farm buildings at Lorne Park, loss \$12,000; boarding houses and Anglican church at Ottawa, loss \$91,000; furnishing and boot stores at Perth, loss \$8,000; barn with season's crop and eight cows at Raleigh Township, loss \$2,500; barn with implements and grain at Ridgetown, loss \$4,500; hotel at Sombra; hospital at Sudbury, loss \$50,000; factory at St. Mary's, loss \$10,000; dyeing and cleaning store at St. Thomas, loss \$15,000; school at Thanesford; at Toronto the following fires occurred: warehouses and laundry, loss \$250,000; business section, loss \$250,000; metal working establishment, loss \$15,000; two warehouses, loss \$120,000; sporting goods store, loss \$6,000; bakery, loss \$3,000; buildings and stores, loss \$23,000; business premises, loss \$8,000; opera house, laundry and grain elevator at Trenton, loss \$12,000; dry goods store at Welland; village of Westport fire swept, loss \$2,000; Methodist church at Woodstock, loss \$30,000.

Manitoba.—Experimental Farm buildings at Brandon; Canadian Northern Railway station at Dauphin; business district at Shoal Lake, loss \$25,000;

steel granary and culvert plant at St. Boniface, loss \$15,000; Trappist monastery at St. Norbert, loss \$25,000; at Winnipeg the following fires were recorded: garage and automobiles, loss \$105,000; business section, loss \$10,000; feed store, loss \$3,000; cold storage plant, loss \$100,000; furniture plant, loss \$20,000.

Saskatchewan.—Government Farm buildings at Indian Head, loss \$20,000; hotel at Luseland, loss \$25,000; lumber yard and departmental store at Regina, loss \$185,000.

Alberta.—Baking plant at Calgary, loss \$5,000; Richelieu Hotel at Edmonton, loss \$50,000; business section at Gleichen, loss \$60,500; two business blocks at McLeod, loss \$6,500; business section at Medicine Hat; hotel at St. Albert.

British Columbia.—Roller rink at Fernie, loss \$2,000; skating rink at Revelstoke, loss \$10,000; Lutheran church at Vancouver, loss \$7,000; and Provincial Jail at Victoria.

Conditions in the Industries and Trades.

Conditions of employment during January in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received from other sources, may be briefly summarized as follows:—

Agriculture.

The month was chiefly occupied by farmers in feeding their stock and marketing their produce. The prices they received were higher than in January, 1911, except for dairy produce which remained about the same. In many parts of western Canada, particularly in southern Saskatchewan a shortage of cars to move the grain was reported, resulting in a large quantity of wheat remaining unshipped. There was some improvement in the situation, however, before the end of the month.

A number of important meetings of agriculturists were held during January. The thirty-seventh annual meeting of the Dominion Grange was held at Toronto on January 23. It was stated that nearly thirty granges had been organized during the year. Resolutions were adopted in favour of a revenue tariff; government investigation of combines and mergers; taxation of the property of railways and other corporations on the same basis as other

property; local option of municipalities with regard to exemption of improvements from taxation.

The annual convention of the Western Grain Growers' Association took place at Brandon, Man., when several important addresses on agriculture were given. A course of lectures on gasoline engines was given by the International Harvester Company. Brandon was again chosen as the meeting place for the convention of 1912.

The annual convention of the United Farmers of Alberta was held at Edmonton, Alta., on January 16, 17 and 18. The elevator committee recommended that the provincial government be requested to introduce an act providing for the incorporation of the Alberta Co-operative Elevator Company with headquarters at Calgary, based as far as possible on the Saskatchewan Act incorporating the Saskatchewan Co-operative Elevator, and that the Dominion government be pressed to secure either an amendment to the grain Act or an order-in-council making Calgary an order point and a terminal point. The "hail insurance committee" recommended the collection of a uniform tax on agricultural lands for this purpose and stated that the proposal for compulsory taxation for hail insurance purposes is steadily growing in favour.

The thirty-third annual convention of the Ontario Agricultural College and Experimental Union was held at the Ontario Agricultural College at Guelph, Ont., on January 9 and 10, and was well attended.

The Sixteenth annual convention of the Nova Scotia Farmers' Association opened on January 23 at Yarmouth, N. S. Discussions took place on the question of asking the Dominion government to establish banks for farmers throughout the country as well as requesting the provincial government to take over the telephone lines and connect them for the benefit of the people.

The forty-eighth annual meeting of the Nova Scotia Fruit Growers' Association

opened on January 15th at Wolfville, N. S. At the opening session demonstrations were given on the packing of apples, and the following sessions were devoted to orchard practice and the commercial side of the fruit business.

The thirty-fifth annual convention of the Dairymen's Association of Eastern Ontario was held at Cambellford, Ont., on January 3rd. In the president's address it was stated that there were exported from Canada during the eleven months ended November 30, 1911, 1,659,261 boxes of cheese valued at \$18,067,450 and 134,600 packages of butter valued at \$1,732,360. Among the conventions held during the month were those of the Dairymen's Association of Western Ontario at Ingersoll, Ont., and the Niagara Fruit Growers' Association at St. Catharines, Ont.

The special commission on the sheep industry of Canada, appointed by the Dominion Department of Agriculture submitted its report. The following recommendations were made: the adoption of improved methods of sheep breeding; provision for wool exhibits at the most important exhibitions; the establishing of demonstration farms for sheep; the distribution of purebred sheep; co-operative summer grazing and marketing of sheep and lambs; and the enforcement of dog legislation.

The provincial government of New Brunswick is asking the co-operation of the various boards of trade in the establishment of demonstration orchards.

It was estimated by the Census and Statistics Office that the total field crops of Canada in 1911 occupied an area of 32,853,000 acres and their value at the average local market prices amounted to \$565,712,000. The area under wheat was 10,374,000 acres; oats occupied 9,220,000 acres, barley 1,404,000 acres, and flax 1,132,000.

Fishing.

Smelt fishing was reported to be good off the north shore of New Brunswick, but the fishermen of Hali-

TABLE SHOWING STATE OF EMPLOYMENT

This table is based largely on the reports of the correspondents of *The Gazette* as published in the issue of employment in the several trades and industries throughout the Dominion. The table has reference only to the phenomena treated under separate headings in *The Gazette*. In tabulating the information in question, the following conditions were favourable or unfavourable, as follows: (1) fair, active and very active; (2) quiet and very quiet.

CANADA DURING THE MONTH OF JANUARY, 1912.—*Concluded.*

present issue and is intended to present, in brief and accessible form, a generalized statement as to the state of the amount of employment prevailing, no account being taken as to wage changes, trade disputes and kindred terms employed are divided into two groups, the order indicating in each, the degree to which general conditions are quiet.

[illegible]

fax made small catches. In the early part of the month good catches of lobsters were made off Nova Scotia until heavy storms interfered with the fishing operations. At St. John, N. B. the sale of the harbour fisheries brought \$3,175.95. The following statement shows the amounts received from the sale of these fisheries during the past fourteen years:—

1898	3,713 05
1899	3,478 05
1900	4,411 30
1901	5,593 20
1902	4,692 85
1903	2,411 60
1904	3,851 05
1905	5,191 05
1906	6,058 95
1907	6,187 00
1908	4,146 10
1909	1,516 35
1910	5,180 30
1911	5,204 95
1912	3,175 95

The catch of tom cod in the St. Lawrence River at Three Rivers was poor. The herring run off Nanaimo, B. C., was disappointing but prospects improved towards the close of the month.

There was an agitation in British Columbia for government action for the extermination of sea lions on the western coast of Vancouver Island, which were reported to be working havoc among the salmon and herring.

Lumbering.

The general snowfall throughout the country gave an impetus to lumbering operations, which had been somewhat retarded in December through lack of snow. In New Brunswick fewer men than last season were in the lumber camps. Wages and the cost of teams were lower than in the previous year. The lumber and pulpwood industries in the Province of Quebec were exceptionally active during 1911 with a still better prospect for 1912. The quantity of lumber sawn in the District of Three Rivers was as follows:—

St. Maurice Lumber Company.....	17,500,000 feet
J. H. Dansereau	10,709,680 "
Grès Falls Lumber Company, Limited	9,500,000 "
Wayagamack Pulp & Paper Company,	
Limited	5,800,000 "
Burrill Lumber Company, Limited..	3,477,000 "

The quantity of pulpwood sawn was as follows:—

Grès Falls Lumber Company, Limited	36,000 cords.
St. Maurice Lumber Company, Limited	25,000 "
Wayagamack Pulp & Paper Company,	
Limited	10,400 "

In the Ottawa Valley logging operations were well under way and it was expected that the cut would be about the same as last year. The production of this district during 1911 was reported to have been about 450,000,000 feet which was about 100,000,000 feet less than in the previous year.

The British Columbia Coast lumber mills were in steady operation.

Mining.

The mining industry was fairly active throughout Canada, although operations were somewhat impeded by the cold weather. The production of coal continued steadily in the Province of Nova Scotia, Alberta and British Columbia. Active conditions continued in the Cobalt district of Ontario. The silver production for 1911 was estimated to have amounted to 32,000,000 ounces, the value of same being \$16,000,000 compared with a production in 1910 of 29,856,069 ounces, valued at \$15,375,000. According to statistics published in the Halifax Morning Chronicle the approximate values of mineral production in Nova Scotia were as follows:—

Coal	\$19,200,000
Steel	8,900,000
*Pig Iron	4,800,000
*Iron Ore	2,475,000
Coke	2,200,000
Quarry products	880,000
Gold	142,000
Clays	190,000
Mis. Scheelite, Maganese,	
etc.	100,000

Total \$38,887,500

*120,000 Nova Scotia ore, balance imported.

Mineral production in the metal mines of British Columbia continued steady. The total shipments for the first three weeks of 1912, from the Kootenay and Boundary districts were 106,512 tons and the ore smelted in

that period was 99,408 tons. During the week ended January 20, 33,552 tons were smelted.

Manufacturing.

Manufacturing establishments had a prosperous month, and were working steadily in nearly all industrial centres. In some places, the period for stock-taking was curtailed in some of the factories.

Railway Construction.

Little actual railway construction was carried on, but preparations were being made for extensive construction later on. In Winnipeg employment agents were actively engaging men for this purpose and it was estimated that about 50,000 men would be required in Western Canada for the lines which have already been projected by the principal railway companies. It was announced by the General Manager of the Grand Trunk Pacific Railway Company that this year's construction programme would involve the expenditure of \$20,000,000. It was expected that about 600 miles of branch lines would be completed by this railway during the present year. The plans included the laying of track to 185 miles easterly from Prince Rupert and also 150 miles westerly from Tete Jaune Cache. The contract for the last section from Tete Jaune Cache to Alermere, B. C., was ratified. It was hoped to link up the main line with Brandon, Moose Jaw, Calgary, Lethbridge, Prince Albert and Battleford, during the summer. It was announced also that a through passenger service would be inaugurated from Winnipeg to Regina in the spring and in the summer a passenger service would be begun from Fort William by this Company. The government of Alberta announced the construction of four new lines: one from Athabasca Landing to Fort McMurry, another from Athabasca Landing in a northwesterly direction to Peace River Crossing, a third from Edmonton to the Grande Prairie

country south of Peace River, and a fourth from Edmonton to a point near Cold Lake on the eastern boundary.

Extensive plans were announced by the Canadian Northern Railway Company for its terminals at Montreal, Que. These plans include a double-track tunnel 3.3 miles in length from a point half a mile west of the yards of the Canadian Pacific Railway Company at Outremont to Lagauchetiere St.; an under ground station on Dorchester St., and elevated tracks from the tunnel mouth to the Brennan St. tracks.

The projected lines of the Canadian Northern railway included one from St. Jerome to St. Eustache, Que., the extension of the Ottawa-Pembroke section to Port Arthur, Ont., and one from Gowganda Junction easterly to North Bay, Ont., connecting at the former point with the line from Toronto, Ont.

The following construction was announced by the Canadian Pacific Railway Company for the present year: The branch from Weyburn, Sask., to Lethbridge, Alta., would be extended about 100 miles west from Viceroy, Sask., to which point it has already been built. The branch from Swift Current, Sask., northwesterly will be extended about 85 miles from Cabri. A branch from the main line, about fifty miles west of Medicine Hat, Alta., will be built southwesterly for about thirty or forty miles into the irrigated section of southwest Alberta. The second tracking of the main line will be continued at the most congested points. Nearly 500 miles will be relaid with 85 lb. steel rails to replace rails of lighter weight. For betterments and construction, the company had appropriated over \$20,000,000.

General Transport.

The railways in western Canada had exceptionally heavy traffic and in Winnipeg great inconvenience was felt by shippers owing to the congestion of cars. The shipments of grain were

heavier than in any previous January, yet but there were still complaints of a shortage of cars at many points and a large quantity of grain still remained to be moved.

The gross earnings of the Canadian Pacific Railway Company for the month of December, 1911, amounted to \$10,654,871.67 and the working expenses \$6,549,141.41, making the net profits for the month of \$4,105,730.26, compared with net profits of \$3,286,533.89 in December, 1910.

The report of the harbour master for the port of Toronto for the year 1911 shows that 3,192 vessels arrived during the season with a registered tonnage of 1,649,887, as compared with 3,402 vessels with an aggregate tonnage of 1,582,961 in 1910.

The Trades.

Building.—The extremely cold weather which lasted during the whole of the month with slight intermission, throughout the greater part of the country, put a stop to outdoor work in the building trades to a great extent, although operations were carried on in many localities, whenever the weather permitted, a large amount of construction being under way. The indoor trades were fairly well occupied in finishing buildings. Plumbers were especially active repairing pipes, etc., which had been burst by the cold. The following is a partial statement of the number of building permits issued in Canada during January, with the estimate value they represent:

Locality.	No. of Permits.	Value.
Halifax, N.S.	16	\$ 4,135
Ottawa, Ont.	21	78,135
Hamilton, Ont.	25	144,800
Regina, Sask.	23,180

Metal and woodworking trades.—These trades were actively employed in most localities, and the month compared favourably with January, 1911.

Printing and allied trades.—The printing and allied trades were generally active, with slightly less employment than in the previous month.

Clothing trades.—Journeyman tailors and garment workers were fairly well employed. Boot and shoe workers had a good month.

Textile trades.—Cotton and woollen mills and carpet factories produced steadily.

Food and tobacco preparation.—Bakers and confectioners were well employed. Butchers had a fairly good month. Cigar makers and tobacco workers had steady employment.

Leather trades.—Tanners, curriers and leather workers had a fair month, though quiet in a few localities.

Miscellaneous trades.—Barbers, hotel and restaurant employes, and laundry workers were actively employed. Retail clerks had a good month, which compared favourably with January, 1911.

Unskilled labour.—January was a quieter month for unskilled labour than was December, but there was more employment than in January, 1911. While there was a cessation of much outdoor work such as municipal improvements and building, many labourers found employment in removing snow and cutting ice. In one or two localities the factories absorbed most of the unskilled labour. There was generally less unemployment than usual in January.

Canadian Trade and Revenue.

Imperial and foreign trade.—During December, 1911, there was an increase of \$8,726,110 in the total value of imports entered for consumption into the Dominion of Canada, over the corresponding month of 1910. During the first nine months of the fiscal year, ending December 31, 1911, there was an increase of \$50,948,301 over the corresponding period of 1910. The total value of domestic exports during December, 1911, showed an increase of \$2,764,272

over December, 1910. The total value of domestic exports during the first nine months of the fiscal year, ending December 31, showed an increase of \$5,130,263 over the corresponding period of 1910. During December there were increases in the exports of agricultural

and fisheries products, and decreases in the exports of the products of mines, forests, animals and their produce, manufactures, and miscellaneous merchandise. The accompanying table contains the latest official summary of Canadian foreign trade:—

Canadian Trade, December, 1911.

TOTAL IMPORTS ENTERED FOR CONSUMPTION IN THE DOMINION OF CANADA,

	ENTERED FOR CONSUMPTION.			
	Month of December		9 Months ending Dec.	
	1910	1911	1910	1911

In the reports of the Trade Commissioners and Commercial Agents of the Department of Trade and Commerce attention is called to certain proposed

changes in the Australian Customs Tariff, a Bill for which had already passed the House of representatives of the Commonwealth. These changes in-

volve largely increased duties on motor car bodies and a readjustment of the duties on timber.

Domestic trades. — After the usual lull at the beginning of the year for purposes of stock-taking, activity was resumed, and the month on the whole was very favorable for both wholesale and retail trades. Collections were fairly well met, except in Northwest Provinces where they were slow owing to the late marketing of the crops, though wholesalers received satisfactory orders for spring goods. According to R. G. Dun & Company, business failures in Canada during January numbered 144, involving \$1,208,367 of indebtedness, as against 143 suspensions with indebtedness of \$1,003,471 in 1911. Commercial suspensions in the Dominion of Canada in 1911, according to the same authority, were 1,332, with liabilities of \$13,491,196, compared with 1,262 suspensions with liabilities of \$14,514,650, in 1910.

The bank statement for December showed an increase of \$522,046, in paid up capital over the previous month, the total at the end of December being \$107,994,604. Notes in circulation amounted to a value of \$102,037,305, an increase of \$94,249 over the previous month. Deposits in Canada, payable on demand amounted to \$335,020,693, a decrease of \$6,691,572, and current loans in Canada to \$774,909,172, an increase of \$4,552,753 compared with the previous month.

The following are the returns from Canadian Clearing Houses for the month of January, 1912:—

Halifax	\$ 8,747,945
St. John	6,918,209
Quebec	11,631,964
Montreal	207,216,549
Ottawa	22,028,048
Toronto	175,019,996
Hamilton	12,670,922
Brantford	3,178,805
London	6,904,546
Fort William	2,425,250
Winnipeg	110,993,506
Brandon	2,498,257
Regina	7,860,842
Moose Jaw	3,979,906
Saskatoon	7,010,084
Calgary	18,599,428
Edmonton	14,328,480

Lethbridge	2,669,025
Vancouver	48,371,226
Victoria	11,902,519

A number of important banks of Canada issued their annual statements during the month, all of which showed satisfactory returns for the year. The Traders Bank of Canada reported profits of \$601,134, compared with \$524,351 in the previous year, an increase of \$3,899,804 in deposits, and an increase of over \$5,000,000 in total assets. The net profits of the Northern Crown Bank amounted to \$285,694, an increase of \$27,550 over the previous year, and 12.94 per cent. of the paid up capital. The Bank of New Brunswick showed profits of \$147,622, against \$142,180 in the previous year. In the course of the year the bank's capital was increased by over a million dollars. The Bank of Vancouver in the first whole year of its existence reported profits amounting to \$20,360.60. The paid up capital was increased from 334,950 to 749,608, and fourteen new branches were opened during the year. The Provincial Bank of Canada showed profits amounting to \$184,398, compared with \$149,082 during 1910. The reserve fund was increased by \$75,000, and a special contingent fund was established with an initial appropriation of \$25,000.

Canadian Revenue.—Canadian revenue for the month of December, 1911, amounted to \$11,596,099.29, compared with 9,790,387.14 in December, 1910. The total revenue from April 1 to December 31 amounted to \$99,482,947.96, compared with \$85,665, 833.83 in the corresponding period of 1910. The total expenditure on capital account during December, 1911, was \$3,148,159.43, as against \$3,680,305.47 in December, 1910. The total expenditure on capital account from April 1 to December 31, 1911, was \$18,983,354.25, compared with an expenditure of \$22,804,247.33 in the corresponding period of 1910. The items of expenditure during December, 1911, comprised \$18,591,713.70 on public works, including railways and canals: and \$391,640.55 on railway subsidies.

Notes.

The output of the Nova Scotia Steel and Coal Company, in tons, during 1911, compared with the previous year, was as follows:—

	1910.	1911.
Coke made	90,360	47,971
Pig iron	66,000	84,166
Steel ingots	75,000	84,503
Billets cogged	59,000	78,389
Bars and plates rolled	49,000	58,382
Shipments of finished material,		

ingots, steel bars, plates
and forgings 30,200 69,800

* * *

It was announced that a sub-committee of the Executive of the Toronto branch of the Canadian Manufacturers' Association was engaged in conjunction with representatives of other business organizations, in devising ways and means for ensuring a solution of the housing problem for factory employees in Toronto.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST.

THE twenty-third Annual Report of the Employees' Relief Fund of the Nova Scotia Steel and Coal Company, Limited, for the year 1911, showed total receipts of \$8,489.89, including a balance on hand at the beginning of the year of \$5,821.91. The expenditure amounted to \$7,375.10, leaving a balance of \$1,123.79 at the end of the year. The sum of \$3,741.67 was paid to 230 members on account of sickness; \$1,056.53 to 70 members on account of accident; \$132.50 to fourteen members on account of contagious diseases; \$880.00 for eight death claims and \$1,401.25 for insurance; \$13.00 to two widows and \$22.00 to four children, making a total indemnity of \$7,146.95. The receipts included \$3,401.95 contributed by members, an equal sum contributed by the Nova Scotia Steel and Coal Company, \$1,401.24 assessment for insurance; and \$293.74 interest.

Strike of Car Repairers Averted.

On January 17th a communication was received at the Department of Labour, stating that a strike of car repairers employed by the Pere Marquette Railway Company at St. Thomas, Ont., was imminent because of the threatened introduction of a piece-work system in the car department. Mr. J. D. McNiven, Fair Wages Officer of the Department, was immediately instructed to proceed to St. Thomas, confer with the parties con-

cerned, and report on the nature of the dispute for the Minister's information. The report of the officer confirmed the information received. It appears that the company desired to change the system in the car department at St. Thomas from day-work to piece-work, which is the system prevailing in all other shops on the Pere Marquette Railway. It was claimed that the change would not involve a reduction in wages. The rates paid at St. Thomas at the present are as follows: Freight car carpenters, 20½ cents per hour; car repairers, 17 cents per hour; coach carpenters, 22½ cents per hour; foreman coach carpenter, 24 cents per hour; carpenters in mill, 24 cents per hour; air brake men, 20½ cents per hour; painters, 20 cents per hour; car inspectors, 17 cents per hour. The hours of labour are 10 per day, except in the case of car inspectors, which are 12. On behalf of the employees it was claimed that the change would result in reduced wages, and they had unanimously resolved not to accept the proposition in the form in which it was presented to them. They further claimed that according to the terms of the agreement under which they were working that no changes could be made until 30 days' notice had been given. The matter was at once taken up by the Department of Labour and made the subject of correspondence with the officials of the company at Detroit, Mich. While the result of this

correspondence was pending the shop foreman at St. Thomas posted a notice on the 31st ultimo that the piece-work system would go into effect on the following day. The men sent a committee to interview the foreman. In the meantime the Master Car Builder having arrived from Detroit, a conference was arranged for the afternoon of the 1st inst., when it was agreed that the enforcement of the piece-work system would be deferred for 30 days, notice to that effect being served on the employees. This was considered satisfactory by the men, and there is ground for believing that before the expiration of this time that the difficulty will be amicably arranged.

Free Employment Bureau at Quebec.

The following statement is based on a return supplied by the Free Employment Bureau of Quebec, which was established by the Provincial Government of Quebec, and relates to the operations of the bureau during the month of January, 1912.

	Male.	Female.	Total.
No. of employees wanted by employers	28	37	55
No. of applicants for situations..	47	17	64
No. of situations offered	33	11	44

Of the applicants for situations ten were under the age of sixteen years. Twenty-eight male and eleven female applicants had dependents.

Coal Company's Benefit Fund.

As a result of the passing of the Workmen's Compensation Act in Nova Scotia, which came into force on February 1, 1911, the various employees' relief societies existing at the larger collieries in Cape Breton and elsewhere under the control of the Dominion Coal Company were consolidated. The company and the workmen doubled the amount of their contributions, and the scale of indemnities were increas-

ed. During the eighteen months the society has been in existence its operations have been attended with success, the surplus on hand amounting to \$134,606.04. The second annual report of the society covering the year ended December 31, 1911 is as follows:—

Your Directors beg to submit their report for the year ending 31st December, 1911.

On 31st December, 1910, the Society had 6,712 members; at the close of 1911 the members numbered 10,045, showing an increase of 3,333. Of this increase Springhill Branch contributed 1,355.

The receipts of the year amounted to \$115,287.30, of which \$51,217.80 were received from members, \$50,495.35 by the Company, \$9,498.35 by the government, and \$4,075.80 from interest.

The expenditure amounted to \$78,530.41, leaving a surplus of \$36,756.89. During the year we undertook liabilities amounting to \$40,274.00, and we paid on account of accrued liabilities \$17,850.45.

The number of deaths were 61, this placed on the funds 36 widows and 70 children. On the 31st December, 1910, there were 36 widows and 199 children on the fund. At 31st December, 1911, there were 54 widows and 233 children, an increase of 18 widows and 39 children.

During the year the workmen at Springhill became eligible for membership in the Society, and on 2nd July, 1911, a branch was organized there. The Employees' Relief Funds then in existence agreed to pass over all funds to the Society, amounting to \$6,392.78, we assuming all liabilities, which amounted to \$319.00.

During the year ending 31st Dec., 1911:

Number of claims paid	4,862
Number of persons paid indemnity	1,810
Number of widows paid	72
Number of children paid	269

The accounts for the year are submitted herewith. They have been duly audited as required by the By-laws.

Commission on Cost of Living.

In view of the high and increasing cost of living throughout the world a movement has been undertaken looking to the establishment of an international commission to investigate the causes and to report on possible remedies for the recent rapid advance in prices. The proposal, which was brought forward by Professor Irving Fisher of Yale University and endorsed by over one hundred leading economists and heads of business corporations throughout the world, is that the government of the United States should take the initiative in the movement and invite other nations to designate members to the commission in question. Resolutions favouring the suggestion

have been passed by the New York and Philadelphia Chambers of Commerce and other bodies as well as by the American Economic Association which met in Washington during December. More recently a Bill has been introduced in the Senate of the United States to authorize the president to appoint three commissioners from among the leading economists and statisticians of the United States and devoting the sum of \$100,000 for the purposes of the investigation. The latter is to take cognizance of recent changes in wages, cost of living, and prices generally throughout the world on a comparative basis.

Phosphorus Poisoning.

A Bill to prohibit the use of poisonous phosphorous in the manufacture of matches has been introduced in the House of Representatives of the United States. The measure is backed by the American Association for Labour Legislation, which estimates that the use of a substitute for phosphorous could entail an annual additional expense of only one cent for each match per.

Cost of Living at Victoria, B.C.

Some four months ago the city council of Victoria, B.C., appointed a committee of three women to enquire into the high cost of living. The report of the committee has been published for general circulation during the past month. The committee carried out a careful comparison between the cost of living in the neighboring cities of Vancouver, Nanaimo and Seattle. The enquiry as to prices were restricted to the main staple commodities, including groceries, meats, milk, fruit, light, fuel, rents, wages, taxes and interest. Several very interesting and valuable facts were elucidated in the report. In the opinion of the committee the subject has been fairly met and dealt with only

affect the social efficiency and well-being of the people as a whole.

2nd. By the inauguration of a government system of adjustment, beginning at the root of the evil and preventing the obtaining and holding of land for speculation, and affording a freer use of the land for bona fide purposes. So that through every department of production, manufacture, cost of labour and distribution, up to the final matter of consumption, such adjustment will assure a generous living to all who are industriously deserving.

Its recommendation is as follows:

As a practical outcome of this inquiry, your committee would respectfully recommend that your Honourable Body the Mayor and Board of Aldermen of the City of Victoria inaugurate a movement through the British Columbia Union of Municipalities, and through the Dominion Municipal Union, memorializing the Provincial Governments, and the Dominion Government individually and collectively to take action along the line suggested, so that the issue may be met, that Canada as a nation may avoid the social and economic unrest experienced by older nations, with all its baneful effects upon the prosperity and the peace and happiness of its people.

Montreal Builders' Exchange.

The annual meeting of the Montreal Builders' Exchange was held on January 22. In the report of the secretary reference was made to a new building code which is proposed for Montreal by which three districts will be established with graded restrictions, one of which will be an absolutely fireproof business section. The erection of water tanks on direct foundations will be compulsory and the building inspector's staff will be increased by ten. Reference was also made to the tariff on American building stone and it was claimed that the American duty against Canadian sawn or dressed stone is 50 per cent. whereas the Canadian duty is only 20 per cent. of the value at the quarry, with the result that about \$600,000 worth of Indiana and Ohio limestone is imported into Canada sawn and dressed and ready for building. The following officers were elected for the ensuing year:—

President.—(re-elected), Mr. James Ballantyne.

Vice-President — (re-elected), Mr. Joseph Brunet.

2nd Vice-President. — Mr. Thomas Gilday.

Directors.—Master Carpenters, Mr. Frank Pauze; concrete contractors, Mr. K. D. Church; electrical contractors,

Mr. E. W. Sawyer; general and mason contractors, Mr. John Allan; cut stone and brick contractors, Mr. John Quinlan; master painters, Mr. W. E. Potter; master plumbers, Mr. J. R. Meadowcroft; master roofers, Mr. F. H. Barwick; lumber and mill work, Mr. William Rutherford; brick contractors and quarry supplies, Mr. T. A. Morrison; cement and builders' supplies, Mr. Alex. Bremner.

Upon representations on behalf of the Lathers' and Plasterers' Unions a resolution was adopted by the Toronto Board of Education on January 17, to the effect that a clause be inserted in all future contracts specifying that contractors shall not be allowed to sublet work without the consent of the Board, and that at the time of the paying of progress certificates they shall be called upon to make a declaration that they have paid the union or prevailing rate of wages.

Wages and Board in British Columbia.

During January the following question was asked in the Legislature of British Columbia with reference to conditions prevailing in railway construction employment in that province:—

Mr. Williams asked the Hon. the Minister of Railways the following questions:—

1. What number of workmen are employed on construction of the Canadian Northern Railway: (a) On Mainland of British Columbia? (b) On Vancouver Island?
2. What rates of wages are paid on each section respectively?
3. What rates are charged for board on the said work?

The Hon. the Minister of Railways replied as follows:—

"1. (a) 5,644, average during month of December, 1911; (b) 351, average during month of December.

"2. On Mainland—Foremen, \$4 to \$6 per day; blacksmiths, \$90 per month and board; carpenters, \$3.50 to \$4.50 per day; shovel engineers, \$150 per month and board; firemen, \$75 per month and board; cranesmen, \$100 per month and board; bridgemen, \$4 per day; axemen, \$2.75 per day;

labourers, \$2.75 per day. On Vancouver Island Foremen on grades, \$3.25 to \$5 per day; axemen, \$2.75 to \$3 per day; rock-drillers, \$2.75 per day; labourers, \$2.50 per day; bridge foremen, \$150 month and board; bridge carpenters, \$3 to \$4.50 per day; team and teamster, \$7 per day; teamsters, \$50 per month and board; blacksmiths, \$90 per month.

"3. On Mainland—\$6 per week. On Vancouver Island—25 cents per meal and \$5.25 per week with bunk-house accommodation."

Brotherhood of Locomotive Trainmen.

The members of the Dominion Legislative Board of the Brotherhood of Railway Trainmen met in convention at Ottawa on January 17th, continuing in session until the 20th. Masters' reports to various railroads were discussed, but no report of proceedings was made public. On the morning of Saturday, the closing day of the convention, the members of the convention listened to a short address from Honourable T. W. Crothers, Minister of Labour, who had by invitation attended for that purpose.

Saskatchewan Legislature.

The fourth session of the second legislature of the Province of Saskatchewan was opened at Regina on January 25. In the Speech from the Throne reference was made to The Saskatchewan Co-operative Elevator Company, which was created by an Act passed at the previous session. It was stated that elevators have been purchased by the company and thirty-nine others constructed, by which means facilities were furnished for handling 1,210,000 bushels of grain. It was announced that the Government had practically completed arrangements, in conjunction with three great railway companies operating in the province, for a careful examination into the feasibility and of diverting the water of the south branch of the Saskatchewan river for purposes of irrigation. The matter was brought before the House by proposals to cope with the lack of experienced farm labourers and domestic servants on a more comprehensive basis than before, a measure to protect

farmers from loss through hail storms, measures for providing transportation facilities in localities that are in need of them, and bills for the greater regulation of insurance companies, to empower rural municipal organizations to purchase and distribute seed grain, and for the control of motor vehicles.

Quebec Legislature.

The Fourth Session of the Twelfth Parliament of the Province of Quebec was opened on January 9. In the Speech from the Throne, it was announced that in order to open up the vast areas of arable land in the north-west part of the province the Colonization Department had already begun the construction of a main artery in the Temiscamingue region, and proposed to begin opening a road about one hundred and ten miles long in Abitibi next spring, along which road free grants would be given. In order to connect this district with the consuming and

distributing centres, the construction of new railways through the north of the province would be urged. A considerable appropriation would be requested in order to aid municipalities which borrow money to improve their roads. Attention was called to the work of the cheese-makers' co-operative syndicate, and to the success of the Department of Agriculture in encouraging the growing of clover and fruit trees.

With reference to education it was stated that increased appropriations would be requested, especially for the encouragement of primary instruction and for increasing the salaries of lady teachers. An amendment would be submitted to enable school boards to supply text books to all children attending the schools under their control. Attention was called to the opening of the technical schools in Quebec and Montreal.

Among other matters of legislation, bills would be introduced respecting the electoral system, civil procedure, and hours of labour in textile factories.

NOVA SCOTIA.

Sydney.

Labour conditions, while not so active as during December, were just as active as in January, 1911. The severe weather of the first half of the month affected the coal trade and also the building trades. The Sydney ferry service was tied up on the 12th of the month but the Intercolonial Railway immediately put on passenger train between Sydney, North Sydney and Sydney Mines. The general trend of the other large industries was one of continued activity and the prospects are good for the part of the winter yet to come. All the large industries of the district are looking forward to increased outputs for the present year. Outside labour, plumbers and other classes, were furnished with considerable employment through the heavy snow-storms and severe frost of the early part of the month.

The Nova Scotia Steel plant had a active month and all departments with the exception of the collieries were in continuous operation. A few idle days occurred at some of the collieries but the latter part of the month showed improvement. It is the intention of the Company to develop its under-served areas. In order to reach these areas which underly Sydney harbour, a long haulage way will be constructed underground. This work will begin some time in March.

The Dominion Collieries, owing to damages sustained by their new ship "Lingan", which was caught in a heavy storm, and also to weather conditions, had considerable broken time in the early part of the month, but e

ditions improved during the last two weeks. Prospects for the coming part of the winter and of the year are said to be as good, if not better than, in 1911.

The output of the Dominion Collieries for 1911 was 3,984,749 tons, being an increase over 1910 of 457,995 tons. It shows an increase of 434,681 tons over the output of 1906, which was the largest record output of this Company.

Underground development work is well ahead at most of the collieries, so that the Company will be ready to take advantage of shipping as soon as the season opens. Large coal heaps are rapidly rising at some of the collieries. Coal is also being placed in the heaps at the Sydney steel plant.

The Sydney steel works had a busy month in most of the departments. Four blast furnaces were in continuous operation and a fifth furnace will be blown in some time in February. The intention of the Company is to have four blast furnaces in continuous operation during the year. In the Autumn, the sixth furnace now under construction will become a producer. With all the other extensions and improvements that were added and are still being made, the Sydney steel plant by the end of 1912 will be twice as large as it was two or three years ago, and will have more than double the capacity for producing and finishing steel products to supply the market it has rapidly acquired.

Heavy shipments of rails were sent out during the month. The nail mill is nearly all closed in and the machinery which is now on the ground will be set up as rapidly as possible. Other construction work, which was held back owing to a delay in the transportation of material, is now being rapidly completed. Transportation by rail was heavy. Wood factories and foundries and other works were fairly busy. The wholesale and retail trades had a fairly good month.

Westville.

Active conditions continued in all branches of industry except those gov-

erned by the weather. The collieries were working steadily and there was a ready market for the output. A number of wood tenements were being erected and building contractors took advantage of any favourable weather to push their work. The Acadia Coal Company has called for tenders for the erection of fifty double tenement houses to be built chiefly in the Ashfelt and Stellarton district. Some of the farmers were busy with their teams hauling timber chiefly for the collieries. There was activity in lumbering and with favourable weather a good cut is anticipated. The manufacturing industries had a good month and the outlook is bright for a continuance of activity throughout the district.

Halifax.

Industrially speaking, the past month has not been as active as the previous one, but business generally showed more activity than in January, 1911. While very few permits were issued only about twelve, for a valuation of \$2,895, being issued up to the fourth week, a fair amount of work was done on interior operations. On the morning of the 12th January a disastrous fire broke out in the centre of the business district which destroyed some twelve buildings, and aggregating a loss of almost \$300,000. The principal building destroyed was the "Herald" and "Mail" office, which, with its contents (valued at \$175,000), including type-setting machines and modern presses, was totally destroyed, throwing a large staff of hands out of work. Besides the printing plant, some twenty tenants of offices were burned out, and most of their valuables destroyed. Cragg Bros., hardware dealers and metal workers, were also burned out, throwing a staff of hands out, and entailing a loss of about \$50,000. The rebuilding of this district, which will be commenced just as soon as plans can be prepared and climatic conditions permit, will give the building trade a big boom. The contract has practically been awarded

for a new "Herald-Mail" building which is to be completed early in the summer, and will consist of a steel and reinforced concrete structure, up to date in every respect, for the erection of which 100,000 tons of steel have already been ordered.

The Nova Scotia Car Works report much activity, and now employ about 600 hands. They have received orders to build two hundred steel underframe gondola cars for the Canadian Pacific Railway and as they have completed the erecting of their steel underframe erecting shed, this order will be rushed through to enable them to be ready to complete other contracts.

Work along the waterfront has not been as busy as might have been expected; nevertheless considerable activity prevailed, and a busy season is anticipated. On the city work the fortnightly pay roll for January 5 to 19 being \$2,570.85. Local fishermen made few catches. Manufacturing was well maintained, with better prospects.

Truro.—The short course classes at the Nova Scotia Agricultural College opened early in January with 304 students (including 23 ladies), the largest number in the history of the institution, and with prospects of this number being augmented by about fifty.

Antigonish.—The annual meeting of the Farmers' Association was convened on January 11. The attendance was not large owing to the severe weather. Many matters of importance were discussed, and Mr. Ritch, of the Agricultural Department, Ottawa, gave an excellent address on sheep raising, and at the close answered several questions asked by the audience. The Association will hold the annual fair and seed fair this year.

PRINCE EDWARD ISLAND.

Charlottetown.

A very considerable decline took place in the demand for labour, especially in connection with building

operations. Work on all buildings under construction ceased with the setting in of the cold winter weather, and as a consequence carpenters, mason bricklayers and plasterers were for the most part unemployed. This was also true in a large measure of unskilled labour.

In several lines of mechanical industry, however, activity prevailed. This is particularly true of iron and metal working. In the foundry and machine shops business was quite as active as in the previous month, the same number of hands being employed, and the same rate of wages paid. In the blacksmith's shops, too, business was quite good, particularly so of horseshoeing.

Tobacco manufacturers were fully busy in January as they had been in December. The output of manufactured tobacco was quite equal to that of the previous month; the hands employed being practically the same, and the payroll undergoing no diminution.

The printing business was good, and printers were in demand; no competent mechanic in this line desiring work being obliged to remain idle.

Our one shoe factory was a little less active in its operations in January than in December, although the output was not materially reduced.

The lumber business on the whole was quiet. Little or no stock was handled outside at our lumber yards but those having planing mills and kindred woodworking departments did good business in these inside operations. The staff of artisans employed in the was not reduced, and the wages remained stationary.

In the offices and mechanical departments of the Prince Edward Island Railway all were busy. In the machine shops, the car shops, and the various mechanical, freight and other departments of the system the permanent staff of skilled and unskilled labour underwent no diminution. The number of unskilled labourers of the temporary class was not as large as in December. Wages were the same.

NEW BRUNSWICK.

Moncton.

Labour conditions were quiet and easy, differing but little from those existing in December, and about up to the standard of the corresponding month of 1911. Building operations were slack, being confined to interior work upon unfinished contracts. About 100 men are employed in the new cell the Government general offices, the work being well advanced. As fully twenty-five per cent. of the resident work people are virtually permanent employees either of the railway or of the other various industrial and commercial establishments in the city, all of which are at present in active operation, with the usual complement of operatives, the proportion of labour affected by the illness incidental to winter is thus not very great, and but few unemployed are found. The Board of School Trustees are asking for Legislative authority to issue debentures to the amount of \$1,000,000 for the purchase of additional school grounds and additions to school buildings. The school estimates for 1912 amount to \$41,138.00, as compared with \$37,536.00 in 1911. Customs returns for the Port of Moncton show exports \$62,120.00, and duty \$8,664.00 ending December, as compared with imports \$55,046.00, and duty \$4,133.00 in the corresponding month of the previous year. The value of exports from various Moncton outports during the year 1911 amounted to \$465,719.00 against \$505,583 for the year 1910, a decrease of about \$39,866. Gypsum shipments from Hillsboro showed considerable decrease. Wholesale trade continues in a healthy state. Retail trade had an average month. Bank collections were fair. Real estate was quiet and firm.

The farmers' work has been limited to the caring of stock and the getting of fuel and fencing. The fourth Annual Exhibition of the Westmorland Poultry and Poultry Association was held

in this city on January 10-13, and was very successful, the entries totalling 1,250, being an increase of 25% over any previous year. To encourage the culture of apples the Provincial Government is asking the co-operation of the various Boards of Trade in the establishment of demonstration orchards. Smelt fishing is in progress along the north shore, and very good catches are reported. Little lumbering is in progress locally, but near Sackville and in Albert County lumbering operations are being carried on. Weather conditions and roads have been favourable.

St. John.

The labour market was dull, with the exception of shiplabourers, and they are not steadily employed. The outlook for next summer in the building trades looks promising, and if all the work spoken of will materialize mechanics will have a busy season. There is a great deal of activity in the real estate business, and rumours of several large deals are prevalent. Up to January 27 there were filed at the Custom House cargoes for thirty-four steamships, which took away Canadian goods valued at \$5,000,826, and foreign goods valued at \$4,072,580, making a total valuation of \$9,073,406. For the same number of vessels last year the value of Canadian goods was \$4,793,829, and of foreign goods \$1,945,260, a total of \$6,748,089. These figures show an increase of \$2,325,317.

The harbour fisheries were sold at auction on January 2 and 9. The total amount received from the sale this year was \$3,175.95, while last year they sold for \$5,204.55.

The following is a statement of the total shipments of lumber from New Brunswick to transatlantic ports for 1911, compared with the last preceding three years:—

Year.	No. of Vessels	Tons	Decks, etc., Sup. Feet.
1908	296	720,801	306,445,056
1909	339	822,272	325,213,658
1910	344	847,845	327,519,421
1911	287	723,443	285,981,379

Fredericton.

Labour conditions in this district continued to be fairly good, there being fewer unemployed than is generally the case at this season of the year. Ice cutting commenced and gave work to a considerable number of men, while several survey parties for two railroads to be constructed in the spring also contributed to lessen the ranks of the idle. Manufacturing establishments were generally busy, with many orders ahead and every prospect of a continuance of activity for some time. The Hartt Boot and Shoe Company especially has been doing a large business, its output in January creating a new high record. Shipments of carload lots to the western provinces are of weekly occurrence, and more labour could be used were it available. As it is the men are working overtime in endeavor to catch up to orders. Commercial men were well pleased with trade conditions and were looking forward to a most prosperous year. The only manufacturing establishment which reduced the hours of labour this winter is the Risteen woodworking factory, which is now working nine hours instead of the usual ten, with a proportionate decrease in the rate of daily wages.

The farmers as usual at this time of the year have had a quiet time, many of those in the vicinity of the city engaging in wood cutting, for which they find a profitable market. Fruit raising is receiving a great impetus in this district, and many farmers have ordered additional trees to be set out in the spring, the climate and soil being peculiarly adapted to apple culture. Poultry raising is also being engaged in more extensively, and a poultry show will be held here in a few weeks.

Conditions in the lumber camps are much the same as last month. The men engaged, while fewer in number than last season, are still at work. A good fall of snow has tended to expedite operations. In the coal mining district the output is rather larger than usual. Railroad construction has been stopped

during the cold weather, but will start with renewed energy with the opening of spring.

Newcastle.

Labour was pretty generally employed, chiefly in lumber camps in surrounding district. The supply of labour was equal to the demand. In the previous month and the corresponding month of last year were very similar.

Navigation was closed, but there was the usual amount of freight shipment for the winter season. There was the average volume of wholesale and retail trade.

Bass fishing was good, but smelt fishing was poor.

QUEBEC.**Quebec.**

The month has been one of severe cold weather, and heavy snowstorms the effect of these conditions being to stop outside work. The most noticeable stoppage occasioned was in the Great Northern R. R. shops. Snow-shovelling and ice-harvesting gave employment to a number of men. The month upon the whole may be classed as a quiet one. The contract for a new 40-inch water main for the city has been granted, the amount of tender being \$716,799.

The Provincial Exhibition of seed grain under the auspices of the Department of Agriculture of Quebec with the co-operation of the Federal Department of Agriculture of Ottawa, was held in the Drill Hall Jan. 24-25-26, and a large number of farmers were present. In the lumbering industry the camps are all working; so far there has not been too much snow to retard logging.

Three Rivers.

The labour market was fairly active during January, although bricklayers and masons had to suspend work part of the month on account of excessive cold weather. Machinists and all those employed in factories have been working

full time. The prospects are that the orders now in hand will keep the establishments running full time until the Spring.

Wholesalers and retailers had a fairly active month.

Farmers were busy carrying farm products to the market and were receiving good and steady prices for them. Although it was the tommy cod fishseason, the catches were smaller than last year. Lumbering was active. Conditions were favourable in the woods, the snowfall being sufficient.

Sherbrooke.

Outside labour was practically at a standstill owing to the extremely cold weather. Many of the buildings under construction were far enough advanced, however, to allow the interior work to be carried on without any inconvenience. The show which fell during the month, was a great boon to the lumber industry.

The machine shops and other industries were running to their full capacity, and extra help would have been taken on in the machine shops had there been accommodation for them.

Two by-laws will be submitted to the ratepayers on February 6, one for the purpose of granting a loan of \$100,000 for ten years to the Jenckes Machine Company in return for doubling their plant, and employing not less than 650 hands and the other for the purpose of purchasing a site for the Canadian Brakeshoe Company.

The Sherbrooke Iron Works will erect a new plant, and expect to employ in three years from 65 to 75 hands. The company has contracted for 100 electric horse power from the city at \$15 per horse power.

The annual financial statements of the municipality for 1911 showed a deficit of about \$2,000. There were large profits however in the electric and gas and water departments, now controlled by the city. In the electric department there were a clear surplus of \$15,662.32 after providing for all fixed charges,

etc. The new plant installed by the city at a cost of \$175,000 has just been started. It is estimated that if the proposed new industries receiving the support of the ratepayers the city will have three customers which will pay the city between \$18,000 to \$20,000.

The Canadian Pacific Railway has decided to make Sherbrooke a divisional point, and to move the one at present at Lake Megantic farther east.

A Citizen's League has been formed for the purpose of looking better after the welfare of the city.

Agriculture work is at a standstill. During the month the various agricultural societies held their annual meetings in the Eastern Townships, and all reported that the past season had been a good one.

Lumbermen were handicapped until the first of January owing to the lack of snow. Now that there is sufficient work is being rushed in order to make up for the time lost. Manufacturing industries are busy, and the woollen mills are advertising for extra help. Outside running operations are quiet although the mills at the asbestos properties are still running.

Farnham.—The farmers are shipping great quantities of hay and there is a great demand for the article here, notwithstanding the bad roads and cold weather.

Waterloo.—Work on the additions and improvements to the Roxton Mill and Chair Manufacturing Company's factory here, is being rushed to completion.

Graniteville.—Owing to the severe cold weather the quarries have been closed for a week.

Scotstown.—The Scotstown saw mills are now running over time, having to work each evening on account of rush orders.

St. Hyacinthe.

The general condition of the labour market, from an industrial point of view, was good during January and com-

pared favourably with that of the corresponding month a year ago. All the local industries had an active month, some receiving twice as many orders as the month before. The building trades were quiet, all the work on hand being completed with the exception of the Normal School and the cathedral.

Business, wholesale and retail, was fair during January, the snow and winter weather giving renewed activity to all the lines. Banks reported a good month with easy collections. There was no change in the rates of wages or hours of labour. Relations between employers and employees were cordial. Farm products were in abundance on the market, and prices remained high. Work on the farm was limited to hauling wood and marketing products. Employment was quiet, with supply amply sufficient to meet the demand.

Sorel.

Labour generally was well employed and there was a demand for good men in certain shops, where good wages were offered. In the Government shops in Sorel work was pushed forward as in the previous months. Owing to the fact that there was little snow, outside work was continued almost the whole month.

As a rule in the whole district of Richelieu the condition of labour was very fair and compared favourably with that of the same month last year. No complaints were heard as to the difficulty of getting employment.

The local industries are doing well, and some of them have been more active than in the previous year. The Bauchemin & Son's Steel Works, which have been considerably enlarged and are now employing some two hundred men, were in full blast.

The local trade suffered somewhat on account of the absence of ice on the St. Lawrence River at the beginning of the month, but it has been generally satisfactory.

Montreal.

There has been very general activity for labour all through January. The building trades are, of course, practically at a standstill, and the iron trades are rather quiet; but in most lines there is more activity than in the previous month, while conditions all round are better than at this time a year ago. Only in unskilled labour is the supply markedly in excess of the demand.

Manufacturing in most lines has been active and some important extensions to industrial establishments are planned in the city and district.

Exceptional activity is reported in the printing trades, with a considerably greater volume of work than is usual at this time of the year. Railway and transport men have been working to the limit of their capacity (with, of course, the exception of the steamboat and wharf men). The pulp mills, having their head offices in Montreal though situated elsewhere in Quebec Province, have been working to their utmost capacity, and are all adding to their output, whenever this is possible. Car and waggon builders and other allied in this line are exceptionally busy, and a big year is declared to be assured.

The only changes of wages of any note announced is an increase in the pay of the corporation labourers of the city of Montreal, about 1,800 in number, who, beginning January 1st, are to be paid \$2.10 per day instead of \$2.00 per day as formerly.

There was general quiet in the labour world. Only one strike took place during the month, and that a small one. Thirty-two heaters, earning \$8 to \$9 a day, went out when the Canada Steel Company reduced their wages ten per cent., and for a week part of the Montreal Rolling Mills establishment was closed down, and one hundred and seventy other men were thrown idle. Other heaters were engaged and work resumed after six days' idleness.

There is an all-round increase in the cost of living to be reported for the month, and this is the subject of general

complaint among wage-earning people in the city and district. Potatoes, butter and eggs are the commodities chiefly complained of in regard to price. The potato situation is becoming serious. City people are of opinion that the farmers, dairymen and poultry raisers are not alive to their own interests in not vastly increasing their production. For instance, although Montreal is surrounded by a rich agricultural section, potatoes have at present to be brought in from New Brunswick and the State of Vermont. Regarding the cause of the general rise in prices, merchants and dealers give varying explanations. Some say the commodities are scarce; so let the farmers produce more; others say the farmers' labour costs them more, so they now demand more for their products; and others explain that city rents have gone up to such an extent that higher prices must be charged. Workingmen claim that there are too many middlemen and non-producers coming in for a share. Whatever the cause, the cost of living is universally declared to be unreasonably high.

Market gardening and poultry raising are rapidly becoming extinct industries around Montreal, following the cutting up of farm lands for building purposes and real estate exploitation. Considerable rich land is still available, however, but men alive to the great opportunities in this line are not in sight.

Orchardists of the Montreal district say that the protracted cold spell, with comparative absence of snow in the first half of the month, has been distinctly unfavourable to their interests, and they fear that their "Fameuse" orchards may have suffered considerable damage, though this will not be definitely known for some months. A national fruit exhibition, planned to be held in Montreal in November next, is under contemplation.

Definite announcement was made during the month of an undertaking of great magnitude and of first-class importance to the city and district of Montreal, viz., the coming of the Canadian Northern Railway into the heart

of the city. This will involve an expenditure of \$25,000,000, and labour in all branches will benefit in consequence. Sites have been fixed upon and purchased for the terminal. A large station will be erected, and perhaps an hotel. The city is to be entered by a tunnel to be bored through Mount Royal, in solid rock practically all the way. The tunnel will be the greatest work of its kind in Canada, will be over three miles long, and will cost in itself about \$6,000,000. A viaduct from the city end of the tunnel will carry the railway to the harbour front. The railway will be operated by electricity so far as the Island of Montreal is concerned. Work is to commence this Spring.

Another announcement of great importance to Montreal and district was made during the month. Sir Lomer Gouin, Premier of Quebec, informed the Legislature that the Provincial Government has decided upon placing \$10,000,000 at the disposal of the municipalities of the Province for the construction of modern highways. Of this work the Montreal district will receive a very large share. Included in the programme are four macadamized highways between Montreal and Quebec, two on the north shore of the St. Lawrence and two on the south shore; one between Montreal and Sherbrooke; one between Montreal and Ottawa; and one from Montreal southward to the United States frontier. In addition to all this, 1,200 miles of other macadamized roadways will be constructed, largely in the district of Montreal.

The plans of the Montreal Harbour Commissioners for works to be carried out in 1912 involve an expenditure of \$2,000,000. Improvements planned are: Completion of No. 2 elevator; completion and installation of dry dock now being built by Vickers, Son & Maxim; raising of level of Victoria Pier and construction of five double deck steel sheds; dredging, etc.

Dominion Government public works to be carried out in Montreal and district in the season of 1912 include an expenditure of \$814,000 for dredging the

St. Lawrence channel; with \$727,000 additional for dredging plants; \$300,000 for a new Customs examining warehouse; \$200,000 for enlargement of Montreal General Post Office; \$120,000 for two new city postal stations; \$100,000 for a new barracks; \$75,000 for new bridge over Lachine Canal at Rockfield; \$50,000 for new ordnance depot; \$25,000 for new detention hospital; 50,000 for new postal station at Westmount; and \$40,000 for new post office at Maisonneuve.

The Quebec Government plan to demolish the present Montreal Court House buildings and erect new buildings near the present site, at a cost of \$250,000, work to commence in the Spring.

The City of Montreal is to enlarge its sewage farm, at a cost of \$50,000; to embellish squares, at a cost of \$50,000, and to construct five underground lavatories at a cost of \$20,000 each. All indications point to an active year in the building trades. Plans are announced for the erection of big office buildings, including two ten-storey ones, hotels, and other large structures. A number of big apartment houses are also planned. In the suburbs many smaller houses and flats will go up. Among the big structures planned to be erected this season are the Ritz-Carlton hotel, the Mount Royal hotel, new buildings for the Bank of British North America and the Royal Trust Company. Several churches and a number of small theatres are also announced to go up. Figures announced during the month showed that buildings erected in Greater Montreal during 1911 totalled almost \$27,000,000 in value.

The City Improvement League of Montreal is actively working to arouse public interest in the question of better housing for wage-earning people, and also in the provision of more parks, playgrounds and breathing spaces, especially in congested sections of the city.

District Notes.—In Maisonneuve it is expected there will be great activity in building operations this year. During

1911 the building permits issued totalled \$2,260,160. Many flats and some factory buildings are planned. The Catholic school commissioners are to erect a girls' school, to cost \$80,000. The fire brigade is to be strengthened both in men and apparatus.

The big industrial plants at Lachine and Rockfield are busy. The car building establishments are working to the limit of their capacity. A new furniture factory to cost \$75,000 is announced to go up at Lachine.

At Verdun the building of residences has continued strong, despite the cold weather; many flats and semi-detached houses are going up.

In Outremont the building outlook is good. Operations in 1911 totalled \$1,674,000. A box factory to cost \$20,000 will be erected shortly.

On the south shore of the St. Lawrence the electric cars are about to be extended to Richelieu in one direction and to Boucherville in another.

Hull.

A large proportion of labourers employed previously in the saw mills and on corporation work are now working in the camps. The demand for labour is quiet compared with the month of January, 1911. The contractors Bisson & Carrière, who are building a sewer, closed their work on the 20th January on account of cold weather; 160 hands working at the rate of 17½ cts. per hour and 10 hands at 40 cts. per hour, 9 hours per day, were let off. All other industries work full time summer and winter. There was a decrease in rates of wages of 18%, since the closing of the saw mills, etc. The hours were also shortened from 10 to 9. There was no change in the price of necessities for rentals, since the last report. Trade both wholesale and retail is very active compared with the month of January, 1911. Bank business in general was reported very good, though collections were a little slow. Building is very quiet no permit since December having been given.

The E. B. Eddy Company is erecting a mechanical pulp factory at a cost of over \$50,000.00 expecting to give a daily production of one hundred tons of paper. Forty hands are working at the rate of 20 cts. per hour and 10 hands at the rate of 40 cts. per hour, for nine hours. The said buildings to be completed in eighteen months. A Hydro electric plant of three units will be erected, each unit will have, at low water, a medium capacity of 4,500 h.p. and a maximum capacity of 18,000, h.p. at high water.

A new railway company to operate either by steam or electricity between Ottawa and the McGregor lakes, is applying for a Dominion charter. A cement plant which will likely employ from 200 to 300 men, is to be erected soon by the firm of H. Pupuis & Son, in the vicinity of the International Cement Company's mills in the outskirts of the city of Hull.

ONTARIO.

Ottawa.

General conditions of labour were comparatively satisfactory. The customary slump in building and construction work was not so pronounced as was anticipated or noted at the same period last year, and a slight improvement even was noted over the previous month. If there was little demand for unskilled labour, very little unskilled labour was unemployed, as the greater number were working in the lumber camps. The corporation used as many as 150 men per day cleaning the streets of snow. Finishing work has been progressing rapidly on the large Grand Trunk Railway Company's depot and hotel, giving employment to over three hundred carpenters and joiners, glaziers, electricians, painters, wood workers, varnishers and the like.

The city has given the contract for a new hospital to be erected on Porter's Island at a cost of \$45,000, and preliminary work has been started. Sites have been procured for two new motor

car garages of a modern type. The board of control has applied to the railway commissioners for permission to build a viaduct over the G. T. R. tracks on Bronson avenue at a cost of \$139,231.

Work on the Canadian Northern Railway Company's line construction south of the city was stopped early in the month pending the decision of the board of railway commissioners on a point in dispute between the company and the township council. Only thirty men were affected as operations had been slackened for the winter. The work was suspended all month.

Ottawa bank clearings for the year ending Dec. 30th, 1911, were \$213,952,293 as compared with \$193,714,890 for the previous year, an increase of \$20,237,403. For the month ending Dec. 30th, the clearings were \$20,904,284, against \$15,962,857 for the same month in 1910, an increase of \$4,941,427. Bank clearings for the week ending Jan. 4, 1912, were \$4,447,376, as compared with \$3,255,091 for the corresponding week last year, an increase of \$1,192,285. Bank clearings for the week ending Jan. 11th, 1912, were \$4,447,376, as compared with \$3,255,091 for the corresponding week last year, an increase of \$1,192,285. Bank clearings for the week ending Jan. 18, 1912, were \$5,259,469, as compared with \$5,012,853 for the same week in 1911, an increase of \$246,616.

Building permits issued this month show dullness in the building season. For the week ending January 6th two permits were issued. Five were issued the following week, and six during the preceding week. The most notable was for a frame ice house on Balsam avenue to cost \$16,000.

A statement issued by the assessment commissioner shows a total realty increase for 1912 over the 1911 assessment of \$11,394,246.

The increase in business assessment is \$1,160,181, and the increase in income assessment \$327,637. The total net increase is \$12,882,064.

The corporation has this month increased the wages of the city firemen by \$50 per year per man. Some seventy men are affected. The minimum salary is \$600, and the maximum \$750 per year. It was also arranged so that 79 firemen shall get one day off in eight instead of one day off in 12 or 14 days as previously.

The high price of such necessities as potatoes and eggs, with beef showing a tendency to go up, and an increase in the price of coal is noted this month. The advance in potatoes was due to the failure of the potato crop in this district last year. Eggs sold around 60 cents per dozen, a high price which is not unprecedented at this season of the year. A tie-up at the Toronto stock yards and an increase in the price of feed stuffs caused the higher prices of beef, which went to 22 cents for choice cuts towards the end of the month. On Jan. 22nd, stove and egg coal sold at \$7.75 per ton, and chestnut coal for \$8 per ton, an increase of 25 cents over the previous week. Wholesale price advances due to unsettled labour conditions at the Pennsylvania mines were given by retail dealers as reasons.

Shareholders of the Ottawa Electric Railway Company received on Jan. 17th an additional bonus of three per cent. on their holdings of the company's stock. This means that they have realized fifteen per cent. on their investments in this company for 1911.

The Civic Electric Commission announced a surplus of about \$20,000 for the year 1911.

Lumbering, which is one of the leading industries in this locality, is naturally quiet at this season of the year in so far as manufacturing is concerned. Log cutting is progressing rapidly in the bush, however, conditions having improved greatly since the new year, and a good cut is anticipated. The retail lumber dealers are employed in stock-taking, but report an encouraging number of enquiries, more than in previous years at this time. Considerable shipping is being carried on, giving em-

ployment to loaders and helpers. The wood working factories are busy.

There are evidences that the coming spring will see a busy season for railway construction. The works of the Canadian Northern Railway are well started south of the city, and will be pushed as soon as the weather moderates. The Canadian Pacific Railway Company is negotiating to secure permission to go ahead with its proposed entrance scheme, including a tunnel under the city and a depot centrally located. The Grand Trunk Railway station and hotel are still employing a large number of men.

The sale of stock and other farm products has been brisk this month. Good roads were kept up by heavy falls of snow, and the market was well attended. Live cows were sold to the meat packers for 6 to 6½ cents per pound. Some farmers found it necessary to buy potatoes for their own consumption, owing to the failure of the local crop last year. Beef sold on the local market for from 6 to 7½ cents per pound; lamb from 10 to 13 cents; pork was steady and plentiful at from 8 to 9 cents per pound; turkeys were 22 to 23 cents per pound; chickens from \$1 to \$1.50 per pair; geese, 15 cents per pound; creamery butter 30 to 36 cents per pound; eggs, 55 to 63 cents per dozen.

That the coming season for building construction will be an important one is apparent from provision in the government estimates brought down on Jan. 10th for the following works at Ottawa; new bridge over the Rideau canal at Bank street, \$80,000; new observatory, \$60,000; new departmental buildings and sites, \$500,000; new examining warehouse, \$300,000.

Brockville.

All classes of labour have been well employed the past year, and the month of January finds all branches of work active with the exception of the building trade. Bricklayers and masons are idle at this writing but carpenters and painters are partly employed, finishing

a business block and the nurses' home at the General Hospital. A new automobile factory has materially added to the manufacturing output. Ice cutting is now in full progress and is giving employment to many. All of the local manufacturers are working full time. There has been just completed, the following extensions to local manufacturing establishments, extension to the plant of the National Manufacturing Company and an extension to the Burrell works, manufacturers of cream separators and milking machines.

Prospects are bright for a busy season on the opening of spring.

Belleville.

Labour conditions in Belleville were excellent, labouring men generally finding much employment. This was owing to sewer construction being carried on by the city, and extension in gas services. The advent of the Canadian Northern Ontario Railway into this city brought considerable employment to many labourers. The prospects are that the coming season will be an exceptionally busy one, as there is no doubt the Canadian Pacific Railway will build a line through the city, and the city council is virtually pledged to pave Front street, repair a number of other streets, lay more sewers and extend the gas service, the gas plant being owned by the municipality. The branch of the Canada Steel Company's works here is in full operation, and two large cement works adjacent to the city are employing a large force of men.

Industries were well employed for this season of the year.

The Canadian Northern Ontario Railway is completing the interior of its new station here, and will begin a passenger service in the near future. Freight over the new line is being received daily.

Kingston.

January was an active month in industrial circles in Kingston. A significant fact was that not a single appli-

cation was made during the month at the city stone-breaking quarry. In other years, including 1911, many men eagerly sought employment there. The carrying on of many industries late into the fall, and the continuance of some of them to the present time afford the explanation. Railroad extension and improvement, building operations, the harvesting of ice, manufacturing, etc., still continue to afford considerable employment. Toward the end of the month the removal of large quantities of snow from the various railway lines, yards, streets, etc., added to the opportunities for employment.

At a meeting of the directors of the North American Smelting Company, held in Kingston, January 6, it was voted to rush the installation of the furnaces and power plant, in order to be able to start operations shortly. The buildings, which are numerous, are practically completed. The company has entered into large contracts for custom ores to be shipped to the smelter as soon as possible, and together with the by-products, such as white lead tailings, old lead scrap, tea lead, etc., and the lead concentrates from the company's own mines, a great future is predicted for this enterprise. It is expected that work on the new Paper Box factory will commence shortly. This plant will consist of three buildings, constructed of concrete and reinforced concrete blocks, with reinforced concrete floors and roofs, and steel sash.

The Kingston Brick and Tile Company expects to open for business very soon. The machinery is now being installed, and is of the very latest patterns. Dryers and other buildings are about completed. This plant will have capacity for an output of from 40,000 to 60,000 bricks daily, with an unlimited supply of suitable clay of the finest quality available. A branch railway line will also connect with the company's property which is within the city limits.

During the month the work of driving the piles for the new wharf at the

Royal Military College commenced, and affords employment to a number of men.

A capitalist from Buffalo visited Kingston during the month with the object in view of promoting a second first-class smelter. Plans were placed before the Board of Trade, and are being earnestly considered.

The Grand Trunk Railway Company has requested Kingston to supply it with one thousand electric horse-power by April 1 for the operation of its drills at the granite quarry a little east of the city. At a conference between representatives of the railway and the city it was agreed that there were no reasons why the city should not supply the necessary power for a period of from ten to twenty years. The Grand Trunk Railway Company will employ fifty men at the quarry nine months of the year. The company has decided to gravel its main line from Montreal to Toronto, in order to get rid of the dust.

On January 1 the ratepayers of Kingston voted by large majorities in favour of a reduction of the liquor licenses, a fixed assessment for the Canadian Locomotive Works; granting considerations to the proposed new box factory, and to promote business with the Hydro Electric Power Commission.

The Davis Dry Dock Company has a contract to build a new steamer for the Ottawa Forwarding Company. The vessel will be 112 feet in length, 25 feet beam, and a depth of 9 feet. Her speed will be ten miles an hour, and she will draw about five feet of water.

Peterborough.

The labour market in January was fair. Outside work became quieter, compared with the preceding month. In other lines of industry, however, the busy conditions reported last month were maintained. Manufacturers of electrical machinery were exceptionally active. The Quaker Oats Company has also had a busy season, but finds it hard to get girls to do their work. The International Harvester Company, the Bun-

ton Carpet Company, and the Canadian General Electrical Company are also advertising for girls. All other help is equal to the demand. The Canadian Canoe Company has commenced operations in a new building. The city has just completed a new sewage system and pumping station for the south end of the city. The police commissioners at their annual meeting this month raised the salary of the chief and men of the force. The city firemen's salaries were raised: first year men to \$550, second year men to \$600, third year men to \$650. A by-law was carried in favour of Hydro-Electric power. A new coal company has started business, and one shipment has been disposed of at a price below that of other dealers. A new company has been organized to manufacture gasoline engines, capitalized at \$20,000, the A. W. Parks and Son Company, Limited. The Board of Education asks \$65,000 for schools the present year. The demand for Separate schools will increase the amount to about \$75,000. There will be two new schools built this year, one in the east ward and one in the west ward. The local merchants express themselves as being very well satisfied with the Christmas trade this year, notwithstanding the absence of sleighing. Building permits for the year 1911 numbered 260, amounting to \$345,372, and for the year 1910 the number was 231, amounting to \$517,958, or a decrease for the past year of \$172,586. There was no particularly large contracts in 1911 as in 1910. The grocers in the southwestern portion of the city have decided to close their places of business at 9.00 o'clock in future.

The farmers have been busy during the month caring for stock and marketing produce. Prices for farm products were never higher than at present. In lumbering the outlook is favourable for a large cut. A smelter is to be installed at the Galway lead mine, where the Union Creek Mining Company, the owners of the property, have about 500 tons of pure lead ready. A recent sample weighing about two pounds contained eighty per cent. lead.

Orillia.

The general demand for labour has been much greater than is customary at this season of the year. The attempt to continue building operations throughout the winter months, favoured by the mild December, has been interfered with somewhat by the extremely cold weather this month. Nevertheless, outside work has been continued whenever weather conditions would permit, and some progress has been made. Inside work, such as carpentry, painting and finishing, or buildings which have progressed far enough for the introduction of heat, has gone on steadily, and has afforded employment to many men who are ordinarily idle at this time of year. Of course the winter has forced some curtailment, and there are men who are glad of the opportunity to earn money by snow-shovelling.

The address of the President of the Orillia Board of Trade, Mr. J. C. Miller, at the annual meeting on the 23rd instant, furnished some interesting statistics as to Orillia's industrial development during the past year. The number of hands employed in the factories had grown from 729 in 1910 to 1,160 in 1911, an increase of nearly 60 per cent. The amount paid in wages had almost doubled, being \$344,850 in 1910, and \$621,953 in 1911, while the output of the factories had increased threefold from \$1,228,400 to \$3,782,500. Upwards of half a million dollars had been spent in building operations. The customs revenue, which was \$50,386 for the year ending March 31st, 1910, was \$88,189 last year. There is every prospect of continued growth the present year, one large factory being just about ready to commence operations.

Generally speaking, the factories are more than ordinarily active for this time of year. The new factory of the Tudhope-Anderson Co., Limited, is now rapidly approaching completion. This factory will ultimately give employment to 600 or 700 men. It will manufacture plows, drills and other agricultural implements, waggons, steel waggon wheels,

etc. The company has a number of branches already established in the West, and will make a specialty of this trade. Their factory will be a large concern, with over five acres of floor space, and requiring two million bricks for construction. Manufacturing has already been begun on a small scale.

It is understood that the C.P.R. has given up all idea of starting a passenger service on its Georgian Bay and Seaboard line, from Port McNicoll to Bethany, which passes through Orillia, before May or June. The line is complete, except for the stations, which are under construction. The C. N. O. R. has running rights into Orillia, from Atherley, over this line. The latter company has had its rails laid up to Atherley, on the outskirts of the town, for eighteen months past, waiting for the C. P. R. to let them into the town. Construction work on the Georgian Bay and Seaboard line practically ceased last month.

Toronto.

Skilled labour in most lines was well employed. Severe weather set in about the close of the year, causing a general suspension of the activity in building, which had continued up to that time. A fair percentage of those engaged in indoor work were employed on uncompleted contracts, but builders' labourers, bricklayers and other out-of-door workers were mostly laid off.

On January 1 the electors voted in favour of bylaws for providing the sum of \$2,200,000 for the extension of the hydro-electric system, and \$139,488 for the construction of the Danforth civic car line.

The Board of Education has appropriated \$600,000 for the erection of new schools and the enlargement and alteration of several of the present buildings.

Charges having been made that foremen engaged on the construction of the civic car liner on St. Clair avenue had shown discrimination in favour of Italian as against English labourers an

investigation was begun by Commissioner J. E. Starr, and much evidence of a conflicting character taken. The enquiry is still pending.

Work on the farms during the month consisted mainly in the care of stock and the marketing of produce, the roads generally furnishing good sleighing. There are complaints of a considerable shortage of coarse feeds for horses and cattle as compared with other years, and many will experience some difficulty in wintering their stock. There is a large decrease in the number of hogs.

Manufacturing in most lines has continued active with plenty of orders to keep the plants in operation. The Massey-Harris agricultural implement shops, were temporarily closed down on January 19 owing to the warehouses being too full to accommodate the output. It was expected that work would be resumed about the close of the month. Another large warehouse giving four more acres of floor space is to be built in the spring, and a new foundry 350 ft. in length is in course of erection.

The Wolsley Tool & Motor Company, of England, have let a contract for a garage on Avenue Road to cost \$40,000 and contemplate the establishment of a large branch factory.

A. J. Reach & Company, baseball manufacturers, have purchased a site on Macdonell avenue for a factory.

The carpenters unions have notified the builders that they would demand a substantial increase over the present minimum wage of 37c per hour in the spring. The Journeymen Tailor's Union are endeavoring to increase their membership by taking in members of the trade employed in factories, as well as those engaged in custom shops with the view of demanding an advance in wages. A large proportion of unskilled laborers were out of work, through snowfalls towards the end of the month gave temporary employment to a number of them.

Niagara Falls.

Employment conditions were almost as satisfactory during January as during December. There were few unemployed, though severe wintry weather caused interruptions in some lines of work.

Two small manufacturing concerns announced decisions to establish in the city. One will make lines of fancy goods, the other shoe-fittings.

The Electrical Development Company, which last autumn commenced work on the final section of its power house and generating plant, will rush work during the present year. Part of the steel work for the new building is now up and contractors are preparing for an early commencement on other parts of the work.

The Queen Victoria Niagara Falls Park Commissioners have decided to have the Niagara Boulevard completed during 1912. Sections of the roadway have been built on different plans for purposes of experiment and comparison.

The Union Natural Gas Company which has secured control of the Essex and Kent gas fields, has its head office here.

The city council has raised salaries of officials by the following amounts, treasurer \$100, cemetery superintendent \$80, market clerk \$50, assessment commissioner \$200. The contract for a section of sewers was let.

Commercial and financial conditions were steady. A little lumbering is done in this district each winter, but there is very little large timber left to cut. Manufacturing concerns were having a fairly good winter. The railway switch works, chain and trap, cutlery, corset, neckwear, suspender, shirt and chemical fertilizer factories were all reported busy.

Niagara-on-the-Lake.—The Dominion Cannery Company will enlarge its plant here.

Port Colborne.—The Dominion government has appropriated \$420,000 for canal, harbour and elevator improve-

ments here. The cement works are being doubled in size, as is also the cork factory. Arrangements were made which assure the location here of a large iron-smelting plant. The expenditure on construction will be very large and permanent employment will be given for several hundred men.

Welland.—A bylaw to grant concessions to a canning factory was carried. The Pittsburg Nut & Bolt Company promises to build a \$50,000 factory here. There John Deere Company was incorporated in Ontario with a capital of \$250,000. The Automatic Transportation Company has completed a factory 200 by 50 feet in size and will have its machinery running in February or March. The Page-Hersey Company commenced running its plant nights and added 100 men to its staff. The Welland Machine & Foundry Company has sold its entire output of hoisting engines for 1912. The new skating rink was finished. The electric transforming plant of the Michigan Central railway was burned.

Crystal Beach.—Further extensive building operations will be commenced early in the spring and completed as quickly as possible.

Hamilton.

Labour generally was not as well employed during January as in the previous month. Extremely cold weather which set in early in the month put a stop to practically all outside construction work. The iron and clothing trades were not very active, and tobacco workers in the big factory here were idle most of the month. Four of the five by-laws voted on by the ratepayers on Jan. 1st were carried, the one to purchase Oakland's park on the north shore being defeated by 47 votes. The city this year will add \$1,655,942 to the civic debt, including Hydro Electric, \$505,160, Board of Education, \$160,000, Birch avenue extension, \$70,000, East End park, \$60,000, fire station, \$65,000, waterworks improvements, \$650,000, lavatories, \$18,000, and waterworks construction, \$127,282.

The Hamilton City and Suburban Homes Company, Limited, has been incorporated with a capital of \$100,000. The new concern will carry on a land and building business. The Automatic Sprinkler Company of Canada, with a capital of \$40,000, is another new Hamilton concern which has lately been incorporated. A local company has been formed to take over the 300 houses which will have to be moved from the right of way purchased by the Canadian Northern Railway.

The Brewster Company, of London, Ont., will open a large 5, 10, 15 and 25c store here. Ice cutting operations have commenced on the Bay. About 300 men find employment harvesting the ice crop here. Customs collections for the Port of Hamilton for the month of December amounted to \$226,462.02, an increase of \$51,055.03 over the corresponding month a year ago. The Steel Company of Canada has taken out a permit for the building of extensions to its plant in East Hamilton. The value of the buildings provided for in the permit is \$100,000. The permit provides for the erection of a rod mill, a bloom and billet mill, open crane runway building, boiler house and gas producing house. As the buildings are by no means the most expensive part of the new plant, some conception of the magnitude of the extensions from a financial and industrial standpoint can be gathered.

The Oliver Chilled Plow Co. of Canada has increased its capital stock from \$1,000,000 to \$2,500,000, and will proceed as soon as possible to make extensions to its plant here, which will cost half a million dollars. The new buildings that will be erected include a warehouse on the water front which will be four stories in height and 200 feet long by 101 wide, a foundry building 750 by 150 feet, and a polishing wheel building 100 by 75 feet. It is expected the first of the buildings will be completed by July next.

The Brown-Boggs Co., machinists, will seek permission of the Legislature to increase its capital stock from \$150,000 to

\$500,000 and will erect a big plant in which to carry on its ever increasing business. The firm expects to more than double their staff of workmen when the new plant is completed. The Hamilton Dairy Co. is building a new plant on Vine street, which will be elaborately fitted up with new machinery. Bennett & Thwaites, contractors, have purchased land in the factory district on which they will erect 75 houses. It is also the intention of the firm to build 25 summer houses on the Beach. A new parish hall, to accommodate 1,000 persons, will be erected in connection with St. Mary's Cathedral. The Hamilton Brewing Association has taken out a permit for alterations to their plant at a cost of \$5,000. Alterations and additions to cost \$5,000 will be made to the Schmidt House, James street. The Cecil Hotel Co. will erect a 100 room hotel at the corner of Catharine and King William streets.

Thirty-eight factories were erected here during 1911 at a cost of \$1,080,650.

The volume of business done by wholesale houses here during the month compares well with that of other years at this time, and the outlook is considered most encouraging. Retail trade has been good. The Labor News, a new weekly journal devoted to the presentation of current trade union news, made its appearance on Jan. 5th.

During the past few weeks many men have complained to the police of the methods of certain employment agencies; they claim that on payment of a certain fee they were promised to be provided with good situations, and then sent to the manufacturing concerns of the city to ask for a job. In almost every instance they were turned away with the information that there was no work.

The local trades and labour council has endorsed a resolution adopted by the Toronto District Labour Council respecting the admittance of Hindous into Canada, and going on record as opposed to any of the immigration laws. A resolution was also passed by the trades and labour council favoring Dominion old age pensions.

Canneries and factories hereabouts are contracting for fruit and vegetables at prices in excess of those paid the growers last year.

Rough roads and the extremely cold weather most of the month kept many farmers from attending the local markets. Manufacturers of harvesting machinery are particularly busy at present. The Deering Co. have over 2,500 hands employed, and several of the departments are working overtime.

Burlington.—The by-law to expend \$33,000 on the building of a new school house was carried at the municipal elections by a majority of 134. A provincial charter has been granted to the Niagara Brand Spray Company, Limited, with a capital of \$100,000.

The total earnings of the Hamilton Street Railway for 1911 amounted to \$454,010.52, an increase of \$75,000.18 over 1910, and was the largest in the company's history. The city received from the company during the year \$36,320.84, an increase of \$6,000 over the previous year.

Brantford.

The general condition of the labour market was about the same as during December, but does not compare favourably with the corresponding month of last year. The Building Trades so far as outside work was concerned were practically idle, but the general expectation among builders is that the coming season will be a busy one. A new Young Men's Christian Association building will be erected, and excavations for the foundations are already completed. A new public school building will be erected in the Holmedale district, and very extensive additions will be made to the General Hospital. The iron trades were not quite so brisk as they had been, and in several cases a temporary reduction of the number of employees was necessary. Skilled labour was better employed than unskilled, a number of the latter being out of work, though the cutting of ice gave employment to some.

The amalgamation of the Adams Wagon Company and the Brantford Carriage Company with the Cockshutt Plough Company is expected to give impetus to the two former, and already additions are spoken of. The Penman Manufacturing Company, which very recently completed a large addition to its factory is advertising extensively for operatives. The Paper, Screen and Bed and Roofing factories were busy. The City Council is investigating the adoption of Hydro-Electric Power that being a feature of the last municipal election. Merchants wholesale and retail had a fair month. The police census shows 2,446 foreigners in the city or one-tenth of the total population.

Paris.—The fabric mills were busy, and the other factories were active.

Guelph.

The labour market for the month of January was fair. Owing to the very severe weather very little outdoor work was obtainable, with the exception of novelling snow and cutting and packing ice, which gave employment to a force of unskilled men. Many of the local industries were closed down during the earlier part of the month for stock-taking and repairs, but towards the end conditions improved and men in factories were nearly all working full time. Many men in the building trades were idle, but those engaged in the iron industries were well employed, very little of the time being reported.

At the municipal elections on January 1, a by-law was passed to extend the street railway to the city limits in St. Patrick's Ward, also one to provide for the creation of a sewerage and public works commission. A by-law to erect a new fire hall, equipped with auto apparatus, calling for an expenditure of \$10,000 was defeated.

Contracts for the heating of the new county buildings have been let for the sum of \$7,559.

The Colonial Whitewear Company has commenced operations in its new factory, and the factory lately vacated

by it has been leased to the Colonial Knitting Company, which was recently incorporated with a stock capital of \$100,000. The latter company will employ about forty hands at the start, mostly females. The Dominion Axle and Forge Company has completed its new factory and is installing machinery. The Guelph Separate School Board is calling for tenders for a new school to be erected in St. Patrick's Ward. Customs returns for the month of December were \$15,917.40, a decrease of \$2,427.92 as compared with the corresponding month last year. Wholesale and retail merchants report a quiet month.

Farmers were occupied mainly with the care of stock. Owing to the severe weather the markets were poorly attended and prices are high for products. The roads are in splendid condition for teaming. Many farmers were taking advantage of the short term courses at the Ontario Agricultural College.

Harriston.—The Davies Packing Company has decided to discontinue the killing and curing of hogs in its Harrison factory, which had a daily killing capacity of 1,000 hogs. The shutting down of the factory will affect 60 men, 47 of whom are married.

Woodstock.

There was not much change in industrial conditions since the previous month and labour of nearly all kinds was fully employed. There was still some building work going on, but the bulk of the unskilled labour which was released at the close of the summer season, has been absorbed by the factories, and most of what was left over is now finding employment cutting and harvesting ice. Owing to the new dairy industry to be established here, the building for which is now under way, an unusually large quantity of ice is being harvested this year.

Reports from practically all the larger factories continue encouraging. The foreign trade in pianos and organs is reported to be unusually good. The Western market for wagons is said

to be a little late in opening up, owing to local money conditions; but the business is still good and the prospects excellent. The factories are practically all making good time, and there is scarcely any complaint from either employers and or employees. The factories appear to be pretty well supplied with labour of all kinds, and especially with unskilled labour. There is some demand, however, for good mechanics. The Canada Furniture Manufacturers are looking for upholsterers, and there is work for stove-mounters and nickel-platers at the Stewart foundry.

Generally speaking business among the merchants was good.

There is a proposal here for the establishment of a branch of the Builders' Exchange, and it is possible that the proposal will be carried out later on.

Stratford.

Labour conditions while not so active as during the previous month were favourable. There was still some work going on in the building trades but it is about over for the season. A number of men were employed on the construction of a large sewer and several were engaged clearing the streets so that the unemployed did not seem noticeable.

Local industries report a very good month. Wholesale and retail trade were active.

The Water Commission of Stratford have published their report. The water pumped during the year was 334,364,900 gallons coal used during the year was an average of $2\frac{1}{4}$ tons daily. 71,236,500 gals. have been pumped by electricity, new mains to the extent of 7,599 feet were laid during the year and a cement dam built at the intake basin, the total income was \$47,649.59, the expenditure totalled \$24,915.13. A bylaw was carried for a factory site for the manufacture of piano supplies. No changes in rates of wages or hours of labour and no trouble in the labour market were reported.

Farmers were quiet excepting doing a little teaming and marketing the prices are: Eggs, 35 to 37 cts. a doz.; butter, 32 cts. per lb.; chickens, 50 to 60 cts. each; potatoes, \$1.50 a bag; apples, \$1.25 a bag; wheat, 80 cts. per bush.; oats, 45 cts. per bush.; barley, 65 to 80 cts. per bush.; peas, \$1 per bush.; live hogs, \$6.25 per cwt.; hay, \$15 to \$17 per ton.

London.

Adverse weather conditions hampered outside work during the month, and but very little was done, although the outlook in the building trades is better than for years. In the factories and foundries business is very good, and indications for a busy year are of the best. Some of the manufacturing plants will double their output of the same month last year. The Tuckett Cigar Company have purchased a 55 x 100 feet, 4 story factory formerly occupied by the Gorman Eckert Spice Co. and will employ many more cigarmakers.

Building permits for 1911 reached over the one million mark.

Two disastrous fires visited London during the month—the first at the Asylum for the Insane, where the kitchen, bake shop and ball room were wiped out, at a loss of \$20,000; the second at the Geo. White & Sons engine and separator works, where one of their buildings was burned at a loss of \$10,000.

On Monday evening, Jan. 15, the Industrial School, under control of Board of Education, was opened and over 100 students were entered in the different classes.

On Jan. 1st the Street Railway Company advanced the wages of the conductors and motormen, relief men from 18 to 19 cents per hour; and day men from 20 to 22 cents per hour.

The city firemen also received an increase of 10 cents a day each.

St. Thomas.

January was a quiet month in the building trades, the severe weather being responsible for an almost total cessation of outdoor work. Inside work was carried on by carpenters, painters and plumbers. Plumbers were particularly busy answering calls on their services to thaw out pipes and make repairs due to damage done by frost. On the railroads men engaged in the traffic departments were busy. An advertisement appeared in the local papers asking for applicants for the position of brakeman,—an unprecedented occurrence. This was made necessary, in great part, by the strict physical examination to which applicants are subjected who seek employment in railway train service. Throughout the railway shops the men were busy keeping the locomotives and cars in condition for the extra demands of the season. Pere Marquette car repairers threatened a strike because of the proposed introduction of the piecework system in the car department. The friendly intervention of the Department of Labour, however, had a good effect on both parties concerned and an amicable settlement is now expected. Ice harvesters are busy and large gangs are at work cutting ice and filling the local ice-houses and obtaining a supply of ice for railway use. Unskilled labour is reported to have been fairly well employed throughout the month. Few requests have been made to the city for relief of the poor. No building permits of importance were issued during the month. Local industries report a good average month. The by-law submitted to the ratepayers to have the City Street Railway extended to Port Stanley was overwhelmingly defeated. A by-law to spend \$10,000 on the construction of an isolation hospital was carried. Merchants report trade brisk.

Chatham.

Labour conditions were not so active during January principally on account of the continued cold weather. All out-

side construction work was at a standstill. During the later part of the month there was a demand for labourers by the different ice companies and a large number found employment. Factories generally were running with full complement of hands, a few on short hours. Foundry and carriage factories were especially active. Civic work was at a standstill the new council are securing estimates for the season's work. At the first meeting of the 1912 council the fire chief reported the cost of buildings erected in 1911 as \$195,147. The abattoir and addition to the International Harvesting Company outside the limits were valued at \$160,000, bringing the total to \$355,147, the largest on record for the city. The customs returns for Chatham and district showed a gain of \$6,727.89 for Dec., 1910. Merchants report trade very quiet after the Christmas activity.

Owen Sound.

Labour conditions were most favourable. All manufactures were in full blast again after the holidays. In the iron, furniture and planing mill industries all employees were working full time. Some of the sawmills were closed for the season, while others that are operated in connection with some other industry were working eight or nine hours per day. The furniture trade was more than usually active for this time of the year. No important changes in rates of wages have been made recently. The ten-hour day is the standard.

In the agricultural parts of this district, mixed farming is followed as a rule. For fat stock the market has been so favourable both as to demand and price that many farmers have ceased to grow grain for the market. In the summer months the dairying industry is of great importance; large quantities of cream being collected and manufactured into butter by the creamery company. During the past summer, several of our local dairymen formed the Owen Sound Dairy Company, which collects the milk,

pasturizes it, and delivers it to its customers. The fruit crop of the past season was very small and of unusually poor quality. Market gardeners also had a bad season. These two failures had a tendency to make living dearer in the towns. Potatoes are so scarce that some of the merchants are shipping them from British Columbia.

Manufactures are well represented in this district. There are three well established foundries and machine shops, one table factory, one furniture factory, one chair factory, three planing mills, two tanneries, one wooden ware factory, one stove foundry, three cement plants, six sawmills, one knitting factory, one woolen mill, one biscuit and confectionery factory, one wholesale and retail printing and bookbinding establishment, three general printing offices, two cigar factories, and others.

Cobalt.

Labour conditions are very good during the month although no noticeable change from the previous month occurred. Outside labour in the vicinity of Cobalt was quiet, the majority of carpenters, etc., being in Porcupine, where considerable building has been in progress. The building trade, however, is slacker this month than are preceding months, but a revival is looked for in the spring. Building operations on the Transcontinental, east and west of Cochrane are active, while work was started this month on railway construction on the Algoma Central from a point 130 miles west of Cochrane. The Pearl Lake branch of the T. & N. O. will be completed in a few weeks to Timmins, the terminal point. No changes in wages or hours of labour were noted during the past thirty days. Cost of living has materially increased in most points, the price of commodities in general having advanced.

Nineteen eleven was a banner year in the history of Temiskaming, not only from the mining but from the agricultural standpoint. Returns from the

mining industry at Cobalt show an increased output of silver for 1911 of some 2,000,000 ounces over the previous year while 1912 made a good start in this line. Mining men state this year's production will be the largest of the camp. The total production of silver amounts to 32,000,000 valued at nearly \$17,000,000. Porcupine and Swastika gold camps should start producing this year, while small shipments of gold may be expected from Larder Lake and Munro fields. A new field in West Shiningtree was found during the year. Lumbering is active. All companies report large forces employed during January while considerable pulp wood is being taken out by farmers in this section.

Sault Ste. Marie.

Since the first of the year, and it might be said during the entire preceding years, labour has been exceedingly well employed, particularly skilled labour and that affecting building operations. In regard to the latter some 400 residences and many handsome business blocks were erected here, all of a very substantial nature. Many more would have been constructed had labour been available, a number of merchants and those interested in real estate delaying building operations until this year in the hope that conditions would improve. A number of conveniently situated subdivisions were also opened last year, and placed on the market, but owing to unavoidable delay in opening streets into them building material could not be brought to the ground. This matter will be remedied this year with the coming of spring, the heavy appropriation for roadways made by the retiring council providing for many new streets, and the macadamizing of important ones in the business and residential sections. Labour in all other lines is well employed and paid. Over 8,000 men are employed at the works of the Lake Superior Corporation, and the many camps owned by the company and private jobbers in close proximity to the

city provide unlimited advantages for the labourer in almost every branch of the mechanical and lumbering departments. The railway construction undertaken by the O'Boyle Bros. along the line of the Algoma Central, and other railway construction east and west, has put a price upon skilled and unskilled labour which to the small operator is practically prohibitive.

At the municipal elections the rate-payers voted for the following appropriations:

Pavements and roadways, \$100,000.00; sidewalks, \$30,000.00; schools, \$30,000.00; sewers, \$50,000.00; parks, \$8,000.00; west end fire hall, \$10,000.00. The town also voted upon a referendum as to the advisability of securing a city charter which was approved by a very large majority, and early application will be made for same. Application has been made for the annexation of the Moffley sub-division, now a portion of Tarentorus township, which has a population of about 300.

In *Steelman* similar conditions regarding labour exist. A policy of municipal ownership was inaugurated some time ago, and the town has since constructed its own water and sewer system, and is now engaged on a civic lighting and power plant. The assuming of the telephone franchise will be considered this year.

MANITOBA.

Winnipeg.

Unemployment was below the average for this season of the year. January is usually a quiet month, during which industrial plants are frequently working with small staffs pending alterations and re-arrangement of plant. The demand for miscellaneous labour was exceptionally good, and a noticeable circumstance is the steady demand for men for farm work.

The volume of transportation was much larger than it has ever been before in January. All the railroad yards

were congested, and consignees had the greatest difficulty in getting delivery of their cars and general freight. Complaints as to this were very persistent from all classes of business people. Special rates have been given by the railroads for carrying grain in bond southward to United States points. These rates were identical with those from points in Western Canada to Fort William or Port Arthur. This will only partially relieve the congestion.

In this connection some very important announcements have been made by railroad officials respecting changes in the yards and facilities for handling freight in Winnipeg. The Canadian Pacific Railroad Company purposes making very material changes. It will build a cut-off by which through freight will not have to be handled in the present Winnipeg yards. When this is done it will for the time being improve conditions.

To the east of the city limits of Winnipeg some large areas have been purchased by the railroads, it is understood, upon which terminal facilities will be erected.

The bank clearings at Winnipeg for January show an increase of 46 per cent. over those for the corresponding month of 1911. For January, 1912, the total was \$110,993,506, and for January, 1911, \$76,020,097.

Business generally during January has been seasonably quiet, both in respect of wholesalers and retailers.

There were no changes in rates of wages, nor any industrial disputes with the exception of that between the members of the Plasterers' Union and the Builders' Exchange, respecting division of work as between that to be done by plasterers and that by carpenters in making and erecting falsework shapes.

Receipts of wheat at Winnipeg continued to be far ahead in volume of those for corresponding periods of last year.

Manufacturing plants are generally quiet — the usual condition at this season of the year.

Employment agents are already actively looking for a supply of men for the large amount of railroad building planned for the summer of this year. It is estimated that the services of 50,000 men will be needed to carry out the plans already announced by the leading railroad companies.

With the exception of some excavating, and work on the publicity building, very little outdoor work is taking place in connection with new buildings.

Most of the engineering trades are slack, and the railroad shops are working short time.

Brandon.

The general condition of the labour market during January was practically the same as in the preceding month, and was considerably better than in the corresponding month of last year. There have been no cases of want brought to the notice of the city authorities. The Hanbury Manufacturing Company is still working overtime and the McDiarmid & Clark Company is working full time.

Large gangs of men are still employed on several of the large building jobs, namely the Canadian Northern Railway hotel, the Canadian Pacific Railway station, and the asylum and the asylum power house. The Canadian Pacific Railway will add six stalls to its roundhouse here, making a total of thirty stalls. It will also add six stalls to the Minnedosa roundhouse and will build new stations at Broadview and Bredenburg. This work with the Normal School building and a new Land Titles office ensures a busy building season for this year.

The Williams' Shoe Company of Brampton, Ont., will shortly open a branch here to handle their Western business.

Several companies have applied for the franchise of the street railway. It is expected to have a part of the railway in operation at the close of the coming summer.

SASKATCHEWAN.

Regina.

During the past month labour in general has been quiet, more noticeably in the building trades, which is accounted for by the intense cold weather. Although the employees in one planing mill have been well employed, this is a trifling matter when compared with the large number of carpenters who have been idle throughout the city. The demand for labour was less than in the preceding month and did not compare favourably with the conditions existing during the corresponding period of last year. The outlook for the coming season, however, is promising, notably in connection with public works, where a large programme is mapped out. Civic improvements are lengthy, among which are the following: installation of a high pressure water system, sewer extension amounting to approximately \$197,000, a large area to be paved, and sidewalks constructed, two or three new fire halls, extension of street railway system, etc., etc. Taking into consideration the season of the year, wholesale and retail trade continues to remain active. Realty circles also are active, as is evidenced by the demand and sale of central business sites, some of which brought record figures.

The situation among the farmers throughout the province remains practically unchanged. The car shortage is still serious. Some districts report threshing as not completed yet. At present there is no demand for farm labour.

Moosejaw.

The continued cold weather of the past five weeks has affected industrial conditions and there was very little demand for labourers. The corporation of the City of Moose Jaw have a few men engaged in water and sewer extensions. There are comparatively few local industries in Moose Jaw. The burning of the Robin Hood mill in De-

cember has thrown out of work a large number of employees, as it was one of the most important of them. All other establishments are operating, but with reduced staffs. Prospects are bright for several industries locating here in the spring.

Employees engaged in transportation have been very busy, owing to the immense amount of grain to be moved east, and to the way it came on the market. All elevators are full and the supply of cars is insufficient, so that a steady fall and winter's work has been kept up. In addition to the handling of the grain the transportation companies have had an unusual amount of coal to haul late this fall, owing to the strike in the mines, and whereas coal is usually handled in large quantities in August and September for storage, very little was handled from the west until November.

The railway company proposes to carry on a big programme of work at this point, and building permits locally for the year 1912 are expected to pass those of previous years.

ALBERTA.

Edmonton.

For this season of the year labour generally has been well employed. All inside industries have been working full time, and the labouring classes have been as well employed as in any previous year at this time. As might have been expected, the first part of the month was very quiet for business in general, but towards the end the situation seemed to have improved. Estimates of 1912 expenditures on public utility extensions and improvements provisionally passed by the city council and on which the ratepayers will be asked to vote on January 30th are as follows:—

Street Railway	\$601,990 00
Telephone Department...	323,804 00
Waterworks Department.	304,895 47
Power Plant	220,900 00
Lighting Department	66,249 00
Fire Department	72,853 00
Stores and Works	23,500 00
Engineering Department.	2,957,754 00

Total \$4,571,945 47

as compared with \$1,079,192.17 in 1911.

Passengers on the street railway system during the month of December were almost double the number carried a year ago.

Lumbering interests have been seriously handicapped by the want of snow during the first of the season. It is expected the cut will be somewhat greater than last year. The usual activity prevails in the coal mines throughout the district. Grade on the main line of the Canadian Northern west of St. Albert is now ready for the steel as far as the Pembina river, a distance of seventy miles. Steel will be laid on this completed grade during the winter. It will then be possible for the contractors now at work on the Pembina river bridge to move the required steel to the bridge site over the new track. Construction work on the concrete foundations of the bridge are now under way. Grand Trunk Pacific contractors have been advertising for five hundred teams for freighting west of the B. C. line. As an incentive to teamsters to go into the mountains and engage in freighting work for the contractors, reduced fare for men and teams are being offered from points along the G.T.P. to the head of Steel at Moose Lake. Thousands of tons of construction camp supplies and equipment will go west from Edmonton during the winter months. Everything will be unloaded at Moose Lake, to be transferred to sleighs for the points farther in the interior of British Columbia, where railway construction work is to be carried on next summer.

Bricklayers and masons and all outdoor workers in the building trades were quiet. Plumbers had a fair month. Carpenters and joiners, lathers, plasterers and painters and other interior workers had a fair month. Stone cutters and builders' labourers were very quiet. Blacksmiths and horseshoers were active. All of the printing and allied trades experienced a fairly active month, as also did the journeymen tailors and garment workers. Bakers and confectioners, butchers and cigar makers were busy. Barbers were well employed, also

clerks and delivery employees. Unskilled labour was very quiet.

Lethbridge.

During the present month there has been very little outside work done, owing to the severe weather. Except on the railways and in the coal mines, there has been a complete stoppage of all work. There has been the largest number of unemployed ever seen in Lethbridge. There has been plenty of work in sight, but it could not be started.

Work has been begun on the sewage disposal plant for the city, but the frost is still in the ground and the work may be stopped for some time yet. There has been a shortage of cars, otherwise the coal trade would be brisk. Bank clearings for the week ending 18th were \$598,123.00. Retail trade has been fairly good.

Coal mining is employing from 1,000 to 2,000 men in the mines in the Lethbridge district.

BRITISH COLUMBIA.

Nelson.

Labour was generally well employed, although usual winter quietness was in evidence. Several mines have re-opened, and Mother Lode, Sheep Creek, will shortly put a new mill into operation. The miners had steady employment, and the satisfactory conditions in mining stimulated business. Coal has dropped in price again as a result of the settlement of the Crow's Nest and Alberta strike.

The sawmills were shut down for the winter and a large number of men are in the bush getting out logs for next season. Active work is proceeding on the Kootenay Central Railway from Elko to Golden, and from Midway to Arcola. The Canadian Pacific Railway has decided on the electrification of its line from Castlegar to Trail and Rossland.

The unusual activity in mining in the Kootenay has resulted in considerable additional work for the machine shops

and foundries. So far the labour for these shops has been equal to the demand.

The usual amount of repairs are going ahead in the Canadian Pacific Railway shipyards at Nelson, Nakusp, and Rosaberry. During the next summer the Canadian Pacific Railway will build a new steel steamer for the Kootenay lake route, the contract for the steel work having already been let to the Polson Iron Works, Toronto. All other work will be done in Nelson.

Victoria.

Very little change was noted in labour conditions from those prevailing during December. While there has been a considerable amount of work done for this season of the year, the unemployed list is large, and no improvement can be looked for for at least a month.

The Portland Cement Company Construction Company have recently let a contract for the building of a large cement plant at Tod Inlet, which will be the second industry of that kind at that place. The cost will be in the neighborhood of a million dollars.

Both wholesale and retail trade continues in an active and healthy condition. Business transacted during 1912 was largely in excess of that of any previous year.

The total number of building permits issued during the year 1911 were 1,170, compared with 744 for the previous year and 568 for 1909. The aggregate value of the structures for 1911 was \$4,026,315, compared with \$2,273,045 the previous year, and \$1,673,420 in 1909. In Oak Bay, a separate residential suburb of Victoria, the value of the buildings erected amounted to \$485,000, while for Esquimalt and Saanich districts, bordering on Victoria, the expenditure on new buildings was about \$300,000, making a total for the year within the "Greater Victoria" area of \$4,811,315.

The aggregate bank clearings for the year 1911 were \$134,929,916, compared with \$101,567,074 in 1910, and \$70,695,

882 in 1909. Compared with 1910 the year's clearings showed an increase of \$43,362,742, or 47 per cent. For the first time in the history of the local clearing house the one hundred million mark has been passed.

The customs collections for the year 1911 amounted to \$3,739,091, compared with \$2,562,039 for the previous year, being an increase of nearly 50 per cent., and constitute a record for this port.

The duty collected on Chinese for the year 1911 amounted to \$2,269,496, as against \$1,244,232 for the previous year.

A large number of civic works are contemplated, chief of which are the Sooke Lake water scheme and the street paving contract, each of which will employ a large number of men.

The Victoria Board of Trade has been officially notified by the B. C. Telephone Company that it is not the intention to increase the telephone rates in Victoria in the near future.

The Trades and Labour Council have elected the following officers for the ensuing six months: President, F. J. Perrott; vice-president, C. Stewart; recording secretary, C. Sivertz; financial secretary, A. R. Sherk; treasurer, G. H. Thibbits; sergeant-at-arms, F. C. Webb; executive committee, G. A. Coldwell, G. Marsh and A. S. Wells; delegates to the Provincial Federation of Labour, C. Sivertz and C. Stewart.

For the year 1911 the B. C. Electric Railway carried 8,221,029 passengers on its local lines, compared with 5,441,910 the previous year, an increase of 52 per cent. over 1910.

At the municipal elections held in January the following by-laws were carried: To ratify the Sooke Lake contract, \$1,600,000; to raise \$275,000 for high schools; to raise \$450,000 for sewers; to raise \$200,000 for waterworks; to increase the rate for charitable institutions purposes. By-laws for increased grants to parks and public library were (for the second time within a few months) defeated. The ratepayers also voted favorably on propositions to abolish wards, and in favour of city govern-

ment by commission. Below is given a synopsis of the civic works carried out and completed during the past year compared with the previous year. The comparison being made, where possible, according to miles of work finished:

Work.	1911.	1910.
Paving	21	8
Sidewalks	27	25
Curbs and Gutters	36	10.75
Surface Drains	36	4
Sewers	15	4.65
Boulevards	20	6
Water Mains	35	13

	1911.	1910.
Cost of works authorized..	\$4,000,000	\$2,000,000
*Wages paid (approx.)...	1,000,000	760,000
*Men employed (daily average)	1,137	

*This is exclusive of contract work.

It is expected that the present year will show equally good results.

In the building trades a large number of carpenters are reported idle during the month. Among other trades work is reported fair with an abundance of help. The unskilled labour market is much overcrowded.

Nanaimo.

There has been very little change in the labour situation in this district during the month, there having been very little outside work going on owing to wet weather. The indoor trades have been quiet, which is usual this time of the year. The coal trade still continues very active throughout the district, and shipments showed a steady growth. Merchants, both wholesale and retail, reported business to be good.

The herring fishery is in full swing, but the catch is not up to expectations, few if any fish coming into the harbour, sending the boats outside. The saw-mills of the district are working steadily, but work in the logging camps is slack owing to the weather conditions. The coal mines of this city and district are working to their full capacity to keep up with the demand for coal, and work opening up new shafts is being pushed. There has been very little railroad construction work during the month.

Prince Rupert.

Employment of labour generally was dull. The only new work started in the city since last report is the excavation for pipe lines of the Woodwork Lake waterworks. Six station gangs of from fifteen to twenty men each are engaged on this work within the city limits making the reservoir, but work on this scheme, which is to cost \$550,000, has not yet begun to any extent outside the city. There is no call for labour of any kind at present in Prince Rupert.

A plant for smoking herring, which are to be afterwards boned and packed for the market, has begun the handling of some five tons of fish. So far a small staff is sufficient to carry on the work, but a new smoke house to handle 25 tons of herring is being built. The plant is located on Digby Island not far from Prince Rupert.

Machinery and miles of piping are being fitted up in the cold storage plant on the water front of the city, and double track steel is being laid by the

Grand Trunk Pacific to serve this large industry which will be in operation before very long.

No special activity can be noted in particular trades, but the general report regarding real estate business is favourable, including better industrial conditions than prevailed this time last year.

Customs returns for 1191 show an increase of 12 per cent. over 1910. Following are the figures: Duties collected from Jan. 1, 1910, to Dec. 31, 1910, \$89,558.22; duties collected from Jan. 1, 1911, to Dec. 31, 1911, \$101,553.85. This shows an increase of \$11,995.63, and indicates the advance made in wholesale and retail business in Prince Rupert.

The labour vote at the municipal election insisted on the maintenance of the 45 cent per hour rate for an 8 hour day, common labour, and has a strong representation on the city council for 1912.

The formation of a Trades and Labour Council was effected, and a cook's and waiter's union is being organized.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.— PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JANUARY, 1912.

ON December 29, 1911, an application for the establishment of a Board of Conciliation and Investigation was received in the Department on behalf of the maintenance of way men and pumpmen, members of the International Brotherhood of Maintenance of Way Employees, employed by the Pere Marquette Railway Company on the Buffalo Division of that road, the number of employees affected being given as 140. In the application it was stated that the dispute in question related to wages and hours, also to a demand on the part of the employees for a set of rules governing both the foregoing.

A Board was established by the Minister of Labour on January 8, and was constituted as follows: Chief Justice

Sir Glenholme Falconbridge, Toronto; Hon. Wallace Nesbitt, K.C., Toronto, (named by the company); Mr. J. G. O'Donoghue, Toronto, (named by the employees). The chairman was appointed on the joint recommendation of Messrs. Nesbitt and O'Donoghue.

Other Proceedings under the Act.

In the January number of the *Labour Gazette*¹ reference was made to the establishment of a Board of Conciliation and Investigation to inquire into certain matters in dispute between the Michigan Central Railroad Company and the station agents, telegraph and telephone operators, and towermen, members of the

¹See *Labour Gazette* for January, 1912, p. 661.

Order of Railroad Telegraphers, employed on the Company's lines in Canada.

The Board in question was established by the Minister on December 26, 1911, Messrs. J. E. Duval, of Montreal, Que., and J. G. O'Donoghue, of Toronto, Ont., being appointed members

thereof on the recommendation of the employing company and of the employees respectively. In the absence of any joint recommendation from the foregoing members, the Board was completed by the Minister on January 17 by the appointment of Mr. Peter McDonald, of Woodstock, Ont., as chairman.

LOCOMOTIVE BOILER INSPECTION IN CANADA.

ON January 1, 1912, there came into force in Canada a set of Rules and Instructions for the inspection and testing of locomotive boilers, issued by the Board of Railway Commissioners, as general order No. 14115. These rules were issued in pursuance of the powers conferred on the Board by the Railway Act and amendments thereto, which provide among other things, that the Board may make rules with respect to the rolling stock, apparatus, structures and works, etc., to be used upon a railway, so as to provide means for the due protection of property the employees of the company, and the public.

The regulations provide that each railway company will be held responsible for the general design and construction of the locomotive boilers under its control, and the safe working pressure for each locomotive boiler shall be fixed by the chief mechanical officer of the company, or by a competent mechanical engineer under his supervision. The mechanical officer in charge at each point where boiler work is done will be held responsible for the inspection and repair of all locomotive boilers under his jurisdiction. Minute directions are given as to the method and time of inspection of both the exterior and interior of the boilers, and the methods and times of testing all the different parts. The flues of boilers in use must be removed at least once in every three years, and the interior of the boilers thoroughly cleaned and examined. The jacket and lagging must be removed at least once every five years and a thorough examination

made of the entire exterior of the boiler. Fusible plugs must be removed and cleaned at least once a month. Every boiler, before being put into service, and at least once every twelve months thereafter must be subjected to hydrostatic pressure, twenty-five per cent. above the working steam pressure, and the boiler thoroughly examined when under this pressure.

Monthly, quarterly and annual reports must be made to the Board of Railway Commissioners on specified forms, and for this purpose each boiler must have its own number on the dome, either the builder's number, if known, or an assigned number to be used on these forms. A specification card, of a certain size and form, must be filed in the office of the Chief Operating Officer of the Board for each locomotive boiler, and a copy of it filed in the office of the chief mechanical officer having charge of the locomotive.

Every accident resulting from the failure of a locomotive boiler, resulting in serious injury or death of one or more persons, must be immediately reported by wire to the Chief Operating Officer of the Board, stating the nature of the accident, the place at which it occurred, and where the locomotive may be inspected, and a detailed report must be mailed immediately, stating the cause of the accident, so far as may be known, and giving a complete list of the killed and injured.

Every railway company violating the provisions of this order shall be liable to a fine of \$100 for each violation.

NATIONAL INSURANCE IN GREAT BRITAIN.

THE National Insurance Bill, which was recently passed by the British House of Commons, is one which is destined to have far-reaching effects on the social and industrial life of Great Britain. The following account of the law is based on two memoranda, explanatory of its provisions, recently issued by the British Government which deal respectively with Health Insurance and Unemployed Insurance, as embodied in Parts I. and II. of the Bill.¹

National Health Insurance.

The objects of the Bill are to effect as wide an insurance as possible of the industrial population against sickness and break-down, and to be as far as possible a preventive measure operating to reduce the amount of sickness. In comparison with the German system various points of difference are noted. The administration of the Fund is to be handed over to Societies, so that deficits due to malingering will have to be borne by the members of a defaulting society, and not by the state or the employer, whereas in Germany the system is much more bureaucratic in its management. The fact that the super-annuation of all persons over seventy years of age is undertaken by the British government, while in Germany it is a burden on the contributory scheme, makes an enormous difference in the rates of weekly payments, affording higher benefits under the British scheme. The German government makes no contribution to the cost of sickness as distinguished from invalidity, but the British scheme proposes to pay one-quarter of such cost in the case of women and two-ninths in the case of men. It is not proposed to adopt the German plan of dividing the industrial population into four classes according to the rate of wages, or to set up separ-

ate machinery for sickness and invalidity, and thus the inconvenience and trouble likely to be caused to employers will be greatly diminished.

The scope of the scheme is to extend over the whole of the United Kingdom, and the insurance will be either compulsory or voluntary. Compulsory insurance will be effected by deduction from wages, and will extend to all persons under contract of service, receiving not more than £160 yearly from their employers, except those belonging to the following classes: Soldiers and sailors; pensionable employees of the Crown or of local authorities, and clerks of railway companies; pensionable elementary school teachers; agents paid by commission or fees, and employed by more than one employer; precarious personal employments, such as luggage carriers, not connected with a trade or business; subsidiary employment, not being the principal means of livelihood; wives employed by their husbands and husbands employed by their wives; crews of fishing vessels, sharing profits. Inmates of charitable homes, who are employed in the homes, may be exempted from compulsory insurance, if they are provided with medical attendance and maintenance in sickness. The employer will be made responsible for seeing that the person employed for no money wage is insured. Exemption from deductions from wages will be allowed on request to an employed person in receipt of any pension or income of at least £26 a year not dependent on his personal exertions, or mainly dependent for his livelihood on some other person. In such cases the employer will be liable to contribute. The Insurance Commissioners will have power to extend the compulsory deduction from wages to classes of employees included in the excepted classes. Voluntary insurance will be permitted to all persons not subject to compulsory deductions, with an income not exceeding \$160 a year, who

¹Cd. 5995, price 2d., and Cd. 5991, price 1d.
London: Wyman & Sons, 1911.

are engaged in some regular occupation in which they are dependent for their livelihood, or who have been insured persons for five years or upwards. Persons under sixteen years of age do not come into the scheme of insurance, and persons over sixty-five years of age when the Act comes into force are specially provided for. Contributions will cease at seventy years.

The rates for employed contributors will be 4d. a week for men and 3d. for women, deductible from wages, and 3d. a week for the employer for both sexes. The state's contribution will be two-ninths of the benefits in the case of men, and one-fourth in the case of women, but will not be paid to foreigners who have not been naturalised, or to those who have not belonged to a society for five years. These rates are applicable only when wages exceed 2s. a day without board and lodging. Where wages are less than that the employer is to pay proportionately more.

The method of collecting contributions is as follows: Every insured person will have a contribution card, upon which the employer at each period of payment, will affix a stamp, obtained from a post office, representing the value of the contributions due both from himself and the workman, and will deduct the amount of the latter's contribution from his wages. When the card is filled, the insured person will send it to his society, or, if a deposit contributor, to the post office. The insurance commissioners can sanction other methods of collection.

The following minimum benefits are provided under the scheme.

(a) *Medical benefit.*—Treatment and attendance throughout life, and provision of medicines and medical and surgical appliances.

(b) *Sanatorium benefit.*—Treatment in sanatoria or otherwise, which may be extended to an insured person's family.

(c) *Sickness benefit.*—For men, 10s. a week, for women 7s. 6d. for twenty-weeks from the fourth day of sick-

ness, except for those under twenty-one years of age and unmarried, in which case the males receive 6s. a week for the first thirteen weeks and 5s. a week for the second thirteen weeks, and the females receive one shilling a week less.

(d) *Disablement benefit.*—Males receive 5s. a week from the termination of the sick benefit, so long as the disablement lasts, and females, 4s. a week.

(e) *Maternity benefit.*—The wife of an insured person, or a woman who is herself insured is to receive 30s. in case of confinement.

(f) *Additional benefits.*—Certain other specified benefits may be granted as the funds of any society allow. These include free medical attendance for dependents; benevolent funds for distressed members; granting sick pay from the first, second, or third day of sickness; convalescent allowances, including the building and maintaining of convalescent homes; additional invalidity or superannuation benefits; an increase of the maternity benefit; benefit for dental treatment.

Sickness, disablement and maternity benefits will be administered by approved societies, and for non-members by local Health Committees. Medical and sanatorium benefits will be administered by the local Health Committees. Rules are laid down to which the friendly societies must conform, before they are approved and authorised to administer benefits under the Act. The insurance commissioners are to be appointed by the treasury, and there will be separate ones for Scotland, Ireland and Wales. In England and Wales a local Health Committee will be constituted for every county and county borough, comprising (a) persons representing insured members of societies and deposit contributors, proportionately; (b) persons, including two women, appointed by the county or borough council; (c) two medical practitioners appointed by their colleagues; (d) one, two, or three medical practitioners appointed by the county or borough coun-

cil; (e) other persons including a medical practitioner and two women, appointed by the insurance commissioners.

Unemployment Insurance.

The scheme of insurance against unemployment embodied in Part II. of the National Insurance Bill, provides for (a) compulsory insurance in certain scheduled trades, and (b) encouragement of voluntary insurance in all trades. The trades in which unemployment insurance is to be compulsory comprise building, construction of works, shipbuilding, engineering, construction of vehicles, iron founding, and saw milling. All workmen in these industries are included, except foremen (other than manual workmen), clerks, apprentices, or persons under sixteen years of age.

Contributions to the insurance fund amount to 2½d. from the workman for each period of employment of a week or less, and the same amount from the employer. The state will contribute one-third of the total contributions from workmen and employers. The workman's and employer's contributions will as a rule be paid by the latter, by affixing a special stamp to an insurance book carried by the workman, and in the insured trades it will in general be illegal to employ any workman without obtaining from him an insurance book, and affixing the stamps at the prescribed times.

A workman may be disqualified for receiving benefits on the following grounds: (a) If he has lost employment through a stoppage of work due to a trade dispute in which he is directly involved. (b) If he has lost employment through misconduct, or has voluntarily left employment without just cause, for six weeks from the date of losing or leaving employment. (c) While he is an inmate of any prison, workhouse or other public institution, or is resident temporarily or permanently outside the United Kingdom.

A workman may without forfeiting

his claim to benefit decline an offer of employment where there is a stoppage of work due to a trade dispute, or an offer of employment at lower wages or on conditions less favourable than those he habitually obtained, or than those generally observed in any district.

No benefit is to be paid during the first week of unemployment, but thereafter a benefit of 7s. a week is to be paid up to a maximum of fifteen weeks in any twelve months. No benefit is paid to any one below the age of seventeen years, and only half benefit from seventeen to eighteen years. No more than one week of benefit can be drawn by any man for every five weekly contributions paid by him.

The administration of the scheme will be principally through the labour exchanges, but under special arrangements it may be also administered through labour organizations which themselves pay unemployment benefits. The decision as to how much benefit, if any, a workman may draw will be made by a statutory officer known as an 'insurance officer,' but there may be an appeal from his decision to a Court of Referees, consisting of one or more members from a panel of representatives of employers, and an equal number from a panel of representatives of workmen, with an impartial chairman.

The main principles with regard to unemployment which underlie the bill are: (1). That provision for unemployment must not be such as to create unemployment, and should if possible tend to diminish unemployment; (2). That compulsory provision for unemployment should be accompanied by arrangements for preserving and encouraging voluntary provision. (3). A number of specified provisions in the bill are inserted with a view to encouraging regularity of employment.

It is estimated that 2,550,000 workpeople of sixteen years of age and upwards will come within the compulsory insurance scheme at the outset. The membership of trade unions in the insured trades at the end of 1909 was 462,000, of whom about 350,000 belong

ed to unions providing unemployment benefits other than travelling pay.

It is proposed that the Bill be put into operation on July 15, 1912, but a subsequent date, not later than January 1,

1913, may be substituted for the coming into effect of the Health Insurance scheme, and not later than October 1, 1912 for the Unemployment Insurance scheme.

EFFECT OF ASBESTOS DUST ON WORKERS' HEALTH IN ASBESTOS MINES AND FACTORIES.

OCCASION having arisen for an enquiry into the dusty processes connected with the manufacture of asbestos, an investigation into the matter was made during the month of January by an officer of the Department, having reference particularly to the effect of the processes concerned on the health of those employed in the asbestos industry. The report on this subject is in the following terms:

"The only factory in Canada for the manufacture of asbestos goods is situated at Lachine, Que. The operations of this factory are confined to the making of asbestos card boards, paper, slate for roofing and corrugated sheeting. In this factory about 150 hands are employed (all males), and no complaints have ever been received of the existence of any dusty processes. The establishment is under the Inspection of Industrial Establishments Act of the Province of Quebec, a copy of which is forwarded herewith. There are no provisions in this Act or regulations specially applicable to asbestos factories as such.

"The Bell Asbestos Mines and Mills, situated at Thetford Mines in the Eastern Townships of Quebec and employing about 425 hands, are said to be among the largest asbestos properties in operation anywhere. The processes in the Bell Mines and Mills may be regarded as typical of all the others. This being the dull season, a much reduced staff of workers is employed at present in the different departments, and also owing to the cold weather the win-

dows in the mills are closed and the conditions with respect to dust are consequently now at their worst. In the mills I found 16 women and girls and about 20 boys from 14 to 20 years of age employed in the hand picking of the asbestos. In this room the atmosphere is kept moist from the evaporation of the raw fibre placed on steam pipes laid on a portion of the floor for the drying of the fibre. All the women found here looked strong and healthy, and none of them had any serious objections due to the presence of dust, which is carried off by means of strong aspirators connected with large galvanized iron pipes into special sheds to be used in the preparation of coverings and for other purposes, a small proportion being ejected through the roof. On examining the surface of the new-fallen snow around the building I noticed that it was not discolored by any dust. Other processes are crushing, screening, and carrying the fibre in bags to be picked and separated into different grades according to the length of the fibre.

"In brief, I observed in the different departments of the mills less dust than is generally found in flour mills, cotton mills, junk shops, bakeries, and in a large number of other industrial establishments.

"Work is carried on in the mills day and night. The number of hours for each shift is 10 hours during the day and 13 hours during the night, while in quarries 10 hours per day is the rule. The shifts are changed every week from day into night work. I was informed that a few years ago

workpeople in the mills were supplied with respirators, but since the adoption and the installation of fans and dust conveyors the employees have objected to their usage.

"The owners of the mills are now studying a new method by which all the offensive dust will be collected by means of electric magnets, and if this is found satisfactory the system referred to will be introduced in the mills.

"The work of extracting the mineral is done in open quarries and in underground tunnels with an incline sufficient to draw out all offensive dust.

"One of the oldest medical practitioners in Thetford expressed the view that the asbestos dust floating in the atmosphere of the cobbing

room had a weakening effect on the lungs of those employed. He had, he said, several cases of tuberculosis under treatment, but recognized that conditions in the mills had been declared greatly improved since the introduction of the new apparatus for allaying the dust. Another medical practitioner of long standing stated that the employees of the Asbestos Company affected with lung troubles had been so affected previous to their employment in the mills. It was stated generally that the record of deaths from lung diseases is not higher in the centres of the asbestos industry than elsewhere.

"The number of workpeople engaged in the asbestos industry in and around Thetford is between 3,000 and 4,000."

INTERVIEW OF TRADES AND LABOUR CONGRESS WITH DOMINION GOVERNMENT.

IT has been the practice for many years for a deputation from the executive committee of the Trades and Labour Congress of Canada to wait annually on members of the Dominion Government to present resolutions adopted at the last preceding convention of the Congress. The convention of 1911 was held in Calgary in September last, the proceedings of the same being reported in the issue of the *Labour Gazette* for October.

A deputation which desired to place before the Government certain of the resolutions adopted at the congress waited on members of the Government on Monday, January 8th. The interview with the Government took place in the Prime Minister's office, there being present the Right Honourable R. L. Borden, Prime Minister, the Honourable T. W. Crothers, Minister of Labour, and the Honourable L. P. Pelletier, Postmaster General. The deputation comprised the majority of the members of the executive committee and Mr. J. G. O'Donoghue, the Parlia-

mentary Solicitor of the Trades and Labour Congress. Various resolutions passed were placed before the Prime Minister and his colleagues, and explanatory statements having relation to the same were made by the various members of the deputation. The Prime Minister promised that all matters placed before him should receive careful consideration.

The deputation was introduced by Mr. P. M. Draper, the secretary of the Congress. The first topic discussed was the advisability of continuing public grants to the Grand Trunk Pacific Railway Company in view of the dispute between that Company and certain of its employees in western Canada. Mr. Bancroft and Mr. Somerville presented the views of the Congress in this connection. The second resolution had reference to alleged misrepresentation of labour conditions in Canada in the advertisements of certain employers; the administration of the Immigration Act was also discussed in this connection. Mr. James Simpson then intro-

passed resolutions with reference to the Lord's Day Act, the extension of the fair wage clause to apply in cases where Government funds are granted in aid of the construction of public buildings, and the amendment of the Alien Act by the enactment of a new law to be enforced by the Immigration branch of the Interior Department. On behalf of the letter carriers in the employ of the Government Mr. McMordie and Mr. Guy presented petitions for superannuation, improvement in uniforms, an increase in provincial allowances, and improved classification. Mr. Lodge presented a resolution requesting a monthly statement as to unemployment in the *Labour Gazette*. The question of Asiatic immigration was discussed by

Mr. Bruce. Mr. Draper then presented resolutions favouring the repeal of the Industrial Disputes' Investigation Act, and asking that the commission on technical education be approved by the present Government and its report published in as complete form as possible. Mr. Draper also dealt with the eight-hour day law, the Dominion Health law, the method of paying wages on railways, and various amendments to the Railway Act. Other subjects dealt with were, the protection of linemen; the abolition of the Senate, the improvement of sanitary conditions in construction camps, the bounty system, the protection of railway carmen, and boiler inspection.

ANNUAL MEETING OF THE COMMISSION OF CONSERVATION.

WHAT the Commission of Conservation has just closed a year of marked usefulness, was evidenced by the reports presented by the officials of the several committees at the Annual Meeting in Ottawa on the 6th of January.

The Hon. Clifford Sifton, Chairman of the Commission, presided. His introductory address was brief, but during the course of the meeting he spoke at some length on the great promise of the fur industry in Canada. He referred, also, to the work of the Commission in connection with the establishment of a National Health Laboratory, and to the result of the Commission's campaign to make railway companies responsible for forest fires started by their locomotives. Instead of himself outlining the work of the Commission in detail, the chairman called on the officials in charge of the work to present reports. Dr. Chas. Hodgetts outlined the work undertaken by the Committee on Public Health during 1911. He detailed the steps that had been taken to interest the Federal Government in tuberculosis, syphilis, and in the establishment of

the latter and action that will probably be taken in the near future.

During 1911 a careful study was made of town-planning and housing conditions in Canada and Europe. A lengthy report on this subject will be published during the present year. Along the same line was the study of sanitary conditions in rural districts in Canada. It was recommended that bulletins dealing with the question of rural sanitation be sent out periodically.

The establishment of a department of public health, under the Secretary of State, was also recommended. At present the forty or fifty medical officers in the employ of the Government work under a number of ministers. The suggestion is to centralize this part of the service so as to prevent unnecessary duplication. Such a provision would enable the Federal health authorities to collect and collate vital and other statistics from each of the provinces. Such a centralizing of effort would be especially valuable in the case of the establishment of a National Laboratory.

The desirability of passing legislation that would render possible the establishment of public abattoirs in towns and cities was also emphasized.

The report of the Committee on Agriculture was read by Mr. F. C. Nunnick, agriculturist to the Commission. The report reviewed the work done during 1911 in investigating farming conditions and methods in Canada; and the experiments carried on in Quebec in growing alfalfa. Resolutions were passed by the meeting authorizing the committee on agriculture to continue their investigation into agricultural conditions during 1912; to carry on under-drainage demonstrations where they might prove beneficial; and to extend the alfalfa experiments to the other provinces.

Mr. W. J. Dick, mining engineer of the Commission, presented a report for the Committee on Minerals. He referred especially to the waste of natural gas that is going on in Alberta, and urged that legislation be passed such as has been in force in Ontario, looking to the prevention of this waste. He also referred to the making of coal briquets as a method of preventing the enormous waste of coal dust and slack coal. Reference was also made to the abnormal number of mine accidents in Canada, and it was urged that steps should be taken to prevent unnecessary loss of life in mines. The peat industry in Canada was discussed at some length, and Mr. Sifton presented a memorandum from Dr. Haanel, which showed that the experiments at Alfred had been a success and that peat could now be produced in commercial quantities in a manner that makes it considerably cheaper than coal or wood. A resolution was passed urging the Government to continue these experiments still further.

Mr. M. J. Patton presented the report for the Committee on Fisheries and Game. He referred especially to the necessity of making more first hand investigations into the conditions of Cana-

dian fisheries, and with the necessity of taking immediate steps to foster the oyster industry in the Maritime province.

Mr. L. G. Denis and Mr. A. V. White each presented reports on the work of the Committee on Waters and Water-powers. Mr. Denis outlined the work done in the prairie provinces during 1911, in obtaining data on water-power chiefly on the Athabaska, Peace and Saskatchewan rivers. He advocated the establishment of gauging stations on the more accessible rivers, on which water storage and conservation will within a few years be a necessity in order to supply the demand for power. Another matter, Mr. Denis held, that requires the attention of the Commission, is the making of a thorough "power survey" of the Dominion to ascertain the amount and proportion of different kinds of power in different localities, and also other power statistics that might be obtainable. Mr. A. V. White reported concerning his work on the water-powers of British Columbia, which he suggested should be continued during 1912. A memorandum respecting the work of Altitudes in Canada, which has been carried out by Mr. G. H. Ferguson, was presented by the Secretary.

Dr. Fernow gave an excellent summary of his work in connection with the forest survey of Nova Scotia. A report of this work will be published by the Commission.

Dr. Jas. W. Robertson gave an address on the work of the Committee on Lands, and Mr. Campbell, Dominion Superintendent of Forestry, outlined legislation and the work that has been done with respect to Dominion Forest reserves, especially the new Rocky Mountains reserve.

A public meeting was held in the normal school in the evening. Addresses were given by Dr. Robertson on Agricultural Conditions in Canada, and Dr. Hodgetts on Housing and Town Planning.

BRITISH COLUMBIA FEDERATION OF LABOUR.

THE annual convention of the British Columbia Federation of Labour was held at Victoria, B.C., commencing on Monday, January 22nd, 1912, and remaining in session for five days. Premier McBride and Mayor Beckwith welcomed the delegates to the city. The convention opened with addresses from Mr. C. Sivertz, secretary of the Victoria Trades and Labour Council; Mr. J. W. Wilkinson, vice-president of the Federation (who presided in the absence of the president), Mr. Parker Williams, M.P., and Mr. L. Dix, fraternal delegate from Washington State Federation of Labour. Eighty-six delegates from every section of the province were in attendance, compared with sixty last year. The officers' reports were read and showed a steady and healthy growth during the year. The Treasurer's report stated that the finances were in a satisfactory condition.

On Monday evening the delegates were entertained by the Victoria Trades and Labour Council.

Tuesday was devoted to presenting resolutions, of which there were more than eighty, covering almost every phase of the labour question. Routine matters were also considered.

Wednesday afternoon the election of officers took place. The following were elected:

President—J. W. Wilkinson, Vancouver.

Vice-Presidents (7)—R. P. Pettipiece, Vancouver; J. H. McVety, Vancouver; J. Roberts, Moyie; C. Sivertz, Victoria; B. D. Grant, New Westminster; J. J. Taylor and George Bent, Smith.

Secy.-Treasurer—Victor R. Midgley, Vancouver.

Delegate to Dominion Trades and Labour Congress—R. P. Pettipiece.

Fraternal Delegate to Washington State Federation of Labour—J. H. McVety, Vancouver.

The convention passed resolutions asking for the repeal of the Lemieux Act; favouring closer association in the metal trades; demanding an amendment to the factory act to provide safety clutches to ladles used in the metal trades; demanding the limiting of the issue of steam engineers' certificates to competent men, and the regulation of the issue of temporary certificates; insisting on the certificate being issued to the actual operator of the engine; to prevent persons suffering from disease from preparing food in hotels and restaurants; condemning the employment of Chinese cooks on railway construction camps; approving the free text book system; in favour of milk inspection; against exemption of church property from taxation; in favour of women's suffrage; in favour of frequent pay days and protection of industrial workers, particularly in mines; in favour of equal examinations for electrical as for steam workers; advocating a record of accidents to be kept by local bodies; advocating industrial unionism; advocating a coal commission for British Columbia; advocating government control of telephones; in favour of abolition of money deposits for elections; in favour of regulations for cables and windlasses around mines.

Four resolutions, dealing with the en-

dorsement or otherwise of political action in connection with the Federation, were presented. The Committee on Resolutions offered the following resolution as a substitute, which was adopted, after several hours' debate:

"Whereas, the sense of this convention being in favour of independent political action, and whereas resolutions have been received urging the endorsement of the doctrine of socialism, therefore be it resolved that the question of the endorsement of the doctrines of socialism be submitted to specially summoned meetings of the affiliated unions, returns of the vote to be sent to the secretary-treasurer of the Federation for compilation."

A resolution was unanimously passed calling upon the Provincial Government to re-enact the Natal Act. Resolutions were adopted favouring the Federal

Government Annuity scheme; the amendment of Alien Labour Act; separate schools for Asiatics; the Women Union Label League; a forty-eight-hour week for cooks and waiters; better ventilation of printing offices; endorsing the "B. C. Federationist" as the official organ of the Federation; amendment of the Workmen's Compensation Act.

The Federation decided to hold the next convention in Victoria. The per capita tax was increased from 1 to 2 cents per member.

The Executive of the Federation presented several of the resolutions passed at the convention to the Provincial Government, which promised careful consideration and an early reply.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR IN THE FOURTH QUARTER OF 1911.

THE number of employees affected by changes in wages and hours in Canada during the last quarter of the calendar year 1911 was considerably less than in the preceding quarter, but the changes that occurred continued to show an upward tendency in wages. Upwards of 9,955 employees were involved in these changes, which resulted in an aggregate increase of over \$11,400 per week. There was only one change reported in working hours during this period.

The following table shows the approximate number of employees affected in each group of trades.

Industry or Group of Trades.	Approximate number of employees affected.
Mining	7,000
Building trades	36
General transport	300
Miscellaneous trades	544
Public employees	2,675
Total	9,955

In another table is shown changes in rates of wages according to each class of workmen affected, with the numbers affected in each case, the date from which each change took effect, the particulars of the change, and the estimated rates of wages and hours

week, and the changes per head per week, in so far as they could be ascertained.

Changes by Industries and Groups of Trades.

Mining.—The most important change during this period took place on November 18, when an agreement was signed by the Western Coal Operators Association, granting increases in wages averaging from five to ten per cent., to about 7,000 coal miners in Southern Alberta and Eastern British Columbia. As the changes involved special modifications in a great variety of classes, and in many cases had reference to piece work prices, a detailed analysis is not practicable, but the wages prevailing under the old and new agreements have already been published in the *Labour Gazette*.¹

Building trades.—On October, the wages of twenty-two lathers at Victoria, B.C., were changed from a rate of \$3.50 per thousand laths, the men supplying their own nails, to \$3.00 per thousand or \$5.50 for an eight-hour day, with the nails supplied them. On November 1 the wages of plumbers at Berlin, Ont., were advanced to 35 cents an hour with a nine-hour day. They had previously received 30 cents an hour and a ten-hour day. This change was in accordance with an agreement made on August 22, after a strike.

Railway Service.—In December, the wages of street railway employees at Kingston, Ont., were voluntarily in-

creased from \$1.50 per day to a rate of \$1.55 per day for new men and \$1.70 per day for old employees.

General Transport.—On November 17, about 300 freight handlers employed by the shipping companies at St. John, N.B., received an advance in wages from seventeen to twenty-one cents per hour.

Miscellaneous trades.—On December 1, 347 employees of the Consumers' Gas Company received an increase in wages, stokers and machine operators being advanced from \$2.25 to \$2.40, and from \$2.50 to \$2.95 per day, and outside men from \$2.00 to \$2.10 per day, and from \$2.05 to \$2.15 per day.

On October 1, an increase was voluntarily granted to 197 telephone operators at Ottawa, Ont., the former wage scale of \$17.50 to \$30 per month being changed to a scale of \$5 to \$8.50 per week.

Public employees.—The most important change was a general advance in the salaries and wages paid to employees on the various government canals throughout the country, which dated from April 1. The changes affected 1,964 employees, and represented increases of from \$1.50 to \$5.78 per week.

About 100 cement workers employed by the municipality of Victoria, B. C., were granted an increase from \$2.75 to \$3.00 per day from July 14, upon the request of their union.

In October, eleven employees of the Public Library at Hamilton, Ont., were granted an increase in their salaries, amounting to fifty cents per week.

¹See the *Labour Gazette*, August, 1909, page 227; and December, 1911, page 541.

Office Fittings, Post Office, Goderich, Ont.

Supply and installation of post office fittings: Goderich, Ont. Name of contractor, The J. T. Schell Company, Alexandria, Ont. Date of contract, January 1912. Amount of contract, \$1,009.

FAIR WAGE CLAUSE.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and a claim therefor is filed in the office of the Minister of Public Works, and proof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the Contractor.

Wharf and Approaches, Digby Island (Prince Rupert) B.C.

Wharf and two approaches: Digby Island (Prince Rupert), B.C. Names of contractors, Naylor Brothers, Vancouver, B.C. Date of contract, January 19, 1912. Amount of contract, \$57,625.

Making and repairing rubber dating stamps and type, also other stamps	65 70
Supplying stamping material and wooden boxes, and repairing stamping pads	1,071 07
Supplying mail bags	1,721 95
Repairing mail bags	2,624 71
Making and repairing mail locks and supplying mail bag fittings	3,190 70
Repairing portable letter boxes, parcel receptacles, Railway Mail Clerks' tin travelling boxes and street letter boxes, and supplying Railway Mail Clerks' tin boxes	138 91
Making and repairing miscellaneous articles of Postal Stores	301 85
Making and supplying articles of official uniform	2,088 63

TRADES AND LABOUR CONGRESS OF CANADA AND PROVINCIAL LEGISLATION.

DURING January delegations of the Trades and Labour Congress of Canada waited upon the provincial governments of Quebec and Ontario and laid before them resolutions passed at the last annual congress held at Calgary, Alta., in September, 1911. Resolutions presented to the government of the Province of Quebec recommended amendments to the Workingmen's Compensation Act to the following effect:

1. In the case of temporary incapacity through accident an indemnity equal to half the salary to be paid the labourer if the incapacity lasts longer than seven days, payment to be made from the first day after the accident.

2. To amend the law so that the indemnity in case of death be increased from \$2,000, to \$3,000.

3. That all medical expenses occasioned by accident be paid by the employer, together with the sum of fifty dollars for funeral expenses in the event of death, and that no exception be made for members of a society which pays funeral expenses.

4. That in the case of legitimate and natural children recognized as such before the accident the employer will provide for their wants until they have

reached the age of twenty. At present the age is fixed at sixteen. That the law shall apply when the victim is the partial support of a family, not only when he is the whole support.

5. To change the basis of indemnity from \$600 to \$800, in the case of salaries under \$1,000, and to pay the indemnities monthly instead of quarterly.

6. That the Superior Court deal with all appeals in connection with the present law.

7. That the law apply to labourers in the lumber industry as well as to those in other industries.

8. That indemnities be payable from the date of the accident where the injuries are permanent.

Other resolutions presented asked for compulsory education in Catholic schools; the extension of the work of inspectors to cover scaffolding; the appointment of one foundry and four additional factory inspectors to be chosen from the ranks of organized labour; the granting of a larger autonomy to the city of Montreal; and an eight-hour day on provincial public works.

The following recommendations were made by a delegation of the Trades and Labour Congress which waited upon Sir James Whitney, Premier of Ontario:

1. That the government give municipalities the right to tax land values only.

2. The establishment of an eight-hour day and a minimum wage scale. An eight-hour working shift in all cases where work is carried on consecutively during the whole twenty-four hours, thus giving employment to a greater number of men, and affording to all the opportunity for rest and recreation.

3. A uniform system of sanitary legislation based upon the latest requirements governing the installation of sanitary plumbing, and providing for the examination and licensing of those engaged in the industry.

4. Abolition of all barber colleges in the province.

5. Stricter measures whereby the health of the inhabitants of mining and lumber camps will be better safeguarded than in the past.

6. The barring of Orientals from any employment, directly or indirectly, on any licensed premises.

7. An amendment to the Factories' Act to eliminate from foundries the danger to employees from obnoxious gases arising from the molten metals, also from the faulty heating and ventilation, which has resulted in a large number of those so employed being stricken with consumption.

8. An increase in the number of factory inspectors, such inspectors to be trade unionists, to devote

particular attention to such industries as shall be indicated by local trades councils as requiring urgent improvement.

9. The appointment of at least one factory inspector in every industrial centre.

10. To make it a criminal offence on the part of employers and their agents who discriminate against a labour union member because of his membership, or because of the active part he or they may have taken in union matters.

11. That it be made compulsory that the most up-to-date safety appliances be provided for high tension electric power linemen.

12. The repeal of laws providing for the eviction of tenants, and for distraining upon the goods and chattels for arrears in rent, which are used largely against striking workmen, where such workmen are tenants in houses owned by employing corporations.

13. To insist on the co-operative system of technical education, whereby an apprentice may attend the technical school in the daytime, the employer to pay his wages during that time; and against night labour for apprentices in technical schools.

14. That steps be taken to have the fair wage clause inserted in all provincial contracts; that a fair wage officer be appointed; and that in all cases where the government contributes part of the cost of a building the fair wage clause be insisted upon.

A delegation of the Trades and Labour Congress, which waited upon the government of Manitoba, in December, presented a memorial requesting the passing of legislation to the following effect:

1. An Act to create a Labour Bureau, and the establishment of a government operated employment bureau under the Department of Public Works.

2. The Factory Act to be amended to include Chinese laundries.

3. The enactment of a Shops Act, similar to the Shops Act of Ontario.

4. Legislation requiring street railway companies to equip street cars with the most approved safety appliances; to abolish running boards on open cars, and in case of accident the car to which the accident occurs to be taken in charge by some responsible person, and no repairs allowed until after having been inspected by some competent person.

5. Legislation governing the erection of scaffolds, floors, and the proper shoring of excavations, for the purpose of the prevention of the loss of life and physical injury, in the erection of buildings and construction of sewers, drains and other excavations, especially modern steel structures.

6. That an inquest be held in cases of sudden and violent death.

7. An act prohibiting the employment of white females in Oriental restaurants, or other Oriental places of business.

8. Abolition of the deposit now required to be put up by candidates in provincial elections.

ONTARIO COMMISSION ON WORKMEN'S COMPENSATION.

SEVERAL important sittings were held during January by Sir William Meredith, special commissioner of Ontario to investigate the question of workmen's compensation, at which the testimony of representatives of employers and labour unions was heard. A brief was presented by the Canadian Manufacturers' Association, embodying the views of a large committee of representative manufacturers, which was appointed on October 12, 1911, at the last annual meeting, to study the question. The brief was summarized as follows:

First: For reasons both humanitarian and economic, the prevention of accidents should be a prime consideration in any scheme of workmen's compensation, and no system will be satisfactory which will not tend to produce the maximum of effort and result in conserving the life, health and industrial efficiency of the workman.

Second: Relief should be provided in every case of injury arising out of industrial accident. Such relief should not be contingent upon proof of fault on the part of the employer, but gross carelessness, drunkenness or intentional wrong on the part of the workman should be penalized in some way.

Third: The system of relief should be adapted to cover wage-earners in every industry or calling involving any occupational risk, and should not be confined to such industries as railroading, manufacturing, building, etc.

Fourth: The relief should be as far as practicable by way of substitution for the wages of which the injured workman and his dependents are deprived by the injury. It should as a rule be periodical and not in a lump sum.

Fifth: The relief should be certain. It should not depend upon the continued solvency of the employer in whose service the injury was sustained.

Sixth: The amount of compensation should be definite and ascertainable both to the workman and the employer. The system should entirely displace the present method of compensation by an action for damages, and the employer should not be subjected to any further or other liability except in cases of gross carelessness or intentional wrong on the part of the employer.

Seventh: The funds for relief should be provided by joint contributions from employers, workmen and the state. Employers and workmen should pay in such proportions as represent the number of accidents occurring by reason of the hazard of the industry and the fault of the employer on the one hand and the fault of the workman on the other. The state should contribute a portion sufficient to cover the expenses of administering the system.

Eighth: The system of relief should be such as to secure in its administration a maximum of efficiency and economy, and as large a proportion as possible

of the money contributed should be actually paid out in compensation.

Ninth: The procedure for the adjustment of claims should be as far as possible dissociated from the regular courts of law. It should be simple, and calculated to involve in its operation a minimum of friction between employer and employee.

Tenth: The system of compensation should be directly associated with a system of inspection with a view to the prevention of accidents and a system of prompt and expert medical attendance to mitigate the effect of injuries.

Eleventh: The system should be such as to secure as liberal measure of relief as possible without undue strain upon industry.

Twelfth: The system should be such as to afford some promise of permanency.

In a memorandum presented to the Commissioner by the Trades and Labour Congress of Canada on December 27th, the following suggestions were made:

1. That the new Act should cover all employments, the employees of the Province municipality, county, or other administrative bodies in the Province to be covered the same as employees in industries.

2. Compensation to be paid for all injuries arising out of and in the course of employment.

3. Compensation for being disabled or other injuries arising out of or as the result of a specified occupation, the said disablement and injuries being in the nature of occupational diseases.

4. Entire cost of compensation to rest upon employer.

5. In the case of injuries resulting in death, the dependents, as outlined in the British Act, and State of Washington Act, shall be the beneficiaries, with the expenses of the funeral as outlined also.

6. The doctrine of negligence on the part of employee or employer, fellow servant, or otherwise, shall have no place in the new legislation.

7. State insurance in connection with Compensation Act.

8. The creation of a Provincial Department of Insurance with three commissioners for the purpose of administering the Act.

9. Compulsory insurance of employees in the State Department by a yearly tax levied upon the industry or occupation, covering the risk of the particular industry or occupation.

10. The tax shall be upon the yearly wage roll.

11. No employer shall attempt to pay the tax by deduction of wages of employee, by agreement or otherwise, such action to be regarded as a gross misdemeanor, as provided for in the State of Washington legislation.

12. The schedules of payment under the Act to be based upon the payments under the British Act, with the proportional increases due to the difference in the wages in Ontario, reflecting the difference in the cost of living.

13. The Provincial government shall provide revenue for the creation of a Department of Insurance.

TRADE DISPUTES DURING THE MONTH OF JANUARY, 1912.

THERE were no industrial disputes of serious consequence during January, the most important one being a general lockout of plasterers at Winnipeg, Man., which, however, only took place a few days before the end of the month. In the case of most of the disputes of previous months normal conditions were resumed so far as the employers were concerned.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during January was nine, one more than in December, and two more than in January, 1911. About twenty firms and 1,105 employees were involved in these disputes, fourteen firms and 697 employees having been involved in new disputes.

Loss of time in working days.—The loss of time to employees through trade disputes during January was approximately 12,875 working days, compared with a loss of about 39,930 days in December, and 29,100 days in January, 1911.

Trades affected by new disputes.—The following table shows the trades affected by the new disputes, and the number of employees in each group of trades:—

Trades.	No. of disputes.	No. of employees.
Building	1	250
Metal trades	1	202
Clothing trades	2	145
Railway construction	1	100
Total	5	697

Localities affected by new disputes.—One of the new disputes occurred in the Province of Quebec, two in the Province

of Ontario, one in Manitoba, and one in British Columbia.

Causes of disputes.—The following were the causes of the new disputes of the month:—

Cause.	No. of disputes.
For increase in wages	1
Against reduction in wages	1
For recognition of Union and changes in shop conditions	1
For better conditions and higher wages...	1
Dispute over right to do certain work...	1
Total	5

Methods of settlement.—Of the nine disputes in existence at the beginning of the month, seven were either definitely terminated or ceased to affect conditions, so far as the employers were concerned, leaving only two still in existence at the close of the month. Of the disputes that were terminated, three were settled by negotiations between the parties concerned, one partly by negotiations and partly by the places of the strikers being filled, one by the resumption of work on the part of some strikers and the places of others being filled, and one by the places of all the strikers being filled. In one case the method of settlement was not reported.

Results of disputes.—The employers were successful in two of the disputes that were terminated, compromises were reached in two others, in one case some of the employees were successful, and in the remaining two cases the results were not reported.

Disputes which commenced Prior to the beginning of the Month.

The trade disputes in existence during January, which began in previous months, comprised strikes of machinists and boilermakers between Westfort, Ont., and Edson, Alta., pulpmill hands

at St. George, N.B., iron moulders at London, Ont., and cement workers and labourers at Wingham, Ont.

Strike of Machinists and Boilermakers of the Grand Trunk Pacific Railway.

No definite settlement was reported in a strike of machinists and boilermakers of the Grand Trunk Pacific Railway, which began on October 10, 1911, and extended from Westfort, Ont., to Edson, Alta. It was claimed, however, by the company that it had ceased to be affected, the places of the strikers having been filled. The matters in dispute related to hours, wages, and conditions of employment. About 300 men were involved in the dispute.

Strike of Pulpmill hands at St. George, N.B.

No change in the situation was reported in the case of a strike of fifty-two pulpmill hands at St. George, N.B., who stopped work on April 26, 1911, on account of the refusal of the employer to grant a demand for an eight-hour day instead of thirteen and eleven hours, with an increase in the minimum wages.

Strike of Iron Moulders at London, Ont.

Industrial conditions ceased to be affected by a strike of iron moulders at London, Ont., which began on June 5, on account of the refusal of three firms to grant the same minimum wage for a nine hour day as had been paid for a day of ten hours. Out of sixty men who were originally involved in this dispute, only six were still out of employment in January, the rest having either found work on the terms demanded, or secured other employment.

Strike of Cement Workers and Labourers at Wingham, Ont.

No settlement was reported in the case of a strike of cement workers and

labourers at Wingham, Ont., which took place on December 19, on account of the refusal of the employers to grant a demand for an increase in wages from sixteen to twenty cents per hour, but conditions ceased to be affected by the dispute.

New Disputes.

The new disputes of the month involved plasterers at Winnipeg, Man., cloakmakers at Toronto, Ont., employees in rolling mills at Montreal, Que., and railway construction employees at Skeena River, B.C.

Dispute of Plasterers at Winnipeg, Man.

On January 24, five plasterers working for the firm of Messrs. Depew & Company in the construction of a building for the Winnipeg Publicity Bureau at Winnipeg, Man., stopped work on account of the employment of carpenters to fix staff plaster in place. The plasterers' union claimed the right to do this work by custom and by agreement, but the employers claimed that the work was of an exceptional character. The Union referred the dispute to a Local Joint Board of Arbitrators, as provided by an Agreement with the Builders' Exchange, but it was alleged that the Master Plasterers' section of the Builders' Exchange refused to arbitrate, and the men on that job accordingly went on strike. On January 27 a general lock-out was declared by the employers, in which about forty firms and 250 plasterers were involved. No settlement of the dispute took place during the month, and on January 31 the Agreement between the Builders' Exchange and the Plasterers' Union expired. The plasterers claimed that they were ready and willing to arbitrate the dispute under terms of the Agreement, or under the Industrial Disputes Investigation Act, 1907. It was also stated by them that the local carpenters' unions had not so far laid any claim to this work.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES C, No. 136.

TABLE OF TRADE DISPUTES DURING THE MONTH OF JANUARY, 1912.

Occupation	Locality	Alleged Cause or Object	No. of Firms of or Estab- lishments affected		Approximate No. of Employees affected.				Date of commen- cement	Date of termi- nation	Result
			Di- rectly	Indi- rectly	Directly		Indirectly				
					Males	Fe- males	Males	Fe- males			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.											
<i>Building Trades—</i> Cement workers and labourers....	Wingham Ont. . .	For increase in wages from 16 to 20 cents per hour.....	1	50	Dec. 19	No settlement reported, but con- ditions ceased to be affected.
<i>Metal Trades—</i> Iron moulders.....	London, Ont.	Men demanded that a mini- mum wage for a ten hour day be paid for a day of nine hours	3	6	June 5	No settlement reported, but con- ditions ceased to be affected. Many strikers had obtained work on terms demanded.
<i>Railway Service—</i> Machinists and boilermakers	Westfort Ont. and Edson, Alta.....	Failure to reach new agree- ment as to hours, wages and conditions of employment.	1	300	Oct. 10 Jan.	No settlement reported, but company claimed to be no longer affected.
<i>Miscellaneous trades</i> Pulpmill hands.....	St. George, N. B. . .	For day of eight hours instead of eleven and thirteen with increase in minimum wages	1	52	April 6	No settlement reported at end of month.

DISPUTES WHICH COMMENCED DURING THE MONTH.

<i>Building Trades—</i> Plasterers	Winnipeg, Man ..	Lockout on account of strike, plasterers claimed work being done by carpenters	40	250	Jan.	27	No settlement reported at end of month.
<i>Metal Trades—</i> Employes in rolling mills.....	Montreal, Que.....	Against reduction in wages ..	1	32	170	Jan.	20	Jan.	29 Work resumed on employers terms by some, places of others filled.
<i>Clothing Trades—</i> Cloakmakers	Toronto, Ont.	For signed agreement involving recognition of union and changes in shop conditions.	1	35	25	Jan.	8	Jan.	28 Agreement signed, a compromise
Cloakmakers	Toronto, Ont.	For increase in wages.....	1	35	50	Jan.	9	Jan.	10 Slight increase granted, a compromise.
<i>Railway construction</i> Labourers, bridge builders and sand excavators.....	Skeena River B.C.	For better conditions, food supplies, quarters & wages	1	100	Jan	Jan	Jan	Settled in a few days, particulars not reported.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is on only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention, moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

Strikes of Cloakmakers at Toronto, Ont.

On January 8 a strike of cloakmakers employed by Messrs. M. Pullan and Sons took place at Toronto, Ont., on account of the refusal of the employers to sign the following Agreement presented by the Joint Board of the Cloakmakers' Union of Toronto:

1. None but Union men in good standing, locals numbers 14, 93, and 83 shall be employed unless no such is procurable.
2. The price committee of the employees, pressers, operators, skirt and coat finishers, including the shop chairman chosen by the employees from the employees, together with a representative of the firm shall determine the prices for the operation, pressing, and finishing of the garments.
3. No employees can be discharged without the consent of the shop chairman or union.
4. The firm shall not interfere with the shop chairman in the execution of his duties.
5. All work shall be equally divided among the employees in the dull season.
6. No garment except samples shall be offered to any employees for making up unless the price for the making has previously been determined by the above mentioned committee.
7. No work shall be given outside the shop for making up, also no contracts of any description shall exist in any department of the making up of the garments.

The dispute was terminated on January 28, when an Agreement was signed on the following terms: A new list of prices to be in force, equivalent to an increase of about ten to fifteen per cent. above the former rates. Piece work to be given out direct by the firm to workers, instead of to a sub-contractor as formerly. Better sanitary regulations to be made in the workshop. There was no formal recognition of the Union in the Agreement. There were about sixty employees involved in this dispute, of whom thirty-five were male and twenty-five female employees.

On January 9 a strike of cloakmakers employed by the firm of Messrs. John

Northway and Son took place at Toronto, Ont., with the object of obtaining an increase in wages. The dispute was settled on the following day, a slight increase being granted. About thirty-five male and fifty female employees were involved in this dispute.

Dispute of employés in Rolling Mills at Montreal, Que.

On January 20 the wages of certain employees of the Montreal Rolling Mills at Montreal, Que., were reduced. The classes of workpeople involved were heaters, spell hands, helpers and firemen, to the number of thirty-two, sixteen in each of the two mills. Negotiations having failed to avert the reduction, all these men stopped work. The mills then closed down, throwing about 170 other men out of employment, until January 29, when they were re-opened. Some of the men returned to work on the employers' terms, and the places of others were filled.

Strike of Railway construction employees at Skeena River, B.C.

A strike of about one hundred labourers, bridge builders and sand excavators, employed on the construction of the Grand Trunk Pacific Railway, was reported to have occurred at the Skeena River, B.C. The cause of the dispute was stated to be a demand for better conditions with regard to food supplies, quarters, and wages. It was reported that the dispute was settled in a few days, but particulars of the settlement were not received.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of January, and which have been reported to the Department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JANUARY, 1912.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of British Columbia, to the office of the factories inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

dents of the month by industries and groups of trades:—

STATEMENT OF ACCIDENTS DURING THE MONTH OF JANUARY, 1911, BY INDUSTRIES AND GROUPS OF TRADES.

Navigation.....	1	5	6
Miscellaneous.....	3	9	12
Public Employees.....	1	13	14
Miscellaneous Skilled Trades.....	4	15	19
Unskilled Labour.....	5	7	12
Total.....	86	214	300

The disasters of the month involving the death of more than one workman were:—the derailment of a wrecking train by a snowslide near Revelstoke, B.C., by which a brakeman and three sectionmen were killed; a premature explosion of dynamite on construction work north of Nipigon on the line of the Canadian Northern Railway by which two labourers were killed and five injured; and a head-on collision of two trains near Barwick, Ont., by which a fireman and a brakeman were killed.

A detailed record of the industrial accidents of the month by industries and groups of trades is as follows:—

Agriculture.—There were seven fatal and nine non-fatal accidents recorded during the month of January, 1912, compared with five fatal and thirteen non-fatal accidents during December, 1911, and nineteen fatal and twenty-one non-fatal accidents during January,

INDUSTRIAL accidents occurring to 300 individual work people in Canada during the month of January, 1912, were recorded by the Department of Labour. Of these, 86 were fatal and 214 resulted in serious injuries. In addition 2 fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before January, 1912.

In the preceding month there were 84 fatal and 194 non-fatal accidents recorded, a total of 276, and in January, 1911, there were 91 fatal and 206 non-fatal accidents, a total of 297. The number of fatal accidents recorded in January, 1912, was, therefore 2 more than in the preceding month and 5 less than in January, 1911. The number of non-fatal accidents recorded in January, 1912, was 20 more than in the preceding month and 8 more than in January, 1911. Altogether there were 22 more industrial accidents recorded in January, 1912, than in the preceding month and 3 more than in the same month of the preceding year.

Of — returns received during the month giving the ages of the victims of industrial accidents, — referred to persons under twenty-one years of age, — to persons between twenty-one and forty-five, and — to persons over 45. — persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the acci-

1911. Of the fatal accidents, three were caused by falling trees, and one each by barn door striking victim, live stock, and by being run over.

Fishing and Hunting.—There were two fatal and no non-fatal accidents recorded during the month of January, 1912, compared with one fatal and one non-fatal accident in December, and three fatal accidents in January, 1911. The fatalities were caused by drowning.

Lumbering.—There were four fatal and seven non-fatal accidents recorded during January, 1912, compared with four fatal and eight non-fatal accidents during December, and three fatal and nineteen non-fatal accidents during January, 1911. Of the fatal accidents, two were caused by exposure and two by falling trees.

Mining.—There were fourteen fatal and fifteen non-fatal accidents recorded during January, 1912, compared with sixteen fatal and fourteen non-fatal accidents during December, and twenty fatal and eight non-fatal accidents during January, 1911. Of the fatal accidents, five were caused by explosions, four by falling material, two by mine cars, two by falls, and one by burning.

Railway construction.—There were nine fatal and twelve non-fatal accidents recorded during January, 1912, compared with one fatal and one non-fatal accident in December, and seven fatal and seven non-fatal accidents in January, 1911. Of the fatal accidents, five were caused by explosions, three by falling material, and one by collision.

Building trades.—There were five fatal and fifteen non-fatal accidents recorded during January, compared with nine fatal and thirty-one non-fatal accidents in December, and four fatal and fifteen non-fatal accidents in January, 1911. Of the fatal accidents, three were caused by falls, and one each by electrocution and machinery.

Metal, engineering and shipbuilding trades.—There were seven fatal and

forty-four non-fatal accidents recorded during January, compared with five fatal and forty-two non-fatal during December, and six fatal and thirty-two non-fatal accidents during January, 1911. Of the fatal accidents, two were caused by machinery, and one each by electrocution, fall, flying material, drowning, and scalding.

Woodworking trades.—There were one fatal and sixteen non-fatal accidents recorded during January, 1912, compared with one fatal and seven non-fatal accidents during the month of December, and thirteen non-fatal accidents during January, 1911. The fatality was caused by machinery.

Printing and allied trades.—There were no accidents recorded during January, 1912, compared with two non-fatal accidents in December, and two non-fatal accidents in January, 1911.

Clothing.—There were two non-fatal accidents recorded during January, compared with two non-fatal accidents during December, 1911, and one fatal and three non-fatal accidents in January, 1911.

Textile.—There was one non-fatal accident recorded during January, as compared with one fatal and two non-fatal accidents during December, and one fatal and one non-fatal accident in January, 1911.

Food and tobacco preparation.—There were three non-fatal accidents recorded during January, compared with two fatal and two non-fatal accidents during December, and two fatal and eight non-fatal accidents during January, 1911.

Leather.—There were no accidents recorded during January, compared with none in December and two non-fatal accidents during January, 1911.

Steam railway service.—There were twenty-three fatal and thirty-three non-fatal accidents recorded during January, compared with eleven fatal and twenty-six non-fatal accidents in December, and fifteen fatal and twenty-

.....	" " ".....	" 29	1	Fell from scaffold

eight non-fatal accidents in January, 1911. Of the fatal accidents, five were caused by derailments, five by collisions, four by the victims being run over, three by machinery, two by crushing between cars, and one each by scalding, a fall, and being struck by a train. In another a fireman was knocked from the cab of a locomotive by an overhanging derrick crane.

Electric railway service.—There were no fatal and eight non-fatal accidents recorded during January, compared with three non-fatal accidents during December, and one non-fatal accident during January, 1911.

Navigation.—There were one fatal and five non-fatal accidents recorded during January; compared with seven fatal and three non-fatal accidents during December, and two fatal accidents in January, 1911. The fatality was the result of a fall.

Miscellaneous transport.—There were three fatal and nine non-fatal accidents recorded during January, compared with four fatal and seventeen non-fatal accidents in December, and one fatal and thirteen non-fatal accidents in Jan-

uary, 1911. Of the fatal accidents, one each was caused by striking an overhead bridge, by a street car, and by the victim being run over.

Public employees.—There were one fatal and thirteen non-fatal accidents recorded during January, compared with two fatal and one non-fatal accident in December and five non-fatal accidents in January, 1911. The fatality was caused by a fall.

Miscellaneous skilled trades.—There were four fatal and fifteen non-fatal accidents recorded during January, compared with ten fatal and sixteen non-fatal accidents during December and two fatal and eight non-fatal accidents in January, 1911. Of the fatal accidents one each was caused by drowning, falling material, machinery, and electrocution.

Unskilled labour.—There were five fatal and seven non-fatal accidents recorded during January, compared with five fatal and three non-fatal accidents in December, and five fatal and twenty non-fatal accidents in January, 1911. Of the fatal accidents, one each was caused by machinery, explosion, cave-in, falling material, and a fall.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior.

THE total immigration to Canada during the nine months of 1911 from April to December, inclusive, was 292,516, compared with 253,226 during the

corresponding period of 1910, an increase of about 15½ per cent. Of the total arrivals during the nine months, 185,151 were at ocean ports, compared with 155,524 in the corresponding period of 1910. There was an increase in the number of arrivals from the United States from 97,702 in 1910 to 107,371 during the same period of 1911.

IMMIGRATION TO CANADA, FROM APRIL TO DECEMBER 1911, INCLUSIVE, COMPARED WITH THAT OF THE CORRESPONDING MONTHS OF 1910.

Of the 526 homesteaders who came from the United States, 191 were from North Dakota; 84 from Minnesota; 37 from South Dakota; 31 from Michigan; 29 from Wisconsin; 23 from Iowa; and 22 from Washington State.

Notes.

A branch of the Imperial Home Reunion Association was formed at St. John, N.B., for the purpose of bringing out from England the families of those men who have already settled in the province. For this purpose the Board of Trade of St. John had raised a fund of \$5,000, and it was hoped that other boards of trade throughout the province would take similar action with a view to organizing the movement on a provincial basis if possible.

It was reported that the Salvation Army immigration department proposed bringing 300 men from Great Britain for Western Ontario. Many applications had already been received at the

Salvation Army headquarters for labourers from Ontario farmers.

It was reported that the British Eastern Investment Trust, Limited, of London, Eng., proposes purchasing 100,000 acres of land in the vicinity of Rosthern, Sask., from the Canadian Northern Railway Company, and to settle first class British farmers on the land. The sum of \$2,125,000 was available for this purpose.

Resolutions in opposition to the admittance of Hindus to Canada, and against the further extension of the immigration laws, were passed by the district labour council of Toronto and the trades and labour council of Hamilton, Ont.

NEW AGREEMENT AFFECTING GRAND TRUNK RAILWAY TRAINMEN.

THE text is printed below of an agreement between the Grand Trunk Railway Company and the trainmen in its employ which went into operation on January 1, 1912. It will be recalled that in connection with certain points which are dealt with in the agreement a strike of the employees affected occurred during the summer of 1910. According to the terms on which the strike was settled the agreement hereunder, which is known as the "standard" agreement affecting workmen of this class in the employ of railway companies east of the Great Lakes, was to go into effect at the close of 1911. The agreement represents a material modification in the rules and conditions with regard to rates of pay, overtime, hours, etc., previously prevailing, being considerably more favourable from the standpoint of the workmen.

Article "A."—The rates of pay in passenger train service shall be:

Conductors	2.68 cents per mile.
Baggagemen	1.55 " " "
Brakemen	1.50 " " "

Article "B."—The minimum allow-

ances for passenger trainmen for each day used shall be:

Conductors	157 miles, or \$4.20 per day.
Baggagemen	177 " \$2.75 "
Brakemen	170 " \$2.55 "
Exclusive of overtime.	

Regularly assigned passenger trainmen who are ready for service the entire month, and who do not lay off of their own accord, shall receive the following minimum sums, including overtime earned, if any, for the calendar month:

Conductors	\$125.00
Baggagemen	\$75.00
Brakemen	\$70.00

Article "C."—Passenger trainmen on short turn-around runs, no single trip of which exceeds 80 miles, including suburban and branch line service, and the work incident to such service, shall be paid overtime for all time actually on duty, or held for duty, in excess of eight hours (computed on each run from the time required to report for duty to end of that run), within twelve consecutive hours, and also for all time in excess of twelve consecutive hours computed continuously from time first

required to report until final release at end of last run.

All other passenger trainmen shall be paid for overtime on the basis of twenty miles per hour, computed from the time required to report for duty until released, and separately for each part of a round trip.

Overtime shall be computed for each employee on the basis of actual overtime worked, or held for duty, at the following rates:

Conductors	42 cents per hour.
Baggagemen	25 "
Brakemen	24 "

For any overtime made in addition (as per Article "C") to the amount necessary to make up the minimum monthly guarantee, trainmen will be paid for at the overtime rates.

Extra mileage made outside of assigned service is not to be considered as overtime.

Article "E."—Reductions in crews, or increases in mileage, in passenger train service shall not be made for the purpose of offsetting the above increases in wages. This, however, is not to be understood as preventing readjustment of runs in short turn-around, branch, or suburban service, that are paid under the minimum rules for the purpose of avoiding payment of excess mileage or overtime that would accrue under these rules, without reducing the number of crews.

Article "F."—The pay in through and irregular freight train service shall be:

Conductors	3.63 cents per mile.
Brakemen	2.42 cents per mile.

Runs of 100 miles or less, either straight-away or turn-around, shall be paid as 100 miles.

Article "G."—The pay in way-freight service shall be:

Conductors	3.975 cents per mile.
Brakemen	2.70 cents per mile.

Runs of 100 miles or less, either straight-away or turn-around, shall be paid as 100 miles.

Article "H."—In all freight and mixed train service, including pusher or helper service, 100 miles or less, or 10 hours or less, shall constitute a day's work.

On runs of 100 miles or less, overtime shall be paid for time in excess of 10 hours, and on runs of over 100 miles, overtime shall be paid for that time used in excess of the time necessary to complete the trip at an average speed of 10 miles per hour. The working time of trainmen shall begin at the time they are required to report for duty, and do so report, and shall continue until they are relieved from duty at end of run. Overtime shall be computed for each employee on the basis of actual overtime worked, or held for duty, and be paid for at the rate of ten miles per hour for the class of service performed.

Article "I."—In work, construction, snowplow or wrecking train service trainmen shall be paid through freight rates. 100 miles or less, 10 hours or less, shall constitute a day's work. Overtime computed for each employee on the basis of actual overtime worked, or held for duty, pro rata.

Trainmen while assigned to work train service will be paid a minimum of 100 miles for each working day exclusive of overtime previously earned.

Rules.

Rule 1.—Crews assigned to mixed train runs, or to runs a portion of which is passenger and the balance mixed, or freight, or both, will be paid mileage, or time, at through freight rates, with a minimum of 3,000 miles per month.

Rates for mixed trains on Branch Lines of less than 100 miles in length include handling way-freight.

Passenger train crews when handling freight cars (not express) en route will be paid through freight rates for the actual mileage with such cars.

Rule 2.—Freight trainmen running passenger trains will be paid through freight rates, except when relieving

regular passenger trainmen, when they will be paid the passenger rates of the man relieved.

Rule 3.—Passenger trainmen making extra mileage on other than their assigned runs will be paid through freight rates, except when turned between sub-divisional terminal points, in which case they will be paid their passenger rates.

Passenger trainmen will not be compelled to make extra mileage outside of their assigned trips on their assigned runs if possible to avoid it.

Rule 4.—Mileage or overtime will be paid for when trainmen are run more than one mile off Main Line.

Track mileage will be paid for plowing or flanging sidetracks.

Rule 5.—When work trains run forty miles or more to or from loading or unloading point, they will be paid time or mileage, whichever amounts to the most, in addition to actual time loading or unloading.

Rule 6.—Trainmen on wrecking trains will be paid mileage to and from place of wreck, and work train rates per hour while working at wreck, with a minimum of 100 miles for the combined service.

Rule 7.—Trainmen will be paid for work or wreck train service en route when time occupied exceeds one hour, and time so paid for will not be included in computing overtime.

Rule 8.—Trainmen, deadheading, or travelling passenger, will be paid same mileage and rate as the corresponding men on train on which they travel.

Trainmen running with light engine, or with engine and caboose, will be paid full through freight rates.

Rule 9.—(a) Through freight trainmen or mixed trainmen (not otherwise specified in Rule 2) required to load or unload way-freight, will be paid overtime at way-freight rates for time so occupied, but not in excess of way-freight rates for full trip.

(b) Through freight or mixed train crews (not otherwise specified in Rule 2) making more than five stops to take

on or set out a car (or cars) or that make more than ten switches en route, or a combination of such service, will be paid way-freight rates for the trip.

Rule 10.—Trainmen acting as pilots will be paid conductors' through freight rate.

When a pilot, as defined in Operating rules, is required, a competent man will be supplied in addition to the regular crew. A man unfamiliar with the physical characteristics of the road will not be required to go.

Rule 11.—Through freight rates per hour will be paid for time occupied in switching at terminals and turn-around points, not less than three of the train crew being used, except that, in all freight and mixed train runs of less than 100 miles, when the combined actual mileage, including overtime made and the time occupied in terminal switching at ten miles per hour exceeds the total time on duty, trainmen will only be paid for such excess time occupied in terminal switching at one-tenth of the daily rate per hour.

Rule 12.—When trainmen come on duty and are not required they will be paid through freight rates, with a minimum of 30 miles, and will stand first out. Trainmen held for duty and not used, and their vans have been sent out, will be paid 100 miles for each twenty-four hours while waiting return of van.

Rule 13.—When unassigned crews are available and are run around at terminals they will be paid fifty miles for each run-around, and hold their turn out.

Rule 14.—Trainmen held for train service after arrival of train at final terminal or end of run will be paid for time so held, provided the minimum daily mileage, or time, has been exceeded.

Rule 15.—For freight train service performed in or between yards at terminals trainmen will be paid overtime rates per hour.

Rule 16.—Time or mileage made doubling or assisting other trains will be paid for at through freight rates.

Rule 17.—Trainmen while shovelling coal for tenders en route will be paid 30 cents per hour, and this time will not be deducted in computing overtime.

Trainmen will not be required to do his work when sectionmen are available.

Rule 18.—Trainmen held off on Company's business, or on Company's order, will be paid schedule mileage rates for mileage lost and reasonable expenses if away from home.

Rule 19.—Trainmen relieving yardmen will be paid yardmen's rates.

Conditions.

Rule 20.—Trainmen will not be compelled to ride on snowplows or flangers, but will be supplied with van or other suitable car properly equipped.

Rule 21.—Trainmen assigned to work-train service will not be considered absent from time work is through Saturday night until starting hour Monday, unless notified before laid up Saturday that they will be required.

Trainmen will be allowed to go home Sundays if train service permits and absence will not interfere with work service.

Rule 22.—Unless senior trainmen desire otherwise junior trainmen, if competent, will be assigned to work trains.

Rule 23.—When a deadhead crew is required the first crew out will be called to deadhead, and will hold its turn out at the distant terminal.

Rule 24.—The Company will arrange their way-freight service to avoid the handling of shed freight at night and on Sundays. Trains leaving terminals between 4.00 a.m. and noon will not be considered night trains.

Rule 25.—Way-freight trains will not be doubleheaded, except where there is but on freight train each way daily.

Rule 26.—Trainmen will be advised, with reason, and without unreasonable delay, if mileage or time claimed is not allowed.

Rule 27.—Trainmen assigned to regular runs will not be considered absent from duty after arrival at final terminal at end of day's run, but if called for service will be given their turn out with unassigned crews.

Trainmen employed on regular runs will be allowed to go home Sunday, provided regular service permits.

Rule 28.—Through freight crews will be run first in first out of the terminals on their respective sub-divisions.

Points on current time table where one or more trains end are terminal points for such trains. The meaning of "terminal" in the foregoing article is understood to be the regular points between which crews regularly run; for instance, the terminal from which a Branch Line projects would be the terminal for the Branch but not necessarily for the section from which the Branch Line springs.

Rule 29.—Except in cases of wrecks, washouts, snow blockades, preventing crews being returned to their home terminals, unassigned crews laid up at other than their home terminal longer than eighteen hours (exclusive of Sunday) without being called for duty, will be paid ten miles per hour for the first ten hours in each subsequent twenty-four hours thereafter, time to be computed from the time crews go off duty until one hour before the departure of the train on which they resume duty. When men book rest of their own accord the time so booked will not be included.

Rule 30.—Crews while en route between terminals will not be compelled to abandon their vans for the purpose of travelling passenger, or when being moved from one to the next terminal for freight service, or when handling Colonist or Continental (European) immigrant trains.

Rule 31.—Trainmen will not be disciplined or dismissed until after investigation. They may, however, be held off for investigation not exceeding three days, and may have the assistance of a fellow employee in stating their case,

and the evidence against them will be stated to them. Employees concerned to be notified to be present. If not satisfied with decision, they may appeal either personally or through their representatives to the Superintendent within thirty days after having been advised of such decision, and if not satisfied with Superintendent's decision they may appeal to the higher officials.

Rule 32.—When a trainman is discharged, or resigns, he will, as soon as possible, be paid and given a certificate stating term of service and capacity employed.

Rule 33.—Freight trainmen living within one mile of yard office, and passenger trainmen within one mile of passenger station, will be called as nearly as possible in time to be on duty thirty minutes before leaving time of train. This rule will not apply to schedule passenger and mixed trainmen assigned to regular runs leaving between 7.30 a.m. and 10.30 p.m., but in cases where such trains are more than one hour late they will be advised of probable time of departure.

Rule 34.—All passenger and mixed trains will have at least one brakeman and one train baggageman, but passenger trains of eight or more cars will have two brakemen and one baggageman if there is a local baggage car on the train; one or two box baggage or refrigerator cars to count as one car, and three or four as two cars.

Rule 35.—One brakeman or baggageman on each train must have at least six months' experience, and the same or another man be acquainted with the run. A conductor will not be required to take out an incompetent brakeman unless the alleged incompetency is disproved.

Rule 36.—Trainmen who have been on duty twelve hours or more will not be called again if they have booked rest on arrival, the men to be judges of their own condition, and not less than six hours' rest to be booked at any terminal.

Rule 37.—Trainmen in through freight service who do not lay off of their

own accord will be paid for not less than equivalent to 2,600 miles in any month. This will not apply to sparsely settled men. This will not prevent crews making as many miles as they are consistently able to make, provided they take the proper rest.

Rule 38.—Trainmen will not be transferred from one promotion district to another, or be run on other than their own district, except in case of shortage of men on that district, when the junior men will be sent unless the senior men wish to go.

Shortage of men will not be considered to exist when there are men available that could be moved to point required.

Men to be notified of transfer at hour terminal.

Rule 39.—Superintendents will prepare separate seniority lists for each promotion district or territory, and will have them posted on the first day of January in each year. Said lists will be posted in conspicuous places at all terminal registering points, and employees whose standing is incorrect shown must protest in writing within ninety days thereafter or no action will thereafter be taken.

Rule 40.—Promotion on each promotion district or territory will be made according to seniority of men on that district or territory, and will be governed by merit, fitness and ability. Men not promoted in their turn will be advised the reason. The promotion of conductors will be to any run, in either freight, mixed or passenger service, which their seniority as conductor entitles them; and in the event of a conductor refusing to accept any particular run to which he is entitled, he will lose his rights to that run until it again becomes vacant, but will otherwise retain his seniority standing. Permanent vacancies or new runs created will be built up for ten days and be given to the senior qualified men applying therefor. In the event of a reduction of crews the junior men will be reduced.

Senior freight brakemen will be required to pass their examination for conductor in turn. Brakemen refusing promotion to conductor, or failing to qualify for same within thirty days of the date set for their examination, will thereafter rank junior as conductor to the man promoted in their stead.

Promotion of passenger brakemen shall be to passenger baggage-men, or to any run in passenger service to which their seniority as brakemen or baggage-men entitles them.

Promotion for freight brakemen will be to any run in either freight or mixed train service to which their seniority as brakemen entitles them, but in the event of a brakeman refusing to accept any particular run that his seniority entitles him to, he will lose his rights to that run until it again becomes vacant, and he will otherwise retain his seniority standing. Permanent vacancies or new runs created will be bulletined for ten days and given to the senior qualified man applying therefor. In the event of a reduction in staff the junior men will be reduced.

Freight brakemen are not eligible for promotion to passenger train service, except that when there is a vacancy for a regular passenger brakeman it will be bulletined for ten days, and preference will be given to the senior suitable freight brakeman or yardman applying for it.

Brakemen have no seniority standing during the first six months' service, but will then rank as brakemen from date of entering service.

Promotion to runs extending over more than one division will be divided and assigned between such divisions as early as possible on a mileage basis.

In the event of the transfer of existing runs from one Superintendent's division to another, trainmen affected will have the choice of being transferred according to seniority. The men transferred will rank with those on the promotion district to which they transfer according to the date from which they rank as conductor, baggageman or

brakeman respectively, but no man will be reduced unless the number of crews employed is reduced.

On Eastern and Northern Divisions district promotion to prevail. Sixth District men to have one-third work on through passenger service between Montreal and Toronto.

On Ottawa Division universal promotion to prevail.

On Middle and Southern Divisions universal promotion to prevail in passenger and mixed service, and station promotion in other service.

On Western Division assignment to service on through passenger trains on main line shall be divided equally between the 25th and 26th Districts.

Rule 41.—Preference in manning new lines or extensions will be given trainmen on promotion district from which new line diverts. In future when a new line connects two promotion districts it will be manned by men taken equally from those districts, provided they are competent, having regard to the men's seniority, dating from time of entering the service, and these men will then rank with the men on the promotion district to which they have been transferred according to the dates from which they rank in the service as conductor, baggageman or brakeman respectively. This will not apply to diversions, reducing grades or distances on existing lines.

Rule 42.—Trainmen will not be compelled to clean cars, light lamps, couple or uncouple hosebags on passenger trains where car repairers are on duty, but will be expected, where train porters are not employed, to remove rubbish from the coaches while en route as as to give them a tidy appearance.

Rule 43.—(*Applicable to Service in United States Only*).—(a) Employees in train service will not be tied up unless it is apparent that the trip cannot be completed within the lawful time, and not then until after the expiration of fourteen hours on duty under the Federal Law, or within two hours of

the time limit provided by State Laws, if State Laws govern.

(b) If employees in train service are tied up in a less number of hours than provided in the preceding paragraph, they shall not be regarded as having been tied up under the law, and their service will be paid for under the provision of this schedule.

(c) When employees in train service are tied up between terminals under the law, they shall again be considered on duty and under pay immediately upon the expiration of the minimum legal period off duty applicable to any member of the road crew, provided the longest period of rest required by any member of the crew, either eight or ten hours, shall be the period of rest for the entire crew.

(d) Continuous trip will cover the movement, straight-away or turn-around, from initial point to the destination train is making when required to tie up. If any change is made in the destination after the crew is released for rest, a new trip will commence when the crew resumes duty.

(e) Employees in train service tied up under the law will be paid continuous time or mileage of their schedules from initial point to tie-up point. When they resume duty on a continuous trip, they will be paid miles or hours, whichever is the greater, from the tie-up point to the next tie-up point or to the terminal. It is understood that this article does not permit conductors and trainmen to run through terminals unless such practice is permitted under the schedule.

(f) Employees in train service tied up for rest under the law, and then towed or deadheaded into terminal, with or without engine or caboose, will be paid therefor as per section (e) the same as if they had run the train to such terminal.

(g) Employees in train service tied up in obedience to the law will not be required to watch or care for engine or perform other duties during the time tied up.

(h) Yardmen required to work six-

teen hours will resume work when the rest period is up, under the Federal Law, and then be permitted to work to hours or be paid therefor.

Rule 44.—The Company will join arrangements for and in representation at a conference with other railways in the territory to dispose of the double header question.

Rule 45.—Conductors, trainmen, yardmen, or their representatives, will call the attention of their Superintendent to any violation of the articles in this schedule, and, if necessary, refer the matter to the General Transportation Manager in order to have the same remedied.

Rule 46.—Trainmen will not be compelled to handle cars in train the drag gear of which is defective and require to be chained, further than to take a car of perishable freight or live stock that may become disabled en route to the first terminal. Under no circumstances will trainmen be compelled to handle cars behind any other than official cars or flangers.

Rule 47.—Any question of interpretation which may arise will be adjusted with the Superintendent, and then, if necessary, with the General Transportation Manager.

Rule 48.—The Company reserves the right to change these rates and regulations upon giving thirty days notice of its intention to do so.

Rates of Pay and Regulations governing Employees in Yard Service.

Rules 8, 12, 18, 26, 31, 32, 36, 37 and 39 will apply to yardmen.

Rule "A."—When day and night crews are employed on same engine the hours for each crew to commence work will be at or between 6.45 a.m. and 8.00 a.m., and at or between 5.45 p.m. and 7.15 p.m., respectively.

Rule "B."—Yardmen working four hours or more between the hours of 6.00 a.m. will be paid night rates for the shift.

Rule "C."—The working time of yardmen will commence at the time re-

red to report for duty, and do so re-
t, and will continue until they are
eved from duty at the end of the
's work, excepting the time taken
meals. Yardmen will be relieved at
yard in which they commence work.

Rule "D."—Yardmen will be allowed
hour for meals between the fifth
seventh hours from time beginning
k; if required to work any part of
meal hour they will be allowed 30
utes for the meal as soon as possible
paid for one hour.

Rule "E."—Yardmen will not be re-
ed to go outside of yard terminals
ept for switching or transfer ser-
e, and yard crews whose work takes
n outside of the switching terminal
receive yardmen's rates.

Rule "F."—This agreement for train-
a and yardmen is not to operate to
ice any rates that may be now high-
han those agreed upon. This not to
orce re-arrangement of present mel-
of operating day and night shifts
yards.

Rule "G."—Yardmen (not spare) re-
ing switchmen will be paid yard-
's rates.

Rule "H."—Yardmen will not be
pelled to couple or uncouple hose-
on passenger cars in yards where
men are on duty.

Rule "I."—Yard crews in transfer
ice will be provided with a van or
r car suitably equipped.

Rule "J."

Ten hours or less shall constitute a
day's work. Overtime computed for
each employee on the basis of actual
overtime worked or held for duty pro
rata.

Rule "K."—The promotion of yard-
men in their respective yards will be
according to seniority of the men in
that yard, and will be governed by
merit, fitness and ability. Men not pro-
moted in their turn will be advised of
the reason. Any yardmen failing to
qualify for or refusing promotion will
thereafter rank junior to the man pro-
moted for that position only. Perman-
ent vacancies, or new jobs created, will
be advertised for ten days and given
to the senior qualified man applying
therefor.

In the event of a yard being abolish-
ed, the men in such yard will be assim-
ilated with the men in other yards on
the Superintendent's Division, ranking
according to seniority from the time of
entering the service as yardmen. When
a new yard is created, yardmen on the
Superintendent's Division will be given
preference to the positions in that yard
in accordance with seniority in their
respective classes.

Rule "L."—A yard crew shall con-
sist of not less than one foreman and
two yardmen, except following yards
where crews may consist of not less
than one foreman and one yardman:

Island Pond	Richmond
Allandale	Gorham
Point Levi	Coteau
Hawkesbury	Madawaska
Depot Harbor	Peterboro
Lindsay	Midland
Guelph	Brantford
Woodstock	Palmerston
Berlin	St. Thomas
Saginaw	Bay City
Kalamazoo	South Bend
Flint	Lansing
Grand Rapids	Pontiac
Grand Haven	Milwaukee

Rule "M."—The Company reserves
the right to change these rates and

regulations upon giving thirty days notice of its intention to do so.

W. G. BROWNLEE,
General Transportation Manager.

APPROVED:

HOWARD G. KELLEY,
Vice-President.

Examples.

Articles "B" and "C."—Turn-around runs, each trip 80 miles or under, but minimum daily mileage not exceeded:—

Crews 8 hours or less in actual service.	
Elapsed time from coming on duty to release at end of day, 12 hours or under.	
Calendar working days	26
26 at \$4.20	\$109.20
Premium	15.80
	<hr/>
	\$125.00

Crews 8 hours or less in actual service.	
Elapsed time 13 hours.	
26 at \$4.20	\$109.20
1 x 26 x 42c	10.92
Premium	4.88
	<hr/>
	\$125.00

Crews 9 hours in actual service.	
Elapsed time 9 hours.	
26 at \$4.20	\$109.20
1 x 26 x 42c	10.92
Premium	4.88
	<hr/>
	\$125.00

Crews 9 hours in actual service, 8 of which before the expiration of 12 hours.	
Elapsed time 13 hours.	
26 at \$4.20	\$109.20
1 x 26 x 42c = \$10.92, used to make up minimum	10.92
Premium	4.88
	<hr/>
	\$125.00

Turn around runs, each trip exceeding 80 miles, say, 85.	
170 x 2.68c x 26	\$118.45
Premium	6.55
	<hr/>
	\$125.00

If overtime (on speed basis of 20 miles per hour) is earned on any single trip, such overtime to the extent of \$6.55 goes towards making up minimum; additional overtime, if any, is added to the \$125.00.

Exceptions to "B" and "C."—Crews on runs will be paid for the actual

mileage made during month (same principle as at present) at the same rate, and will be allowed overtime made on any single trip on speed basis of 20 miles per hour, but monthly earnings will not be less than monthly minimum rate, provided they do not lay off of their own accord.

Article "E." For instance: Toronto Hamilton run.—The running of crews on this run may be changed to avoid paying excessive overtime; the Company to say where and when day's work starts, but the number of crews paid must remain as now, each man receive not less than the minimum monthly rate, provided, of course, he does not lay off of his own accord.

Article "H."—On turn-around runs crews will be paid time at ten miles per hour, or mileage made, whichever amounts to the most, from time reporting for duty until relieved from duty at starting point, but the Company may elect instead to pay not less than 100 miles for each single trip.

Article "I."—A crew earning equivalent to 125 miles on Monday, through stress of weather, or other cause, are not turned out for Tuesday, but be allowed 100 miles for Tuesday.

Rule 1.—Clause 1: The allowance for any one day must not be less than equivalent to 100 miles at the prevailing freight rates.

Clause 2: Mixed train crews handling way freight on branches exceeding 100 miles in length will be governed by Rule 10.

Clause 3: A passenger train run from, say, Stratford to Toronto, picking up freight cars at Guelph, and then out at West Toronto, will be paid passenger rates for the mileage from Stratford to Guelph and West Toronto, and through freight rates from Toronto, and through freight rates from Guelph to West Toronto.

A mixed train is a time-table train composed of freight cars, passenger coach or coaches, and a baggage

combination car, and does not include freight train with only a passenger car attached.

Rule 5.—If from the shovel to the drop is 40 miles, and, say, three trips are made and actual running time not exceed 12 hours, and in addition one hour was used in loading and one hour unloading crews would be entitled to :

20 miles at through freight rate, and 10 miles additional pro rata.

If from the shovel to the drop is less than 40 miles crews will be paid equivalent to 10 miles per hour from time reporting for duty until laid up.

Rule 6.—A crew runs 40 miles to a wreck, works two hours at the wreck, and then returns to starting point, will only be entitled to 100 miles if all done inside of 10 hours, but if worked four hours at wreck would be entitled to 20 miles for the combined service.

Rule 9.—Examples of Combination.—Picking up or setting off cars at two stations,

Making five switches en route;
Handling way-freight at two stations
Making five switches;
Handling way-freight at three stations,

Picking up or setting off cars at four stations.

Rule 11.—Crew comes on duty at 10 a.m., runs, say, 28 miles to turn-around point, switches 4 hours, and returns to original point, and is relieved on duty at 4.00 p.m., has earned :

Mileage 56 miles.
Switching 40 miles.

It will be paid for 100 miles. If on the run the time occupied in switching was 6 hours, the crew has earned :

Mileage 56 miles.
Switching 60 miles.

Or 116 miles.

If one single trip was 82 miles, and it were made in less than 8 hours and 12 minutes, the Company would be entitled to receive service before starting or after arrival of train equivalent to 18 miles or 1 hour and 48 minutes; if run, occupied 10 hours or more their day's work is completed on arrival.

Rule 14.—If a crew is not relieved from duty in connection with the train on which they arrive within 30 minutes after the arrival of such train within yard limits the rule becomes operative, and will apply from the time train arrived within such yard limits.

Article 15.—A crew called at Mimico to go to Bathurst Street for a train destined to London would be paid for time or mileage Mimico to Bathurst Street and return, and straight time or mileage Mimico to London.

or

For instance, a train leaving Bathurst Street picking up cars placed on adjacent side tracks at Mimico would not be paid; but if required to switch out cars in order to get them together to take into train, they would be paid for time so occupied.

Mixed Train Runs.

4 single trips, each 28 miles	112 miles.
Elapsed time 12 hours 20 mins.	
Allowance for day, 12 1-3 at 10 . .	123 "
2 single trips, each 50 miles	100 "
Elapsed time, 9½ hours at 10 . . .	95 "
Allowance for day	100 "
2 single trips, each 65 miles	130 "
Elapsed time, 13 hours at 10 . . .	130 "
Allowance for day	130 "

If train reaches final destination for the day, says, one hour late, then the allowance for the day would be, 14 at 10 140 miles.

Rule 37.—Under this rule regularly set up crews running only a part of a month will be paid for such mileage at the rate of 100 miles for each working day.

Rest booked will not be considered as a lay-off.

PRICES, WHOLESALE AND RETAIL, CANADA, JANUARY, 1912.

I. WHOLESALE PRICES.

WHOLESALE prices as a whole were on a considerably higher level than in the preceding month, and are much higher than at the same period of 1911.

The Department of Labour Index Number of wholesale prices stood at 131.1 for January, as compared with 129.4 in the preceding month and 126.3 in the corresponding month last year. The numbers, it will be understood, are percentages in each case of the average price level prevailing during the decade, 1890-1899, the period selected by the Department as the standard of comparison throughout its investigation into wholesale prices. Some 250 articles carefully selected to represent Canadian

production and consumption, are included in the calculation.

The chief increases during the past year occurred in grains and fodders, dairy products, fish, fruits and vegetables, and metals, there having been decreases in animals and meats, and paints and oils. The features of the past month were advances in grains and fodder, animals and meats, dairy products, with slight declines in fruits and vegetables and miscellaneous groceries.

The following is a table of the Department's Index Numbers arranged by the various groups of commodities into which the investigation has been divided, showing the average price level for January, 1912, compared with that of the previous month and with that of the same month last year:—

TABLE SHOWING INDEX NUMBERS BY GROUPS OF COMMODITIES FOR JANUARY, 1912, DECEMBER 1911, AND JANUARY, 1911.

	Number of Commodities.	Index Numbers.		
		Jan. 1912.	Dec. 1911.	Jan. 1911.
I. Grains and fodders,	13	166.0	160.0	128.7
II. Animals and meats,	14	143.3	136.6	160.0
III. Dairy products,	8	181.6	165.0	162.4
IV. Fish,	7	163.0	163.0	147.7
V. (a) Fruits and vegetables,	15	140.9	144.5	126.1
(b) Miscellaneous groceries and provisions	24	115.1	116.9	112.0
VI. Textiles,	19	116.0	115.4	120.9
VII. Hides, leather, etc.,	11	142.0	142.0	133.9
VIII. (a) Metals,	24	113.5	112.5	104.9
(b) Implements,	10	105.1	105.1	103.8
IX. Fuel and lighting,	10	102.5	102.5	98.2
X. (a) Lumber,	13	164.0	164.1	164.4
(b) Miscellaneous materials,	20	104.0	103.8	103.6
(c) Paints, oils, etc.,	14	138.2	138.2	146.6
XI. House furnishings,	16	111.1	111.1	109.9
XII. Drugs and chemicals,	16	112.5	112.5	111.5
XIII. (a) Furs,	4	304.0	304.0	304.0
(b) Liquors and tobacco,	6	167.7	162.4	139.5
(c) Sundries,	6	103.6	103.0	104.4
Average of all commodities,	250	131.1	129.4	126.1

The chief features of the price movement during January as compared with the preceding month were as follows:—

Grains and fodders.—All grains advanced steadily at Winnipeg, barley rising from 59c to 68c. At Toronto barley, corn, peas and rye were upward, and wheat advanced from 87c-88c, at which it had remained since the first week in November, to 96c in the closing days

of the month. This is attributed to the grain blockade in the West due to car shortage. On the other hand oats remained steady. Bran and shorts were also steady, but hay was up.

Animals and meats.—The feature in this group was the advance in the prices of all live animals, and also of beef and mutton. Bacon, lard and hams were steady, but dressed hogs and barrelled

pork were downward. Fowl were lower, while turkeys advanced and veal was steady. The severe cold has been very unfavourable for shipments of stock.

Dairy products.—Creamery butter was 2c higher at Toronto, and dairy butter was also upward. Creamery butter and cheese were higher at Montreal. Storage eggs at Toronto advanced 1c, but fresh eggs were steady. At Montreal fresh eggs were higher. These tendencies are attributed to the time of the year and to weather conditions.

Fish.—In this group no changes were recorded, all commodities remaining firm at the prices reached in December. Salmon trout and whitefish were still off the market at Toronto. Stocks of B. C. high grade salmon were reported very low.

Fruits and vegetables.—The feature of this group is a further decline in the prices of winter apples and also of evaporated apples, due to the better crop of 1911. Bananas were steady, while lemons and oranges were lower. Raisins and currants were steady. Beans and potatoes were firm at Toronto, but turnips were higher. Potatoes were higher at Montreal, but onions were lower. New Brunswick growers are holding potatoes for higher prices. Canned goods remained firm.

Miscellaneous groceries and provisions.—Sugar declined early in December, and again later in the month, so that in January it was 20c per barrel lower than the high level maintained during the autumn months. These declines followed drops in United States when Cuban and American sugar was marketed. The only other feature was a decrease of 30c per cwt. in the price of oatmeal, other articles remaining very steady.

Textiles.—A slight rise in the price of raw cotton occurred, grey cottons were slightly downward, coloured cottons were steady, and prints were higher. Wool and woollens were steady. Raw silk was slightly lower, and silk thread was firm. Jutes and hessian were higher,

flax fibre was steady, tow was up, and flax sewing twine was very firm on account of the higher price of raw material. Oilcloths were unchanged.

Hides, leather, boots and shoes.—On account of the high prices of hides and the upward tendency of leathers there are expectations of an advance in boots and shoes.

Metals.—Features in the metal market were advances in ingot copper and brass under good demand. Iron was scarce, as insufficient supplies were brought in before the close of navigation, and foundry pig iron has advanced, the demand being better than expected. Other metals were unchanged, but tin was stronger and lead more plentiful than it has been. Demand for spelter was good.

Implements were generally unchanged.

Fuel and lighting.—Coal was reported upward in some districts on account of cold weather and difficulty of transportation.

Lumber.—The feature in this group was the decline in N. B. spruce at St. John, due to overstocking on the United States markets. Other lumber prices were steady.

Miscellaneous building materials.—Canadian Portland cement declined 5c per barrel in December after a reduction by the manufacturers. On the other hand copper wire advanced in common with other copper products.

Paints and oils were steady, but glass is firm and plate glass is up.

House furnishings.—Furniture is steady, but on account of the rise in plate glass some lines are very firm with probability of an advance. The raw material for earthenware has advanced and crockery is very firm.

Drugs and chemicals.—No changes were recorded.

Miscellaneous.—Hops were higher and malt is very firm on account of the high price of barley. Rubber is slightly upward.

RETAIL PRICES OF STAPLE ARTICLES

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the into the cost of living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a quarter of each locality usually occupied by workmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and in order that the statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* quoted, etc., from the Department.

II. RETAIL PRICES.

THE feature in the retail price movement during January has been the advance in meats, fish, butter and potatoes. Supplies were reported scarce in many localities, and unfavourable weather and bad roads have prevented farmers from bringing produce to market. Fresh eggs became more plentiful, and prices advanced in some cities and fell in others. Hog products fluctuated similarly. Fuel was somewhat higher. At Sydney, N.S., eight articles of the necessities of life increased in price during the month. Of these potatoes and butter showed the greatest increase. At Montreal twenty commodities were higher in price with the advance of winter.

Notes on Retail Prices.

Beef.—Sirloin steak advanced in price at Sorel, Que., Montreal, Que., Sault Ste. Marie, Ont., Winnipeg, Man., Lethbridge, Alta., and Victoria, B.C. The price of shoulder roast increased at Sydney, N.S., Sorel, Que., Montreal, Que., Berlin, Ont., and Lethbridge, Alta. These advances were due to increases in wholesale prices and to a scarcity on farmers' markets on account of cold weather and bad roads in many districts.

Veal.—The price of veal advanced at Sydney, N.S., Montreal, Que., Sault Ste. Marie, Ont., and Winnipeg, Man., declining at St. Thomas, Ont.

Mutton.—The price of mutton rose at Sydney, N.S., St. John, N.B., Sorel, Que., Montreal, Que., Peterborough, Ont., but declined at St. Thomas, Ont., and Winnipeg, Man.

Pork.—Fresh pork was higher in price at Sorel, Que., Montreal, Que., Winnipeg, Man., and Victoria, B.C., but declined at St. Thomas, Ont., and Lethbridge, Alta. Salt pork advanced at Sorel and Montreal, Que., and declined at Hull, Que., St. Thomas, Ont., Lethbridge, Alta., and New Westminster, B.C.

Bacon rose in price at Montreal, Que., and St. Thomas, Ont., declining at Belleville, Ont., Toronto, Ont., and Victoria, B.C.

Fish.—Cod steak advanced at Halifax, N.S., on account of unfavourable weather. Pickerel and haddock were higher at Montreal, Que., and halibut rose in price at Montreal, Que. The price of herrings increased at Woodstock, Ont., but salmon trout declined in competition with frozen fish. All fish were higher at Stratford, Ont., but salmon trout declined in price at Brandon, Man., on account of cold weather.

Lard.—The price of lard went up at Sydney, N.S., Sorel, Que., London, Ont., and Winnipeg, Man., declining at Montreal, Que.

Eggs.—Both fresh and packed eggs advanced in price at Moncton, N.B., Montreal, Que., Brockville, Cobalt, Guelph and Stratford, Ont., but declined at St. John, N.B., at Belleville, and Hamilton, Ont., at Lethbridge, Alta., and at New Westminster, B.C. Strictly fresh eggs were higher at Newcastle, N. B., Three Rivers, Que., Peterborough and Windsor, Ont., but were lower at Halifax, N.S., at Sherbrooke and Sorel, Que.; at Toronto and Berlin, Ont.; and at Nelson and Victoria, B.C. Packed eggs advanced at Quebec, Sorel and Hull, Que., and at Toronto, Ont., on account of low stocks.

Milk.—The price of milk declined at Sydney, N.S., as the wholesale price was lowered. At Chatham, Ont., the price rose on account of scarcity.

Butter.—At fourteen of the cities both dairy and creamery advanced, but declined at Berlin and Sault Ste. Marie, Ont. Dairy butter alone advanced at Sorel, Que., and Winnipeg, Man., but declined at St. John and Newcastle, N.B., Berlin, Ont., and Lethbridge, Alta. At Sydney, N.S., the price of dairy butter declined on account of decreased demand due to uncertainty of quality. Creamery butter was higher at Sydney, N.S., St. John, N.B., Three Rivers, Sherbrooke, and

Hull, Que., and at Peterborough and St. Thomas, Ont., but was lower at Victoria, B.C.

Cheese.—Both old and new cheese were up at Sorel, Que., Cobalt, Woodstock and Stratford, Ont. Old cheese was higher at Newcastle, N.B., and Lethbridge, Alta., but lower at St. Thomas and Sault Ste. Marie, Ont. New cheese advanced at Woodstock, Ont.

Bread.—No changes were reported.

Flour.—The price of flour increased at Moncton, N.B., Montreal, Que., Brockville and Peterborough, Ont., and at Prince Rupert, B.C., decreasing at Nanaimo, B.C.

Rolled oats.—At Toronto, Ont., the price of rolled oats declined on account of a decrease in the wholesale price. At Sydney, N.S., Moncton, N.B., Sorel, Que., Peterborough, Ont., and New Westminster, B.C., the price advanced.

Rice advanced in price at Montreal, Que., Lethbridge, Alta., and New Westminster, B.C.

Beans.—Increases in price occurred at Montreal, Que., Belleville, Ont., and Lethbridge, Alta. There was a decrease at Sorel, Que.

Apples, evaporated.—The price declined at Moncton and Newcastle, N.B., and at Sorel, Que., rising at Westville, N.S., and Winnipeg, Man.

Prunes declined in price at Moncton, N.B., London, Ont., and Prince Rupert, B.C., advancing at Montreal, Que., and St. Thomas, Ont.

Sugar.—Both granulated and yellow sugar declined at St. John, N.B., Win-

nipeg, Man., and Nelson, B.C. Granulated sugar was lower at Halifax, N.S., St. Thomas, Ont., and at Victoria, B.C. The price of yellow sugar decreased at Berlin, Ont., and increased at Sydney, N.S. Both yellow and granulated sugar advanced at Cobalt, Ont.

Tea.—At Sorel, Que., and Berlin, Ont., tea declined in price after a temporary advance.

Coffee was unchanged.

Potatoes.—At twenty of the cities the price of potatoes rose, the only decline being at St. Thomas, Ont. At Toronto potatoes are reported to be very scarce and higher prices yet are expected.

Vinegar advanced at Montreal.

Starch was steady.

Coal.—Anthracite coal advanced in price at Halifax, N.S., Moncton, N.B., at Three Rivers, St. Hyacinthe, Montreal and Hull, Que.; and at Sault Ste. Marie, Ont. Bituminous coal was higher at Sorel, Que., and Winnipeg, Man. At Calgary, Alta., the price declined on account of the settlement of the coal miners' strike at Crow's Nest Pass.

Wood.—The price of hard wood advanced at Sorel and Montreal, Que. At Brockville, Ont., on account of no sleighing and bad roads supplies were scarce and the price rose. Soft wood was lower at Sorel, Que. Both hard and soft wood declined in price at Brandon, Man.

Coal oil was cheaper at Sorel, Que.

Rentals were upward at Sorel, Que., and downward at St. Thomas, Ont.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during January, 1912:

DOMINION REPORTS.

Railways and Canals.

Annual Report of the Department of Railways and Canals for the fiscal year from April 1, 1910, to

March 31, 1911. Ottawa: King's Printer, 1911. Pages, 341. Price, 25 cents.

THE Report of the Department of Railways and Canals of Canada for the fiscal year ended March 31, 1911, states that the total railway expenditure during the year amounted to \$36,-

301,979.24, of which \$24,760,029.58 was charged to capital account, \$1,503,070.89 to income, and \$10,038,878.77 to revenue. The expenditure on capital account included \$23,488,208.40 for the eastern division of the National Transcontinental Railway, \$184,149.81 for the Hudson Bay railway, and \$227,563.40 for the Quebec Bridge. The expenditure on the Intercolonial railway amounted to \$10,358,845.85, and on the Prince Edward Island railway to \$518,424.56. The expenditure on canals aggregated \$3,875,978.05. Including various miscellaneous sums, the total expenditure for the year on railways and canals amounted to \$40,180,326.81. The total revenue from railway and canal works was \$10,470,532.87, of which the railways produced \$10,249,394.38.

The following statistics of the Intercolonial railway are of some interest. The total number of passengers carried was 3,232,895, an increase of 110,571 over the previous year. The revenue producing freight carried amounted to 4,101,400 tons, an increase of 174,160 tons compared with the previous year. The total freight moved was 4,280,954 tons as against 4,071,692 tons in 1909-10.

A summary of the progress made in the construction of the National Transcontinental railway up to the close of the fiscal year shows that the entire line of the eastern division, from Moncton to Winnipeg, was under contract, the distance being 1,804.73 miles. Of this distance, 1,388 miles were graded, and 1,064.70 miles of the main track were laid, with 199.76 miles of sidings. The total amount of work done was 68.56 per cent. of the whole. The total expenditure on this portion of the line since its inception in 1904, amounted to \$95,423,085.48. Of the western division of the railway, the Prairie section, extending from Winnipeg to Wolf Creek, a distance of 915 miles, was open to public traffic, the portion between Edmonton and Wolf Creek having been placed under traffic on February 12, 1911, as an "unfinished contractor's

road." Including sidings a total of 1,073.49 miles of track were laid on this section, the expenditure being \$34,805,842.47. On the "mountain section", from Wolf Creek to Prince Rupert, 830 miles, 420 miles were under contract at the close of the fiscal year, and track was laid on 167 miles. The total expenditure on the two sections was \$55,293,999.05.

The canal traffic for the season of 1910 amounted to 42,990,608 tons, an increase of 9,269,860 compared with the previous year. On the St. Lawrence canals 2,760,752 tons were moved, an increase of 350,123 over the previous year. The quantity of grain which passed down the Welland and St. Lawrence canals to Montreal was 789,661 tons, an increase of 136,919 compared with 1909.

Fisheries.

Forty-fourth Annual Report of the Department of Marine and Fisheries, 1910-11. Fisheries. Ottawa: King's Printer, 1911. Pages, 480. Price, 30 cents.

The annual report of the Fisheries branch of the Department of Marine and Fisheries contains some interesting statistics as to the extent and resources of the fisheries of Canada. It is estimated that the coast line of the Atlantic provinces, off which are caught in great abundance many of the principal commercial food fishes, measures over 5,000 miles, while the province of British Columbia has a shore of 7,000 miles. In addition there are about 220,000 square miles of fresh water, well stocked with many species of excellent food fishes.

The total market value of fish and fish products taken by Canadian fishermen, in both sea and inland fisheries, during the fiscal year ended March 31, 1911, amounted to \$29,965,433, of which the sea fisheries contributed \$26,122,596, and the inland fisheries, \$3,842,837. There were employed 1,680 vessels and tugs, and 38,977 boats, the whole manned by 68,610 men. On shore, in the various canneries and fish-houses, etc., there were employed 24,978 persons.

The following table shows the estim-

ated value of fisheries products during the last fiscal year in each of the provinces of the Dominion, which pro-

duced a value of over \$1,000,000, with the increase or decrease compared with the previous year:—

Provinces,	Value Produced.	Increase.	Decrease.
	\$ cts.	\$ cts.	\$ cts.
Nova Scotia	10,119,243 00	2,038,131 44	
British Columbia	9,163,235 00		1,151,520 50
New Brunswick	4,134,144 00		542,171 25
Ontario	2,026,121 00		151,692 00
Quebec	1,692,475 00		115,961 65
Manitoba	1,302,779 00	299,394 00	
Prince Edward Island	1,153,708 00		43,848 59

The following table shows the estimated value of the catch of the various kinds of fish, which amounted to over \$7,000,000 during the last fiscal year, with the increase or decrease for each species compared with the previous year:—

Kinds of Fish.	Value.	Increase.	Decrease.
	\$	\$	\$
Salmon	7,505,871		908,653
Cod	5,921,248	2,008,442	
Lobsters	3,784,099	126,553	
Herring	2,278,842		475,909
Halibut	1,251,839	11,353	
Haddock	1,218,759	389,206	
Whitefish	983,594		16,532
Trout	825,290	204,167	
Smelts	797,066		71,776

Work of the Department of the Interior.

Annual Report of the Department of the Interior for the fiscal year ending March 31, 1911. Ottawa: King's Printer, 1911. Pages, 600. Price, 50 cents.

In the Report of the Department of the Interior for the year ending March 31, 1911, it is stated that the total cash revenue of the Department for that period amounted to the unprecedented figure of \$5,093,140.45, an increase of \$384,126.03 over the revenue for the previous twelve months. As an illustration of the rapid development of the country it is stated that the gross revenue of the department during the past ten years was \$28,071,944.76, as compared with a revenue of \$8,109,706.51 in the previous decade. There were 44,479 free homestead entries during the year, representing a total population of 107,884 settlers and their families,

which shows that over one-third of the total number of immigrants engaged in agriculture in the western provinces. The principle sources of revenue were \$445,135, for homestead fees, 387,054.96 for timber dues, 490,538.27 for coal lands, \$156,485 for pre-emption fees, \$266,878.98 for pre-emption sales, \$376,309.15 for purchased homestead sales, and \$550,567.91 for general sales. It is estimated that the total land area of the three provinces of Manitoba, Saskatchewan and Alberta is approximately 334,894,320 acres. The surveyed area amounts to 153,797,984 acres, and the unsurveyed area to about 98,000,000 acres. Allowing only half the unsurveyed land to be fit for cultivation it is estimated that there are in the three provinces about 202,797,984 acres suitable for agriculture. The total area under cultivation in 1910 was 14,564,

268 acres, only about seven per cent. of all the land available for this purpose.

During the year an addition of 13,403,600 acres was made to the forest reserves, making a total area reserved of 16,128,960 acres.

Life Insurance in Canada.

Report of the Superintendent of Insurance of the Dominion of Canada for the year ended December 31, 1910. Vol. II.—Life Insurance Companies. Ottawa: King's Printer, 1911. Pages, 608. Price, 20 cents.

The report of the Superintendent of Insurance of Canada for 1910 relating to life insurance companies shows that the business of life insurance was transacted in 1910 by 43 companies, of which 25 were Canadian, 7 British, and 11 American. The total amount of policies taken during the year of 1910 was \$152,762,520, an increase of \$21,023,442 over the previous year. The total amount of insurance in force in Canada was \$856,115,059, of which \$565,669,110 were held by Canadian companies, \$47,816,775 by British companies and \$242,629,174 by American companies. There were altogether 485,666 policies in force, omitting the industrial policies of the London Life, the Union Life, the Metropolitan, and the Prudential, the thrift policies of the Sun Life and the monthly policies of the Excelsior. The total amount of policies in force is \$773,929,318, and the average amount of a policy is \$1,594. An analysis of the death rate of insured persons show the rate of 7.830 per 1,000 insured lives in ordinary active companies, a rate of 12.561 per 1,000 insured lives in industrial active companies, and 8.904 in assessment and fraternal societies. Compared with the previous year the rate was reduced in ordinary companies and in assessment and fraternal societies, but there was a slight increase in industrial companies. The death rate in non-active and retired companies is shown at 82 per 1,000 lives exposed to risk. The premium income amounted to \$29,771,903 and the total amount paid to policy holders was \$20,270,594.69. The reserve in these companies amounted to

\$146,487,697 in 1910, an increase of \$13,558,917 over the previous year. An analysis of the expenditure shows that for every \$100 of income, the companies have expended in payment to policy holders \$37.35; in general expenses \$19.83; in taxes, 79 cents; and in dividends to stockholders, \$1.07, leaving \$40.96 to be carried in reserve.

Trade Returns.

Report of the Department of Customs, containing Tables of Imports, Exports and Navigation of the Dominion of Canada for the fiscal year ended March 31, 1911. Pages, 909. Price, 55 cents.

The Report of the Department of Customs for the fiscal year ended March 31, 1911, shows total exports amounting to \$297,196,365 compared with \$301,358,529 in the previous year, and imports amounting to \$472,247,540, as against \$391,852,692 in 1909-10. The duty collected amounted to \$73,312,367.59, an increase of over \$12,000,000 compared with the previous year. The aggregate trade with the United Kingdom increased from \$244,984,407 to \$246,901,573, the trade with the United States from \$336,652,587 to \$464,331,540, and the trade with the West Indies from \$13,284,809 to \$14,869,867. The trade with France amounted to \$14,345,865, an increase of about a million dollars and a half over the previous year, and the trade with Germany was to the value of \$12,710,357, an increase of \$2,273,935.

Penitentiaries.

Report of the Minister of Justice as to Penitentiaries of Canada for the fiscal year ended March 31, 1911. Ottawa: King's Printer, 1911. Pages, 273. Price, 20 cents.

The report on the penitentiaries of Canada during the past fiscal year states that the average daily population was 1,834, being only ten more than in the previous year. There were 334 convicts released on parole and fifteen were pardoned. Attention is called to the fact that the per cent. of the entire prison population is composed of lads under twenty years of age, while at St. Vincent de Paul penitentiary the juveniles constitute fifteen per cent. This is

attributed partly to the restrictions placed upon the judiciary by the provisions of the penal code, and partly to the fact that certain members of the judiciary do not realize the unsuitability of the penitentiary for persons of immature age. An analysis of the nationalities of the 1,865 convicts in custody on March 31, 1911, shows that 1,004 were born in Canada, 322 in other parts of the British Empire, 229 in the United States, 94 in Italy, and 61 in Austria-Hungary. The remaining 155 were born in various other foreign countries.

The report of the Parole Officer shows that in addition to the 334 convicts released on parole from the penitentiaries during the past fiscal year, 319 were similarly released from jails, prisons and reformatories, making a grand total of 653. During the year there were only nineteen cancellations for non-compliance with conditions, and seventeen forfeitures of parole by subsequent conviction. During the twelve years in which the parole system has been in force, 2,143 persons have completed their sentences on parole, and 1,387 were still under parole. In this period only 122 licenses were cancelled for non-compliance with conditions, and only 77 were forfeited by subsequent convictions.

External Affairs.

Report of the Secretary of State for External Affairs for the year ended March 31, 1911. Ottawa: King's Printer, 1911. Pages, 34. Price, 5 cents.

The Report of the Department of External Affairs contains a brief review of the more important matters dealt with during the past fiscal year, classified under the headings (1) Relations with Foreign Powers, and (2) Relations with other portions of the Empire. Under the first heading reference is made to the North Atlantic Coast fisheries arbitration with the United States before The Hague Tribunal, to the International agreement with reference to pelagic sealing in Behring Sea, to the Pecuniary Claims convention with the United States, to the trade relations

with the United States and with Japan, and to the Alaska boundary demarcation. Under the heading "Relations with other Portions of the Empire", reference is made to the West Indies Trade Commission and to the Imperial Conference of 1911.

Under the Treaty on Pelagic Sealing, which went into effect on December 15, the United States agreed to give to Canada and Japan each as compensation an annual share amounting to 15 per cent. of the gross land take upon the United States rookeries, making an advance payment to each of \$200,000 as soon as the treaty went into effect. Similarly, Russia agreed to deliver to Canada and Japan annually 15 per cent. each of the gross yearly take on the Russian rookeries, and Japan agreed to deliver to Canada, the United States and Russia annually 10 per cent. of the gross yearly take on the Japanese rookeries. Great Britain also undertook, in case any seal herd should resort to any islands or shores of the prohibited waters under her jurisdiction, to deliver annually to the United States, Russia, and Japan, 10 per cent. each of the gross yearly take upon such islands or shores.

ALBERTA REPORT.

Public Works.

Annual Report of the Department of Public Works of the Province of Alberta, 1910. Edmonton: Government Printer, 1911. Pages, 201.

The Annual Report of the Department of Public Works of Alberta for 1910 contains an account of the construction of bridges, roads and public buildings in the province, the ploughing of fire-guards, well boring, and the work of the coal mines branch, the local improvement branch, the steam boilers branch, and the telephone branch.

During the year 271 timber bridges were constructed, three small steel bridges were built, two large steel bridges, one over the Bow River and another over the Oldman River were completed, and two steel bridges were

begun. Thirty-five ferries were operated by the Department. It is stated that the regulations for the construction and inspection of boilers, adopted in 1909, have been very favourably received, and that owing to the efficient work of the boiler inspection branch, no fatalities occurred and only four accidents of a minor nature were reported to have been caused by boilers during 1910.

Statistics of the Coal Mines branch show that the output of the mines of the province increased from 2,174,329 tons in 1909 to 3,036,757 tons in 1910. Forty-two new mines were opened, and seven were abandoned. At the close of the year there were 154 coal mines in operation, giving employment of 5,818 persons.

The report of the Superintendent of Telephones shows that, at the close of the year there were 6,115 miles of long distance and rural lines in operation, giving service to 10,571 subscribers. The revenue amounted to \$369,757.14, and was sufficient to pay all operation and maintenance expenses, and leave a profit of nine per cent. on capital expenditure.

BRITISH REPORT.

Mines and Quarries.

Mines and Quarries: General report, with statistics for 1910, by the Chief Inspector of Mines. Part I., District Statistics; Part II., Labour. London: Wyman & Sons, 1911.

The report of Mines and Quarries of Great Britain for the year 1910 states that the number of persons employed in and about coal mines in the United Kingdom was 1,078,083, and 28,656 at the 663 metalliferous mines. Compared with 1909 there is an increase of 35,409 persons at the coal mines and 239 at the metalliferous mines. The total output of the mines under the "Coal Mines Act" was 278,609,949 tons, of which 264,417,588 were coal, 2,484,069 fire-clay, 7,979,750 ironstone, 3,130,280 oil-shale, and 598,262 sundry minerals. There was a marked increase in the output of coal in Scotland and in the York

and North Midland District, while there was a decrease in output in the districts of Newcastle, Durham and South Wales. At the mines there were 1,242 separate fatal accidents, causing 1,775 deaths. The number of non-fatal accidents in the coal mines which disabled for more than seven days was 158,565, by which 159,042 persons were injured. At the metalliferous mines there were 1,578 accidents, by which, 1,596 persons were injured. At quarries there were 5,156 accidents, by which 5,175 persons were injured. The death-rate of the underground workers at the mines was 1.91 per 1,000 persons employed, as against 1.61 in 1909. The death-rate of underground and surface workers was 1.69 as against 1.43 in 1909.

UNITED STATES REPORTS.

Women in Trade Unions.

Report on Condition of Woman and Child Wage-earners in the United States. Volume X: History of Women in Trade Unions. Washington: Government Printing Office, 1911. Pages, 236.

The tenth volume of the report on the Condition of Woman and Child Wage-earners in the United States contains an historical account of women in trade unions in the United States, since the beginning of their organization to the present day. Their history is divided into four periods: (1) The beginnings of organization from 1825 to 1840: (2) the development of associations interested in labour reform, including the beginnings of legislative activity, 1840 to 1860: (3) the sustained development of pure trade unions and the rise of the struggle over the suffrage, 1860 to 1880: (4) the impress and educative influence of the Knights of Labour, 1881 to date; and the present development under the predominant leadership of the American Federation of Labour.

The earliest organizations of women were among cotton, mill employees chiefly in the New England States. Between 1828 and 1836 a number of important strikes were conducted by them

at Dover, N.H., Lowell, Mass., Paterson, N.J., and Philadelphia, Pa. From 1825 on, numerous societies were formed by tailoresses and seamstresses who organized strikes in New York, Philadelphia, and Baltimore. The first city federation of working women's organizations was formed in Philadelphia in 1835, when the tailoresses and seamstresses united with women of other trades to form the Female Improvement Society. Other unions were formed by umbrella sewers and bookbinders of New York, and shoe workers of New York, Philadelphia, and Lynn, Mass.

The second period from 1840 to 1860 was characterized by the organization of "labour reform" associations, which were chiefly educational, and were composed largely of textile mill girls, but included also cap makers, shoemakers, tailoresses and seamstresses.

The centre of activity was at Lowell, Mass., and it is stated that the Association of that place did much to push Massachusetts to the front in labour legislation.

In the third period, from 1860 to 1880, the organization of working women principally among cigar makers, tailoresses and seamstresses, umbrella sewers, cap makers, textile workers, printers, burnishers, laundresses, and shoe workers. Out of thirty trade unions organized nationally or internationally, women were admitted only to the international unions of printers and cigarmakers. The women shoe workers, however, formed a national trade union of their own known as the Daughters of St. Crispin. Many of these organizations disappeared in 1873 with the coming of the trade depression.

The fourth period dates from the formation of the first women's local assembly under the Knights of Labour in September, 1881. The number of women's locals under the Knights of Labour steadily increased until 1886, and from that year declined until about six years later they had practically disappeared.

The following conclusions are drawn in the report: Women's unions, until the last generation at least, have been ephemeral, being usually organized in time of strikes, and frequently disappearing upon their settlement. They have been influenced by leadership from without the ranks of wage-earners to a much greater degree than those of men, and have consequently been often drawn away from plans for immediate advantage to more remote schemes for universal reform. By trade union methods women have won occasional strikes for improvement in their conditions, but their greatest success has been in the direction of a united stand for protective legislation.

History of Women in Industry.

Report on Condition of Woman and Child Wage-earners in the United States. Volume IX: History of Women in Industry in the United States. Washington: Government Printing Office, 1910. Pages, 277.

The ninth volume of the report on Condition of Woman and Child Wage-earners in the United States deals with women in industry from an historical point of view. The introductory chapter contains a general account of the changes in the occupations of women, and the history of labour conditions as affecting women. This is followed by chapters on the following special industries and trades: Textile industries, clothing and the sewing trades, domestic and personal service, food and kindred products, other manufacturing industries, trade and transportation. There is also an Appendix containing twenty-four statistical tables.

The entrance of women into new fields of industry is shown to have been due to the introduction of machinery, which took away their opportunities for earning a living through home industries, and obliged them either to resort to sewing, overcrowding this industry to a terrible degree, or to factories where the minute division of labour provided tasks sufficient for their abilities, and where the low wages which they accepted were an inducement to the manufacturers to employ them. With

reference to the proportion of women wage-earners in the various occupations in the United States it is stated that those engaged in agricultural pursuits decreased from 21.6 per cent. in 1870 to 18.4 per cent. in 1900, and the proportion engaged in domestic and personal service decreased from 58.1 per cent. in 1870 to 44.6 per cent. in 1880 and 39.4 per cent. in 1900. At the same time, the percentage engaged in professional service increased from 6.7 in 1880 to 8.1 in 1900, those engaged in manufacturing and mechanical pursuits from 19.3 in 1870 to 24.7 in 1900, and those engaged in trade and transportation from 1 per cent. in 1870 to 9.4 per cent. in 1900. In considering the effect of the employment of women on the work and wages of men, the view is expressed that it is exceedingly doubtful whether women have, in the long run displaced men, but the mere fact that they have worked at wages so much lower than men's has undoubtedly been a menace to the men's standard of wages.

Industrial Conditions of Kansas.

State of Kansas. Twenty-sixth Annual Report of the Bureau of Labour and Industry for 1910. Topeka, Kansas: 1911. Pages, 269.

The annual report of the Bureau of Labour and Industry and Factory Inspection for 1910 is divided into nine chapters, which deal with the following subjects: (1) Review of previous investigations, with brief index to previous reports. (2) Statistics of wage-earners, showing the hours of labour, average time employed, and number of employees in the principal branches of the building trades; also the wages, hours, length of runs, etc., of employees in railroad train service. (3) Statistics of labour organizations, giving the membership of the trade unions in the states, benefits derived from organization, number and results of strikes, etc., and a directory of labour organizations. A brief review is also given of the proceedings of the Kansas State Federation of Labour. (4) Strikes and labour difficulties, enforcement of labour laws,

new labour laws, and court decisions affecting labour. In addition to the new labour laws passed by the State of Kansas, this chapter also contains copies of the workmen's compensation laws recently passed by several other states, and a copy of the general eight-hour law for female wage-workers which was passed by the State of California in 1911. (5) Factory inspection. This chapter contains tables of the inspections by counties and industries covering a total of 55,224 wage earners, employed in 1799 different establishments, and the number of orders issued in the interest of the workers. (6) Accident statistics. This chapter gives a review of the law relating to the reporting of accidents, a table showing the number of accidents reported, and several articles relating to the prevention of accidents. (7) A report on the inspection of fire-escapes, conducted by the bureau. (8) A summary of the statistics of manufactures of the state as reported by the federal census for 1909. (9) Returns from ninety-four cities showing their population, railroad facilities, natural resources, industries needed, etc.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

QUEBEC CASES.

Railway Accident—Proof of Negligence.

IN the case of damages arising from injuries received in a railway accident, is the mere fact that the accident occurred to be taken as inducing a presumption of negligence on the part of the railway, or must the claimant, before securing damages, offer satisfactory proof of negligence on the part of the company?

This question arose in the course of a jury trial at Montreal recently. The specific claim under consideration was entered by a postal express messenger, who was injured in a derailment while at work on a Grand Trunk train running between Montreal and Island Pond. The attorneys of plaintiff, in the course of the trial, submitted proof of the accident, as well as of the injuries received by their client, but did not

endeavor to prove that the accident was due to the negligence of the defendant company. The position they took in the matter was, that the mere fact of the occurrence of the accident involved a presumption that the company was at fault, and that, consequently, it was incumbent on the company to prove that it was not responsible for the accident that occurred. They cited several authorities in support of their contention, but the representatives of the company took strong exception to this line of argument. According to the company's solicitors, before a claim for damages, on account of injury, could be entertained, it was necessary that the person seeking redress should prove that the defendant party to the suit was responsible for the damage done. As, in the case at issue, the plaintiff had failed to prove such responsibility, the attorneys for the company asked that the matter should be taken out of the hands of the

jury. They intimated that, failing this, no matter what award the jury might make, the case would be appealed.

Judge Demers, who was presiding, ruled in favor of the plaintiff, holding that the mere occurrence of an accident, such as the one in question, induced a presumption that the company was at fault. The learned judge declared himself open to correction on the point, at the hands of a higher tribunal, and, in his charge to the jury, summed up strongly in favor of the plaintiff. Only the fact that the jury, after lengthy deliberation, were unable to come to an agreement as to the amount of the damages which should be awarded, though they were unanimous regarding the principle involved in the claim, prevents the matter from being forthwith threshed out in the courts. In view of the unexpected turn of events, a new trial will be necessary before another jury.

The action was that of Alderic Tetreau, vs. The Grand Trunk Railway, the plaintiff claiming \$10,000, alleging that he had suffered to this extent as a result of an accident which occurred at Beloeil on the 24th of September, 1910. At the time of the accident, five of the seven cars on the train derailed and turned on their sides, the plaintiff receiving a fracture of the ribs in the region of the heart. He was confined to bed for six months as a result of the accident, and suffered permanent injury in the nature of heart trouble, etc. The cause of the accident was shown to be either a spreading of the rails or a twisted rail.

It is understood that the question raised on the hearing of this case is one the solution of which has been eagerly looked for by legal representatives of the various transportation interests of the country. In the hundreds of damage claims arising yearly, on the grounds of injuries accruing to passengers and others on board trains at the time of the accidents, the mere fact that the accident occurred, has, generally speaking, militated against the company defendants, but in the great majority of cases, the plaintiff submit-

ted either direct or indirect proof that the company was at fault. A close watch was being kept for a case where no attempt was made by a claimant to prove such negligence, as it was the intention of the defendant company, in such an action, to make a test case in the matter, so as to secure a final ruling on the point. This case was seized upon, but, as stated, a disagreement of the jury has for the present precluded any further action along the line of the question referred to.

Validity of Agreements with Imported Servant Girls.

The scheme for the solution of the domestic servant problem, by the importation of cheap colored labor, may receive a check in consequence of a test case which is to be heard in the Recorder's Court shortly. Discouraged mistresses took fresh hope some months back, when contingents of colored girls from Guadeloupe began to arrive, and were to be had for the cash payment of \$80 and the low wage of \$5 per month. The initiative was taken by a man in one of the outlying towns of the province, who, having been consul in the island for some years, brought back with his family one of these girls. This led to a scheme being initiated whereby people arranged for a wholesale importation, each shareholder being required to put down \$80.00 for which one girl would be obtained, and the employer would be required to also pay \$5 a month in wages.

When two or three parties had arrived in Montreal, action was taken by Mr. H. Reynaud, the French consul, to stop the proceedings. He communicated with the Governor of Guadeloupe, which is a French possession, and his representations had the effect of preventing further shipments after July.

The case that has arisen in the courts is that of Marie Dedet, who arrived with one of the earlier shipments. With the other girls she voyaged to New York, and there, according to her own statements, was required to sign a contract whereby she agreed to enter ser-

vice at Montreal at \$5 a month. It is believed that this contract was for an unlimited time, but this is uncertain. It is, however, contended that any contract is illegal, since under the Alien Labor Act it is not permissible to enter into such an engagement on foreign territory.

On reaching Montreal, Marie Dedet entered the service of Miss Poupart, and after some weeks was transferred to another family, in which matter, it is alleged, she was not consulted. More recently there was a third transfer, this time to the household of a provincial government officer. The transfer of the girl in each case was accompanied by a transfer of the financial obligations, that is, of the \$80 or part of it, which had to be reimbursed to the association of indentured labor. Somehow there still remained a balance of \$74 even at the third transfer, although the girl was under the impression that the small wage meant that something was being contributed all the time to cancel the debt.

A fortnight ago the girl made up her mind to leave her employer, but, it is said, was told that she could not do so without paying the balance of \$74, which still remained unpaid, and, pending this, her goods were held. She was arrested for desertion and appeared before Mr. Recorder Weir. The defence put forward by her counsel was that she had given notice and was not, therefore, a deserter. Personal bail for \$20 was accepted. As there are fifty other women working under similar contracts, the decision of the court may have a wide effect.

ONTARIO CASES.

Negligence—Injury to Workman working in Trench.

An appeal to the Divisional Court by the plaintiff from the judgment of Hon. Sir John Boyd, Chancellor. Plaintiff, a labourer, working for defendant contractors, engaged in the construction of a trench or ditch in Port Arthur, was injured while in the bottom of the

trench shovelling earth off the rock. He was struck on the head by a pole falling into the trench, which produced concussion of the brain and left him in a state of general shock, etc. The injuries were alleged to have been caused by the negligence of the defendants. Plaintiff claimed \$5,000 damages. Chancellor Boyd at the trial dismissed the action without costs. The Divisional Court set aside this judgment and ordered a new trial on the ground that the evidence showed that plaintiff was where he ought to have been, and where he had been so ordered by defendants' foreman, and the defendants had failed to discharge the onus cast upon them of showing that the accident occurred through no fault of theirs. Costs of former trial and of this appeal were reserved for the judge who shall preside at the new trial. *Magnussen vs. L'Abée*, 20 O.W.R. 502.

Workmen's Compensation Act—Master and Servant—Damages.

An action by Catherine Darke, widow and administratrix of Hugh Darke, for \$10,000 damages, under the Workmen's Compensation for Injuries Act, the Ontario Factories Act, and also at common law, for the death of her husband. The defendant company possesses extensive works at Peterborough, where are manufactured electrical goods of various kinds, and the deceased at the time of the accident was in their service as a machinist's helper.

The company was manufacturing a generator, and, before shipping it to the buyer, desired to submit it to an electrical test. Its parts were made in various buildings of the company's works; they were put together in the room for that purpose; and the machine was then bolted to the steel floor where it stood, that it might be secure and firm when being tested. The deceased was in attendance to render certain services, if necessary, after the power was turned on, but thinking the machine not sufficiently secured proceeded to further bolt it to the floor, and, in order to get a better purchase

on the wrench with which he was turning a nut on the bolt, knelt on a broad belt which the power when turned on set in motion. When he was so situated Thompson, the electrician, not knowing of Darke being on the belt, turned on the power, whereby the deceased was carried between the belt and the pulley and crushed to death.

One of the questions asked of the jury was whether the accident was caused by the negligence of any person in the service of the defendants who had any superintendence entrusted to him whilst in the exercise of such superintendence? The jury answered, "Yes." Chief Justice Mulock, the trial judge, held that having regard to the jury's answer to this question, that there was no evidence that Thompson had entrusted to him any superintendence over Drake, therefore, there was no liability under section 3, sub-section 2, of the Workmen's Compensation for Injuries Act. Another question asked of the jury was, by what authority, or at whose instance, was the deceased acting when endeavoring to further secure the machine just prior to the accident? The jury's answer was, "Jeffry's general order to look after the machine." The Chief Justice held that there was no evidence to support this finding, that Darke was acting under the authority of his foreman, Jeffrys, when endeavoring further to secure the machine, so there was no liability under section 3, sub-section 3, of the Act. The Chief Justice also held that, at common law, the Company would not be liable for the negligence of Thompson, who, as regards Darke, was a fellow workman. Thus there was no common law liability. He dismissed the action without costs. *Darke vs. Canada General Electric Company*, 20 O.W.R. 587.

Master and Servant. — Damages for negligence of man in superintendence.

On the 8th day of May, 1911, the plaintiff, as a workman in the employ of the defendants, was engaged with other labourers in shovelling coal. The defendants were moving their coal and

distributing it to different places upon their coal docks and on their extensive coal storing premises. This work was done by means of a hoisting gear and tramway system, hoisting coal in buckets or skips from a lower level and conveying it to any place desired, emptying coal from the full buckets or skips and returning empties to be refilled, etc.

The shovellers below were doing their work apparently under the direction of a man also in the employ of the defendants. This man was called the "hooker," and he from below directed the motorman or engineer above when to stop, when to lower the empties, and when and where to stop to hoist the full buckets. At the time of the accident the plaintiff was working on a night shift. In general the way the thing was done was to stop the hoist directly over the full bucket, and when the bucket was hooked on to the chain from the crane, or whatever that might be called, the signal was given to hoist. On the 8th day of May, 1911, the motor was not directly over the bucket, but rather over the plaintiff, who was working below, and when the bucket began to move up it swung from the vertical line and struck the plaintiff severely injuring him by making a wound seven and one-half inches long directly across and completely through the wall of the abdomen.

Mr. Justice Britton, who tried the action, found that the man called the "hooker" in superintendence for the defendants in and about the work of placing the buckets, lowering the empties, etc., was guilty of negligence which caused the accident to the plaintiff. He also found that the system of the defendants, in moving this coal at night, was defective. Judgment for the plaintiff for \$600 damages with costs. *Flocks vs. Canadian Northern Coal and Ore Docks Co.*, 20 O.W.R. 65.

Damages for Workman's injured foot

Frederick Bowyer, who was employed by the Toronto Electric Commissioners, was run over by a lorry on July 3rd last, while assisting some other

employees to erect a fifty foot pole at the southeast corner of Queen and York streets. While engaged in the work of supporting the pole by means of a pike pole, a wagon belonging to Hendrie & Company, Ltd., turned the corner, and the hind wheel passed over his right foot, breaking two bones in his ankle and crushing his foot, permanently injuring it.

In an action in the non-jury court before Judge Denton for \$500 damages, Bowyer claimed that his injuries were caused by the negligence of the driver of the wagon. The defence claimed that the plaintiff, when bracing the pole, moved his foot out under the wheel when the wagon was passing, and therefore the accident was due to the plaintiff's own negligence. After hearing the evidence, Judge Denton allowed the plaintiff \$300 damages and costs.

BRITISH COLUMBIA CASES.

Damages for negligence of watchman.

Mr. Justice Murphy, who tried the action, has given judgment for \$1,500 in favor of Alfred Jones against J. Braemer, night watchman for the Pacific Pressed Brick Company. Last February, Jones, who is a steamboat hand, was making his way along the wharf of the Pacific Brick Company to the tug on which he was working, when Braemer, the night watchman, offered to pilot him through. As Braemar was leading, with a cigar lighter in his hand, Jones fell eighteen feet through an open hatchway and received injuries from which he contracted a form of diabetes from which he is still suffering. The judge held, that the accident was due to the carelessness of the watchman and ordered him to pay the damages named and the costs.

GRAIN BLOCKADE IN WESTERN CANADA.

DURING to the extremely heavy crop of wheat in the provinces of Manitoba, Saskatchewan and Alberta, and the unusually late threshing season a large quantity of grain still remained unshipped in January, and complaints were made of a shortage of cars at numerous points. At the first annual meeting of the Associated Boards of Trade of Southern Saskatchewan, which was held early in the month at Regina, Sask., the following resolution was passed:

Whereas, there exists a very serious grain blockade in the province, owing to the inability of the railroads with their present available facilities and inadequate all-railroad, to promptly handle the grain offered for shipment, and, *whereas*, a large proportion of the grain is untouched in consequence of the inclement weather since harvest, and consequently not disposed of before spring will be of no value, thereby in the spring a serious loss to farmers and business and financial interests in this province,

Therefore, be it Resolved, that the Associated Boards of Trade of Southern Saskatchewan in convention assembled hereby request the Government of the Province of Saskatchewan to use every means in its power to urge the railroads to give such a favourable rate to Duluth and Minneapolis as will enable shippers to dispose of their grain in these markets.

Resolved, further, that a copy of this resolution be forwarded to the Minister of Agriculture and the managers of the freight departments of the railroads operating in this province.

An investigation of the situation was made during the month by Mr. A. J. Nixon, Chief Operating Officer of the Railway Commission of Canada, on behalf of the Commission, but the result of his findings was not made public.

A statement issued by Mr. Bury, vice-president of the Canadian Pacific Railway Company, gave the following facts. Up to February 2, 1912, 94,577 cars of grain of the 1911 crop had passed inspection while by February 2, 1911, 61,105 cars of the 1910 crop had passed inspection, showing that fifty-four per cent. more cars had been handled this year than last up to that date. This was achieved in spite of many difficulties against which the railways had to contend. Threshing was from three weeks to a month later than usual. The different quality of parts of the crop caused delay at the terminals. The special binning of the

inferior wheat greatly reduced the capacity of the elevators. The coal strike in the west made it necessary to bring in a year's supply of fuel from the East for the locomotives, and to give merchants much greater storage accommodation for coal at Fort William. The

prolonged cold weather in January also affected the operation of the trains. It was estimated by Mr. Bury that 61,000,000 bushels of wheat still awaited shipment, and that the railways can have all this wheat out of the country by early in the summer.

ANNUAL CONVENTION OF THE NATIONAL ASSOCIATION OF MARINE ENGINEERS.

THE annual convention of the Grand Council of the National Association of Marine Engineers was held at Ottawa during January. Two resolutions with reference to conditions of employment were passed, namely, as follows:—

(1) That twelve hours in twenty-four hours be the maximum period a marine engineer can be required to stand watch, constituting one day's work.

(2) That all steamboats constructed in the engine department in such manner that the water gauges are not visible from the engine room or are separated by bulkheads and stairs, be required to carry a water tender.

Resolution No. 2 is designed to protect the engineer who is held responsible for the boilers and who cannot

leave his post and pass over the obstacles named without absenting himself from the engineroom, where he is required at all times to answer all signals from the deck officer.

During the course of the convention a delegation waited upon the Honourable the Minister of Railways and discussed the above and other matters with him.

Officers of the Grand Council were elected for 1912 as follows:—

Grand President.—J. T. McKee, St. John Co., N.B.

Grand Vice - President. — Thomas Theriault, Levis, Que.

Grand Secy.-Treasurer.—Neil J. Morrison, P. O. Box 238, St. John, N.B.

Grand Conductor.—J. A. Murray Midland, Ont.

Grand Doorkeeper. — Geo. Bourret Sorel, Que.

Grand Auditors.—L. B. Cronk, Windsor, Ont.; Richard McLaren, Collingwood, Ont.

THE LABOUR GAZETTE

MARCH, 1912.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF FEBRUARY, 1912.

1.—GENERAL SUMMARY.

OUTDOOR construction work was interfered with, especially in the building trades, by the exceptionally cold weather which continued during the greater part of the month. In other respects active conditions existed in nearly all parts of the country. A shortage of cars in the West caused some congestion of traffic during the first part of the month, but an improvement occurred during the latter part, following heavy shipments of grain to United States points. Farmers were busy marketing produce, and good prices generally were realized. Wholesale and retail trade was good. The mining companies were busy and good outputs were maintained. Manufacturing was brisk, factories in nearly all parts of the country working full time. The heavy snowfalls hindered traffic for a time, but gave employment to many unskilled labourers.

The Department's index number of wholesale prices, which as it covers over 250 representative commodities, is designed to reflect general industrial and trade activity, as well as cost of living, stood at 134.3 for February, 1911, being the highest point ever reached in the records of the Department which extend back to 1890.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades, of the more important changes in wages and

hours of labour, information concerning which was received at the Department of Labour during February, 1912.

Metal trades.—Iron moulders (32) in Brantford, Ont., received an advance of ten cents per day. Coremakers (12) in the same city received an increase of ten cents per day.

Railway service.—Machinists (50) on the Pere Marquette Railway at St. Thomas were given an increase of one cent per hour.

Civic employees.—Civic firemen (71) at Hamilton, Ont., received increases. Labourers in the same city received increases from 20 to 22 cents per hour. Employees of the hydro-electric and waterworks department of the city of London, Ont., had their salaries increased, the number of men affected by the change being 14. Members of the police force at Guelph were given an increase of \$50.00 per year. Members (4) of the Berlin Police force were given increases ranging from \$100 to \$200 per year. The members of the Regina Fire Department have received an advance.

Police salaries at Niagara Falls were increased as follows, chief from \$1,140 to \$1,200, sergeant from \$960 to \$1,000, four patrolmen from \$840 to \$864 and one patrolman from \$720 to \$840. Further increases to other municipal employees include, electric department superintendent from \$1,320 to \$1,400 and line foreman from \$900 to \$975.

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

Unskilled labour.—Labourers (1,100) in Victoria, B.C., received an advance from \$2.75 to \$3.00 per day. Rock drillers (40) in the same city received an increase from \$3.00 to \$3.25 per day. Labourers at St. Jean had their wages increased from \$1.75 to \$2.00 per day. Labourers (300) at Toronto were given an increase from \$2.00 to \$2.25 per day.

Interruptions to Industry.

The strike situation in Canada continues on the whole favourable according to the latest reports of the Department of Labour. Few disputes of importance occurred during February, the one affecting most employees being that of the cloak and garment workers in the employ of T. Eaton Company, Toronto and Montreal. About 600 employees were affected by this dispute. Altogether there were twelve strikes in existence during February affecting about 50 firms and 1,200 employees. The loss of time in working days was approximately 10,000, compared with 12,000 days lost from the same cause during January and over 32,000 days lost in February, 1911. Eight strikes remained in existence at the close of the month.

Among the industrial establishments, etc., destroyed by fire or through other causes during February, 1912, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Sugar refinery at Dartmouth, loss \$1,000,000; business block, Middleton, loss \$12,000; business block, New Glasgow, loss \$20,000.

Prince Edward Island.—Furnishing store at Montague, loss \$10,000.

New Brunswick.—Roman Catholic church at Campbellton, loss \$30,000; dry goods store at St. Stephen, loss \$3,000.

Quebec.—Hardware store, Ayer's Cliff, loss \$12,000; Roman Catholic church, Iberville, loss \$100,000; locomotive works, Longue Pointe, loss \$4,000; brick works at Laprairie, loss \$15,000. The following fires occurred at Montreal: business block, loss \$8,000; electrical supply store, loss \$10,000; laundry, loss \$3,000; plumbing and patent medicine establishments; sash and door factory, loss \$4,000; roof of round-house collapsed, loss \$10,000; jewellery store at Ogdensburg, loss \$70,000; business block at Sherbrooke, loss \$30,000.

Ontario.—Business section of Bowmanville; barn and live stock near Brockville; grain elevator, Chatham, loss \$3,000; hotel at Galt, loss \$5,000; wheelwright establishment damaged by wind, \$40,000; business block at Harrow, loss \$10,000; printing establishment at Hamilton, loss \$75,000; also laundry at the Sanitarium, loss \$5,000; Methodist church at Iroquois, loss \$25,000; hardware store at Kenora, loss \$3,500; dry goods store at Listowel, loss \$17,000; bowling alleys at Niagara Falls, loss \$5,000; Presbyterian church at Newboro; crockery establishment at Ottawa, loss \$40,000; wire fence factory, Owen Sound, loss \$15,000; business block at Port Arthur, loss \$10,000; woodworking factory at Toronto, loss \$3,000; explosive factory near Wallaceburg, loss \$50,000, and twenty-five men thrown out of employment; hotel at West Lorne, loss \$2,000; Separate school at Windsor, loss \$28,000; business block at Wiarton, loss \$12,000.

Manitoba.—Business block at Shoal Lake, loss \$25,000; sash and door factory at St. Boniface, loss \$25,000; barn, together with granaries and 16 horses, at Rothwell, Man.

Saskatchewan.—Business block at Herbert, loss \$5,000; hotel at Moosejaw, loss \$80,000; warehouse at Moosejaw, loss \$8,000; general store and other buildings at Zealandia, loss \$25,000.

Alberta.—Theatre (Monarch) at Medicine Hat.

British Columbia.—Coal tipple, loss \$3,000; power dam at Union Bay burst, destroying 50 buildings, loss \$100,000, and one life lost; laundry at Victoria, loss \$3,000.

Conditions in the Industries and Trades.

Conditions of employment during February in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received from other sources, may be briefly summarized as follows:—

Agriculture.

Little was done by farmers during the month besides caring for stock, marketing produce and replenishing wood supplies. The markets were well attended during the first part of the month, but the recent heavy snow falls made the markets so difficult of access that prices reached exceptional high levels. This was particularly true in the case of fowls, eggs, butter and potatoes, the last named commodity being sold for prices which have rarely been equalled. Stock sales were plentiful and well attended, and horses and cattle reached good prices.

In the Quebec Legislature reference was made to the encouragement of poultry raising by the Quebec Department of Agriculture. Teachers had been sent to the different parts of the Province to instruct the farmers in the production of eggs, and the fattening of poultry, and arrangements were made with the Canadian Pacific Railway and the Allan Steamship Line to supply them with chickens.

A bulletin issued by the Statistics Branch of the Saskatchewan Department of Agriculture giving the final estimates of the areas and yields of the principal grain crops growing in the province in 1911 states that Saskatchewan now stands first in the production of wheat and other small grains. Minnesota and the Dakotas have been close competitors in recent years, but in 1911 the Canadian province outstripped its southern neighbours. Of Saskatchewan's total wheat production of 97,796,588 bushels there were some twenty million bushels under the snow during February, and of this amount perhaps one-half will be a total loss, while twelve million bushels of the threshed grain is damaged and awaiting immediate shipment. The rush of spring work intensified by reason of the small amount of fall ploughing done will, in many instances, necessitate leaving the threshing of the balance of the 1911 crop until after the 1912 crop has been put in the ground. Much will depend on weather conditions in the spring as to value of the unthreshed balance. The following presents in tabulated form area and production of the 1911 grain crop with 1910 comparison:—

1911 ACREAGE.

	Wheat (acres)	Oats (acres)	Barley (acres)	Flax (acres)
Total acreage for province.....	5,232,248	2,192,806	244,993	932,408
Acreage unthreshed by Jan. 1st, 1912....	481,367	208,317	10,780	155,712
Acreage threshed by Jan. 1st, 1912.....	4,750,881	1,984,489	234,213	776,696

Grain	Yield per acre	1911 Total production.	Am't. unthreshed	Am't. thresh'd	1910 Total production.
Wheat.....	18.50	96,796,588	8,905,289	87,891,299	72,666,399
Oats.....	45.00	98,676,270	9,374,265	89,302,005	63,315,295
Barley....	28.00	6,859,804	301,840	6,557,964	5,859,018
Flax.....	11.13	10,377,701	1,733,075	8,644,626	3,044,138

Amount of all grains threshed, 192,395,894.

Amount of all grains unthreshed, 20,314,469.

The Manitoba winter fair will be held at Brandon early in March.

The annual convention of the British Columbia Farmers' Institute was held in Victoria on January 26, with forty-four delegates in attendance. Addresses were delivered by Hon. Price Ellison, Minister of Agriculture, and Premier McBride, who stated that the Government could not promise the adoption of a government owned telephone system.

The twenty-second annual meeting of the British Columbia Fruit Growers' Association was held on January 30. The report of the Executive stated that the Association had a total membership of 594. Two years ago the membership was 97. The Convention was addressed by Premier McBride and the Minister of Agriculture, who spoke of the bright future of the fruit industry of this province. A deputation from the Farmers' Institute of British Columbia waited upon the Government asking "State Loans to the Settler" by way of loans to farmers as is done in Denmark and some of the Australian States. The Premier stated that the request would have the careful consideration of the Government.

The eighth annual convention of the Canadian Seed Growers' Association was held at Ottawa, February 8-9. There was a good attendance of the members.

It was reported that one million barrels of apples had been received in the United Kingdom this season from Nova Scotia, and it was estimated that another three hundred thousand to four hundred thousand barrels remained to be shipped. The keeping qualities of the apples, however, were below the average,

owing, it is thought, to the fruit having ripened too quickly. The large quantity had a lowering effect on prices.

Fishing.

Fishing has been good throughout the country during the month comparing well with that of the corresponding month of last year. Fair catches of winter fish have been made in the Maritime Provinces.

It is understood that an agreement satisfactory both to Canada and the United States in regard to the future regulation of the fisheries has been made as a result of the recent conference at Washington. The Minister of Marine and Fisheries stated that the conference was satisfactory but that no definite announcement would be made before Newfoundland had been communicated with.

Lumbering.

Lumbering operations have been actively carried on, the heavy falls of snow facilitating work. The increased demand for laths and shingles in the United States markets has served to stimulate that industry in New Brunswick and a number of small mills are now active. The lumber trade in Eastern Canada was appreciably better in 1911 than in the preceding year and prospects for 1912 are even brighter. In the west the opening of new lumber yards is indicative of increased industry in this line. Much inconvenience is being experienced by the shortage of cars, a considerable quantity of lumber awaiting shipment. With the prospect of extensive building operations throughout Canada in the spring there is expected to be a large demand for forest products.

During 1911, the timber cut from the provincial Crown Lands in British Columbia amounted to 1,100,000,000 feet as compared with 936,000,000 feet in 1910. Of the total cut only 45,000,000 feet were exported to the United States. The total collection for the year in royalties and taxes, exclusive of rent-

als, was \$444,333 compared with \$393,598 in 1910.

The fourth annual meeting of the Canadian Lumbermen's Association was held at Ottawa on February 6 and was the most successful that the Association has ever had. There were about forty members in attendance.

To be entitled to free entry into the United States from Canada, wood pulp and paper must be the product of the woods of the Dominion, and not Canadian manufacture of foreign materials, according to a decision by the Secretary of the United States Treasury. The question was raised on a recent importation at Detroit, Mich., of paper from Canada. It developed that this paper was made in Canada from wood-pulp imported into that country from Sweden. American importers of Swedish wood-pulp and paper were among those who most recently appealed under the "most favoured nation" clause of the commercial treaties for the abolition of the tariff on those articles imported direct into the United States.

Mining.

Fairly active conditions prevailed in the various mines, though a falling off in the amount of labour required was noticed in the Alberta coal mines. The industry has been slack in Western Canada generally, this time of the year being as a rule quiet. A large stock of coal was laid in in order to prevent a coal famine in case the strike continued and it is expected that business will show a revival in the spring.

The mines in the Cobalt district have been working steadily and there was little unemployment. It is stated that Ontario now stands third in point of production among the silver producing countries of the world, the entire output yielding one-seventh of the world's production.

A proposed amendment to the Mines Act of Ontario provides that:—

(1) No miner shall be employed underground in any mine for more than eight hours in any twenty-four hours, including in such eight hours the time occupied in descending into and ascending from the mine.

(2) For every contravention of this section the person owning or controlling the operation of the mine and the Manager or Superintendent of it shall incur a penalty not exceeding \$50, recoverable under the Ontario Summary Convictions Act.

The production of minerals in the British Columbia mines has continued active. In the Kootenay district especially the men have been working overtime. The annual report of Le Roi No. 2 Mining Company of Rossland stated that during the twelve months covered by the report 27,098 tons of ore were shipped to the smelter, the gross value of which was \$571,282.84.

Manufacturing.

Manufacturing establishments throughout the country are reported to have had a very busy month. They have with very few exceptions been working at full time and several new establishments have been added to those already existing throughout the country. With the increased activity that may be looked for in the different trades it is probable that there will be still more activity in the factories in the different industrial centres during the spring.

It was announced that steps were being taken by the Hydro-Electric Power Commission to extend operations to Central, Northern and Eastern Ontario.

The Nova Scotia Steel and Coal Company has issued a circular requiring its mining officials to qualify and obtain certificates of competency from the St. John Ambulance Association for first aid to the injured. With this end in view the Company is making arrangements for a series of lectures to be given by a competent medical officer associated with the St. John Ambulance Association to take place during the present winter in some convenient building at Sydney Mines. All expense in connection with these lectures and examinations are to be borne by the Company.

Railway Construction.

There was not much done in the way of railway construction but contractors

all over the country have been making preparations for carrying on extensive operations in the near future. It is probable that all the unskilled labourers now out of employment will be needed in construction work and some uneasiness exists among contractors in regard to securing enough men to complete their contracts on time.

As the season advances announcements of Western railway extension multiply. In the Saskatchewan legislature recently notice was given of important legislation for the incorporation of the Grand Trunk Saskatchewan Railway Company. The bills will provide for charters for the construction of a large number of branches throughout the province. The programme for the Canadian Northern for this year includes, in addition to work on the main line and many branches, the enlargement of the Company's yards at Winnipeg and several other western points, and the erection of many new stations and section houses.

It is reported that the Canadian Pacific Railway Company have bought a large tract of land east of Winnipeg with a view to constructing thereon a new freight yard, as well as providing a line which will carry all through freight traffic past the city without coming through it. This is part of a plan to relieve the annual traffic congestion in the freight yards at present existing.

In the Federal House notice was given of a bill to incorporate the Pacific Trans-Canada and Hudson Bay Railway. The company propose to build a railway from Edmonton through the Peace River Country and Laurier Pass to Prince Rupert, also a line to Churchill or Nelson. A bill to incorporate the Saskatchewan and Hudson Bay Railway was also reported.

The extent to which the Grand Trunk Pacific railroad is becoming a factor in the transportation business of this country is shown in the fact that there have been ordered for this company since the first of the year one thousand new freight cars. Of these

250 are refrigerator cars, each having a capacity of 60,000 lbs. from the Canadian Car Foundry Company. The American Foundry Company is to supply 250 refrigerator cars of the same capacity and dimensions. A Detroit Foundry will supply 250 Automobile steel underframe cars and the Western Car Foundry Company of Chicago will contribute a similar number of the same variety. Delivery of these cars is to commence in April of this year and is to be completed at the rate of twenty-five cars per day. The other transcontinental roads are also buying new rolling stock in their effort to keep up with the rapidly growing business of the country.

General Transport.

Some alleviation of the grain situation in the west was brought about by a reduction in the rates to United States points which was made by the railway companies in order to relieve the congestion at the head of the lakes. The business outlook has been improved considerably by the rush of grain south following this change, about 2,000,000 bushels having gone forward during the month. While the blockade has meant losses to holders, it will prove a boon to navigation companies during the coming season.

The railway property of Canada is now capitalized at \$1,528,629,201. There is an additional \$200,000,000 in taxes and subsidies from the Dominion Government and the value of upwards of 50,000,000 acres of land. This is nearly 4 per cent. of the entire value of the railways of the world. The total earnings of the Canadian Pacific Railway Company, the Canadian Northern Railway Company, the Grand Trunk Railway and the Intercolonial Railway, which make up four-fifths of Canadian railways, last year were \$188,733,000, and their operating expenses \$131,034,000.

The following is a statement of the earnings and expenses of the Canadian Pacific Railway Company for January,

1912, also a comparison of the net profits with those of the corresponding one of last year:—

	January, 1912.
Gross earnings	\$7,328,781 81
Working expenses	6,245,924 11
Net profits	\$1,082,857 70

In January, 1911, the net profits were \$656,117.87, so that the increase in net profits in January, 1912, over those of the same period of last year is \$426,739.83. Taking the period from July 1, 1911, to January 31, 1912, net profits are shown to the value of \$25,553,105.34, which represents an increase of \$2,880,279.24 over those of a similar period one year ago.

An agreement between the Temiskaming and Northern Ontario Railway Commission and the Grand Trunk Railway Company granting the latter running rights over the Temiskaming and Northern Ontario Railway, in consideration of which they have agreed to assume a fair share of the cost of maintenance of the road and to pay the sum of \$300,000 per annum as rental. This will represent half the interest of the total cost of the line.

The annual meeting of the Richelieu and Ontario Company was held on February 19. The following is a summary of the earnings for 1911, with comparisons:—

	1911.	1910.
Gross	\$1,536,159	\$1,437,931
Operating expenses	1,050,289	1,016,233
Fixed charges and interest	57,629	58,582
Net	\$448,240	\$363,115

The Pere Marquette Railway Company paid over to the City of London, Ont., the sum of \$17,244 as rental for 1911 for running rights over the London and Port Stanley Railroad, owned by the City.

At a sitting of the Board of Railway Commissioners for Canada on February 6, 1912, it was ordered:

1. That all Railway Companies within the Legislative authority of the Parliament of Canada operating snow plows shall, on or before the first day of November, 1912, equip such plows with

(a) Direct connection between the plow and the steam whistle of the locomotive so that the man in the plow shall be able to give all proper signals.

(b) Air guage, air controlling valve, and proper air connections between the plow and the locomotive, so that the air brake may be controlled from the plow.

2. That snow plows shall run as push plows, not fitted with cupolas, and having no men in charge, shall be fitted with air pipe connections between the plow and the locomotive, so that in case of derailment and air connections being broken the brake will apply automatically.

The annual report of the Ottawa Electric Railway Company for the year 1911, presented at a meeting held at Ottawa February 5, 1912, showed that the gross earnings for the year were \$840,680.52, compared with \$748,708.76 for 1910; an increase of \$91,971.77. The net earnings for 1911 were \$354,691.08. 19,270,521 passengers were carried, compared with 16,967,334 in 1910; an increase of 2,303,187. It was pointed out that the business of the Company had practically doubled in six years, the number of passengers carried in 1905 having been 9,891,311.

The Trades.

Building.—Inactivity in this line prevailed in many places during the month. Conditions in regard to indoor work compared favourably with those of January, though the outdoor work was seriously hampered by reason of the exceptionally cold weather. In some districts it was practically abandoned. A season of exceptional activity is assured in general throughout the country. The building permits issued during February are considerably more than those issued for the corresponding month of last year, and reports of architects show that, judging by the number of plans prepared for the erection of new buildings, the year 1912 is likely to eclipse all previous year in activity in this industry. The following is a partial statement of the number of building permits issued in Canada during February, with the estimate value they represent:—

LOCALITY	No of permits	Value
Halifax.....	12	\$ 10,162
Ottawa.....	24	107,305
Peterborough.....	1,135
Brantford.....	5	6,150
London.....	22	15,675
Winnipeg.....	169	801,710

Metal and woodworking trades.—These trades experienced a month of activity with very little change from last month.

Printing and allied trades.—Slightly more activity in these trades was shown than in the month of February, and there was little unemployment.

Clothing trades.—Tailors and garment workers had a fair month; boot and shoe workers were very busy.

Textile trades.—Cotton and woollen mills were running steadily throughout the month.

Food and tobacco preparation.—Bakers and confectioners were very actively employed; butchers had a good month. Cigar makers and tobacco workers had steady employment.

Leather trades.—Employment was fairly good in the leather trades, and conditions compared favourably with those of January.

Miscellaneous trades.—Barbers were actively employed, as also were hotel employees and laundry workers.

Unskilled labour.—During the first part of February there were many labourers out of employment, but the heavy snowfalls towards the end of the month gave work to a large number. On the whole the month did not compare favourably with January. The factories while running at full time and giving employment to skilled workmen did not require additional help from unskilled men. As soon as spring operations commence, however, it is probable that a ready market for the surplus labour which now exists will prevail.

Canadian Trade and Revenue.

Imperial and foreign trade.—During January, 1912, there was an increase of \$2,963,765 in the total value of imports entered for consumption into the Dominion of Canada over the corresponding month of 1911. During the first ten months of the fiscal year ending January 31, there was an increase of \$53,913,066 over the corresponding period of 1910-11. The total value of domestic exports during January, 1912, showed an increase of \$2,384,855 over January,

1911. The total value of domestic exports during the first ten months of the fiscal year ending January 31, showed an increase of \$7,515,118 over the corresponding period of 1910-11. During the month of January there were increases in the exports of agricultural, fisheries, forest and manufacturing products, and decreases in the exports of the products of the mine, animals and their produce, and miscellaneous merchandise. The accompanying tables contains the latest official summary of Canadian trades:—

Canadian Trade, January, 1912.**TOTAL IMPORTS ENTERED FOR CONSUMPTION IN THE DOMINION OF CANADA,**

	ENTERED FOR CONSUMPTION.			
	Month of January		10 Months ending Jan.	
	1911	1912	1911	1912

Domestic trade.—Trade conditions throughout Canada were generally good during the month. Bad weather towards the end interfered largely with the movement of commodities and caused some congestion. Collections in the west were only fair. In the east they were fair to good. Wholesale and retail trade was steady. The volume of business was fairly large and well distributed throughout all lines of trade.

According to R. G. Dun and Company, business failures in the Dominion of Canada for the month of February totalled 129, as compared with 139 during February, 1911.

According to a compilation of weekly statistics published by the Monetary Times, the following are the returns from Canadian Clearing Houses for the month of February, 1912:—

Halifax	\$ 6,862,944
St. John	6,363,223
Quebec	9,582,685
Montreal	175,991,961
Ottawa	17,288,311
Toronto	140,770,959
Hamilton	10,336,066
London	5,542,481
Winnipeg	96,251,218
Brandon	1,889,644
Regina	6,925,475
Saskatoon	6,732,313
Calgary	16,992,940
Edmonton	16,091,039
Lethbridge	2,381,023
Vancouver	43,365,419
Victoria	12,043,897

The thirty-seventh annual report of the Standard Bank of Canada was submitted during the month, and showed net profits amounting to \$381,601.10, being at the rate of 19.08 per cent. per annum.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST.

THE first session of the thirteenth legislature of the Province of Ontario was opened on February 7 at Toronto, Ont. In the speech from the throne it was announced that the net earnings of the Temiskaming and Northern Ontario Railway for the year ended December 31, 1911, amounted to \$593,000, as against \$420,000 in the previous year. The branch of the railway to Porcupine has been completed and there are 300 miles of the railway in operation, while another branch is being located to Elk Lake.

Government Telephones Commission.

A Royal Commission was appointed by the Government of Manitoba composed of the Honourable Justice Locke, Mr. George R. Crowe and Mr. Roland L. Barry for the purpose of investigating certain complaints which had been made as to the administration of the Manitoba Government telephones by the commission which was appointed January 15, 1908. The Royal Commission was appointed upon the request of the telephone commissioners.

Annual Convention of Miners at Lethbridge, Alta.

The ninth annual convention of District No. 18 of the United Mine Workers of America was held at Lethbridge, Alta., in the third week of February. The reports of the officers dealt at some length with the recent strike affecting the collieries in Alberta and Eastern British Columbia, the organization and finances of the union, and the Bellevue disaster. Closer support of the Trades and Labour Congress of Canada and of the British Columbia Federation of Labour was urged. The total receipts of the organization amounted to \$432,950 during the year, out of which expenses amounting to \$431,826 were paid.

United States Children's Bureau.

On February 1 there was introduced into the House of Representatives of the United States an act to establish in the Department of Commerce and Labour a bureau to be known as the Children's Bureau, to investigate and

report on all matters pertaining to the welfare of children among all classes of people, especially on questions relating to infant mortality, the birth rate, juvenile courts, desertion, dangerous occupations, accidents and diseases of children, employment, and legislation.

Glace Bay Co-operative Society.

The quarterly report of the Glace Bay Co-operative Society shows that the total business for the quarter amounted to \$63,000, compared with 43,000 in the previous, and \$45,000 in the corresponding quarter of a year ago. The sum of \$7,730 was available for dividends, which were paid at the rate of 8 per cent. The Port Morien branch of the society has shown a loss during the past six months owing to dullness at the collieries, but improvement is expected.

International Commission on Cost of Living.

On February 2, the President of the United States in a message to Congress referred to a movement among economists and others to secure the appointment of an international commission to investigate into the causes for the high prices of the necessities of life. The President strongly urged the holding of a preliminary conference to prepare plans for a full investigation into the high cost of living, its extent, causes, effects, and possible remedies. An appropriation of \$20,000 was asked for to enable the President to invite foreign governments to such a conference.

Women and Child Labour Legislation.

The following bill has been introduced in Quebec Legislature:

1. In cotton or woollen factories, no boy less than eighteen years old, and no child, girl or woman shall be employed more than ten hours in any one day, or more than fifty-five hours in any one week.

One hour shall be allowed at noon each day for meals, but such hour shall not be counted as part of the working hours hereinabove mentioned.

The day mentioned in this article shall not begin before seven o'clock in the morning, nor end after half-past six o'clock in the evening.

2. This act shall come into force on the first day of January, 1913.

British Labour Party.

The report of the British Labour Party, which was presented at the 12th annual conference held recently at Birmingham, Eng., showed that the membership of the Party during 1911 had increased from 1,430,539 to 1,446,666, but that the number of affiliated trade unions had declined from 151 to 137. This was attributed to the result of the Osborne judgment. A reference was made in the report to the work of the joint board which considered the "Right to Work Bill", the "National Insurance" Bill; and the "Trade Union" Bill, adjudicated in several disputes between unions. Brief reports were given by representatives of the Labour Party at various congresses, including the trade union congress, the general federation of trade unions, and the seventh annual congress of the Peace Association, and the conference on industrial training. It was announced that there were good prospects of establishing a daily labour newspaper.

British Columbia Commission on Labour Conditions.

On the 27th of February the premier of British Columbia announced that it was the intention of the government, as soon as it was possible after the session, to appoint a royal commission on labour, "so as to enable Parliament later on to take what steps in the premises seem just and wise." The question arose in connection with a bill respecting employment agencies and the premier recalled that for some years Socialist members had urged on the government the passage of drastic legislation in connection with labour. The government had indicated its desire not to interfere between employer and employee, but to leave hours of labour, wages and so forth to settlement by those interested. He said that it always appeared to the government that if once the legislature started this

it would be hard to draw the line where its function should stop. The province was yet in the formative stage and the government, with an eye to the public good, preferred to move slowly. The premier said that it was proposed on the rising of the legislature as soon as time would permit, to submit to the lieutenant-governor a recommendation for the appointment of a royal commission whose function would be to carefully and completely investigate labour conditions through British Columbia in order to secure a report from that source which would deal in a general way with the affairs that especially relate to the employment of labour in British Columbia. The premier stated that ample opportunity would be afforded all interests to appear and be heard, and the commission would cover the province. He stated, moreover, in reply to a request that two representatives of labour should be appointed on the proposed commission that he would be glad to consider the matter of appointments later on. The government, he said, intended to make the commission as representative as conditions would permit, so that it might enjoy the confidence of the country.

Canadian Forestry Convention.

The thirteenth annual convention of the Canadian Forestry Association was held at Ottawa on February 7-8; over 200 delegates being present. At the opening meeting they were welcomed by the Right Honourable R. L. Borden and Sir Wilfrid Laurier, who in their addresses emphasized the importance of the conservation of Canadian forests. In the address of the president George Y. Chown, the objects for which the Association should work were stated to be, (1) the taking of the forestry service, both Dominion and Provincial, out of politics, making way for technically trained men; (2) a permanent forest policy, and especially a progressive policy with regard to the treatment of forest reserves; (3) some efficient manner of dealing with slash

in order to guard against forest fires. A number of addresses were made on subjects relating to forestry, and resolutions were passed as follows: that the Federal and Provincial governments be recommended to make increased expenditures on forest management; that the Government be impressed with the necessity of maintaining in connection with the forestry branch and experimental laboratory for testing and investigating the physical and mechanical properties of Canadian woods, with a view to extending the possibilities of their use and for other purposes. The association reaffirmed its attitude in favour of the public domain, and the inclusion in forest reserves of lands unsuited for agriculture, where the forests are required for the protection of watersheds, and they urged the Federal and Provincial governments to carry out that policy at the earliest possible date. For the elimination of forest fires, it was recommended that an educative campaign should be carried on with regard to settlers, that times should be fixed for the burning of slash from their clearing operations and in each case a permit to burn same should be secured from the fire warden of the district. It was suggested that tourists and prospectors should not be allowed to start fires in the woods for any purpose without having a permit from the proper officer, and such permit should be for a short time only and renewable on good conduct. To reduce the danger from lumbering operations it was recommended that the slash be burned while logging operations are going on and that the tops and branches of trees should be brought to lie close to the ground insuring rapid decay.

The following officers were elected:

Honorary Past President, Sir Wilfrid Laurier; Honorary President, Premier Borden; Patron, His Royal Highness the Governor-General; President, John Hendry, Vancouver; Vice-President, Hon. W. A. Charlton, M.P., Toronto; Territorial Vice-Presidents: Ontario, Hon. Mr. Hearst; Quebec, Hon. Jules Allard; New Brunswick, Hon. J. K. Fleming; Nova Scotia, Hon. George M. Murray; Prince Edward Island, Hon. J. A. Matheson; Manitoba, Hon. R. P. Roblin; Saskatchewan, Hon. A. E. Brown; British Columbia, Hon. W. R. Ross; Yukon, Com-

missioner Black; Mackenzie; F. D. Wilson; Keewatin, Lieut.-Gov. D. C. Cameron; Ungava, the Archbishop of Montreal.

Board of Directors: Messrs. W. Little, Hiram Robinson, Aubrey White, E. Stewart, H. M. Price, W. B. Snowball, Thos. Southworth, Hon. W. C. Edwards, Hon. Sydney Fisher, R. H. Campbell, J. B. Miller, G. C. Edwards, Dr. B. E. Fernow, Ellwood

Wilson, F. C. Whitman, G. C. Piche, Aleck McLaurin, Carl Riordan, Mgr. Mathieu, Bishop of Regina, A. P. Stevenson, Wm. Pearce, Wm. Power, C. E. Eusher, Dennis Murphy, C. Jackson Booth, Wm. Price, M.P., J. W. Harkom, A. S. Goodeve, M.P., Senator Bostock, W. C. Hall, K. S. Dennis.

Secretary, J. S. Lawler; treasurer, Miss M. Robinson; assistant secretary, Mr. F. W. H. Jacombe.

II. REPORTS OF LOCAL CORRESPONDENTS.

NOVA SCOTIA.

Sydney.

The only change in labour conditions during the month was an improvement in the coal trade. All the larger industries continued active and business generally was in a healthy condition. The weather was less severe than in January but a large amount of snow fell which blocked up the railway sidings, and hindered traffic to some extent though it did not stop it entirely. The subsidiary works of the Dominion Coal Company, such as the Tar and Chemical Works, the Cement Works, the Fertilizer plant and others were busy, while the wood and other factories were all busy. Prospects in nearly all lines of work are bright.

The coal industry was more active than in January and larger outputs were obtained in the Glace Bay and Sydney Mines districts. The output of the Dominion Collieries was greater by 50,000 tons than at the end of February, 1911. The output of the Nova Scotia Collieries show an increase for the first two months of the year of over 50,000 tons. This is owing to the activity of one of the collieries which during the first two months of the year 1911 were non-productive, owing to an accident. Inverness Colliery worked steadily during the month.

The steel industry was active during the whole month and large outputs were obtained. The bulk of their output was shipped by rail, which made traffic on the Intercolonial Railway fairly heavy. Construction work on the steel plant is advancing fairly rapidly. The Nova Scotia Steel works had a busy

month. The improvements being made to the plant are progressing favourably.

About the middle of January, the Cross Fertilizer Company, Limited put their new plant into operation. It was erected at Sydney for the purpose of manufacturing fertilizer from the slag produced at the Bessemer furnace of the Steel Company. At present fifty men are employed. The company have a contract with the Dominion Iron and Steel Company by which they receive the slag (raw) from the steel works. As the quantity of slag is likely to increase during the next two or three years, the grinding plant of the Fertilizer Company will be improved to handle the full output. The quantity of the raw slag, which the Steel Company expect to produce, is very high both in contents of Soluble Phosphoric Acid and Lime, and when turned into fertilizer will make it of a very high grade. For some time it may be necessary to export a certain portion of the fertilizer but the company hope in the course of a year or two that their entire production will be absorbed in the Maritime Provinces. The Fertilizer Company also act as the Canadian agents for the parent company of Glasgow, Scotland, and sell their acid superphosphates and mixed fertilizers, which are imported into Halifax and St. John, but as soon as the results justify it, the Cross Fertilizer Company will erect a plant in Canada to manufacture these articles also. The Intercolonial Railway was busy during the month and handled much freight in the way of steel rails, coal and other commodities usually borne by water in the summer season.

The new steamer "Bruce", built for passenger and freight trade between Newfoundland and Cape Breton, made her first trip and arrived in the port of North Sydney about the middle of the month. The steamer is specially constructed for drift ice conditions and was severely tested in covering a distance of forty miles through a field of ice before the entrance of Sydney harbor was reached. Except for a slight break in part of her machinery, the vessel stood the test exceedingly well. The severe frosty weather and heavy snowstorms gave considerable employment to outdoor labour. The building trades were quiet during the month but the wholesale and retail trades did a fairly large business. Of the staple articles, butter, prunes and tea increased in price.

Westville.

The labour market throughout the district continued brisk in all the several departments with the exception of outside industries which are at present quiet owing to the severe weather. The mines in town and district were generally steadily employed with fair outputs daily for the winter season.

The Drummond Colliery is pushing ahead with the bottom coal of the main seam. This coal was left some years ago and the mining of it will add greatly to the prosperity of the district as the seam averages from four to eight feet in thickness. The shipments from this colliery for the month of January, 1912 total about 17,000 tons which shows a decrease of about 3000 tons compared with those of January, 1911.

Amherst.

During the past month labour has been well employed. Few men have been idle, and the fine weather allowed considerable work under construction to be completed, adding to the industries of the district and creating employment for considerably more skilled labourers. No new factories or buildings are under construction but it

is expected that there will be considerable activity along these lines during the spring months. The Canadian Car and Foundry Company has completed its buildings destroyed by fire some time ago and now anticipates a greatly increased output. A number of its departments are working overtime.

Carpenters, moulders, plumbers, machinists, blacksmiths, boiler makers, coal miners, lumbermen, and the employees of the Car Company have been exceptionally busy.

There have been large railway shipments of imports, while wholesale and retail trade has been exceptionally brisk.

The feeling between employers and employees has been better than for some time past.

Halifax.

Labour conditions in the past month show an improvement over those of January, and also over those of the corresponding month of 1911. Outside work has been retarded, as is usual during this season of the year. While work along the waterfront has not been as great as in former years, this has been offset by the fact that more work has been done on city works this season than has been customary in the past. As to prospects, they are, owing greatly to the comparatively big fires that have recently occurred, much brighter than they have been for some time. On one site alone two seven-story buildings, besides several of lesser consequence, are to be erected, which will cost in the vicinity of \$250,000, while on the site of a recent fire several dwellings are to be erected, with a new hotel quite adjacent. The City of Halifax contemplates spending some \$200,000 on sewer construction and water works improvement, and the reconstruction of the new sugar refinery at Woodside should also tend to send up the building record of 1912.

The "Halifax Herald" and "Evening Mail," both of which were compelled to suspend publication for a few days owing to fire made their re-ap-

pearance on February 3, after the installation of one of the best newspaper plants in the Maritime Provinces.

The sixteenth annual meeting of the Halifax Electric Tramway Company was held on February 12. Steady progress was shown in all branches. The income for one year was \$502,399.32, including the following items: Passenger receipts, \$229,927.84; light and power earnings, \$202,119.88; gas earnings \$61,310.24; sundry earnings, \$9,041.36. The operating expenses were \$256,874, making net earnings \$215,525.32. During 1911 5,212,257 passengers were carried as against 4,848,767 in 1910. The percentage of operating expenses to income was 51.97 as against 51.94 during 1910. The number of passengers carried by this company in 1911 was nearly double that of 1900, while the dividends paid amount to about three times as much as the dividends of twelve years ago.

PRINCE EDWARD ISLAND.

Charlottetown.

The general condition of the labour market during the month of February did not differ very much from that of January and was much the same as during February of last year. Some lines showed a little more activity, while others declined somewhat.

Weather conditions precluded any activity in building operations. So far as outside work was concerned and carpenters, masons, bricklayers and plasterers had just as little to do at their respective trades as in the month of January.

At the lumber yards and in the planing mills and wood-working establishments in connection with them, business showed an improvement as compared with the month of January. A start was made in the moving of lumber from the yards. This was facilitated by the improved conditions of the winter roads. In the wood-working shops there was much activity; the preparing of inside finishings necessitating

the running of these establishments to their full capacity.

Iron workers have been very busy during February. In the machine shop engine room and other departments of our big foundry, the greatest activity prevailed and all are running on full time. This is particularly the case with the engine manufacturing department. A large number of orders for gasoline engines has kept this department running at full speed.

Mechanical operations in connection with the Prince Edward Island railway were very active during the month of February. The different labour departments were in full swing and showed as much activity fully as during January.

In the tobacco manufacturing business, the month of February exhibited a little less activity than did last month. The output was less and conditions generally were scarcely as brisk.

In shoe manufacturing business during February was just about as active as in January, and compared favorably with February of last year. The same number of hands were employed as in January and the wages were at the same rate.

Printing and allied trades were quite good during February.

Farmers were considerably more active during February than in the previous month. The improved condition of the winter roads and the longer days contributed in no small degree to this activity.

NEW BRUNSWICK.

Moncton.

The conditions of the labour market during February have been quieter than those of the previous month and in volume of employed labour do not compare favourably with those of the corresponding period of last year. Building operations were limited to the finishing of interior work upon uncompleted contracts of last season, and consequently the demand for men in

this trade is still small. The Paul Lea wood-working factory is actively running with its usual compliment of men, preparing stock to supply the ensuing season's demands. Work in the stove and Head factory is also active, night shifts being employed. About 5,000 cords of wood will be manufactured here. In all other local manufacturing plants, with possibly one exception, active conditions prevail and the outlook for continued steady work in the future seems assured. The estimates of the City Council for 1912 provide for the expenditure of \$117,435.00 as compared with \$107,908.00 in 1911. The Customs returns for the port of Moncton for January were imports \$31,438.00, duty \$5,188.00 as compared with: imports \$65,137.00 and duty \$5,135.00 for January, 1911, showing a decrease in value but a slight increase in duty collected. Retail trade has been rather below the average, but wholesale trade remained about normal.

St. John.

Work among the building trades was dull during February, but it is expected that business will improve as the spring advances.

As soon as the frost is out of the ground work will be commenced on the erection of the eight buildings required by T. M. Block, of Portland, Me., for the manufacture of "Blockite," an explosive material invented by him. A. B. Petrie, head of the Petrie Manufacturing Company of Hamilton, Ont., has purchased a lot of land on Prince William street, and will erect thereon a warehouse and offices for the accommodation of the Maritime Provinces trade. The boom in real estate continues, and many transfers of property have taken place during the month. Several realty companies have secured options on properties situate on the east and west sides of Courtenay Bay, paying big prices for the same.

The annual meeting of the Wilson Box Company was held on February 21, and the reports submitted showed the company to be in good standing.

This company now employs sixty hands in its Fairville factory, and anticipates employing a large number of hands in its saw mill at Westfield during the summer months. The annual meeting of the shareholders of the St. John Street Railway Company was held on February 26. The report of the directors showed that the company had declared four quarterly dividends of one and one-half per cent., amounting to \$48,000, leaving a balance \$6,232.41 transferred to profit and loss. The net profit, after providing for the interest on the bonds and all other purposes, was \$54,232.41. The following is a statement of assets and liabilities:

ASSETS.

Cost of property	\$1,963,610.74
Accounts receivable	56,826.47
Stores	32,216.38
Cash on hand	1,300.00
Cash in bank	2,747.73
Total.....	\$2,056,710.32

LIABILITIES.

Capital stock	\$ 800,000.00
Bonds.....	1,000,000.00
Accounts payable	72,294.60
Accd. interest on bonds	8,333.33
Dividend payable Jan. 17	12,000.00
Outstanding tickets	2,587.99
Contingent and depreciation	39,561.40
Profit and loss	121,933.00
Total... ..	\$2,056,710.32

Bank clearings for the four weeks ending February 22 were: \$6,146,732, and for the corresponding period last year \$5,423,767, being \$722,965 greater in 1912 than in 1911, and \$60,093 less than for the four weeks ending January 25 of the current year. Savings bank deposits for the month of January were \$63,511, and the withdrawals \$52,662.04. Up to February 23 there were filed at the Customs House cargoes for 57 steamships in connection with the winter service. These vessels took away Canadian goods valued at \$8,528,108, and foreign goods valued at \$6,199,256, making a total of \$14,727,364. For the same number of steamships last season the value of Canadian goods shipped was \$8,463,913, and foreign goods \$4,539,084, making a to-

tal valuation of \$13,002,997. These figures show an increase of value in Canadian goods of \$64,195, and of foreign goods \$1,660,172, making a total increase of \$1,724,367 in favour of the present season. The custom receipts for the month of January were \$120,701.36, and for the corresponding period last year \$115,687.97, an increase of \$5,013.39. The inland revenue receipts for January were \$18,351.48, and for January of last year \$16,192.47, an increase of \$2,150.01. During the month of February the city cashier paid out \$10,537.04 to civic officials for salaries, and \$8,036.42 in wages to workmen, making a total of \$18,573.46 for the month. The report of the building inspector for 1911 shows an increase in the amount of building over 1910. The value of buildings for which permits were issued was \$572,700, as compared with \$524,475 in 1910, an increase of \$48,225. The municipal council has agreed to a fixed assessment of \$225,000 for fifteen years on the Partington pulp mill property at Lancaster on condition that the sum of \$100,000 is spent in two years, 50 more hands engaged, and eventually a paper mill built. Incorporation has been granted to the Maritime Nail Company, with its chief place of business in St. John. The capital is \$25,000, and the incorporators are Stanley E. Elkin, Frederick Eugene Marvin, Edward C. Elkin, Harry Albert Marvin and Clarence Pettingill Nixon, all of St. John.

Reports from Woodstock state that farmers are getting \$2.85 per barrel for potatoes, the highest price ever paid there. A Jacksonville farmer hauled two loads to Woodstock which netted him \$204.

The Salmon River cut of logs will be more than 6,000,000 feet, and the Martin Head cut 2,500,000 feet. Early in March the Pejepscot Lumber Company will build wharves and erect a mill at Martin's Head to cut the logs there into lumber. This company will continue its reforestation work next season on a larger scale than ever, having 90,000 trees ready to set out.

Fredericton.

Industrial and labour conditions in general were probably as satisfactory during the past month as they have been for years at this season. There is always considerable unemployment during February, especially in the case of unskilled labourers, but nearly all the industrial establishments have been working full time, and several of them overtime. The Hartt Boot and Shoe factory has been especially busy and find it difficult to keep up to their orders. City merchants also report trade more brisk than is generally the case at this season. The farmers in the locality were occupied mainly with the care of stock, marketing of produce and replenishing their wood piles for the coming year. Prices in the country market still remain very high and the farmer in this vicinity has few complaints. Potatoes are selling especially well, prices from \$2.75 to \$3.00 per barrel, being obtained which are the highest for many years. Operations in the lumber woods are still being continued.

Newcastle.

Labour conditions remained very much the same as during January. Little industrial activity was shown in the commencing of new work, but labour was in good demand and equally well supplied in the lumber camps of the district. Wholesale and retail trade was fairly brisk.

QUEBEC.

Quebec.

The month was a quiet one so far as labour conditions are concerned, severe cold and stormy weather retarding outside work. The winter trip of the government steamer "Montcalm" from Quebec to the North Shore ports in the Gulf as far as the Island of Anticosti, gave a demonstration of the practicability of winter navigation to Quebec, the vessel having made the trip in

about the same time as if it were made during the summer season. The vessels wintering in Quebec Harbour have had work commenced upon them in being refitted for the summer season; this work gives employment to a large number of men.

Farmers have been obtaining exceptionally high prices for butter and eggs, butter selling for 35 cents per pound and eggs 35 cents a dozen. In the lumbering industry the prevailing conditions have been ideal.

The building trades give promise of a very busy season next summer, contracts have been signed for a great number of large and valuable buildings. These are for the most part outside Quebec but the skilled workers that will be employed on them will come from the city. This, with the new buildings and repairs in the city, should result in a very busy summer for the building trades.

Three Rivers.

The labour market was fairly active during February and business showed a slight improvement over that of the preceding month comparing favourably with that of the same month of last year.

Building trades were busy and gave plenty of work to sash and door factories; all other factories were also working on full time, with plenty of orders ahead.

Commercial activity was noticeable both in wholesale and retail circles without any insolvent cases for the month.

Farmers were looking after stock and bringing products to the market. Good prices were obtained in every line, but especially for fowls, fresh eggs, butter and potatoes. The amount of snow in the bush gave lumber firms an opportunity of doing much work. Several hundred men are still being employed by the Wayaganack Pulp and Paper Company in the construction of their mills on the island. The demand for unskilled labour was very great.

but there is a good supply in this respect.

Sherbrooke.

Although the month of February was quiet so far as outside labour is concerned, the various industries that were not inconvenienced by the weather had a busy month. The machine shops in particular were very busy, and in the case of the Canadian Rand Company overtime was put in by the employees, the first within the past four years. In addition extra half has been taken on by the same company. The other shops, such as the Jenckes machine Company and Sherbrooke Iron Works were equally busy. The preliminaries for commencing new and augmenting present industries were passed during the month. There were three industrial by-laws submitted to the ratepayers on the 6th of February, and each was carried by large majorities. The Jenckes Machine Company by-law was probably the most important. The company agree to double their plant and employ not less than 250 hands in addition to the number they already employ. This will bring their total hands employed to not less than 675 men. On return the city agrees to give the company a loan of \$100,000 for ten years without interest. In addition the company will purchase from the city the amount of electric power they require at \$15 per horse power.

The Canadian Brakeshoe Company is a new industry. The company will employ not less than 125 men to start with, and will increase that number year by year. The city agrees to purchase a site for the company, and give exemption from taxation for ten years. The company also agrees to take from 1,500 to 2,000 horse power from the electric light department at \$10 per horse power. (The latter to be used at nights). The Sherbrooke Iron Works are given a free site and exemption from taxes on condition that they enlarge their present capacity and employ more help. According to the provisions of the agreement between these

concerns there will be an increase of over 600 hands employed in the city when they start operations. Work has already been begun for the starting up of these concerns, and within a few months it is expected that the machinery will be in motion.

Another industry, which is seeking location here, is the Cosmopolitan Clothing Company. The City Council with the approval of the ratepayers, will give the company the old carpet company building. In return the company agrees to pay not less than \$30,000 per year in wages, exclusive of wages to officers or travellers.

Another new industry started operations here during the month. It is known as the Sherbrooke Specialty Company. The product will be creepers for rubbers, hatpin protectors, paper clips etc. The concern will commence with twenty-five employees, and these will be increased later on. The head of the concern says he has already contracted with a Montreal firm to handle the entire output.

The Canadian Pacific Railway Company has decided to make Sherbrooke a home division, and this will mean that a large number of railway men will have to reside here. Taking it all in all Sherbrooke would seem to be forcing ahead as an industrial centre.

During the month the shareholders of the Eastern Townships Bank ratified the agreement entered into by the directors with the Canadian Bank of Commerce whereby the latter institution takes over the Eastern Townships Bank, but of 30,000 shareholders proxies to the number of 25,000 favoured the deal.

The Quebec Eastern Railway Company has bought out the Lotbiniere and Megantic Railway which is about 30 miles in length. The price paid was \$300,000. The road will be extended on either side so that there will be a direct communication between Sherbrooke and Quebec, running through the most important section of Megantic County. The surveys have been completed and the new company is re-

sponsible for the statement that work will be begun at the Sherbrooke end just as soon as the season opens. This railway will be a great boon to Megantic County as hitherto the place has been isolated in so far as railway communication is concerned.

A movement is on foot to boom the Eastern Townships as an industrial and agricultural centre. A central board has been organized composed of the executives of the different Boards of Trade with this end in view.

East Angus.—The new pulp mill of the Brompton Pulp and Paper Company place was started on February 21. This has been under construction for some months past and is in addition to the company's extensive plant already in operation. The new mill is equipped with eight grinders and has a capacity of fifty tons of pulp per day.

Bromptonville.—The management of the Pearl Manufacturing Company have decided to enlarge the works. Another storey will be added, and this will enable them to employ from 75 to 100 girls. At present only about 20 are employed.

Granby.—At a special meeting of the Village Council, a resolution was passed that the Council would consider favorably the proposition of the Canadian Pacific Railway Company, laid before it by the Railway Committee of the Granby Board of Trade, viz., to build an electric road from Farnham to Granby, provided the council afforded the right-of-way to enter the Municipality so that they could reach the different manufactories and would request the said company to lay before the Council, plans and specifications in accordance with their views and desires at their earliest convenience.

Sorel.

The month has been a satisfactory one for labour in Sorel and the District of Richelieu. There has been a demand in some quarters for good men, especially for mechanics and boil-

ermakers, and the wages offered were generally fair.

A number of bricklayers and carpenters have been out of employment, but work is about to be given them, as winter is nearing its end. As is generally the case during the winter months a number of navigators have been unable to secure employment. Some day laborers have also been out of work but the number is getting smaller and smaller every day. Masons had not much to do, as buildings were rather few in number and of no great importance. Painters and plumbers, on the other hand, have been well provided with work, as also the machinists and boiler-makers, especially at the government shops and Sorel industrial establishments, which are all doing well and employing more men than in the past. On the whole labour conditions have been good and there is cause to expect that they will improve in the near future. Local industries have all, as a rule, been doing well, and fair wages have been paid to the employees.

St. Hyacinthe.

There was much activity during the month in almost all the industries, with the exception of the building trades, which had the quietest month for years, on account of the very severe weather. But it is probable that there will be a revival of activity in that branch next spring, owing to the high rents prevailing at present and to the settlement of the new Bourg-Joli ward. All the factories have worked full time with full staffs and have orders to keep them busy for some time. The City Council has before it a proposition from a capitalist for the erection of a chair factory which, if an agreement is reached, will be a boon to the local workmen. Retail trade slackened a little in the beginning of the month on account of the Lenten season. Wholesale business was reported fair. Banks reported a good month, with a fair average in deposits and easy collections. There was no change in the rates of wages or hours of labour, and relations between em-

ployers and employees were most cordial.

The general condition of agriculture was good, farmers obtained big prices for whatever they had to sell. Dairy products were very high and the quantity on hand very limited. Preparations on a large scale were being made in anticipation of the maple sugar season. Work on the farm became a little more active towards the end of the month, but until spring the supply of labour will be amply sufficient to meet the demand.

St. Johns and Iberville.

The general condition of labour was good during the month. The Lighting Furnace Company suspended work, but all the other factories were active, the Cluett-Peabody Company advertising for three hundred additional female workers. Trade, wholesale and retail, was normal. City labourers were earning two dollars for a nine hours' day. There was no disturbance in the labour market.

Farm products, especially hay, were in great demand. Fishing was normal. Potteries were very active. Bricklayers and masons were idle, but stone cutters were active. Lathers and plasterers and builders' labourers were quiet. Unskilled labour was in great demand.

Montréal.

Marked activity has characterized labour in general in Montreal city and district during February. This is particularly the case in the printing and allied trades, the volume of work being much greater than at this time last year. Many of the job printing offices are working with double shifts, and there is a great scarcity of first-class labour both in newspaper and job work. Among the boot and shoe workers there is also very great activity, one of the big manufacturing firms having orders for half a million more pairs of boots and shoes than it is at present able to fill. The big locomotive and car

plants are also working to the limit of their capacity; and here it is worth noting that in the first two months of this year Canadian railways have ordered two hundred and sixty new locomotives. Railway workers of all classes are exceptionally busy, and the same is true of draymen and drivers of all kinds. Pulp establishments having their headquarters in Montreal all report the utmost activity, and all of them are taking measures to largely increase their output. The cigar making establishments are all remarkably busy, and a scarcity of skilled labour still exists in this line. Unskilled workers have had a somewhat hard time of it, but the great snowfall at the end of the month came to their aid and an army of several thousand men found at least temporary employment.

The cost of living is still going up. Meats have again advanced, while eggs, though a little lower than last month, are still very dear. Butter is very high, and potatoes are selling at something like famine prices. Merchants and dealers all agree that production should be increased all along the line, while the wage earners hope for speedy relief. It is the general opinion of those who have studied the question, that agriculture has failed to keep pace with the amazing growth of Canada's great urban centres, and that the time has arrived for the application of modern chemistry and electric power to the work of the farm. In brief, agriculture must be modernized and production vastly increased to meet the evergrowing demands of our big cities for food products. Instead of this, farming and market gardening are becoming extinct industries in the neighborhood of Montreal, while intensive methods of agriculture are unknown or, at all events, not applied.

Rents have again gone up this year. The advance in moderate dwelling houses is about fifteen per cent. In the north end of the city where rents have hitherto been lighter than elsewhere, the increase is nearer twenty per cent. The demand for office room is excep-

tionally heavy this year and tenants of downtown offices not protected by leases or who are obliged to move will have to pay rentals twenty-five to thirty-three per cent. higher than have been ruling for some time in the past. In the uptown business section rents have gone up from twenty-five to fifty per cent. this year.

There was great commercial activity during the month and of this the bank clearings and the Customs collections bear very striking evidence.

The bank clearings in February made a new record of \$189,650,913 an increase of \$27,476.78 over the clearings in February, 1911. The extra day, of course, helped to swell the total but even without it this month's business would have established a record. Clearings for February for the last six years show the following totals:—

1912	\$189,650,913
1911	162,174,125
1910	145,685,051
1909	120,115,223
1908	95,031,138
1907	107,654,000

The February collections at the Montreal Custom House also establish a record for any month with the sole exception of March, 1911. Heavy importations of dry goods account for this increase.

Inland revenue receipts in Montreal for February amounted to \$793,757.79, as compared with \$597,511.10 for the corresponding month of last year, an increase of \$196,246.69.

Railway earnings also showed marked increases for the month over the corresponding period of 1911.

For this time of the year there is a fair amount of work in the building trades, inside men of course doing the most of it. The iron trades are all quiet. The outer stone work of the new headquarters building of the Canadian Pacific Railway was completed this month, and interior work is now being pushed ahead in order that the building may be ready for occupation by the end of June. The structure with its two great towers forming a huge

office fifteen storeys in height is one of the highest business buildings in the British Empire. All indications are for a very busy season in the building trades in Montreal and district. Quite a number of ten-storey office buildings are announced for erection.

All over the city, but especially in the uptown and downtown business sections real estate values have increased extraordinarily of late, and the trend is still upward.

Manufacturing in practically all lives was of considerably greater volume than at this time last year, and greater steadiness is reported all round. Quite a number of new industries will locate in Montreal, Maisonneuve and Lachine during the year.

Work on the Montreal terminals of the Canadian Northern Railway and the tunnel under Mount Royal will be begun very shortly. The line between Montreal and Toronto via Ottawa will, it is announced, be completed during 1912. Two big bridges are in course of construction near Montreal, one over the Mille Isles River from St. Eustache to Ile Jesus, and the other from Ile Jesus to the Island of Montreal. Cold weather has somewhat interfered with the work lately, but both bridges will be finished during the summer. The Canadian Northern plans have been extended and now include a direct line from Montreal northward into the Laurentian Mountains. A big garden city scheme is part of the Canadian Northern's Montreal plans. The garden city is to be situated behind Mount Royal and will be called Mackenzie Heights. For \$3,000,000 the company has already sold 6,000,000 square feet of this property to financiers who will exploit the scheme. It is announced that preparations have been completed for the building of the Central Railway of Canada. The first section from Montreal to Ottawa will be completed by the end of this year while the further portion from Ottawa to the Georgian Bay will be built later. The road will follow along the shore of the Lake of Two Mountains, passing through St.

Placid and Oka, crossing from the mainland to Ile Jesus at St. Eustache and reaching the Island of Montreal at Cartierville. It will reach Montreal Harbour at Tarte Pier. This will be the first freight entrance into Montreal. A passenger entrance is planned from the West and it is expected that the terminus will be the Grand Trunk Railway's Bonaventure Station.

The announcement that the Grand Trunk Railway has completed arrangements with the Ontario government for running rights over the Temiskaming and Northern Ontario Railway from North Bay to Cochrane is of great importance to Montreal, as it means that the Metropoles will be brought into connection with the Grand Trunk Pacific immediately that line is completed between Cochrane and Graham, thus forming a direct line with Winnipeg and other cities of the West now reached by the Grand Trunk Pacific. The distance approximately between Montreal and Winnipeg via Ottawa, Scotia Junction, North Bay and Cochrane is 1467 miles.

The Montreal and Southern Counties Railway, which furnishes electric car communication with the south shore of the St. Lawrence will this season spend \$1,000,000 in extending its system and for a new rolling stock. The company is building a line to Granby. By July it is expected that cars will be running as far as Richelieu. In all, 192 miles of track will be added to the system this year. This line will bring a rich stretch of territory into direct communication with Montreal and greatly promote trade.

Most extensive plans will be carried out this year for the further development of Montreal Harbour. Parliament recently voted \$6,000,000 to the Harbour Commissioners and of this sum \$2,500,000 will be spent during the summer. In the most advantageously situated parts of the harbour will be added new high level quays so arranged as to give berths for twenty-four ocean vessels of from 600 to 800 feet in length. The aggregate frontage of

these high level quays will be 16,800 lineal feet and that of the new low level quays 5,800 feet. The combined area of the new high and low level wharf spaces and extensions will be 74 acres. The floor area of the new sheds will be 1,386,000 square feet. Two new elevators with extensive conveyor systems and with capacity of 3,500,000 bushels of grain will also be erected.

The entire programme for the coming summer as announced by the Harbour Commissions is as follows:—

The construction of islets or anchorage tanks in the Laprairie Basin, to hold the ice until melted in the spring.

The construction of grain elevator No. 2, and jetty at Section 12, with conveyors reaching adjacent piers.

The improvement and extension of the harbor railway tracks from Victoria Pier to the Racine wharf above winter water level, so as to be useful both summer and winter.

Completion of Victoria Pier and Market Basin giving 2,700 lineal feet of high level quays for ocean steamers, with a depth of 35 feet at low water, and 4,000 lineal feet of low level quays for river vessels.

The erection of permanent sheds on the new Victoria high level quays, including equipment.

The lengthening of the Alexandra and King Edward Piers to about 1,200 feet each, and of the Jacques Cartier Pier to 1,100 feet, and a corresponding lengthening of the sheds upon them.

The construction of high level shore wharves from the lower end of the new Market Basin, section 23, to Section 30, of a length of 3,600 feet, with a depth of 35 feet at low water.

The erection of permanent sheds with equipment on the new high level wharves, section 23 to 30.

The construction of a Grain Elevator No. 3, on section 30, having a capacity of 1,000,000 bushels and so located as to permit of liberal enlargement of the storage capacity when needed.

The construction of new Pier No. 1, above the Alexandra Pier, the extension of the Bickerdike Pier, the con-

struction of 1,600 lineal feet of wharf along the Guard Pier with necessary alterations of two lift bridges to give direct railway and roadway communication between the main shore wharves and those on the Bickerdike and Guard Piers.

The erection of permanent sheds with equipment, and conveyors from the Grand Trunk Railway elevator, on New Pier No. 1.

The construction of high level shore wharves, Section 30 to Section 35, 3,000 feet in length and 350 feet average breadth and 35 feet depth at low water.

The construction of permanent sheds, with equipment, on the wharves, Section 30 to 35.

Dredging and filling, in general, including dredging for wharf foundations, for widening the channel opposite St. Helen's Island and Ile Ronde; altering the lower end of the Guard Pier; widening and deepening the harbor inside the Guard Pier, and deepening the channel between St. Helen's Island and the south shore, to lessen the St. Mary's current and obtain the necessary material for the construction of the piers and wharfs.

Paving and laying railway track upon all the new wharves.

Maisonnette.—All the big industrial establishments have been busy during the month, some of them working overtime. A number of firms are negotiating for sites and several new industries will locate here shortly. There is considerable building going on and an active season is reported all round as certain.

Lachine.—All the big industrial plants are busy and prospects are reported as excellent. By an annexation measure just passed at Quebec Lachine is enlarging its boundaries, taking in 900 acres of new territory, on which stand some of the biggest industrial establishments of the Montreal district. The civic treasury will benefit to the extent of \$10,000 additional revenue yearly and the population of Lachine will be increased by 2,000.

Outremont.—Many improvements will be carried out in this town during the year. Details are as follows:—Concrete sidewalks on whole or portions of thirty streets at an estimated cost of \$46,412. Sewers on fourteen avenues, approximate cost \$89,310. Grading and macadamizing on twelve avenues \$46,860. This brings up a total of \$182,582 and it is understood that the balance of the proposed bond issue of \$400,000 will be devoted chiefly to the building of conduits for the accommodation of electric wires and other work in connection with the recent decision to have the wires removed from the streets. There will be a lot of building in the town during the year.

Verdun.—The town is to issue bonds for \$229,000 to be spent in municipal improvements increase of fire protection \$20,000; increase of power for provision of water and electricity \$100,000; extension of water mains, sewers, and other street improvements \$109,000. There is considerable building going on in the town and a very busy season is certain. Verdun is carrying on an extensive scheme of improvements along its water front for nearly four miles along the St. Lawrence having purchased from the Federal government the water lots and having begun the creation of a boulevard and a chain of parks. The Federal government will shortly erect an up-to-date wharf with a properly dredged approach. The town which has now a population of 15,000 gained 2,000 last year and expects to have 5,000 more people by the end of 1912.

Pointe Claire.—The town has awarded a contract for the installation of a municipally owned water, drainage and electric lighting plant at a cost of \$105,000.

St. Lambert.—A survey has been made and plans drawn up for a new sewer outlet at an estimated cost of \$56,534.

St. Genevieve.—The Fathers of the Holy Cross will this summer erect a four-storey school to cost \$60,000.

Granby.—The Catholic School Commissioners have awarded a contract for the erection of a boys' college, five storeys high to cost \$60,000.

Hull.

Labour conditions were good compared with those of the same period of last year.

Two large snow storms gave much work to the labourers, about sixty men having been employed at cleaning the street.

Pulp factories and other industries except sawmills were working full time.

As soon as the weather gets milder, the contractors, Bisson & Carriere, will begin their work, and will employ about a hundred and sixty hands. The Public Works Department will also have reparations made at the North Shore slide.

The Corporation of Gatineau Point is erecting a steel tank for water works, with a capacity of 30,000 gallons, at the cost of \$3,500.00. It will be completed on or about the 15th of March next.

With the exception of the building in connection with the E. B. Eddy Company works and the two fire stations, there was no great activity in this line.

Trade, both wholesale and retail, was not quite as active as during last month, but better than during February, 1911. Butter and potatoes have increased in price.

Bank business in general was reported to be very good.

ONTARIO.

Ottawa.

The general condition of the labour market in February was fairly satisfactory, the severe winter weather exerting its usual influence on such lines as the building trades. While not so good as last month, conditions compare favourably with those which prevailed last year. Unskilled workers were in demand by the municipality and the Electric Railway Company for snow cleaning, over 500 being employed at

this work. There was no pronounced unrest in the labour field. The Ottawa Electric Street Railway Company gave a voluntary increase of one cent per hour to 450 employees. No change in the hours of work was made.

Continued increases in the prices of necessities are causing some unrest. There are indications that milk will shortly go up in price, while butter, eggs and potatoes have all increased. Butter from New Zealand is being imported to a considerable extent.

Merchants report a brisk trade all the month. A large number of conventions took place in the city, bringing in some thousands of visitors and over-taxing the capacity of the hotels, besides helping the volume of trade considerably. Bank clearings and customs collections show a substantial increase over those of January.

A delegation of the city bricklayers met members of the building exchanges and concluded a satisfactory settlement of some outstanding grievances.

Exceptional activity in real estate combined with the inability of the city brickyards to turn out enough brick to meet the demand, even after working all the winter, points to an unprecedented activity in building this spring.

Activity has been noted in all local industries, with the possible exception of agriculture. Interest was aroused by a convention of fruit growers from all over Canada, at which important matters were dealt with. An effort is being made to interest the farmers more in winter dairy work in this locality. The problem of securing help is a burning one.

The local sawmills are being renovated and improved for the coming sawing season. Log cutting in the bush is very active, more so because the log-haulers went in later this season than last, owing to early unfavourable conditions.

Railway contractors are planning for extensive track-laying operations near here when the winter is over.

At the annual meeting of the Ottawa Electric Railway Company, gross earn-

ings for the past year were given as \$840,680.52, an increase of \$91,971.7 over the previous year. The business of the company has doubled in the past six years.

Russell.—A large new shale brick works to employ one hundred men and with a capacity of 100 tons per day will be erected at Russell. Preliminary work on the site has begun. The Russell Shale Bricks, Limited, is the name of the company interested.

Brockville.

The general conditions of the labour market were not so good as during the previous month.

Outside work is at a standstill, ice cutting having been the only available work for unskilled labour until the recent heavy snow storms which gave temporary employment to all the labourers available. There is little operation in the agriculture line, and mining is at a standstill. Lumbering operations are quiet and little railroad construction work is being done in the district.

The consolidation of the three following firms in the province of Ontario has been completed within the last few days: The James Smart Manufacturing Company, Limited, of Brockville; the Canadian Billings & Spencer Company, Limited, and the Canadian Forge Company, Limited, both of Welland, to be known as the Canadian Foundries and Forgings, Limited, with the following capitalization:—

	Authorized.	Issued.
Common stock ...	\$1,250,000	\$960,000
Preferred stock, 7		
p.c. cumulative..	1,250,000	960,000
Bonds, 6 p.c.	500,000	67,000

The new company is planning for extension, and prospects look bright for the near future.

Kingston.

Industrial activity prevailed during the month. There were abundant opportunities for employment, and no

ases of non-employment or distress were reported.

The last two weeks of the month were very hard on the various railways, the snow being heavy on all lines in the district. Snow ploughs and extra men were kept busy, and in spite of this in some cases teams were stalled and traffic impeded. The city engineer's department found it difficult to secure men to remove the snow blockades expeditiously.

Three of Kingston's new industries are now well under way. The new 40,000 daily capacity brick and tile yard, and the original lead smelter are about ready to commence operations, while ground was broken for a second large smelter towards the end of the month.

From the present outlook the building trades are entering upon a busy season. A number of public buildings will be erected, including the following: a new Salvation Army barracks, additions to the post office, a wing to the general hospital, the finishing of the McDonald public school, a box factory, the new summer hotel, and a large number of new residences, as well as considerable work at the Royal Military College and other public buildings.

It is stated that there are very few vacant houses in the city, the need of the hour being low-priced houses for workmen. Many enquiries are being made about vacant lots for building purposes. Business in real estate is very active. Men in this line of business state that conditions are the best in years.

The plans for the new summer hotel have been approved by the architect representing the city. The work of laying the new floor in the armories was commenced during the month, and is nearing completion. A meeting of the governors of the general hospital was held during the month, and it was decided to proceed with the new wing in short time.

The manager of the civic light, peat and power plant reports a surplus of 10,317.79. The actual profits are said

to be about \$22,000. During the month the building formerly known as the Jubilee hotel, and from which the license was recently taken, was leased by the government, and is being used as a storehouse for the Army Service corps. A consulting engineer from New York is here with respect to the extensions to the locomotive works. The work of construction will begin a few days. Upwards of 200 men are employed by the Kingston Shipbuilding Company. The numerous other shipyards are also very busy.

Belleville.

Labour in the city has been quite active during the month, and in the building line inside work on two public schools has been going on and the new Y.M.C.A. building has just been completed.

Railway traffic has been good. The Canadian Northern Ontario Railway have been operating their line for freight from Toronto westward to Deseronto, some sixteen miles east of this city.

Cost of living has increased. Eggs and butter have been scarce, and prices have risen.

The several industries in the city have been busy during the month, all running full time. The rolling mill commenced work again after a temporary suspension, during which time some necessary repairs were made and new machinery installed. A new industry to be known as the Tavini Electric Steel Company will be established here this summer.

Peterborough.

The general condition of the labour market for February was active. All branches of industry were well employed except the building trades, cold and stormy weather being largely responsible for this. Building operations were suspended much of the time. Heavy snowfalls gave temporary employment at removing snow to a large number of men. The various ice houses have secured an

abundance of ice of a quality unsurpassed in previous years. The Water Works Department shows a surplus of \$2,200.24 on the year's operations. The total revenue was \$45,194.95. The expense accounts include \$13,197.70 paid to the city in meeting the interest on debentures, \$9,370.23 for sinking fund, and an amount for depreciation of tools and plant, and totalled \$4,299.41. The annual meeting of the Peterborough Hoek Manufacturing Company was held this month, and the report showed that the company was in a flourishing condition, and had expended \$40,000.00 in the past two years remodelling new buildings and installing new plant. The International Harvester Company has started the manufacture of binder twine. About one hundred and twenty-five hands are at present employed in this industry, the only difficulty experienced by the new manager being his inability to secure sufficient female help. The Canadian General Electric Company is advertising for tenders for the erection of another large building, the dimensions of which are to be 325 feet by 50 feet.

The city will pave George street and Charlotte street this year, and work in this connection will be commenced as soon as the weather permits. The city council have passed a by-law by which all sewers will be paid for on the frontage tax system. A rate of 52 cents per foot straight on all frontage will be the assessment on land on both sides of the street on which sewers are constructed and the remainder of the cost of such sewers will be borne by the corporation. Street watering will also be paid for by frontage tax. The city council have appointed a permanent assessor at a salary of \$1,400 per year. Messrs. J. J. Turner & Sons, tent manufacturers, have received a contract from the Dominion government for two hundred military tents.

The markets for agricultural products were well attended during the first part of the month, but the attendance has lately fallen off on account of the heavy

ness of the roads. Prices are the highest known.

Lindsay.—The Seymour Power Company are to erect a sub-station for the transmission of power into Lindsay, at a site near the old Victoria Railway Junction north of the town, on which preliminary work has been under way since last fall.

Whitby.—The Ontario Government has decided to locate the new Provincial Asylum in Whitby. The Commissioners fixed a rate of 7 cents per 1,000 gallons of water and 6 cents per 1,000 watts for light.

Orillia.

The event of the month which will have the greatest effect on future labour conditions in Orillia was the commencement of manufacturing in the big new plant of the Tudhope-Anderson Company, Limited. The work of pattern making has been going on for some time, but the first actual products, in the shape of a few sets of harrows, were completed on the 20th. About sixty men are now employed in operation and installation, and another sixty are at work on the completion of construction. The factory will ultimately give employment to about 600 hands, in the manufacture of ploughs, harrows, drills, waggons, steel wheels &c.

Outside building has gone on intermittently, as the weather was favourable or otherwise. Considerable progress has been made on the four storey brick block under construction for Messrs. Cavana & Watson, in which the Union Bank is to have its office.

Generally, employment has been plentiful, the heavy snowfalls making work for a large number of men.

All the factories of the town are busy, and working with their normal staffs.

For a year past the town's electric power and light plant at the Ragged Rapids has been staggering along under an overload. To avoid the necessity of large capital expenditure on ex-

tensions at the present time, the Town Council has entered into an agreement with the Simcoe Railway and Power Company, who have a power plant at the Big Chute, on the Severn River, to hold a thousand horse-power available for Orillia's use for the next four years. Current is now being drawn from this source when required, and the factories are assured of all the power they require at all times.

The Town Council is planning to lay several sidewalks and roads, and to extend the waterworks this summer, to keep pace with the growth of the town. There is also talk of paving the main street

A great scarcity in the supply of butter and eggs has raised the retail price of these products to from 35 to 40 cts., unusually high figures for this district.

An engineering party is engaged in surveying the Severn River for the Department of Railways and Canals preparatory to the opening of the northern end of the Trent Canal. The party is under the direction of Mr. E. B. Jost, and is working from the lower, or Port Severn end, up the river.

The heavy storms of the last week of the month have seriously interfered with all kinds of trade, by blocking the country roads. Snow ploughs and men with shovels are being freely used to reopen them.

The ice harvest will be light. It is being seriously interfered with through heavy snow preventing the ice from forming, despite the extreme cold of January. The snow had to be cleared off, in order to give the ice a chance to form.

The heavy storms towards the close of the month seriously disarranged railway traffic. There were no passenger trains on the 22nd, and no freight moving from the 21st to the 24th.

The department has consented to the issuing of licences for the spearing of white fish and salmon trout in Lake Simcoe.

Railway construction is at a complete standstill in this district, for the

first time in seven or eight years. The Georgian Bay and Seaboard branch of the Canadian Pacific Railway is completed, with the exception of the stations, and is ready for opening in the spring.

The Canadian Northern Ontario Railway has a survey party engaged in running a line for a loop from Orillia to Sparrow Lake. This will be used for passenger service, the present line on the east side of Lake Couchiching, continuing to be used for freight.

Toronto.

Labour conditions during February were less satisfactory than they have been for some time. Owing to continued severity of the weather during the greater part of the month, outdoor work was largely discontinued and a number of unskilled labourers and others were out of employment, and many cases of destitution were reported. The relations between employers and wage-earners were also disturbed by strikes owing to which many were thrown out of employment. The building trade, though slack during the month, promises to be very active as soon as the frost is out of the ground. During the month of January 142 building permits were issued, representing an approximate value of \$774,165, as compared with 137 permits, representing the value of \$458,580, in January, 1911. A police census taken on January 21st gives the population of the city as 425,407.

The annual meeting of the Labour Temple Company was held on the 10th. The financial statement showed that the mortgage debt had been reduced from \$10,500 to \$9,500, and the surplus increased from \$20,004 to \$22,119. The directors submitted a report to the effect that the question of providing a larger building should be considered. The following Board of Directors was elected: D. A. Carey, Thomas Walsh, James Simpson, A. E. Thompson, L. H. Gibbins, John McFadyen, W. J. Ayers, Wm. Glockling, A. C. Sanders, W. J.

Storey, J. Spencer, J. Ralph, Joseph Gibbons, Thomas Dulan and J. Watt.

A civic housing scheme has been proposed by Mayor Geary and a committee including representatives of the Board of Trade, Manufacturers' Association, Civic Guild, and others, which contemplates the establishment of model residence districts in or near the city. It is suggested that a company be formed capitalized at \$1,000,000, and a tract of land secured large enough to provide for a comprehensive plan of laying out streets, gardens, and open spaces, on which houses of different types and sizes will be erected to be rented only to shareholders and ultimately purchased by them. It is proposed to limit the dividends to 6%, and return the balance of the net profits to tenants. The project was endorsed at a large meeting in the Metropolitan Methodist Church on the 11th, and a strong committee appointed to secure the co-operation of the churches and labour and fraternal organizations. At a meeting of the District Labour Council on the 15th, the project was condemned as being of no use to the workers, few of whom could pay the minimum of \$250 requisite to purchase a house. The Council favoured a plan under which the municipality should acquire power to purchase land and re-sell it at cost price on easy terms to workingmen.

The monthly report of the House of Industry showed a total of 1,314 families receiving outdoor relief during January. Shelter was also given to 353 casuals, and there were 185 inmates in the Home.

The cost of the Hydro-Electric distribution system of the city up to the end of 1911 was \$2,407,590.

The Street Railway receipts for January were \$408,043 as against \$362,380 in January last year.

Farmers found considerable difficulty in bringing produce to market on account of the heavy snowfall, the roads being blocked in many places. Prices for eggs and dairy produce continued high. There was an unusually large

number of stock sales throughout York county, and horses and cattle brought good prices.

Manufacturing plants in nearly all lines continued active. The Massey-Harris Co., which had temporarily closed down for about 10 days, resumed operations about the end of the month and will this spring make important extensions. The Canadian General Electric Company will erect a 3-storey factory on Dufferin street near King street, at a cost of \$87,000. The Shipway Iron Bell and Wire Manufacturing Company is building a factory on King street west. W. R. Phillips & Company, printers, will erect a warehouse on the corner of Richmond and Duncan. The iron trades were generally active. About 40 structural ironworkers employed on the new Canadian Pacific Railway buildings on the corner of Yonge and King streets, went out on strike on the 16th. They demanded the discharge of an engineer and signaller on the ground that they were incompetent which was refused. Some men were brought from outside places to take the places of the strikers. Woodworkers, printers and bookbinders and leather workers had steady work. Custom tailors had a quiet month. The Journeymen Tailors' Union has demanded an increase in the scale of wages amounting to 20% when the present agreement expires on March 1st. The employers offered an increase of 5%, which was refused. Garment workers were busy turning out spring goods. About 1,200 operators in the T. Eaton Company's factories struck on the 15th on account of the discharge of 65 male operators who refused to work with new machines which would enable them to put in linings, a class of work hitherto done by women finishers. Hotel and restaurant employees were quiet during the earlier part of the month, but busy towards the close. Barbers were generally well employed. Members of the Journeymen Barbers' Union requested the Board of Control to secure the passage of a by-law limiting the hours of work in barbershops to twelve in the twenty-four,

alleging that in some cases they now work 14 hours per day. Railway and street railway men and others engaged in transportation were active. Snow shovelling gave temporary employment to a large number of men out of work.

North Toronto.—Wages of all town employees under the jurisdiction of the Board of Works have been raised to 27½¢ per hour.

Niagara Falls.

Frequent periods of severe weather caused many interruptions to outside work during February, otherwise the month was a very satisfactory one in regard to industry and employment. Nearly all the factories were ascertained to be running full time and several were unusually busy for this season. The Urschel-Bates Company, manufacturing of paper bags, have commenced building operations on a factory which is likely to be running in April. Orders for the product of the new plant have been secured. Another large fruit and vegetable cannery will be erected in Niagara township this year.

The annual report of the chief of the fire department shows losses of \$11,600 and insurance of \$8,502, paid during 1911.

Port Colborne.—The erection of a large smelting plant by the Canadian Union Furnace Company seems assured. Negotiations with the government for site and docking privileges, with the municipality in regard to taxation and water service and with the Grand Trunk Railway Company for yards were in satisfactory stages.

Welland.—Industrial conditions continue to be satisfactory. Manufacturing concerns were busy. The street railway will be running in a short time and a hotel will be erected this year at a cost of \$125,000. The Canadian Steel Foundries, Limited, have completed the purchase of the site for a blast furnace. The plans call for an expenditure of \$1,500,000.

St. Catharines.

The labour market continued active and labour generally was well employed. Eleven building permits were issued for the months of January and February amounting to \$52,540.00. Prospects for the coming season appear to be most favourable.

Port Dalhousie.—Labour was well employed for the month.

Merritton — Favourable conditions prevailed for the employment of labour which was active.

Thorold.—The labour market was active.

Hamilton.

Labour conditions during the month of February did not vary much from those of the previous month except in building trade which were practically abandoned altogether as far as outside work was concerned, owing to the severity of the weather. A large number of men who are usually out of work at this season of the year found temporary employment cleaning the streets and car lines after the big storm of February 21st.

The Federal Sign System Company, a seven-million dollar concern, with headquarters in Chicago has practically decided to establish a Canadian branch here. It will manufacture electrical signs at its Hamilton plant for all parts of the Dominion. A new company, Fretz, Limited has obtained an Ontario charter and will carry on a canning and preserving business here. It will commence the erection of its plant at once, which will consist of two buildings 86x56 feet. About 100 hands will be employed at the start. The authorized capital is placed at \$150,000. Among the other local companies which have been granted provincial charters are: The Turner Realty Co., Ltd., capital \$45,000; Braemer Realty Co., Ltd., capital \$40,000; Canadian Kent Mill Co., Ltd., capital \$10,000.

The capital stock of the Malcolm & Souter Furniture Company has been increased from \$75,000 to \$150,000.

Messrs. Pearie & Co., of Toronto, have purchased the Thos. Launder's brick plant for \$25,000 and will commence operations shortly.

The Montreal firm of W. H. Scroggie, Limited, will open a large departmental store.

Large numbers of immigrants from the British Isles are arriving in Hamilton; representatives of big steamship lines say that the number this year will be 50% in advance of that of any previous year.

Customs collections for the port of Hamilton for January amounted to \$191,957.76, an increase of \$19,040.49 over the corresponding month of last year.

One of the latest ideas of the Board of Trade is that all retail stores be closed at 6 o'clock in the evening and with a view to hearing the opinion of local retail men, letters asking for such were sent out among the merchants, many of whom believe that such a plan would be beneficial commercially.

Local contractors anticipate a busy season ahead for the building trades; wholesalers already report a brisk demand for supplies. A deputation of holders of cab licenses will wait on the Police Commissioners and ask the board to amend the cab by-law so that the division by which the tariff is now arranged will be changed and to have some provision made for an increase in the day and night tariff in the extreme easterly parts of the city. The Board of Education has increased the salaries of the department masters at the Collegiate Institute \$200 by yearly increases of \$100 several of the teachers and caretakers of the public schools have also had their salaries increased. The Police Commissioners have increased the salaries of the Officers, Sergeants, Detectives and first-class constables on the force. First-class detectives were given an increase of \$50 a year, bringing the salary from \$1,150 to \$1,200 and second class detectives from \$1,100 to \$1,150. The patrol sergeant's pay was increased from \$1,000

to \$1,050 a year and the sergeants from \$1,100 to \$1,150 a year. The salary of first-class constables was raised from \$900 to \$950 and a year was taken off the length of service a man must put in to become a first-class constable which means that the time has been reduced from six to five years.

The Hamilton Builders and Carpenters' Association and the Amalgamated Society of Carpenters and Joiners and Brotherhood of Carpenters have signed a 3-year agreement to commence on May 1st. The agreement provides for an 8-hour day at 40c per hour, half holiday on Saturday, time and a half for overtime and holidays and many other features of advantage to both sides. A new Painters' Union is being organized among the members of that craft in East Hamilton.

The Hamilton Brewing Association have taken out a building permit for a \$15,000 brick cooling house to be erected on Market street.

Fruit growers report that orchards have so far stood the severe weather very well, with the exception of a few cases where young peach orchards have been frozen out. Canneries are contracting for tomatoes, strawberries and raspberries at prices in advance of those paid last year. Potatoes have advanced to \$2 per bag and butter is also high in price.

Plans of the route of the Canadian Northern Railway through the city have been submitted to the Board of Control. According to the plans the tracks will be overhead most of the way through the city until they reach the manufacturers annex, where they will run on the level. The freight sheds will be built between Simcoe and Ferrie streets west of Ferguson avenue. The station will be at the corner of James and Murray streets with a second station at Sherman avenue. The company expect to commence operations early in the spring and anticipate having the work completed in a year's time.

The merger of the Richelieu and Ontario Navigation Company of Montreal

and the Inland Navigation Company of this city has been announced.

The Merchants Mutual Steamship line which operates the City Dock here is having two steamships built which will be added to its fleet this spring.

The Hydro-Department has large gangs at work erecting its poles in the city.

Brantford.

The general conditions of the labour market continued unchanged from January, and do not compare favourably with those of the corresponding month of last year. The building trades were practically idle; a few bricklayers worked part of the month, principally on the erection of an addition to the building of the Adams Wagon Works Company. Carpenters are working short time, but are as well employed as in former years. The iron trades are not so busy as they usually are at this season; this is especially true of the agricultural implement factories. These, however, expect to be more active in the near future. The Ham & Nott Manufacturing Company, makers of screen doors, refrigerators and bee-keeper's supplies, was especially busy and working overtime. The Brantford Roofing Company is doubling the capacity of their plant and establishing branch offices in the West. The Goold, Shapley & Muir Company will increase its capital stock to one million dollars. The Barber-Ellis Company, manufacturers of paper, paper boxes, etc., has commenced the erection of a new factory, which will be rushed to completion as soon as weather conditions are favourable. The Radial railway from Port Dover to Brantford seems to be assured; the general location of the line, highway crossings, and the crossing of the lines of other railways have all been approved by the Dominion Railway Board.

Merchants had a fair month. Butter, eggs and potatoes have advanced considerably in price during the past month, creamery butter selling at 40c per lb., eggs at 45c per dozen, and potatoes at 35c and 40c per peck. The

Waterous Engine Works Company has raised the wages of its moulders and coremakers 10c per day.

Guelph.

There has been little change in the labour situation during the month of February. Nearly all branches of industry were well employed, though building operations were at a standstill on account of severely cold weather. Contractors and architects, however, are unanimous in reporting prospects for the coming season as very good. Five building permits for workmen's dwellings valued at \$6,750 were issued during the month.

Plans have been drawn for a new Masonic Temple, to be built during the coming season at a cost of \$50,000.

The Stewart Sheaf Loader Company are also having plans prepared for their large new factory.

Supplementary estimates presented to the Ontario Legislature this session call for an expenditure of \$200,000 for the erection of buildings for the Provincial Prison Farm at Guelph, also \$113,500 to be expended in the purchase of land and erection of buildings at the Ontario Agricultural College, Guelph.

The Co-operative Association held their second half-yearly meeting and the committee presented their financial report, which showed gross receipts for the half year of \$50,737.55, an increase of \$5,848.93 over the same period of last year. The profits for the half year were \$3,004.25. A dividend of 4 per cent. was declared to shareholders. The Association will erect a model bakeshop early in the season.

The Ontario Gazette announces the incorporation of the Guelph Estates, Limited, with a capital of \$40,000.

With very few exceptions, factories were running full time with full staffs, and report plenty of orders ahead.

Wholesale and retail merchants report a fair month.

Customs receipts for the month of January were \$14,153.60, an increase

over the corresponding month last year of \$1,499.81.

The Seventh Annual Convention of the Ontario Retail Hardware and Stove Dealers' Association was held here, with an attendance of about 800 manufacturers and their representatives from all over the Province.

The Stonemasons and Bricklayers' Union has presented a demand to the master builders for an increase in wages from 48½ to 50 cents per hour.

The Police Commissioners have granted an increase of \$50 per year per man to each member of the force.

A large proportion of unskilled labourers were out of work, though shovelling snow gave temporary employment to a number of them.

Farmers have had a very quiet month. Many severe storms have blocked the roads badly, and as a consequence the markets are very poorly attended and prices for produce remain high.

Berlin.

Labour conditions during February compared favourably with those of the previous month and still more so with those of the corresponding month of last year. All factories with the exception of one were working full time. No new buildings were started during the month, although it is reported that a new rubber factory will be commenced in the spring which will employ from 200 to 300 hands. A very severe storm passed through the district on the 21st which hindered traffic on the Galt & Elmira railroad for three days and caused all trains on the Grand Trunk main line to run from five to ten hours behind schedule time. A number of labourers were employed by the corporation to clear the streets of snow. The Berlin Police Commission has increased the salaries of some of the members of the force, it has also added two constables, making a total of seven.

Waterloo.—Work on the Mutual Life Building and Post Office has been sus-

pended on account of bad weather. Conditions regarding labour were practically the same in Galt, Preston, Waterloo and Elmira as in Berlin, reports from all these towns indicating that there will be a lot of buildings constructed next summer especially in Preston and Elmira.

Woodstock.

That labour in this district is pretty well employed is shown by the difficulty of securing men to shovel snow during the recent storm. As a matter of fact the railway companies claim that they were unable to secure the men they wanted for such work. The total number of unemployed men in town is comparatively small, and most of these are not compelled by their circumstances to accept work of any kind. There is still a little outside work going on in the building line, but not very much. Most of those, however, engaged in the building trades are already employed in other occupations, or can afford to wait for suitable work.

The reports from the factories continue satisfactory. It is the dull season with the wagon manufacturers, but the outlook is reported to be quite encouraging. The furniture manufacturers are busy, and the same is true of the manufacturers of pianos and organs. Some of these later report business for this season considerably in excess of the same period a year ago. There is a more or less constant demand for skilled labour, including cabinet-makers, stove-mounters, and upholsterers; but generally speaking the demand and supply in the matter of skilled labour are fairly well balanced. There is practically no demand at the factories, however, for unskilled labour. The cost of living is extremely high; but there is very little real hardship in the community, and the demands on the municipal charity department are lighter than usual for this time of the year. Business on the whole is reported to be very good and the outlook satisfactory.

Stratford.

General conditions of labour were good. Unfavourable weather prevailed during the greater part of the month, and hampered outside work in some cases. A number of men with teams found employment in shovelling snow and keeping the streets cleared, while much work for labourers was provided in the laying of sewers. Railway traffic officials found it very difficult to get the roads clear of snow. All the factories were running full time with full staffs.

The Bell Telephone Company had a gang of men employed changing the system and moving to its new building. The customs returns for the port of Stratford for the month of January totalled \$9,754.19, and the excise returns were \$4,339.31, a slight increase on the same month of 1911. Wholesale and retail merchants reported trade good. Thereupon no change in rates of wages or hours of labour and no trouble in the labour market.

The following prices prevailed for agricultural products: Butter, 32c to 35c; eggs, 34c to 36c; potatoes, \$1.60 to \$1.75 a bag; turnips, 40c to 50c a bag; chickens, 50c to 60c each; turkeys, 21c a lb.; apples, \$1.25 to \$1.90 a bag; wheat, 90c a bush.; oats, 45c a bush.; barley, 65c to 85c a bush.; peas, \$1 a bush.; hay, \$20 a ton.

St. Mary's.—The new cement works plant building in course of construction is making rapid progress. When finished it will give employment to a large number of men.

Mitchell.—All classes of labour were employed. Manufacturing establishments were busy. Whittlaufer Brothers intend building an addition to their present foundry, which is too small to suit the business. This will mean an increase in their staff of workers.

London.

As during last month the excessive cold weather again almost completely tied up outdoor work, and most of those

depending on the building trades for employment were idle. It is a satisfaction, however, to note that little distress is heard of throughout the city. In the foundries and factories business was good, and commercial travellers report heavier sales than for the corresponding month of last year. The railroads have suffered severely from snow blockades, on some lines no trains going through for sixty hours.

Building prospects are better than for years past, and in January permits were issued to the value of \$17,367, an increase of \$10,337 over the corresponding month last year. Large buildings to be constructed as soon as weather moderates are as follows: addition to London Printing Company, \$50,000, 4 storeys 60 x 100 feet; addition to Aberdeen School, \$35,000; new Catholic Church, \$35,000; replacing burned part Perrin's Biscuit Factory, \$40,000; buildings destroyed by fire on Dundas street, \$150,000; part of Geo. White's foundry destroyed by fire, \$6,000; public convenience for market, \$3,000; also the following proposed structures: New City Hall, \$200,000; Ashplant's sample rooms, \$40,000, and addition to Victoria Hospital, \$6,000. A new concern, the Rice Cigar Box Factory, is opening up business here with a \$20,000 plant. The Tuckett Cigar Company has moved into its new factory, and is employing a large number of cigarmakers.

The city is requesting permission from the Ontario Legislature to issue debentures to raise funds to the extent of \$74,000 for the following works:—

North Midland Station	\$25,000
Wharcliffe Bridge	20,000
Weigh scales and comfort station.....	6,000
Fire apparatus	18,000
Commissioner of industries	5,000

The Pere Marquette Railway Company paid over to the city the sum of \$17,244 as rental for 1911 for running rights over the London and Port Stanley Railway, owned by the City.

On Feb. 1st the G.T.R. shops went on shorter hours, reducing them to 45 per week. This is expected to continue for a short time only.

Towards the end of the month famine prices prevailed on the London market owing to tremendous snowfalls and storms which rendered country roads impassable, so that farmers were unable to come to the city. Potatoes sold at \$2 per bag; dressed pork, \$10 per hundred; butter, 40c per lb.; eggs, 40 to 45c per doz.; hay, \$19 per ton and oats \$1.50 per bushel.

St. Thomas.

General conditions were satisfactory during the month. The severe weather prevented outside work in the building trades but inside work was continued. Unskilled labour was in great demand and in some instances the supply was not sufficient. Storms and heavy snow falls during part of the month made work for hundreds of men on the railroads and in civic service. Railway traffic and shop employees were busy with the exception of Pere Marquette car repairers. In this department the entire staff has been laid off. Employment was found for about ten men, formerly engaged as car repairers, in other departments of the shops. Other reductions of minor importance were made, but the shop men, for the most part, were kept busy, with plenty of work ahead. A new schedule of wages will go into effect in the Pere Marquette shops by which fifty machinists will be benefitted by an increase of one cent an hour. The men were formerly working nine hours a day, six days a week and these hours will be continued under the new schedule.

Two Boards, appointed by the Department of Labour, one to enquire into the conditions of labour of the Pere Marquette sectionmen, and the other to enquire into those of the Michigan Central telegraph operators, met in this city during the month. It was given out that the negotiations were satisfactory to all concerned.

Chatham.

Labour conditions generally remained about the same as during the pre-

ceding month. Owing to the Ice Company having secured their full stock in January many unskilled labourers were out of employment some, however, received a few days' work on the different railroads after the heavy snow storms.

Factory work still remained quite brisk all factories working with the exception of two planning mills on full time.

There was no special activity in the building trades for early spring work. Architects promise better conditions later on.

Merchants report retail trade very quiet and attribute the cause to the severe cold weather.

There is a keen demand for desirable tenement houses and many of the managers and foremen of the new industries are compelled to seek hotel accommodation.

In the agricultural parks of the district farmers had little to do, a few being busy hauling material for building purposes. Fodder will be very scarce before the spring opens, the ruling prices have been: Hay, \$22 and \$23; clover hay, \$14.00 a ton; potatoes \$2.75 a bag; live hogs, \$6.60; butter 40c lb.; eggs, strictly fresh, 40c; pork dressed and by the quarter, 10 and 11c; chickens, 50 and 60c; ducks, 60 to 75c; and geese, \$1.25 and \$1.35.

There was nothing done in the way of railway construction.

Cobalt.

Speaking generally, the labour situation in Northern Ontario was good during the month, although as is usual around mining camps, many men were idle. The year 1912 is expected to see a big increase in building operations in the district. Haileybury will be the scene of most of the substantial buildings, which include a \$10,000 hospital, \$25,000 convent, \$20,000 Presbyterian church, as well as other buildings of lesser cost, though of a substantial nature. The naming of the county seat will mean the establishment of large

provincial buildings, the fortunate town not being named as yet. It is likely that much building will take place in Porcupine where many plants will be erected, giving an increased amount of labour during the summer. The cost of living is very high in the district. Butter advancing most in price, while other commodities were higher than they were last year.

An important piece of legislation affecting labour is the Ontario Government's bill to provide an 8-hour day for underground miners. This measure affecting as it does, some 5000 or more men in the Cobalt district, meets with the universal approval of those employed in the mines. Nine hours a day is prevailing at present. The conditions of mining labour were brisk during the month and with the spring much work is being contemplated in outside mining camps, in addition to those of Cobalt and Porcupine. No strikes were noted during the month in any of the branches of the mining industries and mention might be made of the small fatality list which prevailed.

Little was done in farming lines owing to the heavy snow fall, but all the lumber camps report a good supply of men and trade brisk. It is reported that the Elk Lake railroad will be commenced in the spring, while the Nipissing Central Street Railway from Haileybury to Liskeard will also be started. To the north, work on the Pearl Lake branch of the Temiskaming and Northern Ontario was completed, and the Transcontinental and Algoma Central Railways are rushing work.

MANITOBA.

Winnipeg.

During the month of February normal conditions have prevailed in regard to the employment of labour. It is usually a month during which there is considerable unemployment. Labourers frequently find themselves in difficulties at this season of the year as a result of their savings during the summer months

not being sufficient to carry them over until the work of the spring and summer opens up. A meeting of citizens was held at the office of the Great West Life Assurance Company with a view to seeking some remedy for the low wages paid in the case of certain classes of workpeople. Those particularly referred to at the meeting were girls earning from \$3 to \$5 per week, and labourers whose earnings were not sufficient to maintain their families. No information of a statistical character was forthcoming at the meeting. After some discussion it was decided to appoint a committee to get more definite particulars as to the cause of distress in certain cases.

The Manitoba Bridge and Ironworks Company has announced its intention of securing a new site within a reasonable distance of Winnipeg with a view to largely increasing its capacity. At the present time its plant is insufficient to cope with the business offering.

The City of Winnipeg has decided to construct local improvements estimated to cost \$1,600,000. These improvements consist of pavements, sewers, sidewalks, water mains, etc. In addition it is intended to submit a by-law to the ratepayers authorizing the incurring of a debt of \$700,000 for the construction of a subway at Salter street under the track of the Canadian Pacific Railroad.

Traffic on the railroads continues to be very heavy. The movement of grain continues to be about three times the volume of that of 1911 at the corresponding time.

The weather has been very suitable for operations in the wood camps, and as a result there has been a very steady demand for labour for this kind of employment. Some interruption to the wood business has been experienced through a shortage of cars.

Railroad contractors are busy maturing their plans for summer work.

Brandon.

The labour market has been very quiet. The weather has been fairly open and mild, giving some members

of the building trades an opportunity to work.

The large sash and door factories and the Hanbury hardwood finishing factory have been working full time.

The Canadian Pacific Railway Company announce that they will double their yards and terminals here. The terminals at Bredenbury, Broadview and Medora will also be enlarged. Six stalls also will be added to the round-house here.

The new Canadian Pacific Railway depot will be formally opened next month. The Prince Edward hotel will also be opened in April.

Tenders will shortly be called for the new six room school for the Alexander school district.

A spur track will be laid from the Canadian Pacific Railway transfer track making additional trackage for warehouses, etc.

There were few changes in the cost of living. Fresh eggs had decreased, but butter had increased in price.

The Manitoba Winter Fair opens here early next month and promises to be the largest in the history of the Winter Fair Association.

SASKATCHEWAN.

Regina.

Although weather conditions were less severe, labour conditions for February did not compare favourably with those of the corresponding period of last year.

The building trades, generally speaking, were quiet, although the prevailing mild weather has enabled bricklayers to resume work on some jobs which were closed down for the winter.

For this season of the year, exceptional activity prevailed in real estate. Both wholesale and retail trade continues to maintain an active standard. Heavy shipments of spring goods have already been received.

Several changes in wages affecting civic employees will take place on ratification of recommendations submitted

to the City Council. In connection with the Fire Department the following changes in wages takes place immediately:—

Old Scale.

\$55 per month for first two months.
\$60 per month balance of first year.
\$67.50 per month second year.
\$75 per month third year.
\$80 per month for lieutenants.
\$90 per month for captains.

New Scale.

\$55 per month for first two months.
\$60 for next four months.
\$65 for next six months.
\$70 for second year.
\$80 for third year.
\$90 for lieutenants.
\$100 for captains.

Saskatoon.

Industrial conditions showed a slight improvement over those of January and were much the same as those of the corresponding month of last year. No new work has been commenced and no exceptional activity was noted in any particular trade, the building trade in particular being almost at a standstill. Railways were very busy hauling grain from agricultural districts as fast as the cars can be obtained for loading. The shortage of such cars has resulted in millions of bushels of grain being stored temporarily in places adjacent to the shipping points and will entail considerable loss to the producer and make collections for the general merchants very slow.

ALBERTA.

Edmonton.

Industrial conditions during the month have been in most respects better than during the same period last year.

The building trades have experienced the usual seasonable slackness. The various industrial concerns have

been operated steadily, with a full complement of hands, and the number of men seeking employment was no greater than usual at this time of the year. Work is being rushed on the piers of the east end bridge, the contractors endeavouring to have them completed before the break up of the ice. Preparations are being made to lay the steel superstructure on the piers from the north side part of the steel has arrived and the work will be rushed forward as rapidly as possible.

The following are the returns for January as compared with the same month last year:—

POST OFFICE.

	1912.	1911.
Stamps sold	\$12,428 00	\$ 9,183 00
Money orders issued	50,077 02	30,012 07
Money orders paid	82,859 60	49,898 65
Postal notes sold	8,126 26	4,078 92

The number of registered letters mailed during the same month was 9,940 as compared with 5,680 in January, 1911. Customs returns January, 1912, \$68,204.71; January, 1911, \$38,016.55. Building permits issued in January, 1912, \$80,000 as against \$38,405 in January, 1911.

Retail merchants report a good month and transportation lines were busy. Realty values are still on the increase, some record prices being paid during the month for inside property.

Lethbridge.

There has been no exceptional activity in labour conditions during the month of February owing to the severity of the weather; conditions, however, have been much the same as during January. The city commenced work in Henderson Park and gave employment to several men. There are, however, still a number out of work, though it is likely that the advent of spring weather will put an end to this. A forward movement in industrial conditions is seen in the opening up of a new lumber yard, while another wholesale house and a farm implement business have been added to the

industries of the city. Coal mining has been rather slack, and the miners have been working half time. This is reported to be due to the lack of demand for coal. Little has been done in railway construction, about thirty-five men having been employed in putting a breakwater in the river to reinforce the footings of the railway bridge crossing the Belly River. The bank clearings for the month of January passed the two million mark, thus showing a good increase from last year. The total of the customs returns for the same month is \$23,354.02, as compared with \$11,016.75 in January, 1911, or an increase of \$12,337.27.

The following is a comparative statement showing the increasing business at the post office during the month of January just closed and that of corresponding month last year:—

Money Orders issued, 1911, \$27,262.27; 1912, \$29,208.13.
Money Orders paid, 1911, \$13,222.11; 1912, \$13,654.94.
Postal Notes issued, 1911, \$1,380.20; 1912, \$1,476.18.
Postal Notes paid, 1911, \$837.36; 1912, \$952.69.
Stamps sold, 1911, \$2,400; 1912, \$3,172.27.
Savings bank deposits, 1911, \$2,734; 1912, \$3,528.
Registered letters delivered, 1911, 1,676; 1912, 2,179.
Registered letters mailed, 1911, 1,886; 1912, 2,533.
Registered letters passing through, 1911, 1,609; 1912, 2,192.

BRITISH COLUMBIA.

Nelson.

The general state of trade was quiet during February. The weather is mild and trade is improving. Mines are running as usual the Arlington mine is opening and will employ quite large body of men.

Carpenters were well employed for the time of the year, the usual quietness prevailed in other trades. There are prospects of a good summer as some large buildings are to be erected.

Building permits for January amounted to \$25,000 for general repairs.

Mining in the Kootenays keep the iron workers and machinists employed night and day.

Some few lumber mills are running, the Kootenay Shingle Company started its plant and are running full time.

New Westminster.

A large number of unemployed were given work during the month but more are arriving daily so there are still a number without work in the city. Building operations have begun in earnest and street railway extensions are giving employment to a large number of men. Road grading, laying of water and sewer pipes have also begun, as well as some land clearing in the outlying districts.

Several large buildings are either started or being arranged for and dwelling houses are springing up everywhere. Indications point to a busy summer in this vicinity but as yet there are no signs of a scarcity of labour.

Lumbering is being carried on as usual all the mills are running to capacity. All the factories in the city are running full time.

The British Columbia Electric Railway is extending its lines continually and with constant addition to rolling stock is daily adding men to its pay list.

The extension of electric light and power wires gives employment to a large number of men.

The Western Canada Power Company is installing a distributing system in the City and district.

Victoria.

There has been a marked improvement in nearly all classes of outdoor labour during February. With the advent of more settled weather conditions many of the municipal works that were under way last fall have been resumed, giving employment to a portion of the men who were practically idle for the past two or three months. The street paving contractors have resumed operations, and

it is expected that in a month's time they will be employing a large number of workmen. Work in the building trades has also improved materially during the month; a large number of private residences, in addition to several business blocks, are being constructed.

Building permits issued during January, 1912, totalled \$319,885, compared with \$151,455 for the same month a year ago. Of the total for January, 1912, more than \$200,000 were listed for dwellings. In Oak Bay the building permits for January numbered thirteen, valued at \$30,325, compared with five valued at \$8,950 for the same period a year ago, or an increase of over 300 per cent.

The Customs duty collected for January, 1912, was \$142,471, as against \$109,737 for the same month a year ago.

The number of Chinese who paid the import tax during January was 144, the amount being \$72,000. For the same month a year ago 244 Chinese paid the tax amounting to \$122,000.

The number of passengers carried on the local street railway during January was 849,012, and for the same month last year 546,029, an increase of more than fifty per cent.

A total of over one billion feet of timber was cut on Provincial lands during 1911, netting the sum of \$444,333 in stumpage, royalties and taxes, in addition to revenues from timber licenses and rentals. This does not include timber cut in the railway belt controlled by the Dominion Government. Of this 45,000,000 feet of lumber was shipped into the United States. The amount of timber cut during last year was 146,000,000 feet greater than in the previous year, when it totalled 936,000,000 feet.

A deputation representing the Canadian Industrial Peace Association recently interviewed the Provincial Government with the object of asking the Government to pass a law dealing with strikes and lockouts, somewhat after the Dominion Conciliation Act, but more extended in its scope. The Government promised consideration. The local Trades and Labour Council also inter-

viewed the Government in opposition to the proposal.

The City Council has granted an increase to 1,100 labourers from \$2.75 to \$3.00 per day, and to 400 rock drillers and deep sewer men from \$3.00 to \$3.25 per day, effective from March 1st, 1912.

The School Board has increased the salaries of 121 teachers in the High and Public Schools by 15 per cent., effective from January 1, 1912.

The Victoria Steam Laundry are erecting a new laundry to cost in the neighborhood of \$20,000.

The various workers employed in the building trades report an improvement in work over the past two or three months, and with the large amount of building under way, and in sight, conditions should steadily improve for some months. Work in the local shipyards has been brisk, with considerable work in sight. Printing and allied trades have been busy, with practically no idle men. Tailors report work as slack, while garment workers are well employed. Bakers, confectioners, butchers and cigar makers have had regular employment. Laundry workers are kept constantly busy and increase in numbers. Unskilled labourers have been more regularly employed than for the past two or three months, but yet more unemployed are reported in any other branch of industry.

Nanaimo.

There has been a slight improvement in the labour market during the month owing to weather conditions but there are still a large number of men looking for employment.

Great activity prevailed in the coal trade and there was a steady increase in railroad and steamboat transportation. Freight shipments were very good for the time of year. Wholesale and retail merchants report business very good. There has been very little change in the cost of living from that of last month.

Prince Rupert.

Remarkably mild weather during the end of January and the beginning of February enabled outdoor work to proceed steadily, and labour has generally been better employed. There are indications now of considerable activity in the spring. At present, however, there is enough labour of all classes to supply the demand, and a little over. Work on street grading in the business section of the city has fallen off considerably, owing to the completion of the heavier portion of this undertaking. To some extent, however, employment in this direction has been replaced by the commencement of the excavation of the pipe-line for the new city water supply. This work within the city limits is to be done by day labour under supervision of the engineering department of the city. The engineering staff is to be reduced slightly this spring, indicating a reduction of municipal undertakings requiring expert supervision. The Woodworth Hydro-electric scheme is the main enterprise ahead of the city for the spring and summer. According to the City Engineer, some forty men will be employed on the pipe-line excavation immediately. These will all be resident citizens.

Announcement was made by the Engineer in charge early this month, that active work will commence on the new Grand Trunk Pacific dry dock and ship building yards almost immediately. This is a \$2,000,000 undertaking, and will mean considerable employment for common labour. The grading of the Grand Trunk Pacific station site, and hotel site and grounds is expected to begin this spring, and to employ common labour extensively. These are the only new undertakings in sight this month. Building in the city is rather more active than last month, there being a new wholesale warehouse in course of erection, and several new residences. A rush of residential building is expected this spring and summer.

Commercially the city is more ac-

tive than it was last month. Real Estate transactions have been more numerous, and prices for realty kept very firm. There is increasing waterfront traffic, passenger lists of incoming steamers beginning to lengthen, and railway traffic up the first hundred

miles of Grand Trunk Pacific railway laid is considerable. Wholesale firms have greatly increased their buying for supplies for the interior, anticipating great development in the Hazelton district this spring. Retail trade is more prosperous.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—REPORT OF BOARD IN DISPUTE BETWEEN PERE MARQUETTE RAILWAY COMPANY AND MAINTENANCE-OF-WAY MEN AND PUMPMEN ON BUFFALO DIVISION.

THE Minister of Labour received, on February 19, the unanimous report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Pere Marquette Railway Company and the maintenance-of-way men and pumpmen employed on the Buffalo Division of the road, members of the International Brotherhood of Maintenance-of-Way Employees.

The application was made on behalf of the employees concerned, and stated that the differences in question related to wages and hours and to the employees' demand that both should be embodied in a set of rules. The number of employees affected by this dispute was given as 140.

A Board was established by the Minister on January 8, and was constituted as follows: Chief Justice Glenholme Falconbridge, (Chairman), Mr. Wallace Nesbitt, K.C., and Mr. J. J. O'Donoghue, all of Toronto. Messrs. Nesbitt and O'Donoghue were appointed on recommendation of the company and employees respectively and the chairman on their joint recommendation.

The Board met for the hearing of the parties on February 9, completing its work on the 16th of the same month. A set of rules and rates of pay was drawn

up by the Board and was accepted by both parties to the dispute, an amicable settlement of all matters at issue being thereby reached.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:

IN THE MATTER of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Pere Marquette Railway Company and its Maintenance of Way Employees.

We, The Honourable Sir Glenholme Falconbridge, Kt., The Honourable Wallace Nesbitt, K.C., and J. G. O'Donoghue, Esq., all of Toronto, the members of the Board appointed in the above matter, *hereby* report, that the Board met for the hearing of the parties on the 9th day of February, 1912, and was engaged in conference with the parties on the 10th February and the 12th February and again met on the 16th February, 1912.

We beg to report that after hearing the parties and discussing the matter fully and after conference with both, it has been agreed that the following schedule of wages shall be paid:—

SCHEDULE OF SECTION MEN ON THE L. E.
& D. R. AND L. & P. S. LINES.

			Foreman.	Men.	Rate Foreman.	Rate Labourers.
Walkerville	L. E.	1	1	2	60.00	.16½
Oldcastle		2	1	2	57.50	.16
McGregor		3	1	2	57.50	.16

Black Rock Yard			1	nil	55.00	
Windsor Yard			1	2	62.50	.16½

The pump men are each to be paid the sum of \$40.00 per month.

The hours shall be ten hours per day.

It was further agreed that the Superintendent of the Pere Marquette Railway Company in Canada should promulgate a set of rules governing the trackmen in Canada, as follows:

RULES AND RATES OF PAY, PERE MARQUETTE RY.

The following rules and rates of pay will govern the service of "Permanent Maintenance of Way Employees" on the Buffalo Division of the Pere Marquette Railway.

Sec. 1.—By "Permanent Maintenance of Way Employees" is meant employees who take their orders from the Roadmasters and Bridge and Building Master on such parts of the line as are open for traffic, and who have been in the Maintenance of Way service continuously for one year or more, or who have had one year cumulative service during the three years immediately preceding, and same will hereinafter be referred to as "Employees." Labourers in extra gangs unless those practically engaged all the year round will not be ranked as Permanent Employees.

Sec. 2.—Ten hours shall constitute a day's work excepting for Pumpmen. Twelve hours either continuous or intermittent shall constitute a day for a Pumpman.

Sec. 3.—Section Foremen and Sectionmen travelling on orders of the Company to and from work after regular hours outside of their regular sections will be allowed straight time.

Sec. 4.—In computing time one hour will be allowed for 30 to 60 minutes; for less than 30 minutes no allowance will be made.

Sec. 5.—Employees will be promoted hereafter on the Buffalo Division in order of seniority provided they are qualified, such qualification to be solely in the judgment of the Division Engineer.

(a) Employees refusing promotion become junior to employees accepting such promotion.

(b) Employees unable to read or write English need not be promoted.

(c) In the event of reduction in the number of men employed, those longest in the service shall have preference of employment, provided they are qualified in the judgment of the Division Engineer.

Sec. 6.—Employees suspended or dismissed or who consider that they have been unjustly treated will receive full and impartial hearings, and will be advised of decision reached within fifteen days of such hearing. Should investigation show suspension, dismissal, or treatment unjust, full time will be allowed and employee reinstated. Appeals from decisions must be made in writing through his roadmaster within fifteen days after being advised of such decision.

Sec. 7.—Employees taken off their regular sections temporarily to work on snow or tie trains or other work will be compensated for the board and lodgings expenses they necessarily incur.

Sec. 8.—The Company will keep Company's section houses in good repair; the cost of repairs other than ordinary wear and tear will be charged to the occupants.

Sec. 9.—Employees in the service over six months will be granted free pass three times a year to any point on the Buffalo Division and one pass a year over the entire system.

(a) Quarterly passes will be issued to employees living at flag stations and outside sections for marketing purposes.

(b) Half rate will be granted on household goods of employees when moving and remaining in the Company's service; when moved under agreement with or on the Company's orders, household goods will be carried free and free transportation for wife and family.

These rules will not take away any of the privileges that are now in effect with the employees. They will become effective and will remain in force until either party desiring a change gives the other party sixty days' notice.

We are very happy to report that the men after considerable discussion expressed themselves as thoroughly satisfied with the above arrangement in view of the conditions prevailing upon the railway, and that on the solicitation of the Board the Railway yielded to the payment of the above schedule of wages.

Dated this 16th day of February, 1912.

(Sgd.) GLENHOLME FALCONBRIDGE,
Chairman.

(Sgd.) WALLACE NESBITT,
For Ry. Co'y.

(Sgd.) J. G. O'DONOGHUE,
For the Men.

The Department received from the Pere Marquette Railroad Company on March 6 a printed circular relative to the rules and rates of pay governing the employment of its section foremen and section men in Canada, effective from March 1, 1912. The rules and rates of pay in this circular are identical with those recommended by the Board of Conciliation and Investigation.

BUILDING OPERATIONS IN CANADA DURING 1911.

THE present article contains a review of the building operations in the principal industrial centres of the Dominion in the year 1911, and is similar in scope and form to reviews published in the *Labour Gazette* in previous years, with reference to building operations during 1905, 1906, 1907, 1908, 1909 and 1910. The information is based on statistical returns supplied by official correspondents of the *Labour Gazette*, and by city clerks, engineers, building inspectors, and other municipal officers, to whom the Department is indebted for their courtesy in furnishing the desired particulars.

The statistics have reference chiefly to municipalities having a population of 5,000 and upwards, and are classified, wherever possible, according as to whether the work was in connection with new buildings, or with repairs, alterations, or additions to old ones. The number of permits is given in the case of municipalities where the issuing of building permits is in vogue, and in the case of others estimates are given of the actual cost of building construction, based on as accurate information as could be obtained.

General Result.

Detailed information was obtained by the Department with reference to 103 localities throughout the Dominion, being twenty more in number than those about which information was obtained for the previous year. The total value of building operations in these localities during 1911 was \$149,724,519. As in the five previous years, the greatest building activity was at Toronto, Ont., where the expenditure amounted to \$24,374,539. In the second place came Winnipeg, Man., with an expenditure of \$17,716,750, closely followed by Vancouver, B.C., with \$17,652,485. Montreal ranked fourth with an expenditure of \$14,579,952, but it was claimed that these figures were far short of the actual amount. Regina, Sask., came fifth with \$5,099,340, Saskatoon, Sask., sixth with \$5,004,326, and Hamilton, Ont., seventh with \$4,255,730.

The following statement shows the localities in Canada other than those above mentioned where an expenditure of \$500,000 or over in building operations took place:—

Localities.	Amount of Expenditure
Victoria, B.C.	\$4,083,765
Edmonton, Alta.	3,672,260
Fort William, Ont.	3,068,900
Ottawa, Ont.	2,997,610
Moose Jaw, Sask.	2,431,235
Sault Ste. Marie, Ont.	2,374,547
Maisonneuve, Que.	2,289,120
Brandon, Man.	1,538,679
Outremont, Que.	1,460,900
Westmount, Que.	1,334,071
Three Rivers, Que.	1,135,825
St. Boniface, Man.	1,131,735
New Westminster, B.C.	1,126,355
London, Ont.	1,036,880
Lethbridge, Alta.	1,033,380
Prince Albert, Sask.	921,595
Victoria District, B.C.	795,000
North Vancouver, B.C.	775,836
Windsor, Ont.	740,595
Medicine Hat, Alta.	704,302
Brantford, Ont.	613,858
Kamloops, B.C.	595,704
Campbellton, N.B.	594,090
St. John, N.B.	572,700
New Glasgow, N.S.	527,000
Guelph, Ont.	513,690
Halifax, N.S.	509,645

Comparative returns relating to the value of building operations in 1910 and 1911 were obtained in the case of sixty localities, including all the larger centres of population. In these localities the total value of buildings erected in 1911 was \$144,223,765, and in 1910 \$111,408,398, an increase in the past year of over twenty-nine per cent.

The localities from which returns were received to the effect that the year was less active than in 1910 were: Moncton, N.B., Montreal, Que., Westmount, Que., Verdun, Que., St. Hyacinthe, Que., Ottawa, Ont., Peterborough, Ont., Niagara Falls, Ont., Brantford, Ont., Stratford, Ont., Port Arthur, Ont., Lethbridge, Alta., Nelson, B.C., and Prince Rupert, B.C.

The following cities showed decreases of \$500,000 and over in the amount of building operations during 1911:—

City.	Amount of Decrease
Montreal, Que.	\$1,235,927
Westmount, Que.	640,599
Total	\$1,876,526

There were increases in the amount of building during 1911 at Sydney, N.S., Halifax, N.S., Westville, N.S., New Glasgow, N.S., Amherst, N.S., Charlottetown, P.E.I., St. John, N.B., Newcastle, N.B., Sherbrooke, Que., Three Rivers, Que., Maisonneuve, Que., Outremont, Que., Sorel, Que., Hull, Que., Cornwall, Ont., Kingston, Ont., Toronto, Ont., St. Catharines, Ont., Hamilton, Ont., Guelph, Ont., Berlin, Ont., Galt, Ont., Woodstock, Ont., London, Ont., St. Thomas, Ont., Chatham, Ont., Windsor, Ont., Fort William, Ont., Sault Ste. Marie, Ont., Winnipeg, Man., Brandon, Man., Regina, Sask., Moose Jaw, Sask., Prince Albert, Sask., Saskatoon, Sask., Edmonton, Alta., Calgary, Alta., Medicine Hat, Alta., Vancouver, B.C., Victoria, B.C., Victoria district, B.C., and Nanaimo, B.C.

The following table shows the amount expended in each province in building operations during 1911 in the 102 localities from which information was received:—

Province.	Amount Expended.
Nova Scotia	\$ 1,633,542
Prince Edward Island	96,300
New Brunswick	1,444,095
Quebec	23,716,414
Ontario	46,242,357
Manitoba	20,387,164
Saskatchewan	13,920,996
Alberta	18,798,783
British Columbia	27,196,547
Total	\$153,436,198

The following table shows the amount expended during 1911 in building operations in each locality, arranged according to Provinces, with comparative figures for the year 1910. Where a system of issuing building permits exists, the returns relate to the building permits, elsewhere the reference is to the estimated number of buildings erected or altered:—

Nature and Extent of Building by Localities.

The following is a brief statement showing the nature and extent of building operations in 1911 in the more important centres of population in Canada.

Nova Scotia.

Sydney.—One hundred and eighty-one permits were issued, comprising twenty-five for business premises, one hundred and forty-seven for dwellings, and nine for barns and stables. One hundred and sixty-two were for new buildings, and nineteen for alterations and repairs. They represented a value of \$495,642. In 1910, there were issued 194 permits, amounting to \$347,554. The principal new buildings were offices of the Dominion Iron and Steel Company, costing \$91,000; plant and offices of Alex. Cross & Sons, Limited, costing \$80,000; a store and theatre of Messrs. McCuaig and Konig, costing \$30,000, and offices of the Sydney Daily Post, costing \$30,000. Dwelling houses are reported to be very scarce, commanding good rentals. The prospects for building in the present year are favourable. Several new business blocks are to be erected.

Sydney Mines.—No building permits are issued, and complete statistics were not available, but it was reported that there were erected a theatre, several stores, an extension to the convent school, about thirty residences, and several large buildings erected by the Nova Scotia Coal and Steel Company, including a compressor house built of a steel frame and tile blocks. The theatre would cost about 10,000; one of the stores about \$7,000; one of the residences \$4,300, five or six of the others about \$2,500 each, and the rest would average about \$1,000 each.

New Waterford.—Seventy-one houses were constructed by the Dominion Coal Company, amounting in value to a little over \$100,000.

Glace Bay.—Thirty-five new buildings were erected, valued at \$86,500, and four buildings were repaired at a cost

of \$6,000. No permits are issued at this place.

Dartmouth.—Ten buildings to the value of \$18,000 were erected. No building permits are required, and no record of repairs is kept. It was reported that the building trade was extremely dull last year, but there were indications that there would be much more activity during 1912.

Halifax.—Permits to the number of 124 were issued for new buildings valued at \$376,550, and 298 valued at \$133,095 for alterations and repairs, making a total of 422 permits representing \$509,645, compared with 544 permits representing \$484,045, in 1910. The chief buildings erected were an addition to the Nova Scotia car works, and a new factory for Moirs, Limited, and a large school-house. The outlook for building in the present year was reported to be much brighter.

Amherst.—There were erected forty-five new buildings valued at \$107,769, and repairs and alterations to the amount of \$167,995 were made to fifteen others. The new buildings comprised the following classes:—

- 25 residences.
- 1 theatre.
- 1 opera house and hotel combined.
- 1 machine shop and foundry.
- 1 forge shop.
- 1 galvanizing building.
- 1 pattern shop.
- 1 bottling works (rebuilt).
- 2 stores.
- 1 store and check office.
- 4 shops and dwellings combined.
- 1 stable and dwelling combined.
- 3 stables.
- 2 garages.

The alterations comprised extensions to six buildings of the Canada Car Company, a factory of the Christie Brothers Company, the Winter Fair buildings, a church and a residence, and the remodeling of a residence and a hotel.

Stellarton.—Forty new buildings were erected, the total value of which, including buildings repaired, was \$100,000. The value of building operations in 1910 was the same amount. The expenditure for 1911 does not include im-

provements at the Allen shafts, which amounted to another \$100,000.

Westville.—The expenditure on buildings amounted to about \$15,000; the principal expenditure having been a new church.

New Glasgow.—One hundred and twenty-nine new buildings were erected, the total value of which was \$507,000, and one addition to a building costing \$20,000, making the total expenditure \$527,000, compared with \$250,000 in the previous year.

Prince Edward Island.

Charlottetown.—Twenty-three new buildings were erected of the value of \$76,500, and alterations costing \$19,800 were made to eleven others. The new buildings comprised eighteen dwellings, three warehouses, a jail and a church. Alterations were made to five dwellings, a convent, three shops and an office. No building permits are issued.

New Brunswick.

Moncton.—In Moncton proper, 52 permits for new buildings representing a value of \$67,195, and 44 permits for repairs to buildings, valued at \$15,760, were issued during 1911. In the suburbs there were issued 18 permits for new buildings, valued at \$21,600, and 15 permits for alterations and repairs, valued at \$5,500, making a total of 129 permits, valued at \$109,455, compared with 90 permits amounting to \$112,915 in 1910.

Campbellton.—Permits were issued for the erection of 206 buildings, valued at \$594,090. As the town is being rebuilt after the fire of July, 1910, no work of any consequence was done in that year.

St. John.—136 permits for new buildings, alterations, and repairs, the total value of which was \$572,700, were issued during 1911, compared with 164 permits representing a value of \$524,426 in 1910. Of the buildings erected and repaired during 1911, 121, valued at

\$276,700, were for wooden structures, and 15 permits representing a value of \$296,000, were for brick structures. The permits issued for brick buildings were:—

2 Dwellings and stores	\$36,500
1 School	10,000
1 Dwelling	1,500
1 Office	1,500
2 Nail works	8,000
3 Churches	171,000
1 Warehouse	1,000
1 Armoury	55,000
3 Stores	11,500
<hr/> 15	<hr/>
	\$296,000

The permits issued for buildings of wooden construction were:—

94 Dwellings	\$196,700
8 Dwellings and stores	15,000
3 Stores	2,400
3 Offices	1,700
4 Warehouses	44,000
1 Factory	2,000
5 Barns	2,400
1 Foundry	10,000
1 Laundry	800
1 Theatre	800
<hr/> 121	<hr/>
	\$276,700

Fredericton.—16 permits valued at \$46,500 for new buildings, and 14 permits, representing a value of \$17,850 for buildings undergoing repairs and alterations, were issued during 1911. The principal operations were the building of Christ Church Cathedral, and the rebuilding of the New Brunswick Foundry Works, which had been destroyed by fire.

Newcastle.—From ten to twelve residences were built, one valued at from \$10,000 to \$12,000, and the others ranging from \$1,200 to \$3,000. About the same number were built at Chatham and Bathurst.

Quebec.

Chicoutimi.—Permits were issued for seven houses, costing in all about \$4,423. It was stated that many persons built without permits, but the value of their houses could not be ascertained. They were estimated, however, to have cost more than the buildings for which permits were issued.

Quebec.—Ninety-one permits for new buildings, valued at \$667,323, and 107 permits for alterations and repairs, valued at \$72,100, were issued during 1911, making the total of 198 valued at \$739,423, compared with 219 permits, representing a value of \$762,998, issued during 1910. The principal buildings erected during 1911 were an apartment house of six stories, the estimated cost of which was \$111,000, and a school costing \$40,000.

Lévis.—Twenty permits for new buildings, valued at \$38,900, and 12 permits for repairs and alterations to buildings, valued at \$4,800, were issued, making a total of 32 permits, amounting to \$43,700. The prospects for building during 1912 were good.

Sherbrooke.—There was an estimated expenditure of \$920,000 on building operations, comprising \$770,000 for new buildings, and \$150,000 on extensions and repairs to buildings. The expenditure in 1910 was \$555,000. These figures include large additions to the works of the Fairbanks Company, Rand Drill Company, McKinnon, Holmes and Company, and the Union Machinery Company. The building trades had not been so well employed in previous years. The total buildings erected amounted to a value of \$850,000, not including a new dam, power-house, and reservoir for the city, and buildings erected in the outskirts. No building permits are issued at Sherbrooke.

Fraserville.—Nineteen permits were issued, representing an approximate value of \$78,500. The principal building erected was a college, the cost of which was \$50,000.

Three Rivers.—Fifty-three permits were issued, representing a value of \$1,135,825, compared with 44 permits, representing a value of \$980,350, in 1910.

St. Hyacinthe.—About 16 buildings valued at \$36,550 were erected, and about \$2,000 was expended on repairs to structures, making a total estimated expenditure of \$56,550, compared with \$169,600 in 1910. No building permits are issued.

Sorel.—About 15 building permits representing a value of \$38,050 were erected, and repairs and alterations were made to the extent of 20 permits, valued at \$6,000; making a total expenditure of \$42,050, compared with \$27,100 in 1910.

Longueuil.—About twenty-five houses were built having an average value of \$3,000, making a total expenditure of about \$75,000. No official records are kept of building construction.

Montreal.—Two thousand eight hundred and eleven permits for new buildings, representing a value of \$12,905,764, and 925 permits for repairs to buildings, representing a value of \$1,673,868, making a total of 3,736 permits, representing a value of \$14,579,632. This, however, is claimed to be a very low valuation, and does not include the value of building operations done by the city corporation, the harbour commissiion, or in the two city wards which are exempted from conforming to the city By-laws. In the whole of the district of Montreal, including the towns of Verdun, Outremont, Westmount and Maisonneuve, it was estimated that the amount of building operations was about \$28,008,715. The permits issued in Montreal for 1910 were \$15,815,859. The building operations in 1911 for Greater Montreal were estimated as follows:—

City of Montreal (proper)	\$20,114,484
Maisonneuve	2,260,160
Outremont	1,674,000
Westmount	1,334,071
Verdun	496,000
Longue Pointe and Cote des Neiges....	130,000
Harbour Commission	1,500,000
Civic works	500,000
Total	\$28,008,715

In 1910, the building operations in Greater Montreal were approximately \$21,443,861.

Valleyfield.—Three or four new buildings were erected, and repairs were made to two factories. The total cost of construction was about \$50,000, of which \$10,000 would represent the value of new buildings.

Thetford Mines.—The expenditure on new buildings amounted to about \$350,000, the details of which were as follows:—

Mill for the extraction of asbestos	\$300,000
Office of the Bank of Montreal	15,000
Freight shed of the Quebec Central Railway	10,000
Two shops	13,000
Dwellings	12,000

Shawinigan Falls.—Twenty-one new buildings were erected at an estimated cost of \$84,900, and alterations were made to three others at a cost of \$2,700.

Buckingham.—About eleven buildings with an estimated value of \$51,300 were erected. These comprised one planing mill, seven stores, a hall and four stores combined, and two dwellings.

Hull.—The new buildings erected and the cost of alterations and repairs to buildings represented a value of \$130,000, of which \$80,000 was for private buildings and \$50,000 for public buildings. No permits are issued, and no record is kept of building operations. Expenditure on building operations during 1910 amounted to about \$80,000.

Ontario.

Ottawa.—There were issued 657 permits, representing a value of \$2,997,610. The total value of improvements and new buildings constructed was estimated by the publicity commissioner at \$3,425,775. This includes the new plaza and the Grand Trunk hotel, which are not in the permits issued in 1911. The new buildings erected were chiefly residences. Large extensions were made to the manufacturing plants of a number of firms, including the E. B. Eddy Company, the McFarlane-Douglas Company, the Watson Carriage Company, the Ottawa Car Company, and the W. C. Edwards Company. The Continental Bag and Paper Company and the J. W. Wilson Company, sash and door manufacturers, finished their buildings and began operations. There was great activity in building in the suburbs, where permanent residences have in many cases replaced frame summer cottages.

The outlook for the present year is very bright for the building trades.

Rockland.—Fourteen buildings were erected at a cost of \$10,000, and repairs were made to about twenty others at a cost of \$5,000. No permits are issued.

Carleton Place.—Ten buildings were erected, valued at \$46,300, and alterations and additions were made to three, costing \$4,500.

Cornwall.—Eleven buildings were erected, valued at \$54,000, and repairs to the amount of \$6,000 were made to others, making a total value of \$60,000, compared with \$49,850 in the previous year. The most important new building was a branch office of the Bank of Montreal.

Smith's Falls.—Sixty-two new buildings were erected, costing \$246,950, and an addition costing \$25,000 was made to the foundry of the Frost & Wood Company. The principal new buildings were a collegiate institute valued at \$60,000, a cement theatre costing \$8,000, and a bakery costing \$2,600. Of fifty-eight dwellings erected, \$120,550 represented the value of brick buildings, \$27,000 the value of buildings of cement blocks, and \$8,800 the value of frame buildings.

Perth.—Six buildings costing approximately \$54,700 were erected, and alterations costing about \$5,000 were made to about ten others.

Brockville.—Twenty-six new buildings were erected at a cost of about \$82,167, and extensions and repairs costing about \$43,790, were made to twenty-one other buildings. No permits are issued.

Kingston.—The value of new buildings, alterations and repairs amounted to \$311,259, compared with \$220,092 in 1910.

Peterborough.—Two hundred and sixty permits, representing a value of \$345,372, were issued.

Belleville.—The sum of about \$300,000 was expended on new buildings. This includes \$90,000 for two public schools, not yet quite completed, and \$40,000 for a building of the Young Men's Christian Association.

Picton.—There were four buildings erected, representing a value of \$40,000, which included one church costing about \$2,500, another church begun to cost about \$25,000, a canning factory valued at \$10,000, and a house valued at \$2,500.

Cobourg.—Permits were issued for forty-five new buildings of an estimated value of \$98,500. Twelve permits at least were also issued for improvements. During the past four years 170 permits have been issued, representing a value of \$6,553,500.

Oshawa.—Sixty-eight permits were issued, representing an expenditure of about \$120,000. Of this amount the sum of \$35,000 was spent on factory extension, and \$85,000 on stores, residences and alterations. It was expected that the season of 1912 would be a very busy one in the building trades.

Orillia.—It was estimated that the expenditure on new buildings amounted to about \$346,150, and on additions, repairs and alterations about \$68,200, making a total of \$414,350. Of this sum about \$207,000 was expended on factories, about \$116,500 on churches, libraries and other public buildings, and about \$90,000 on residences, etc.

Toronto.—There were issued 6,635 permits for new buildings, representing a value of \$22,239,397, and 3,234 permits for alterations amounting to \$2,135,142, making a total of 9,869 permits, representing \$24,374,539, compared with 8,499 permits, issued in 1910, representing a value of \$21,127,783.

The following is a copy of the official classified list of buildings erected in Toronto during 1911:—

LIST OF BUILDINGS ERECTED IN TORONTO,
1911.

Permits	Buildings.	Value.
3,826	Brick dwellings	\$10,456,875 00
246	" Alt. and Add.	230,826 00
870	R'gheast dwell's., bk. fronts	1,281,220 00
122	" Alt. and Add.	39,060 00
319	Roughcast dwellings	317,035 00
260	" Alt. and Add.	48,182 00

Permits	Buildings.	Value.
422	Frame dwellings	345,180 00
329	" Alt. and Add.	49,615 00
285	Stores and Offices	1,068,400 00
245	" Alt. and Add.	130,730 00
45	Offices	1,467,305 00

6	Shelters	21,600 00
2	Rinks	158,000 00
2	Telephone Exchange Bldgs.	49,500 00
3	Fire Halls	34,000 00
1	Pumping Station	30,000 00
9,869	Total ..	\$24,374,539 00

North Toronto.—Three hundred permits were issued, representing a value of about \$300,000. Permits, however, are only necessary for buildings erected in a central circumscribed area.

Niagara Falls.—The total estimated expenditure on buildings was \$492,000, which was \$180,000 less than in the pre-

vious year. This was accounted for by the unusually heavy expenditures of the power companies in 1910, the Ontario Power Company alone having spent \$400,000. The following estimates of expenditure during 1911 are based on information obtained from building contractors, owners, architects, etc. :—

Ontario Power Company, power house, etc.	\$100,000
Canadian Niagara Power Company, p. house	50,000
Armoury, 44th regiment	44,000
Nurses' Home at general hospital	10,000
Grand stand, rink and lodge hall	17,000
Factories	19,750
Dwellings	127,300
Stores, offices, etc.	27,300
Miscellaneous	11,750
Repairs	65,000
Dwellings, etc., in suburbs	20,000
Total	\$492,000

Welland.—There was an estimated expenditure of \$308,831 on new buildings, and \$33,977 on repairs, making a total of \$342,808. The new buildings included among others a pumping station valued at \$75,000, a club house costing \$10,000, business blocks costing \$61,500, a factory costing \$1,200, and residences costing \$55,000. The building prospects for 1912 are stated to be very good.

Port Colborne.—The expenditure on new buildings was reported to have been the largest of any year in the history of the village. The Maple Leaf Milling Company built a large flouring mill with a capacity of four thousand barrels per day, and the Canadian Cement Company began a large extension to its plant.

St. Catharines.—One hundred and twenty permits for new buildings were issued, representing a value of \$265,435, compared with 262 permits representing \$263,000 issued in 1910. In addition to these, a large number of private dwellings were being erected outside of the fire limits, for which no permits are required. The Yale-Towne Company and the Steel Radiator Company are erecting two very large buildings. The value of real estate has nearly doubled all over the city during the past year.

Hamilton.—There were issued 1,135 permits for new buildings valued at \$4,476,325, and 224 for repairs costing

\$179,405, making a total of 1,359 permits, representing a value of \$4,255,730. In 1910, there were issued 1,331 permits, representing a value of \$2,604,605. The building permits of 1911 were in excess of any previous year, and it was stated that indications pointed to as busy, if not busier, conditions during 1912.

Dundas.—The expenditure on new buildings amounted to \$96,000, and on repairs and alterations to \$28,100, making a total expenditure of \$124,100. A new public building is under construction, and the outlook for building of dwellings during 1912 was reported to be fairly good.

Brantford.—There were issued 403 permits for new buildings valued at \$508,529, and 128 permits for repairs, alterations and extensions costing \$105,329. The new buildings included 315 residences, averaging in value about \$1,600, churches to the value of \$7,800, a convent valued at \$8,000. Extensions to thirteen factories cost \$109,880, new stores including extensions and repairs to others, \$31,600, and a new bank building with extensions to others cost \$31,600. The outlook for building during 1912 was reported to be especially bright.

Paris.—About eighteen buildings of an estimated value of \$50,000 were erected. No permits are issued.

Guelph.—One hundred and six permits were issued, representing a value of \$513,690, compared with 58 permits, representing \$143,700, issued in 1910. The civic expenditure on sewerage construction amounted to \$24,153.42, and on road construction to \$16,487.24.

Berlin.—One hundred and ninety-four permits were issued for new buildings, valued at \$356,093, and thirteen for alterations costing \$35,200, making a total of 207 permits, representing a value of \$391,293, compared with 138 permits, representing \$349,906, issued in the previous year. Large extensions were made to a number of factories, the principal ones being a four-storey addition to the Kaufman rubber factory costing \$25,-

000, additions to two buildings of the Lang Tanning Company costing in all \$27,000, and an addition to the factory of the Western Shoe Company costing \$10,000.

Chatham.—There were issued 69 permits for new buildings valued at \$183,935, and thirteen permits for alterations and repairs costing \$11,212, making a total of 82 permits, representing an expenditure of \$195,147, compared with a total of 49 permits with an expenditure of \$61,849 in 1912. The amount of building was reported to have been the largest of any year in the history of Chatham. The following were among the most important of the new buildings erected:—

American Pad and Textile Company's factory.	\$41,500
Addition to factory of International Harvester Company.	12,000
School.	25,000
Addition to convent.	20,000

Just outside of the city limits there were erected an abbatoir costing \$80,600, and a building of the International Harvester Company costing \$80,200.

Wallaceburg.—There were issued 24 permits for buildings valued at \$88,875, which included the following:—

Hotel	\$15,000
School	25,000
Additions to Dominion Sugar Company.	20,000
Planing mill.	1,500
Four shops	8,000
Fourteen dwelling houses	each: \$950 to 2,600

Dresden.—Twenty houses were built and three stores were remodelled.

Windsor.—There were issued 340 permits for buildings valued at \$740,595, compared with 237 permits, representing a value of \$393,040, issued in 1910. The new buildings erected comprised 283 dwellings, seven shops, and ten factories. The outlook for building in 1912 was reported to be very good. In the neighbouring towns of Walkerville and Sandwich building was very brisk. In Walkerville six factories and one storehouse were erected.

Sarnia.—There were twenty buildings erected, the aggregate cost of which was

estimated to have been approximately \$40,000.

Goderich.—There were erected nineteen new buildings at an estimated cost of \$35,000. The cost of additions and alterations to factories and other buildings was estimated at \$14,300, making a total expenditure of about \$49,300. No permits are issued, and the above figures are stated to be a very conservative estimate.

Owen Sound.—Building permits were required for the first time in June, 1911. From June 1 to the end of the year there were issued seventy-eight permits for new buildings costing \$181,975, and eighty-one permits for repairs and alterations costing \$17,346. Prior to June 1, there were also erected thirty-five new buildings valued at \$55,000. The total number of building operations was, therefore, 194, representing an expenditure of \$254,321.

Collingwood.—There were issued twenty-seven permits for new buildings costing \$101,485, and two for repairs and alterations costing \$1,325, making in all twenty-nine permits representing an expenditure of \$102,810.

Cobalt.—There were issued fourteen permits for new buildings costing \$7,000 and twelve for repairs and alterations costing \$3,000, making a total of twenty-six permits, representing an expenditure of \$10,000. It was reported that building operations were very light, compared with four or five years ago, when the mining boom of that district was at its height. This is the rule in the development of all mining camps.

Haileybury.—There were issued thirty-five permits for new buildings valued at \$90,925, and three for repairs costing \$750, making a total of thirty-eight permits representing an expenditure of \$91,675. The most important of the new buildings were a hospital costing \$35,000, a church costing 20,000, and a business block costing \$6,000. It was reported that the building trades were very quiet in 1911, but the season of 1912 was expected to be a busy one, as the construction of the new county

buildings of the District of Temiscaming would probably be begun.

Sudbury.—The total expenditure on building construction was estimated to have been about \$200,000. Permits are not issued for all parts of the town.

Fort William.—There were issued 355 permits for new buildings valued at \$2,994,435, and 100 for repairs and additions costing \$74,465, making a total of 455 permits, representing an expenditure of \$3,068,900, compared with an expenditure of \$2,381,125 in the previous year.

Manitoba.

Winnipeg.—There were issued 3,671 permits for 4,398 buildings costing \$18,282,250. There were cancelled, however, sixteen permits for twenty-three buildings costing \$565,500, making the net permits issued 3,655 for 4,375 buildings constructed with an expenditure of \$17,716,750. The permits for repairs are not separated from those for new buildings, but the gross amount expended on additions, alterations and repairs was stated in the building inspector's report to have been \$636,300.

The following statement shows the number of buildings for which permits were issued according to their various classes, with their aggregate cost:—

674 Frame dwellings	\$ 763,200
1,608 Frame dwellings on stone base- ments	5,072,350
119 Brick dwellings	845,800
34 Brick veneer dwellings	307,800
130 Shops and stores	327,750
81 Tenements, hotels and office blocks	5,738,500
19 Churches, schools and institutes..	1,549,500
127 Garages, warehouses, storehouses, mills, factories, etc.	2,449,300
22 Theatres and public buildings...	326,600
753 Private garages, stables, sheds, workshops	255,150
830 Additions, alterations and repairs	636,300
4,398	\$18,272,250

Brandon.—There were issued 150 permits for new buildings costing \$1,531,754, and eight for repairs and alterations costing 6,925, making a total of 158 permits, representing an expenditure of \$1,538,679, compared with 153 permits

and an expenditure of \$1,224,385 in the previous year. The principal new buildings were an asylum costing \$525,000, the Canadian Northern Railway hotel costing \$425,000, a large school and a fire hall built by the city, and a large warehouse and salesroom of the International Harvester Company. It was expected that there would be as much building during the present year, the only important new structures announced being two schools. No factories were built.

St. Boniface.—There were issued 246 permits for new buildings valued at \$1,120,535, and four for repairs costing \$11,200, making a total of 250 permits, representing an expenditure of \$1,131,735.

Saskatchewan.

Regina.—There were issued 950 permits for buildings valued at \$5,099,340, compared with 695 permits, representing a value of \$2,416,288 issued in the previous year. Many large warehouses were built, and it is reported that the demand for sites for warehouses continues to increase. The class of dwellings erected during 1911 was greatly in advance of those built in former years. The outlook in the building trades for 1912 is very bright.

Weyburn.—There were erected 104 new buildings of the better class, representing a value of \$464,500. No building permits are issued.

Moose Jaw.—The value of buildings for which permits were issued amounted to \$2,431,235, compared with \$1,116,690 in the previous year.

Prince Albert.—There were issued 200 permits representing a value of \$921,595, compared with the erection of buildings costing \$662,475 in 1910. It was expected that many dwellings and a number of large business blocks would be built this year.

Saskatoon.—There were issued 806 permits for buildings costing \$5,004,326, of which amount about \$7,000 would cover the cost of repairs and alterations.

Alberta.

Edmonton.—The value of building operations amounted to \$3,672,260, compared with \$2,416,288 in 1910.

Calgary.—There were issued 2,619 permits representing a value of \$12,907,638, compared with 1,499 permits and an expenditure of \$5,589,594 in 1910. No separate record is kept of repairs and alterations.

Medicine Hat.—There were issued 361 permits for new buildings costing \$703,302. Very few permits for repairs were issued, and \$1,000 would cover all the expenditure on them. In 1910, 151 permits were issued, representing a value of \$427,140. The Alberta Clay Products Company, the Medicine Hat Foundry, and the Medicine Hat Rolling Mills are all doubling the capacity of their buildings, and a large gas fixture manufacturing plant is to be built this year.

Strathcona.—There were issued 171 permits for new buildings valued at \$467,553, and 17 permits for repairs and alterations costing \$13,650, making a total of 188 permits with an expenditure of \$481,203, compared with 112 permits and an expenditure of \$372,470 in 1910.

Lethbridge.—There were issued 305 permits representing a value of \$1,033,380, compared with 514 permits representing \$1,211,310, issued in the previous year. There were erected 158 residences, fifteen stores and office buildings, and twelve factories and warehouses. Permits for repairs and miscellaneous structures numbered 121. While the partial crop failure of 1910 and the seven months' strike of coal miners caused a decline in building operations compared with the previous year, it was expected that there would be great activity in the building trades during the season of 1912.

British Columbia.

Granby.—Seven buildings valued at \$20,000 were erected, of which one was a factory for the manufacture of elastic web, which was valued at \$5,000. The

other buildings were six frame dwellings.

Nelson.—There were issued 132 permits, representing a value of \$166,700. These included a jam factory costing \$10,000, and a departmental block costing \$65,000. Active building operations were also carried on in the suburbs. In Fairview cottages were built to the value of \$50,000. On the west arm of Kootenay Lake cottages to the value of \$75,000 were built, and at Procter a hotel was erected by the Canadian Pacific Railway Company at a cost of \$150,000.

Revelstoke.—There were issued 55 permits for new buildings valued at \$322,000, and 21 for repairs and alterations costing \$12,850, making a total of 76 permits, representing an expenditure of \$334,850. A government building was erected costing \$125,000, and four blocks costing respectively \$40,000, \$9,000, \$25,000, and \$18,000, also a large sash and door factory. The prospects for building in 1912 are very bright.

Kamloops.—There were issued 115 permits for new buildings costing \$553,849, and 39 for repairs and alterations costing \$41,855, making a total of 154 permits and an expenditure of \$595,704. The following were the principal buildings erected in 1911, and their cost:—

Hospital	\$103,000
Building of the Royal Bank	32,000
Church	30,000
Building of Telephone Company	13,000
Repairs to Hudson's Bay Company's stores	12,500
Addition to building of Canadian Bank of Commerce	9,000

New Westminster.—From February 1, when the system of building permits first came into force, until the end of the year, there were issued 411 permits, representing a value of \$1,126,355. The cost of repairs was not given, but it was stated that they were not two per cent. of the total. Most of the new buildings were dwelling houses, but there were also erected two four-storey business blocks and several smaller stores and warehouses.

Vancouver.—There were issued 2,764 permits, representing a value of \$17,-

652,485, compared with 2,250 permits, representing \$13,150,365, issued in 1910.

North Vancouver.—There were issued 511 permits, representing a value of \$775,836. The outlook for building during 1912 is reported to be very favourable.

South Vancouver.—The issuing of building permits was only begun on October 21, 1911. From that time until the end of the year there were issued 184 permits, representing a value of \$280,800, of which sum \$1,000 was spent on repairs and extensions. The new buildings included four picture theatres, five business blocks, three churches, a tenement building, and two sawmills. The rest were residences ranging in value from \$500 to \$4,000, the most popular form of house costing from \$1,500 to \$2,000.

Victoria.—There were issued 1,201 permits representing a value of \$4,083,765, compared with 746 permits, representing \$2,373,045, issued in 1910. A large number of modern dwellings were erected, and many business blocks ranging in height from two to seven storeys. Very few factories were built. The building prospects for 1912 are reported to be bright. The detailed record for 1911 follows:—

Reinforced concrete buildings.....	\$ 989,500
Brick dwellings	722,920
Addition to brick buildings	53,075
Alterations to brick buildings	78,190
Wooden dwellings	1,991,675
Two wooden fire halls	10,325
Warehouses, etc.	45,610
Wooden garages and stables	35,115
Addition to dwellings	39,655
Alteration to dwellings	17,700
General alterations to civic bldgs.	100,000
	<hr/>
	\$4,083,765

Victoria District.—In Oak Bay the sum of \$485,000 was spent on new buildings, and in South Saanich and Esquimalt \$310,000 was spent, making a total of \$795,000 spent on building in the suburbs of Victoria. In 1910, the expenditure on buildings in the suburbs of Victoria amounted to \$275,000.

Point Grey.—From May 1 to the end of the year, it was estimated that there were erected 364 new buildings, valued at \$1,778,650. It was estimated by the municipal assessor that up to May, 1911, the total value of buildings in the municipality was \$2,047,750. No permits are issued.

Nanaimo.—There were issued 91 permits, representing a value of \$150,461, compared with 40 permits, representing \$105,234, issued in 1910. The new buildings comprised fifty-three dwellings, twenty-five business establishments, and thirteen public buildings.

Prince Rupert.—There were issued 162 permits for new buildings valued at \$251,602, and 55 permits for repairs and alterations costing \$14,425, making a total of 217 permits, representing an expenditure of \$266,027. Building was principally confined to the erection of dwelling houses, but a number of shops and boarding houses were also built. A cold storage building for the fish industry, which was begun before 1911, is nearing completion. The cost of this building which is made of concrete is \$136,000. All the other buildings in Prince Rupert are frame structures more or less temporary, with the exception of a concrete building of the Bank of Montreal, which was erected before 1911.

WORKMEN'S COMPENSATION AND OLD - AGE PENSIONS IN
AMERICAN BREWERIES.

AN interesting scheme for compensation for injuries to workmen and for old age pensions has recently been devised by representatives of the United States Brewers' Association and the International Union of United

Brewery Workmen of America. The plan is to go into effect when approved by a majority of the members of the International Union, ascertained on a referendum vote, and by brewery proprietors whose output represents forty

per cent. of the output of beer in the United States. In a communication received from the Secretary of the International Union, the opinion was expressed that the plan would undoubtedly be accepted, and that it would go into effect on July 1.

Creation and Maintenance of a Fund.

Under the proposed scheme, a fund is to be established to be known as the Workmen's Compensation and Old Age Pension Fund for Brewery Workmen of America. The fund will be maintained by contributions from the employer of an amount equal to one and one-half per cent. of the wages paid by him, and from each employee an amount equal to one-half of one per cent. of his wages, which is to be deducted from the wages by the employers and forwarded every three months to the Board of Directors and Award, together with their own contribution of one and one-half per cent.

Beneficiaries Under the Fund.

The beneficiaries under the Compensation Plan are to include: (1) all persons employed in breweries, the proprietors of which are parties to the agreement, and in their bottling departments, depots, agencies and malt-houses, irrespective of their affiliation with labour organizations: (2) all men employed in malt-houses not connected with breweries, provided the employers become parties to the agreement: (3) all salaried officials of the local and international organizations of brewery workmen, who shall be entitled to benefits of the Old Age Pension Fund only. The time during which these officials are not employees, but officers, while not counted as years of service, shall not be considered an interruption, nullifying previous years of service.

The benefits of the fund are intended to be in lieu of all legal claims to compensation, and the acceptance of benefits under this plan shall be a complete

waiver of all remedies which the beneficiary may have upon his employer under common or statute law. The beneficiary under this agreement is to elect within eight days after the right to any benefit shall accrue, whether he will accept the provisions of this fund or claim his common law or statutory remedy. The Local Boards of Award, and the Board of Directors and Award shall have the right to require a written acceptance or release, and a waiver of all statutory and common law remedies, before authorizing any payment under the Fund. As it is the intention, through this fund, to provide just compensation to the employee, and at the same time to protect the employer from claims made by those who elect to take their common law or statutory remedy, then the employer shall be reimbursed out of this fund, for any amount that he may, by a competent tribunal, be compelled to pay, or an amount which may be arrived at by compromise, provided such compromise has been sanctioned and approved by the Board of Directors and Award.

Compensation.

Employees injured during working hours shall be provided with first aid, medical or surgical, as the injury may require. In the case of a temporary injury, the employee shall receive sixty-five per cent. of the rate of weekly wages, averaged for the two months preceding the date of injury, but no compensation shall be paid for the first week of disability, unless the disability shall last for more than four weeks. Under this provision, the maximum weekly payment shall be twenty dollars and the minimum weekly payment, five dollars. In the case of total disability, not resulting in death within two years after the injury, the injured employee shall receive a similar weekly payment for a period of five years from the date of the injury, but the total amount paid shall in no case be less than the amount which would

have become payable under the provisions of the fund had the injury resulted in death. In cases of unquestioned total disability, the Board of Directors and Award shall have the right, in its discretion, to award a lump sum, equal to the total weekly amounts that would be payable, in lieu of weekly payments. If an injury result in death before the expiration of two years from the date of the injury, the employee's relatives, dependent on him, shall receive an amount equal to three hundred times sixty-five per cent. of the weekly rate of wages, averaged for the two months preceding the date of injury, provided such amount shall not exceed \$3,400. Necessary funeral expenses of an employee, whose relatives are entitled to compensation, may be promptly advanced out of the fund, to an amount not exceeding \$150, and where there are no dependent relatives, the Board of Directors and Award shall have the right to pay funeral expenses up to this amount. Compensation shall be payable out of this fund irrespective of the question of negligence, either of the employer, the employee, or of a fellow workman: nor shall there be any consideration of assumption of risk, or other statutory or common law defences in adjusting claims upon the fund.

Old-Age Pensions.

Participants in old age pensions must be employees who have served for a period of twenty-five years, and who have reached the age of sixty years, or who, after continuous employment for twenty-five years, have become incapacitated for active work before reaching the age of sixty, if they have in every case accepted the

provisions of this fund, in preference to statutory or common law remedy. The pensions shall be at the rate of one-half the rate of their weekly wages, averaged for a period of six months immediately prior to the date of their retirement. The Board of Directors and Award, however, is authorized to determine from year to year, whether the above rates of compensation and old age pensions can be safely paid, and to increase or diminish the amounts of, and the times for which benefits and old age pensions shall be payable.

Administration.

The fund shall be administered by a Board of Directors and Award consisting of three members to be appointed by the United States Brewers' Association, through its Board of Trustees, and of three members to be appointed by the International Union of United Brewery Workmen of America, through its Executive Board. The members shall serve for terms of three years, and until their respective successors are selected. There shall also be selected by each of the parties a like number of alternates, to serve at any meeting which any member of the Board shall be unable to attend. In case of tie votes, an additional member shall be selected by the Board, whose vote shall be decisive. Such temporary members shall be selected from time to time as necessity arises, and shall serve only for the purpose of deciding a tie vote. The moneys constituting the fund shall not be drawn out of any depository except upon resolution of the Board and upon the signature of two trustees, selected from time to time by the Board from their number.

Local Boards are also to be constituted in such a manner as may be determined by the Board of Directors and Award. These local boards shall promptly consider and adjudicate all claims upon the fund, under the rules and procedure prescribed by the Board of Directors and Award. In case an employee or any person interested in the fund is dissatisfied with the decision of the Local Board, he shall have the right, within ten days after receiving notice of the decision, to appeal to the Board of Directors and Award, whose decision shall be final and binding.

The Board of Directors and Award is required to make a detailed and

complete report annually of all transactions in connection with the fund, with an itemized financial statement, which shall be sent to the United States Brewers' Association and to the International Union of United Brewery Workmen for distribution among their members.

An interesting feature of the scheme is that an employee to be a participant in the fund is not compelled to remain in the service of any single employer, but may take service, from time to time, with any other employer who are parties to the agreement, without losing any benefits under it. It is stated that there are about 800 brewers in the United States Brewers' Association, employing about 40,000 workmen.

PRICES, WHOLESALE AND RETAIL, CANADA, FEBRUARY, 1912.

I. WHOLESALE PRICES.

WHOLESALE prices as a whole were on a considerably higher level than in the preceding month and were much higher than at the same period of 1911 having reached the highest level shown by the Department price record, which goes back to 1890. The Department's Index Number stood at 134.3 for February as compared with 131.4 in the preceding month and 126.3 in the corresponding month last year. The numbers, it will be understood, are percentages in each case of the average price level prevailing during the decade, 1890-1899, the period selected by the Department as the standard of comparison throughout its investigation into wholesale prices. Some 250

articles carefully selected to represent Canadian production and consumption are included in the calculation.

The features of the past month were advances in grains and fodder, dairy products, fruits and vegetables. The chief increases during the past year occurred in grains and fodder, dairy products, fruits and vegetables, furs, liquors and tobacco, there having been decreases in animals and meats, textiles, and paints, oils and glass.

The following is a table of the Department's index numbers arranged by groups of commodities into which the investigation has been divided, showing the average price level for February, 1912, compared with that of the previous month and with that of the same month last year:—

TABLE SHOWING INDEX NUMBERS BY GROUPS OF COMMODITIES FOR FEBRUARY, 1912, JANUARY, 1912, AND FEBRUARY, 1911.

The chief features of the price movement during February as compared with the preceding month were as follows:

Grains and fodders.—All Ontario grains were very high during February. Winter wheat maintained the level at 95-96c reached at the end of January, barley rose to the same level. oats have been advancing, peas were up to \$1.20-1.25 in the last week of the month, and rye rose to \$1.08-1.09 at the middle of the month but in the next week dropped 3c. Manitoba wheat averaged about 1c higher at Fort William than during January, having declined slightly during the month. The export demand had not been good, some believe on account of the reports which had been circulated as to its quality, but prices have also been lower at Liverpool. Western barley was not quite so high as during January, but was firm. Flax seed fell from \$1.94 to 1.83½. The demand for oats was very strong throughout Canada and Canadian oats were shipped to the United States, which is very unusual. All wheat was in good demand from Ontario millers and insufficient Ontario wheat was on the market, any Manitoba wheat available being soon taken. Fodders have been very firm, bran and shorts advanced \$1.00 per ton, and were reported scarce. Baled straw was steady, baled hay was firm at Montreal, though at Toronto it declined slightly. Deep snow on country roads and railway freight congestion are alleged as the immediate factors in the price movement.

Animals and meats.—Butchers' cattle were higher in the early part of the month at both Toronto and Winnipeg but receded slightly about the middle of the month. Practically no export demand was reported, as English prices were low, and milder weather brought in fair supplies. Cattle, however, are reported scarce throughout Ontario and good beef cattle are scarce in Western Canada. Dressed beef maintained the higher level reached at the end of January. Veal was steady.

Live hogs rose from \$6.15 to 6.45-6.50 at Toronto during the month, dressed hogs rose from \$8.75-9.25 to 9.00-9.50 at the middle of the month. Bacon, hams, and barrelled pork have been steady since the first of the year: Lard rose ¼c per lb. in the middle of the month. Sheep also advanced at the middle of the month and mutton was steady at the level reached during January. Poultry was steady.

Dairy products.—Creamery butter advanced 1c at Montreal in the first week of the month but receded to the previous high level. At Toronto both creamery and dairy butter advanced 1c in the first week of the month and again in the last week. Imports from New Zealand came on the market, without, however, reducing prices. The high price and scarcity of milk and cream since last spring has seriously curtailed the output of butter. The hay crop in Ontario is estimated as being 20% short and the grain used for feed as being 39,000,000 bushels less than in 1910-11. Cheese was steady at an advance of ⅛c in the last week of January. Milk has been steady but it is proposed to raise the price at Montreal on account of the great cost of production. Eggs reached a very high level in the first week of February, storage eggs were nearly exhausted, and imports were received from the United States. Milder weather later in the month and better supplies of fresh eggs caused slight declines. The unusually severe winter checked the supplies of fresh eggs for which there were prospects early in January and trade has depended chiefly on storage supplies and imports since that time.

Fish.—Eastern fish were steady and catches have not been large. Fresh halibut was reported quite scarce. Salmon trout was on the market in Toronto again. British Columbia canned salmon was firm and scarce.

Fruits and vegetables.—The outstanding feature in this group has been the unprecedentedly high price of potatoes. At Toronto they advanced from \$1.40-1.50 in January to \$1.65-1.75, and at

Montreal from \$1.10-1.50 to \$1.50-1.70. The highest wholesale price recorded previously in February since 1890 was \$1.10-1.12 at Toronto in 1903, and \$1.00-1.10 at Montreal in 1893 and \$0.95-1.10 in 1903. The highest price ever paid since 1890 at Montreal was \$1.15-1.40 in the summer of 1903, and at Toronto was \$1.30-1.35 in the summer of 1907. In Ontario the potato crop of 1911 is estimated at 40% less than in 1910, the acreage being only slightly less. Germany and United States also had unusually short potato crops. Winter apples were higher during the month, good apples were reported scarce and evaporated apples also advanced. Bananas were steady but oranges and lemons were lower. The demand for oranges was reported to be light as the fruit was in some cases sour and inferior but some losses through frost tended to strengthen prices. Raisins and currants were steady. Turnips and canned vegetables were firm and onions advanced to \$4.00 per 100 lb. bag at Montreal, a price reached before only in 1905.

Miscellaneous groceries and provisions.

—The feature in this group has been successive declines in sugar from \$6.00 on December 1, 1911, to 5.50 at the end of January for extra granulated at Toronto, but during February the price has advanced 10c twice. Fluctuations in European and United States markets and the undecisive condition of the Cuban crop are the factors in the price movement. Rio coffee was 1c higher and reports of short crop in Brazil persist, tea, pepper and rice are strong. Cream of tartar was slightly lower. Stocks of tea in Japan are said to be cleared and in China to be low, though not on account of the war. Glucose advanced 50c per cwt. but maple sugar was very dull and declined. Flour has been steady, the demand for home consumption having been good but the export trade quiet. In the Maritime Provinces a rise in flour took place. Rolled oats and oatmeal were higher after the drop due to price cutting and stocks are low,

many mills not being able to get enough oats.

Textiles.—Raw cotton advanced from 9.35 to 9.90 under good demand from England and the United States mills. Cotton goods continued to decline until the first of February and demand is good. Wool was also higher on advances in the English market and good demand from mills in Canada. Raw silk recovered from the low prices and dullness at the first of the year. Stocks are low in China and demand is good in Europe and United States. Jute and Hessians were higher and trade was reported good at Calcutta. Flax fibre and fine tow were higher and linen products were firm.

Hides, leather, boots and shoes.—Hides and leathers are still high and firm and advances in some lines of boots are considered probable.

Metals and implements. — The iron and steel markets are unsteady in both Canada and the United States. Demand for building operations and railway construction is good but the tariff question across the border has an unsettling influence on both markets and the question of bounties is also an important item of interest in Canada. Nova Scotia pig iron and steel billets averaged lower at Montreal though Scotch pig was reported scarce. Brass receded after the rise in January but copper was firm. Lead was steady, but was fluctuating on the primary markets. Tin was higher on the primary markets and firm here. Spelter was lower at Toronto. Quicksilver was higher at New York, and bar silver has been advancing.

Fuel and lighting.—Connellsville coke advanced again and Vancouver Island coal averaged higher. Coal is reported very scarce in various parts of America.

Building materials. — Lumber prospects were reported better this season and prices are encouraging. There has been a brisk demand and prices in hardwoods were firm and some advances were reported in box and mill

culls. Hemlock is in good demand and laths are strong. British markets are rather quiet and are waiting for lower prices though stocks are reported low. Red oak declined slightly at Toronto. The features of the paint and oil market were the declines of 2c in linseed oil and 5c in turpentine, which had risen sharply. Speculative action is alleged as the chief cause.

House furnishings.—Some lines of furniture have a strong upward tendency on account of a rise in the price of plate glass. Crockery advanced $2\frac{1}{2}\%$ and celluloid handled knives 5% in sympathy with an advance on the English markets. Brooms receded somewhat after a sharp advance in January.

Drugs and chemicals were steady. Opium was firm at the advance of last year.

Miscellaneous.—Furs were decidedly higher and further advances are expected, especially in mink, muskrat and skunk. Canadian hops were higher at Montreal but British Columbia hops and choicest Bohemian were slightly lower. Binder twine, sisal, has been set $\frac{3}{4}$ c higher than last year. Raw rubber advanced $8\frac{1}{2}$ c per lb. at New York.

II. RETAIL PRICES.

THE feature of the month in the retail price movement was the advance in potatoes and butter almost from coast to coast. In the Maritime Provinces outside demand raised prices, in some parts of Quebec the crop was poor, in Ontario severe cold made shipments from outside points difficult and expensive and prevented the marketing of what supplies farmers had stored, while some stores were lost through frost; in the western provinces scarcity prevailed. Scarcity of feed and under production were held responsible for the great advance in potatoes, butter, and other farm products. At Montreal and in some cities of Ontario there was something like a

famine in potatoes though supplies were brought in from New Brunswick, Vermont, Scotland and Ireland. There was also a great shortage of butter and importations from New Zealand appeared on the Montreal market, without, however, checking the upward trend of prices. At Toronto supplies of butter were short, in part due to the bad state of the roads in some parts of the country, and in part due, as alleged by dealers, to the fact that many farmers were sending milk straight to the market, instead of making butter. Milk prices were sufficiently high to account for the change. At St. Hyacinthe, Que., an increase of 12c in the price of butter is reported to be due to the fact that milk producers sell the cream for shipment to the United States, during the summer months a carload of cream per day is said to have been shipped. At Kingston, Ont., butter is reported to be higher because cream is shipped to the United States and Toronto. Eggs are reported higher in some districts and lower in others. Supplies of packed eggs have been used up in many districts and fresh eggs are being imported, yet supplies coming into many cities are said to show a great falling off as compared with the same time last year. At Montreal, Ottawa and Toronto, beef and mutton were higher, an advance having been made in the livestock markets, where dealers say that the high prices of feed together with a prospective shortage in the number of cattle in the country has tended to send up prices, which they say are likely to go still higher this spring. Pork and lard were also somewhat upward but bacon and fish downward. Some advances in flour, rolled oats and rice were attributed to scarcity and increases in wholesale prices. Sugar had fluctuated considerably, the wholesale prices having dropped several times from early in December to the beginning of February when advances took place, with reported prospects for higher prices. At Quebec and Sydney rentals for the ensuing

year are on about the same level as last year but at Montreal and Toronto are upward under good demand.

Notes on Retail Prices.

Beef.—At Montreal, Ottawa, Toronto and Port Arthur both sirloin steak and shoulder roast advanced in price, on account of scarcity. Shoulder roast advanced at Sorel as farmers did not bring in sufficient supplies, having killed their beef cattle in December. Sirloin steak was higher at St. Hyacinthe, Que., as cattle were scarce, and at Newcastle, N. B.

Veal advanced in price at Three Rivers and Montreal, Que., at Ottawa, Toronto, Guelph and St. Thomas, Ont.; and at Winnipeg, Man. At Fredericton, N.B., there was a decline in price.

Mutton was higher on account of scarcity at Three Rivers and Montreal, Que., at Ottawa, Toronto, Guelph, Berlin, St. Thomas and Chatham, Ont., and at Victoria, B.C., where the wholesale price was raised by the packers. At Fredericton, N.B. the price was lower.

Pork.—The price of fresh roasting pork rose at Charlottetown, P.E.I., St. Hyacinthe, Que., St. Thomas and Cobalt, Ont. A decline in price occurred at Montreal and Chatham, Ont. Salt pork was higher at St. Hyacinthe, Que., at Ottawa, Peterborough, and St. Thomas, Ont., and at Regina, Sask. At Winnipeg the prices of both fresh and salt pork declined on account of competition with supplies from United States.

Bacon declined in price at St. Hyacinthe, and Montreal, Que.; St. Thomas, Ont., and Nanaimo, B.C. Advances occurred at Brockville and Peterborough, Ont.

Fish.—Codfish were lower in price at Fredericton, N.B., and halibut declined at Montreal.

Lard advanced at St. Hyacinthe, at Ottawa, Woodstock and St. Thomas, Ont.; and declined at Winnipeg. These increases are attributed to the high price and scarcity of butter.

Eggs.—Strictly fresh eggs rose in price at St. John, N.B., Kingston, Brantford, Berlin, St. Thomas, Chatham, and Port Arthur, Ont. At Montreal prices had advanced to 60c but were given at 50c at the middle of the month, supplies being however unusually scarce. At Hamilton, Ont., supplies on the market were becoming better as is usual at this time of the year. At Brandon, Man., New Westminster, Victoria, Nanaimo, and Prince Rupert, B.C., prices were lower, supplies being larger on account of milder weather. Packed eggs advanced at Quebec, and Three Rivers, on account of scarcity of fresh eggs and good demand. At Victoria, B.C., the price rose on account of short supplies from the east. Increases also occurred at Toronto, Ont., and Nanaimo, B.C., and at Peterborough, Ont., there was a decline. Both packed and fresh eggs declined at Fredericton, N. B., Sherbrooke and Sorel, Que.; and at Stratford, Ont., on account of larger supplies. Prices rose at St. Hyacinthe and St. John's, Que.; and at Ottawa, Orillia, London and Cobalt, Ont., on account of scarcity.

Milk advanced from 6c to 7c per quart at St. Hyacinthe, Que.

Butter.—Both dairy and creamery butter advanced at twenty-one of the cities but declined at Sorel, Que., and Victoria, B.C. Dairy butter alone was higher at Fredericton, N.B., Windsor, Ont., Cobalt, Ont., and Nanaimo, B.C. Creamery butter advanced at Hamilton, Brantford, St. Thomas and Port Arthur, Ont.; at Toronto dairy tub butter was steady but creamery and dairy prints were higher, and at Winnipeg the price of creamery butter was higher, due to smaller imports from United States. The scarcity and high price of feed, severe cold, and less production of milk are given as causes for advances and milder weather as the cause of any decreases which occurred.

Cheese.—The price of both old and new cheese increased at St. John, N.B. on account of short supplies, at Brantford, Ont., in sympathy with the price of butter, and at St. Thomas, Ont. Old

RETAIL PRICES OF STAPLE ARTICLES

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month into the cost of living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a quarter of each locality usually occupied by workmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and in order that the statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* quoted, etc., from the Department.

*In British Columbia a bag of potatoes is usually quoted per 100 lbs.

*At Nelson, B.C., \$8.75 is the price of Lethbridge coal and \$12.00 of Vancouver Island coal.

cheese rose at Sherbrooke, Que., and new cheese at Woodstock, and Toronto, Ont., in sympathy with an advance in butter. At St. Hyacinthe, Que., both old and new cheese declined as the local supply was large. Old cheese declined at Regina, Sask.

Bread.—At New Westminster, B.C., the price of bread still remained at four loaves for 25c, or 10c per single loaf, although a city by-law came into effect, prescribing $1\frac{1}{4}$ lb. as the weight of a loaf, the usual weight previously having been 1 lb. The change is therefore equivalent to a decrease of 20%.

Flour.—At Woodstock, Ont., the price of flour was raised from \$2.65 to \$2.75 per cwt., an advance of 10c per cwt. having been made by the millers. At Victoria, B.C., there was a rise due to an increase of the wholesale price. At Chatham, Ont. and Nanaimo, B.C., the price also advanced but declined 5c per bbl. at Sydney, N.S. and $\frac{1}{2}$ c per lb. at Kingston, Ont.

Rolled oats advanced at Kingston, Toronto, and St. Thomas, Ont., and at Victoria, B.C., on account of an increase in the wholesale price, due to an advance in oats.

Rice was higher at Sherbrooke, Que., Woodstock, Ont., and Prince Rupert, B.C. Crop failure in the Orient and troubles in China are given as the causes.

Beans declined at Lethbridge, Alta., and advanced at Prince Rupert, B.C.

Apples, evaporated, were lower at Sherbrooke, Que., as fresh apples were more plentiful, and at Montreal, but advanced at Stratford, Ont., as fresh apples were higher.

Prunes advanced at Sydney, N.S., Sherbrooke, Que., Brockville, and Hamilton, Ont., and at Prince Rupert, B.C., but declined at Nanaimo, B. C. A short crop and great scarcity were given as causes.

Sugar.—The price of both granulated and yellow sugar rose at Three Rivers,

Que., and Windsor, Ont., but declined at Regina, Sask., and Nanaimo, B. C. Granulated sugar advanced at Kingston, Niagara Falls, London and St. Thomas, Ont.; declining at Orillia, Brantford, and Berlin, Ont. Yellow sugar was higher at Moncton, and St. John, N.B.

Tea.—The price of tea was higher at Sydney, N.S., as the wholesale price rose and a better quality was on the market. At Ottawa, Ont., an advance was attributed to the troubles in China and to decreasing production in India and Ceylon as tea plantations were being converted into rubber plantations.

Coffee.—No changes were reported.

Potatoes.—At thirty of the cities potatoes rose in price. At St. John and Fredericton, N. B., stocks were held for high prices for shipment. At Sherbrooke, Que., the local supply had been shipped away to a great extent. At St. Hyacinthe, Que. the crop had been poor. Nearly every city in Ontario reported higher prices, due chiefly to crop failure, difficulty and expense of shipping and marketing in the severe weather, and to much loss through stored supplies being frozen. Western cities also reported higher prices through scarcity.

Vinegar advanced at Montreal as the wholesale price was higher.

Coal.—The price of anthracite coal rose from \$6.50 to \$8.00 at Sydney, N.S., as there was none on the market. An advance occurred at Moncton, N.B. At Newcastle, N.B., hard coal rose from \$6.75 to \$9.00 as the supply brought in by water freight had been exhausted. At Ottawa a rise was due to an increase in the wholesale price on account of trouble at the mines. No changes in soft coal were reported.

Wood.—Both soft and hard wood declined at Sydney, N.S., on account of favourable weather and good supplies of soft coal. The price of hard wood advanced at Moncton, N.B., and declined at Kingston, Ont. Soft wood was quoted

higher at Windsor, Ont. All wood was higher at Newcastle, N.B., as roads were blocked and the supply was short.

Coal oil was lower at Ottawa and Orillia but was higher at Berlin and at Toronto on account of an advance in the wholesale prices.

Rentals.—At Montreal an all-round advance of \$1.00 per month took place as houses were not plentiful. At Toronto scarcity of houses caused an advance of \$2.00 per month. At Orillia, Ont., rents had an upward tendency on account of the scarcity of houses.

TRADE DISPUTES DURING THE MONTH OF FEBRUARY, 1912.

FEW disputes of importance were reported to the Department as having taken place during the month, the one affecting most employees being that of the cloak and garment workers employed by the T. Eaton Company of Toronto. More than six hundred work-people were affected by this dispute, no settlement of which had been reported to the Department at the end of February.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during February was eleven, which represents an increase of two over that of last month. About fifty firms and twelve hundred employees were involved in these disputes, of which eight firms and eight hundred and forty-nine employees were affected by the disputes which commenced during February.

Loss of time in working days.—The loss of time to employees through trade disputes during February was approximately 10,080 working days, compared with a loss of about 12,875 days during January and 32,525 in February, 1911.

Trades affected by new disputes. — The following table shows the trades affected by the new disputes, and the number of employees in each group of trades:—

TRADES	No. of dis-putes	No. of em- ployees
Building.....	1	42
Metal Trades.....	1	40
Clothing Trades.....	3	633
Transport.....	1	14
Unskilled Labour.....	1	60
Total.....	7	849

Localities affected by new disputes.—Three of the new disputes occurred in the Province of Quebec, and four in the Province of Ontario.

Causes of disputes.—The following were the causes of the new disputes during the month:—

CAUSE	No. of dis-putes
For increase in wages.....	1
Against increase in working hours.....	1
Against employment of particular persons.....	1
Against changes in method of employment.....	1
Sympathetic.....	2
Other causes.....	1
Total.....	7

Methods of settlement.—Of the eleven disputes in existence at the beginning of the month, two were definitely terminated, while in two the employers claimed that conditions ceased to be affected. In the case of the other seven no settlement had been reported to the Department at the close of the month. In the cases where a settlement was effected, work was resumed after negotiations between the parties; work was resumed pending

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual business is concerned, it may be regarded as terminated. The list of trade disputes published in the present table, therefore, includes mentioned a record of the continuance of such a dispute might be misleading. The list of trade disputes published upon the business interests of the community is on only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention, moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

an agreement in one case and in another the strikers' places were filled by other men.

Results of disputes.—In the two disputes terminated during the month the employees were successful in obtaining their demands, in another work was resumed pending an agreement.

Disputes which commenced Prior to the beginning of the Month.

The trade disputes in existence during February, which began in previous months comprised strikes of machinists and boilermakers between Westford, Ont., and Edson, Alta., plasterers in Winnipeg, pulpmill hands at St. George, N. B., and iron moulders at Moncton, N. B.

Strike of Machinists and Boilermakers of the Grand Trunk Pacific Ry.

No definite settlement was reported in a strike of machinists and boilermakers of the Grand Trunk Pacific Railway which began on October 10, 1911, and extended from Westford, Ont., to Edson, Alta. The Company claimed to be no longer affected; the men, however, maintain that the strike is still on. About 300 men were involved in this dispute.

Lockout of Plasterers at Winnipeg.

Five plasterers ceased work on January 27 on account of a claim made by them to fix in place some ornamental staff plaster, which work had been assigned to carpenters. Two days later a general lockout was declared by the Builders' Exchange, in which about forty firms and 250 men were involved. According to the secretary of the Builders' Exchange, the lockout was raised on February 3. Work was resumed under "open shop" conditions pending a new agreement between the Master Plasterers and the Local Union.

Strike of Pulpmill Hands at St. George, N.B.

No change in the situation was reported to the department in the case of

a strike of forty-two pulpmill hands at St. George, N.B., who stopped work on April 26, 1911, on account of the refusal of the employer to grant a demand for an eight-hour day instead of thirteen and eleven hours with an increase in the minimum wages.

Strike of Iron Moulders at Moncton, New Brunswick.

Thirty iron moulders in the employ of the Record Foundry and Machine Company ceased work on January 27. A 20% increase was given the employees last year and at the annual meeting this year it was decided to reduce the wages to the rate prevailing before the increase took place. A strike occurred of which no settlement had been reported at the end of the month.

New Disputes.

The new disputes of the month involved structural iron workers and cloak and garment workers at Toronto, Ont., iron moulders at Montreal, Que., garment workers at Montreal, Que., freight handlers at Hamilton, Ont., coat pressers at Hamilton, Ont., and labourers at Hull, Que.

Strike of Structural Iron Workers at Toronto.

On February 19, forty-two structural iron workers in the employ of the Dominion Bridge Company at Toronto ceased work which was being done on the Canadian Pacific Railway office building. The men stated that they objected to risking their lives by working in the company of an incompetent person, who, they claimed, occupied a position of responsibility and was thus accountable for the safety of his fellow workmen. The Company on the other hand claimed that the men struck on account of the employment of men who did not belong to their union. At the close of the month no settlement of this dispute had been reported to the Department.

Strike of Iron Moulders at Montreal.

On February 5, forty moulders in the employ of the Record Foundry and Machine Company of Montreal went on strike in sympathy with employees of the same Company in Moncton, N.B. No demand of any kind was made by the men and the dispute was left unsettled at the end of the month.

Strike of Cloak and Garment Workers at Toronto, Ont.

On February 14, fifty-five men in the employ of the T. Eaton Company of Toronto, were discharged for refusing to sew with machines the linings in women's coats. They claimed that this change in the method of finishing garments would deprive finishers of their work. On the following day 500 employees of the same Company, 200 of whom were females, were discharged for refusing to work. No settlement was reported at the end of the month.

Strike of Garment Workers at Montreal, Que.

On February 27, eighty garment workers in the employ of the T. Eaton

Company of Montreal struck work in sympathy with employees of the same company at Toronto who were on strike. No settlement of this dispute was reported at the end of the month.

Strike of Freight Handlers at Hamilton, Ont.

A strike of fourteen freight handlers in the employ of the Toronto, Hamilton and Buffalo Railway Company and the Canadian Pacific Railway Company took place on February 10. The Companies' lines were congested with freight traffic and the men were requested to work until 8 p.m. to relieve the situation. They refused and walked out, their places being immediately filled by others.

Strike of Snow Shovelers at Hull, Que.

On February 26, sixty labourers in the employ of the Hull Electric Railway Company ceased work. They demanded an increase in wages and an increase of one cent per hour being granted on the following day the men returned to work.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF FEBRUARY 1912.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of British Columbia, to the office of the factories inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 239 individual work people in Canada during the month of February, 1912, were recorded by the Department of Labour. Of these 61 were fatal and 178 resulted in serious injuries. In addition 4 fatal accidents were recorded

as having taken place prior to the beginning of the month, information not having been received by the Department before February, 1912.

In the preceding month there were 86 fatal and 214 non-fatal accidents recorded, a total of 300, and in February, 1911, there were 93 fatal and 197 non-fatal accidents, a total of 290. The number of fatal accidents recorded in February, 1912 was, therefore, 25 less than in the preceding month and 32 less than in February, 1911. The number of non-fatal accidents recorded in February, 1912, was 36 less than in the preceding month and 19 less than in February, 1911. Altogether there were 61 less industrial accidents recorded in

February, 1912 than in the preceding month and 51 less than in the same month of the preceding year.

Of 174 returns received during the month giving the ages of the victims of industrial accidents, 17 referred to persons under twenty-one years of age, 80 to persons between twenty-one and forty-five, and 21 to persons over forty-five. Fifty-six persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and groups of trades:—

Nature of Fatalities and Accidents.

The only disaster of the month involving the death of more than one workman was a premature explosion of dynamite on construction work on the line of the Canadian Northern Railway, eight miles east of Fort Francis, Ont., by which thirteen construction hands, including the foreman, were killed and six others seriously injured.

Record by Industries and Groups of Trades.

Agriculture.—There were three fatal and seven non-fatal accidents recorded during the month of February, 1912 compared with seven fatal and nine non-fatal accidents during January and fourteen fatal and fifteen non-fatal accidents during February, 1911. Of the fatal accidents, two were caused by falling trees and one by a blast.

Fishing and hunting.—There were no accidents recorded during February compared with two fatal accidents during January and three fatal during February, 1911.

Lumbering.—There were one fatal and eight non-fatal accidents recorded during February, as compared with four fatal and seven non-fatal accidents during January and fifteen fatal and twelve non-fatal accidents during February, 1911. The fatality was caused by drowning.

Mining.—There were five fatal and eight non-fatal accidents recorded during February, as compared with fourteen fatal and fifteen non-fatal accidents during January and eight fatal and twelve non-fatal accidents during February, 1911. Of the fatal accidents three were caused by falls, and one each by an explosion and crushing by mine cars.

Railway construction.—Although the table shows fourteen killed and eighty injured during the month of February there were but two occasions on which lives were lost by accident, and only three occasions on which eight persons received serious injuries, compared with eight occasions involving nine fatalities and five occasions involving serious injuries to twelve labourers during January, and five occasions involving fatalities during February, 1911. In one of the fatal accidents thirteen construction hands were killed and in the other the victim was run over by a train.

Building trades.—There were two fatal and eight non-fatal accidents recorded during February, as compared with five fatal and fifteen non-fatal accidents during January, and three fatal and seven non-fatal accidents during February, 1911. One of the fatalities was caused by falling material, and the other by burning.

Metal trades.—There were three fatal and forty-eight non-fatal accidents recorded during February, compared with seven fatal and forty-four non-fatal accidents during January, and eight fatal and forty-two non-fatal accidents in February, 1911. Of the fatal accidents, two were caused by machinery and one by an elevator.

Woodworking trades.—There were one fatal and six non-fatal accidents recorded during February, compared with one fatal and sixteen non-fatal accidents during January, and three fatal and eighteen non-fatal accidents in February, 1911. The fatality was caused by a piece of flying timber.

Printing and allied trades.—There were no accidents recorded during February, as compared with none in January and one non-fatal accident in February, 1911.

Clothing.—There were two non-fatal accidents recorded during February compared with two non-fatal in January, and one non-fatal accident during February, 1911.

Textile.—There were three non-fatal accidents recorded during February compared with one non-fatal accident in January and none in February, 1911.

Food and tobacco preparation.—There were two non-fatal accidents recorded during February, compared with three non-fatal accidents in January and one fatal and seven non-fatal accidents in February, 1911.

Leather.—There were two non-fatal accidents recorded during February compared with none in January, and one non-fatal accident in February, 1911.

Steam railway service.—There were twelve fatal and thirty-one non-fatal accidents recorded during February, as compared with twenty-three fatal and thirty-three non-fatal accidents in January, and twenty-one fatal and thirty-one non-fatal accidents in February, 1911. Five of the fatalities were caused by persons being run over; three by crushing between cars, two in derailments, one struck by a train and one by falling material.

Electric railway service.—There were one fatal and four non-fatal accidents recorded during February, as compared with eight non-fatal accidents in January, and none in February, 1911. The fatality was caused by a rear-end collision.

Navigation.—There were one fatal and three non-fatal accidents recorded during February, as compared with one fatal and five non-fatal accidents in January, and two non-fatal accidents in February, 1911. The fatality was due to drowning.

Miscellaneous transport.—There were four fatal and fifteen non-fatal accidents recorded during February, compared with three fatal and nine non-fatal accidents in January, and twenty-one non-fatal accidents during February, 1911. Of the fatalities, one was caused by a fall, one by crushing, one by live stock, and one in which victim was struck by a train.

Public employees.—There were three fatal and nine non-fatal accidents recorded during February, compared with one fatal and thirteen non-fatal accidents in January, and six fatal and thirteen non-fatal accidents in February, 1911. Of the fatalities, one each was caused by suffocation; falling material, and machinery.

Miscellaneous skilled trades.—There were three fatal and five non-fatal accidents recorded during February, as compared with four fatal and fifteen non-fatal accidents in January, and one fatal and eight non-fatal accidents in February, 1911. Of the fatalities, two

FATAL ACCIDENTS OCCURRING IN JANUARY, BUT ONLY REPORTED TO THE
DEPARTMENT IN FEBRUARY, 1912.

Miner	Phoenix, B.C.	Jan. 23	1	Killed by blast.
Leather worker	Ponetanguishene, Ont.	" 20	1	Caught in machinery.
Brakeman	Upper Kent, N.B.	" 31	1	Fell between cars.
Labourer	Salt Spring Island, B.D.	" 25	1	Struck by crow bar.

were caused by elevators, and one by suffocation in a grain bin.

Unskilled labour.—There were eight fatal and nine non-fatal accidents recorded during February, as compared with five fatal and seven non-fatal ac-

cidents in January, and five fatal and six non-fatal accidents in February, 1911. Three of the fatalities were caused by cave-ins, two by falling material, and one each by a fall, drowning, and machinery.

RECENT INDUSTRIAL AGREEMENTS.

THE following Agreement was made on behalf of the Western Coal Operators' Association and District No. 18, United Mine Workers of America with reference to the Kipp Mines of the Lethbridge Collieries, Limited, and is supplementary to the general agreement which was signed on November 17, 1911.

To the Western Coal Operators' Association and District No. 18 United Mine Workers of America.

Regarding the making of an agreement for Kipp Mines of the Lethbridge Collieries, Ltd., we find

(1) That the general provision of the agreement now in effect between the United Mine Workers of America, District 18, and the Western Coal Operators' Association, be in effect at above named colliery.

(2) That the outside and inside day wage scale of the agreement now in effect between the United Mine Workers of America, District No. 18, and the Western Coal Operators' Association, be in effect at the above named colliery.

(3) That the contract rates of this lignite field (namely, A. R. & I. Co. Chinook Colliery, Royal Colliery and the Diamond Coal Co.) be in effect at the above named colliery, with the following brushing clause:—

Brushing.—Clod or draw slate in entries or rooms to be paid at the rate of 6 cents per inch for all clod or slate in excess of 5 inches.

(4) That these general conditions and rates are to be effective, for the life of the agreement between the Western Coal Operators' Association and District No. 18, United Mine Workers of America, dated Nov. 17, 1911.

Note.—The above contract rates are made with the understanding that the cutting is to be done in

the band of bone or slate which is some ten inches or a foot from the bottom of the seam; however, if the Company desire to make this cutting below the bottom bench of coal, it shall be optional with them to do so, providing by so doing it will not decrease the earning capacity of the man.

(5) That the local conditions as now exist at the several collieries in this immediate field, as are in the agreement, now in effect between the United Mine Workers of America, District 18, and the Western Coal Operators' Association, be in effect at the above mentioned colliery during the life of the agreement now in effect between the United Mine Workers of America, District No. 18, and the Western Coal Operators' Association.

(6) That where Monobel is used, the same price is to be charged as is now charged at all other mines (where in use) in the Western Coal Operators' Association:—namely, 30c per lb.

(7) That all other prices underground be the same as are at the Mines of the Alberta Railway & Irrigation Company.

(Sgd.) W. F. McNEILL,

Commissioner, Western Coal Op. Assn.

(Sgd.) W. B. POWELL,

President District 18, U. M. W. of A.

Dated at Lethbridge, Alta., Jan. 27th, 1912.

Agreement at the Leitch Collieries.

AGREEMENT entered into between:—District No. 18 of the United Mine Workers of America, of the First Part, and The Leitch Collieries, Ltd., of the Second Part.

NO. 3 SEAM.

Angles to be driven as per present system, 12 feet wide. Price, 60 cents per cubic yard. Pillars, 53 cents per cubic yard. The above prices to include timbering and chute building. Counter tunnel, as per present practice, 6 ft. x 6 ft., \$3.50 per lineal yard. Cross cuts 6 ft. x 6 ft., on the level, \$3.50 per lineal

yard. Cross cuts 6 ft. x 6 ft., on the angle, \$3.00 per lineal yard.

NO. 4 SEAM.

Angles to be driven as per present system, 14 feet wide. Price, 52½ cents per cubic yard. Pillars, 45½ cents per cubic yard. The above prices to include timbering and chute building. Counter tunnel as per present practice, 6 ft. x 6 ft., \$3.50 per lineal yard. Cross cuts, on the level, 6 ft. x 6 ft., \$3.50 per lineal yard. Cross cuts, on the angle, 6 ft. x 6 ft., \$3.00 per lineal yard.

It is understood and agreed that the above agreement expires March 31, 1915.

In witness whereof, the parties hereto have here-

unto set the hands of their proper officers, this twelfth day of February, 1912.

THE UNITED MINE WORKERS OF AMERICA,
District No. 18.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF FEBRUARY, 1912.

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals and the Department of Marine and Fisheries, which has received the signatures of both parties, together with the fair wages schedules inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

INTERIOR FITTINGS, POST OFFICE, SOURIS, MAN.

Supply and installation of interior fittings in post office at Souris, Man. Name of contractor, John Clark, Brandon, Man. Date of contract, January 22, 1912. Amount of contract, \$1,735.

FAIR WAGES CLAUSES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than

those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the Contractor.

PUBLIC BUILDING, ATHENS, ONT.

Public building at Athens, Ont. Name of contractor, John Dillon, Seeley's Bay, Ont. Date of contract, January 29, 1912. Amount of contract, \$13,800.

Fair Wages Schedule.

Trade or Class of Labour.	Rate of Wages.	
	Not less than the following rate:	
Stonecutters.....	\$3.00 per day of 10 hr.	
Bricklayers.....	3.50 " 10 "

Making and repairing rubber dating stamps and type, also other stamps.....	47 75
Supplying and stamping material and wooden boxes, and repairing stamping pads.....	442 82
Repairing Post Office scales.....	40 00
Supplying mail bags.....	804 75
Repairing mail bags.....	2,588 95
Making and repairing mail locks and supplying mail bag fittings.....	2,997 25
Supplying street letter boxes and railway mail clerks' tin boxes and repairing portable letter boxes, parcel receptacles, railway mail clerks' tin travelling boxes and street letter boxes.....	575 22
Making and repairing miscellaneous articles postal stores.....	433 10
Making and supplying articles of official uniform.....	5,416 56

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior.

THE total immigration to Canada during the ten months from April, 1911, to January, 1912, inclusive was 300,705, compared with 260,687 in the corresponding months of 1910-1911, an

increase of 15 per cent. Of the total arrivals during the ten months, 188,999 were at ocean ports compared with 158,670 in the corresponding months of the previous year. There was an increase in the number of arrivals from the United States from 102,017 during the ten months ending January, 1911, to 111,706 in the ten months ending January, 1912.

IMMIGRATION TO CANADA FROM APRIL 1911 TO JANUARY 1912, INCLUSIVE, COMPARED WITH THAT OF THE CORRESPONDING MONTHS OF 1910-11

Notes.

The following resolution was passed by the legislature of British Columbia with reference to Oriental immigration.

"That, *Whereas*, the feeling in the Province of British Columbia has long been opposed to Asiatic immigration; and

Whereas, numerous representations have been made by the Legislative Assembly of this Province to the Federal authorities, setting forth the views of the people at various times as being in favour of effectual exclusion; and

Whereas, on account of the action of the Dominion Government on several occasions in disallowing local legislation, framed on the lines of the commonly called 'Natal Act,' with the object of preventing such immigration, the local Legislature has been prevented from exercising authority on its own behalf; and

Whereas, a Delegation from the Government of British Columbia, whose report has been submitted to this House, has recently made further and urgent representations on the subject to the Federal authorities to the effect that the immigration from Oriental countries still continues in a degree constituting a menace to white labour and the desire to preserve British Columbia as a white man's domain;

Therefore, be it Resolved, that this House heartily concurs in the representations made by the said delegation to the Right Honourable R. L. Borden, Prime Minister of Canada, and desires to express its great satisfaction at the announcement that the Government of British Columbia will be consulted in connection with the new treaty with Japan so far as consideration specially affecting British Columbia may be concerned; and

Be it further Resolved, that His Honour the Lieutenant-Governor be requested to forward a copy of this Resolution to the Honourable the Secretary of State at Ottawa."

Active steps are being taken by the Provincial government of New Bruns-

wick to settle a large number of British immigrants in some of its newer districts. It was stated by the Premier that a part of the programme of the government was to take over partially improved farms and to hand them over to settlers on easy terms of payment. A joint conference of the St. John and Fredericton Boards of Trade was held, at which it was decided to call a great immigration conference at Fredericton in March. Steps were taken to interest the provincial boards of trade, municipal and city councils, farmers' associations, the press, and the transportation companies in the proposed conference.

At the opening of the Ontario legislature on February 7, it was announced in the Speech from the Throne that the provincial government intended to spend \$5,000,000 in opening up Northern Ontario. It was further stated that there were brought into the province during 1910 by the Department of Colonization 8,000 immigrants, and it was believed that the figures for 1911 would show a still larger number. Conferences had been held between the Minister of the Interior at Ottawa and the Minister of Agriculture of the Province, with a view to co-operation with regard to this matter in future, which, it was believed, would bring about desirable results.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during February, 1912:

DOMINION REPORTS.

Railway Statistics.

Railway statistics of the Dominion of Canada for the year ended June 30, 1911 (from sworn returns furnished by the Railway companies). Ottawa: King's Printer, 1912. Pages, 273. Price, 15 cents.

IN the report on the railway statistics of the Dominion of Canada for the year ended June 30, 1911, it is stated that the total railway mileage in Can-

ada was 25,400, representing an increase of 669 miles over that shown in the report for year ended June 30, 1910. Seventy per cent. of the increase was in the western provinces. On June 30, 1911, there were also about 1,600 additional miles of railway in actual operation, but these were regarded as being still under construction. The amount of railway line under construction was as follows: 6,222.63 miles being graded; 3,833.34 miles on which track was laid or being laid, and 1,577.5 miles in operation. During 1911 \$61,650,300 was added to the stock is-

se of Canadian railways and \$56,741,-214 to the funded debt, bringing the aggregate capital liability to \$1,528,-389,201. The ratio of dividends to share-capital was 4.08 per cent. in 1911, compared with 3.16 per cent. in 1910 and the net earnings compared with share-capital amounted to 7.70 per cent. in 1911, compared with 7.78 per cent. in 1910. During the year ended June 30, 1911, there were carried by the railway companies 37,097,-718 passengers and 79,884,282 tons of freight, showing an increase over the previous period of 1,203,143 passengers and 5,401,416 tons of freight. During the year ended June 30, the operation of railways in Canada resulted in the killing of 495 persons and the injuring of 3,329, showing a decrease of 120 in the number killed and an increase of 1,190 in the number of persons injured, compared with the previous year. One passenger in every 1,-324,919 was killed and one in every 124,489 was injured, while in 1910 one passenger in every 598,243 was killed and one in every 132,943 was injured. There were 202 employees killed and 1,314 injured in 1910-11, compared with 214 killed and 926 injured in the previous year. The principal causes of accidents to employees were: falling from trains and cars, by which 26 were killed and 253 injured; coupling and uncoupling cars, which caused the death of 13 and injury to 191 persons; jumping on and off cars and engines, by which 15 were killed and 141 injured. In collisions 34 were killed and 119 injured. The number of persons employed in the railway service up to June 30, 1911, was 141,224, an increase of 17,456 over the corresponding period of 1910.

Miscellaneous Work of the Department of Trade and Commerce.

Report of the Department of Trade and Commerce for the fiscal year ended March 31, 1911. Part IV; Miscellaneous Information. Ottawa: King's Printer, 1912. Pages, 112.

Part 4, of the Department of Trade and Commerce for the fiscal year end-

ed March 31, 1911, shows information on the following subjects: (1) Annuities, (2) Bounties; (3) Chinese Immigration; (4) Lumber and Staple Products; (5) Revenue and Expenditure of Department of Trade and Commerce; (6) Statistical Record of the Progress of Canada; (7) Tonnage Tables; and (8) Trade Commissioner Service.

The portion dealing with government annuities shows that on March 31, 1911, there were 1,709 contracts in force, representing a total amount of annuities issued of \$343,112.18, while the total value of annuities purchased was \$865,427.08. An account is given of the various forms of annuities' contracts issued with tables showing the cost of annuities at different ages and plans.

The statements with regard to bounties show that the total of \$1,597,-663.48 was paid during the last fiscal year. Of this amount \$1,138,748.43 was paid on pig-iron, steel, and wire rods; \$248,534.48 was paid on lead, \$49,784.29 on Manilla fibre, and \$160,-596.28 on crude petroleum.

The returns on Chinese immigration show that 805 Chinese were exempted from taxation on arrival in Canada, and 4,515 paying the tax. The total revenue for the year from this source amounted to \$2,262,056. In the previous year there were 688 Chinese exempted from the tax and 1,614 paid the tax on entry into Canada. Since 1886 53,787 Chinese have entered Canada by paying the tax and 4,049 have entered exempt. 45,262 were registered for leave.

The statistical record of the progress of Canada contains statistics from 1868 to 1911 relating to the estimated population of the country, currency and banking, commercial failures, receipts from taxes, expenditure on account of consolidated fund, insurance, loan companies and building societies, mineral production, post office statistics, railways and canals, shipping, imports and exports by countries and by commodities.

QUEBEC REPORT.

Industrial Conditions in Quebec.

General Report of the Minister of Public Works and Labour of the Province of Quebec for the year ending 30th June, 1911. Quebec: King's Printer, 1911. Pages, 154.

The Report of the Minister of Public Works and Labour of the Province of Quebec contains chapters relating to trade disputes and to the inspection of industrial establishments. The Registrar of Councils of Conciliation and Arbitration, in his report states that trade disputes between employers and employees have not been numerous, and that there are signs of a return to better feeling between masters and workmen. An account is given of the settlement of a strike of employees of the Canadian Car and Foundry Company of Montreal, which was effected through the friendly mediation of the Registrar after it had lasted for eight days in June, 1911. The findings are given of a commission instituted to enquire into certain differences between employers and employees in the boot and shoe factories in Quebec. This commission was composed of Messrs. Felix Marois, Registrar of Councils of Conciliation and of Arbitration, representing the employers, J. A. Langlois, M.P.R., representing the workmen, and Dr. G. W. Jolicoeur, chairman. All the matters in dispute were satisfactorily adjusted by the commission.

In the Report of the Chief Inspector of Industrial Establishments reference is made to a number of new measures recently adopted in the Province of Quebec and reforms that have been promised with regard to labour legislation. These include the reduction in the number of hours for women and children in cotton factories to 58 hours per week: special regulations for the comfort and health of foundry hands: inspection of cotton factories by inspectors: drafting of new regulations concerning Chinese laundries: enforcement of the law limiting the age of children employed as performers in theatres to fifteen years: and the estab-

lishment of free labour exchanges Quebec and Montreal. With regard to factory accidents it is stated that in spite of an increase in the number of new industries, there has been a marked decrease in the number of accidents which is attributed to improved machinery, and to more stringent regulations of insurance companies.

During the year there were reported 547 slight accidents, 122 serious ones and 19 fatal accidents. A brief reference is made to occupational diseases and a recommendation is made for the enactment of a law obliging doctors to report to the Inspectors all cases of occupational diseases they may be aware of. It is pointed out that the following dangerous trades exist in the Province: The manufacturing of hats, mirrors, thermometers and explosive which are liable to cause poisoning by quicksilver; the manufacturing of paints, wall paper, oil cloth, etc., causing arsenic poisoning; the manufacturing of matches producing phosphorus poisoning; wool sorting and hair and leather industries, the workers of which are liable to anthrax or carbuncle; and working in compressed air caissons causing syncope and paralysis.

BRITISH COLUMBIA REPORT.

Royal Commission on Taxation.

Synopsis of report of the Royal Commission on Taxation, 1911. King's Printer: Victoria, B.C., 1911.

A report has been issued by the Royal Commission on Taxation of British Columbia, appointed by an order in-council on September 14, 1911, for the purpose of making an enquiry into the operation of the "Assessment Act." The report deals with the following methods of taxation, which are in force in the province, the revenue tax, the personal-property tax, the income tax, wild-land, timber-land, and coal-land tax, real-property tax, mineral-tax, probate fees, and succession duty. The commission commended the abolition of poll tax, personal-property tax, and the tax on improve-

ents. With regard to income tax, they make the following recommendations:—

1. The raising of exemption from \$1,000 to \$1,500.
2. The withdrawal of any exemption from incomes above \$11,500 and under \$50,000.
3. The withdrawal of any exemption from incomes above \$50,000 with the addition of a super-tax of 5 per cent. for that part of the income which exceeds \$50,000.
4. An exemption of \$200 for each legitimate child under eighteen for certain classes of income.
5. An exemption of an additional \$1,500 for farmers.
6. An average system for assessing incomes from trades.

With regard to real-property tax, besides the abolition of taxation on improvements the commissioners recommend a periodical re-assessment of property according to actual value as defined. Legislation enforcing registration of real estate on affidavits setting forth the true consideration for purchase; and that a registration fee of 1/5 of 1 per cent. on the value of real estate up to \$5,000 should be extended to all real estate irrespective of value. With respect to the coal and tax, it is recommended that the tax on coke should be reduced from 5 cents to 10 cents per ton. With respect to succession duty, the commissioners suggested the raising of the duty for all the degrees of relationship in the case of estates over \$400,000 and in the two more distant degrees of relationship in the case of estates over \$100,000 and \$200,000. In addition to the present taxation of banks, it was recommended that the tax of 1/15 of 1 per cent. be imposed on business one, including in this term both loans and deposits.

BRITISH REPORTS.

Trade Unions.

Reports of the Chief Registrar of Friendly Societies for the year ending December 31, 1910. Part I. London; Wyman and Sons, Limited, 1912. Price, 6d.

The report of the Chief Registrar of Friendly Societies on Trade Unions contains returns of trade unions regis-

tered under the Trade Union Acts who are required to furnish annual statements showing their assets and liabilities at the 31st December of each year, and the receipts and expenditure during the year preceding that date. At the close of the year, 1910 there were on the register 669 trade unions of which 638 furnished returns. The total membership for Great Britain and Ireland for these unions was 2,017,656, compared with 1,957,904 in 1909; their total income was £3,187,415 as against £3,042,421 in the previous year. Their total expenditure was £3,137,085 as against £3,158,698 in 1910; and the balance of the funds amounted to £5,925,358 in 1910, compared with £5,886,272 in 1909. During the year 28 trade unions were registered and 25 were dissolved or gave notice of termination during the year.

UNITED STATES REPORTS.

Industrial Opportunities in Illinois.

State of Illinois Bulletin—Industrial Opportunities—Part 2, of the Sixteenth Biennial Report, Bureau of Labour Statistics for 1910. Springfield, Ill. State Printers, 1911. Pages, 171.

The bulletin issued by the Bureau of Labour Statistics of Illinois with regard to industrial opportunities contains the result of an investigation conducted in 1910 and shows with reference to municipalities with a population of 1,000 and more the manufactures established, cities and towns desiring additional industries, inducements offered, facilities and advantages of locations. For the purposes of inquiry schedules were sent to the chief officers of 316 cities to be filled in with respect to the following subjects: Name and location of city and tax rate; number of railroads, and number of trains daily; available land for additional manufactures; inducements to secure factories; cost of coal per ton; agricultural or mineral products that would supply material for manufacturing; estimated number of men or women who could be secured for employment; number of newspapers,

schools, churches and manufacturing industries. Replies were received from 187 cities and the results of the inquiries are shown in eleven tables.

Industrial Conditions in South Carolina.

Third annual report of the Commissioner of Agriculture, Commerce and Industries of the State of South Carolina, 1911. Labour Division. Columbia, S.C. State Printers, 1912.

In the report of the Labour Division of the Commissioner of Agriculture, Commerce and Industries of South Carolina for 1911, mention is made of the number of recent acts respecting labour passed in that State. These include a Child Labour Law forbidding the working of children under twelve years of age in any textile factory, so removing exemptions formerly allowed for children of widowed mothers, totally disabled parents and orphan children. The Act came into force on January 1, 1912. A new act was passed relating to hours of labour for women in mercantile establishments. The new law which came into force at the beginning of the present year caused 410 children who were under twelve years of age to leave the employment in the factories in which they were engaged. Statistics for the year 1911 show that there were 1,370 fewer children of all ages in the textile factories than in the previous year. Statistical tables are given in the report relating to cotton mills and other textile industries; permits issued to school children to work during the summer months, cotton-seed oil mills; and statistics of other industries arranged by counties.

Industrial Conditions in Pennsylvania

Annual report of the Secretary of Internal Affairs. Part III. Industrial Statistics, 1910.

The thirty-eighth annual report of the Bureau of Industrial Statistics of Pennsylvania is divided into three parts containing information relating to a large variety of subjects. Part I. contains recommendations, special ar-

ticles and general statistics. Part II. contains sketches of special investigations concerning industrial and sociological conditions of the counties of the State. Part III., contains statistics of mining and manufacturing in the State. A special article in the volume deals with industrial accidents, population, the Negro in Pennsylvania, farm statistics and financial statistics.

FRANCE.

"La Lutte Contre Le Sweating System," by Paul Boyaval.

This is the title of a book recently published by Félix Alcan, Paris, France, discussing the origin and development of the sweating system, its causes and effects, and the remedies which have been adopted in different countries, particularly England and Australasia. In dealing with the question the author refers to numerous historical and legislative documents and to reports of investigations and experiments in various parts of the world. The sweating system is clearly explained and the root of the evil is shown to be insufficient wages, the source of all sorts of sufferings. To alleviate these sufferings it is first of all necessary, the author claims, to assure to the workers at least a living wage. Due credit is given to the charitable efforts of private initiative, but the authors point out that if the disastrous effects of famine wages are to be successfully combatted, the intervention of the law is absolutely necessary. In this connection he recommends that mixed committees of employers and employees should be established for the purpose of determining the minimum wages to be fixed by law.

The preface is written by Count Albert de Mun, of the French Academy. The principles advocated in the book, he states, are those which prompted him to introduce the bill which he has presented to the Chamber of Deputies as the best means of solving the problem.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

NEW BRUNSWICK CASES.

Enforcement of Labor Liens Against Company in Liquidation.

CLAIMANTS asserted liens under the Woodmen's Lien Act (C.S. N.B. 1903, ch. 148), for labour and services

in connection with logs or timber of the Nepisquit Lumber Company. The company was in liquidation, an order for its winding-up under R.S.C. 1906, ch. 144, having been made by a Judge of the Supreme Court on February 4th, 1911. On February 22nd, 1911, on the application of claimants, an order was made by the same Judge granting them leave to file with the Clerk of the County Court their liens as provided by the

Woodmen's Lien Act. Subsequently a petition was presented by the claimants for an order to enforce their liens, and a counter petition was presented by the liquidators of the defendant company for a declaration that such liens were invalid, and for an order to set aside the order granting claimants leave to file their liens.

Judge McLeod, who heard the petition, held, that under sections 23 and 84 of the Winnipeg Act (R.S.C. 1906, ch. 144), such liens could not be enforced against the property of the company after the winding-up order was made; and that the order granting leave to claimants to file liens should be rescinded and such liens vacated and set aside.

In *re Herman Good et al*, and *The Nepisiquit Lumber Co., Ltd.*, 10 E. L. R. 252.

ONTARIO CASES.

Appeal by the plaintiff to the Divisional Court from the judgment of the Local Judge at North Bay, in an action to enforce three mechanics' liens.

The defendant Rothschild, a merchant, was the owner of certain land in Cochrane; the defendant, Eloy, contracted to build upon this land a store in which to carry on the defendant Rothschild's business. The plaintiff was a merchant who supplied certain goods for this building.

The plaintiff filed three mechanics' liens, and proceeded for their enforcement before the Local Judge at North Bay, who gave judgment in favour of the plaintiff as against the defendant Eloy, in regard to the amounts of the three liens; but, as against the defendant Rothschild, the Judge held that the plaintiff was entitled to the amount of the third lien only.

The building contract, dated the 29th August, 1910, provided for the pay-

ment of \$6,700 in instalments to the contractor after the rate of 80 per cent. of the value of work and material every fourteen days as the work proceeded; also, that time should be of the essence of the contract; and that the whole of the premises should be erected and completed internally so as to be in a fit and proper condition for commercial occupation and use within six weeks of the date of the contract, under a penalty of \$20 per day for every day the owner should be denied the full and proper use of the premises. The contractor specially agreed to pay the owner the said sum of \$20 per day for every day the owner should be denied full possession of the premises, either directly from party to party, or as an allowance from any sum due or to become due to the contractor. The building was not completed within the time agreed, and was never completed by the contractor. The contract-price had not been paid in full for the work done by the contractor.

It was held by the Divisional Court in this action by the material-man to enforce liens against the land, that, by reason of the penalty mentioned in the contract and the breach of the agreement on the part of the contractor, there was no sum "justly owing" or "payable" within the meaning of the Mechanics' and Wage-Earners' Lien Act, by the defendant the owner to the contractor, and the plaintiff was cut off from any relief under the Act. (*Farrell vs. Gallagher* (1911), 23 O.L.R. 130, approved and followed.)

The Divisional Court also held that, notwithstanding the use of the word "penalty" the sum of \$20 a day was really liquidated damages. The authorities are reviewed in the judgment of the court, *Clydebank Engineering and Shipbuilding Co. vs. Don José Ramos Yzquierdo y Castaneda*, (1905) A. C. 6, being specially referred to. The judgment of the Local Judge at North Bay was affirmed.

McManus v. Rothschild, 25 O. L. R. 138.

Accident Insurance—Temporary Total Disability.

In an action upon an accident policy issued by the defendants to the plaintiff, the assured, by the terms of which, in the case of temporary total disability, he was entitled to \$25 a week for the period of disability, it was found that the plaintiff had suffered injuries resulting in a temporary total disability, within the meaning of the policy.

The policy further provided that, if the injuries were sustained while the plaintiff was a "passenger" which meant, as defined by the policy, "while riding as a passenger in or upon a public conveyance provided by a common carrier for passenger service," he should be entitled to \$50 per week.

The plaintiff's injuries were sustained in this way. He was a passenger on an open street car; he got off upon the highway when he arrived at his destination, but, before he reached the sidewalk, was confronted by danger from a passing automobile; in order to escape from that danger, he endeavoured to get on the street car again, and in doing so struck some part of the street car and was thrown down and so injured.

The action was tried by Chief Justice Meredith, who held that the plaintiff, when injured, was still a "passenger" within the meaning of the policy: either as not having completely or safely alighted and so being still in the act of alighting; or as being in the act of getting on the car to be carried to a place where he might alight with safety; and, therefore, he was entitled to the double indemnity.

Wallace vs. Employers' Liability Assurance Corporation, 25 O. L. R. 80.

ALBERTA CASES.

Work and Labour—Collateral Verbal Agreement.

In an action for the price of work and labour done by the plaintiff for the

defendants under a written contract, and which was tried by Mr. Justice Beck, it was held upon the evidence, that the work for the price of which the plaintiffs sued was completed before the commencement of the action.

The Judge also held, that the onus was on the defendants to prove their plea that the written memorandum of contract was signed on the condition that the plaintiffs should not be entitled to payment until certain village debentures were sold; and that the defendants had not satisfied the onus.

But, if the defendants had conveyed to the minds of the plaintiffs their (the defendants) intention not to make payment until the debentures were sold, a mere unenforceable understanding and not an effective agreement, would have resulted—an expectation, based upon representations of circumstances, that, though payment might be legally enforced upon performance, it would not then in fact be demanded. (*Cuddihy vs. Costigan*, Newfoundland Reports (1897-1903), p. 567, considered).

Pertini & Company v. Peacock, 19 W. L. R., 910.

Mechanics' Liens—Action to Enforce Lien.

An action to enforce a mechanics' lien. The words of sec. 17 of the Mechanics' Lien Act, "No assignment by the contractor . . . of any moneys due in respect of the contract shall be valid as against any lien given by this Act", were held not to operate so as to prevent payments made by the owner to creditors of the contractor, under an arrangement between the owner and the contractor, from being effective as payments on account of the contract-price, in the ascertainment of the amount due from the owner to the contractor, upon which alone the lien of material-men attaches under sec. 32 of the Act, as amended by sec. 12 of the Statute Law Amendment Act, 1908.

If the arrangement had been one for payment in the future; but, once the

arrangement was acted upon and payments were made in pursuance of it, the assignment (if the arrangement amounted to an assignment) ceased to be of importance, and the payments must be regarded as payments to the contractor—no notice in writing having been given by the plaintiffs—and the owner was protected to the amount of these payments. *False Creek Lumber Co. vs. Sloan*, 17 W.L.R., 525, applied and followed). The costs of the plaintiffs were equitably adjusted, in view of all the circumstances, including the circumstance that the plaintiffs might have proceeded by way of originating summons, instead of by action.

Pioneer Lumber Co. v. Rooney, 19 W. L. R., 913.

Building Contract—Completion or Non-Completion.

In an action by a contractor against building owners to recover a balance alleged to be due for work done under a building contract and for extras, and upon a counterclaim by the defendants for damage done to their goods by the plaintiff, and for delay.

Mr. Justice Beck, who tried the action, held, that the question of completion or non-completion, in any particular case, must depend upon the terms of the contract and the facts and circumstances of the particular case; and, where there is honesty and a *bona fide* intention to complete, there is completion if the contract is completed in all essential and material respects, and there exist only slight imperfections in the work or slight deviations from the specifications, which can be easily cured and corrected at an expense trifling as compared with the amount of the contract-price; and in this case, there

was completion in that sense—the contract-price being about \$20,000, the plaintiff having deposited with the defendants the sum of \$1,000 by way of security, designed to cover trifling imperfections, and the owner being entitled to retain 20 per cent. of the contract-price until completion.

He also held, that, if there was non-completion, the architect having, under the authority of a clause in the agreement, elected to give a notice to the plaintiff calling his attention to certain parts of the work remaining incomplete, requiring him to complete them within three days, and stating that, failing compliance, the contract would be cancelled and the work completed by the architect, had, by taking advantage, on behalf of the defendants, of the benefits of this clause, conferred upon the plaintiff the corresponding benefits, viz., that the work must be paid for by the defendants with a deduction of the cost of such labour and materials as was incurred in completing the contract; and, an election having once been made, neither the owners nor the architect could withdraw.

The only reference to a written certificate of the architect was in a clause of the contract relating to payments, in these words: "The remaining 20 per cent. on the contract-price to be paid 33 days after the works are entirely completed to the satisfaction of the architect and accepted by him, provided that, in each case where payment is demanded, a certificate shall be obtained from and signed by the architect in charge to the effect that he considers the payments properly due."

Apparently under this, a written certificate was not a condition precedent

to recovery by the contractor; and, if a certificate was required, the architect could be forced, by mandamus or otherwise, to execute one.

But the question of the necessity for a final certificate did not really arise, because the defendants took over the completion of the contract, and were liable to pay the contract-price with the proper deduction. Even where the contract provides that a final certificate shall be a condition precedent to recovery by the contractor, the condition becomes ineffective where the employer interferes with the architect, either before or in the giving of the certificate.

Mr. Justice Beck also held, upon the evidence:

(1) That the architect would, if he had been left to exercise his own independent judgment, have certified to the final completion of the building, with a deduction for defects or imperfections to the amount of 150, and that he refrained from doing so, and refused to do so, because he was instructed by the defendants and their solicitors not to do so, and thus, if a certificate was necessary, it was dispensed with.

(2) That the architect did eventually give an effective certificate.

(3) That the plaintiff was entitled to recover the balance of the contract-price, with a small deduction for imperfections or defects in the work; and was also entitled, upon the evidence, to recover for certain extras both within and without the contract.

Upon the counter-claim he held, that the defendants were entitled to \$300 for damage to goods by rain, through the negligence of the plaintiff; but were not entitled to any further damages for loss of or injury to goods.

The contract provided for the payment by the plaintiff of \$20 a day for each day's delay after the time fixed for completion, "the said amount to be deducted from the amount of consideration for this contract as for liquidated damages, and not by way of penalty. . . . provided, however, that, should the contractor be delayed by strikes of any trade, or from any other cause which he cannot reasonably be expected to control, then the architect shall give the contractor such extension of time as, in his (the architect's) opinion, is fair and just":—

It was a question whether these sums of \$20 a day could be recovered in the action, or whether the only remedy was to deduct them from the amounts owing by the owners to the contractor upon the final ascertainment. But it was held, that, in any event, the architect, by his absolute refusal to deal with the question of damages, which necessarily involved the question of allowances for delays, abdicated his quasi-judicial office; and, therefore, the ascertainment of the amount of the damages—involving the allowance for delays—was for the Court.

It was also held, that, once the owner has seen fit to take possession of a building, although this may have no bearing on the question of completion or non-completion, it prevents the owner from claiming so-called liquidated damages for non-completion; and, upon the evidence, having regard to the time or times when possession was taken, the days of delay should be fixed at 26 and allowed for at \$20 a day.

BRITISH COLUMBIA CASES.

Master and Servant—Workmen's Compensation Act, 1902.

The claimant had been for about six months an apprentice machinist in the employ of the respondents, at a wage allowance of \$4.50 per week, when, on the 19th July, 1911, he was set to work by the respondents chipping a casting with a cold-chisel and hammer; a piece of metal from the chisel or casting flew into his eye and damaged it so that the eye had to be removed.

It was held as follows by the Junior Judge of the County Court of Vancouver, who, by the order of Mr. Justice Morrison, was appointed arbitrator to settle all questions in dispute between the claimant and the company respondents, pursuant to the Workmen's Compensation Act, 1902:

(1) That the injury was by an accident arising out of and in the course of the claimant's employment, within the meaning of sub-sec. (1) of sec. 2 of the Act, and that the respondents were liable to pay compensation in accordance with the first schedule to the Act. (*Neville vs. Kelly Brothers and*

Mitchell Limited, 13 B.C.R. 125, 5 W. L. R. 427, followed).

(2) That upon the evidence, the claimant was, by the accident, totally incapacitated for work for a period of ten weeks, and should be allowed as compensation 50 per cent. of his weekly wage after the second week.

(3) That the claimant, by reason of the accident, had been permanently partially incapacitated, and his chances of obtaining employment had been materially reduced; and he was in fact unable, by reason of the loss of his eye, to obtain employment for six weeks after he had sufficiently recovered to resume work, and was entitled to compensation therefor at the same rate. (*Cardiff Corporation vs. Hall*, 80 L. J. Q. B. 653, and *Clark vs. Gas Light and Coke Co.*, 21 Times L. R. 184, specially referred to).

(4) That the claimant was entitled to a "suspensory order" for the payment of 25 cents a week until increased, diminished, or ended, under Rule 9, schedule 1, of the Act; provided that such compensation should not continue after the full sum of \$1,500 had been paid.

Re Milholm and Conaty Stack & Co., Limited, 19 W. L. R., 860.

THE LABOUR GAZETTE

APRIL, 1912.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF
MARCH, 1912.

1.—GENERAL SUMMARY.

COLD weather continued up to the opening days of April and had considerable effect upon conditions of employment. Nearly all parts of the country were affected by these conditions, but, generally speaking, the various industries were more active than during March, 1911. Agriculturists were able to do little besides marketing produce; the supply of experienced farm help for the summer season appears to be generally scarce. Mining operations were adversely influenced by the severe weather; a considerable amount of development work was, however, done. An increase in the output of the coal mines in Nova Scotia is recorded. Inactivity continued in the outdoor building trades, and little was done except in the way of preparation work. Lumbering operations were carried on briskly during the month and a good supply of logs were brought to the streams. Manufacturing establishments were running at full capacity generally in all parts of the country; in a few instances, however, a shortage of coal hindered operations slightly and reduced the output. The railway construction camps are beginning to show signs of activity, though little actual construction work has been done. Men are being apportioned to the various camps and will commence work as soon as the milder weather permits. Railway traffic continued heavy with little interruption, but navigation will be late in opening on account of the unusually late

spring. There was no pronounced demand for unskilled labour.

The Department's index number of wholesale prices, which as it covers over 250 articles selected as representative of production and consumption is designed to reflect general industrial and trade activity as well as cost of living, stood at 134.2 in March as compared with 134.3 in the preceding month, and 126.3 in March a year ago, being on or about the highest point in the records of the Department back to 1890.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during March, 1912:

Building trades. — Painters, decorators and paper hangers (611) at Hamilton received an increase of 2½ cents per hour.

Metal trades. — Cotton mill operatives (6,300) in the employ of the Dominion Textile Company at Halifax, N.S., Moncton, N.B., Magog, Montmorency and Montreal, Que., received a general increase of 5 per cent., and a reduction in working hours from 60 to 58 per week.

Clothing trades. — Journeymen tailors in St. Thomas, Ont., were granted an advance of about 5 per cent.

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

Railway service.—Telegraphers (778) on the Grand Trunk Railway System received an advance for necessary overtime work on Sundays; Street Railway employees at St. Thomas were granted an increase of 1 cent per hour; Street Railway employees (400) at Winnipeg were given an increase of 1 cent per hour.

Miscellaneous trades.—Broom and whisk makers (16) at Hamilton were given an increase amounting to about \$2.00 per week.

Civic employees.—Civic labourers (20) at St. John's, Que., were given an increase of 25 cents per day; Municipal employees (12) at Niagara Falls were given increases amounting to \$24—\$200 per annum; street labourers of the same city received an increase of 25 cents per day; City police of Hamilton had their salaries increased by sums ranging from \$50 to \$150; City policemen in Guelph received a similar increase; policemen (8) in St. Thomas, Ont., were given increases ranging from \$60 to \$100 per annum; City firemen (3) in the same city received increases ranging from \$80 to \$160 a year; policemen (4) at Chatham, Ont., were given increases of \$5.00 per month; call firemen (10) in the same city were granted an increase of \$30-\$35 a year; civic employees (7) at Lethbridge, Alta., received increases ranging from \$50 to \$300 annually.

Unskilled labour.—Labourers (300) in Toronto, Ont., received an increase of 25 cents per day.

Interruptions to Industry.

Few disturbances of industrial conditions through strikes occurred during March according to the latest reports received in the Department of Labour. The only strike which took place during the month affecting more than two hundred employees was that of tailors at Toronto. Altogether there were fourteen strikes in existence in Canada during March affecting in all about two thousand employees. The loss of time in

working days was approximately 44,800 days, compared with 10,000 days lost from the same cause during February. Ten strikes remained in existence at the end of the month.

Among industrial establishments, etc., destroyed by fire or through other causes during March, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Store at Sydney, loss \$3,500; evaporating plant at Windsor, loss \$15,000.

New Brunswick.—Hotel (*Fraser's*) at Plaster Rock, loss \$6,000; Kent hotel and stores, loss \$5,000; business block at St. John, loss \$50,000.

Quebec.—Sawmill at Calumet Island, loss \$2,000; tallow factory at Cote St. Michael, loss \$75,000; Grand Trunk railway station at Hillcrest; *Clarendon* hotel at Quebec; 2 stores at Quebec, loss \$5,000; 3 stores at St. Hyacinthe, loss \$18,000; comb and novelty factory at Warwick, loss \$25,000.

Ontario.—Manual training school building at Brant, loss \$3,500; stationary and jewelry stores at Bracebridge, loss \$30,000; barn and contents near Brockville; Methodist church at Frome; *City* Hotel at Guelph, loss \$50,000; post office and telephone exchange at Hickson, loss \$10,000; interior of a Methodist church at Hamilton, loss \$6,000; *Cecil* Hotel, loss \$2,000; *Royal* Hotel at Lucknow, loss \$10,000; knitting factory at Lindsay; machine shop at Madoc, loss \$2,000; business block at Niagara Falls, loss \$35,000; planing mill at Orillia, loss \$75,000; car barns and workshops at Oshawa, loss \$20,000; crockery establishment at Ottawa, loss \$2,000; basket factory at Ridgetown, loss \$2,000; court-house at Sarnia, loss \$50,000; barn and contents at Smith; business block at St. Marys, loss \$20,000; electrical supply store at St. Catharines; carpet factory at Toronto, loss \$6,000; fur store at Toronto, loss \$10,000; shoe store at Toronto, loss \$5,000; business block, including car barns containing 230 electric street cars, loss \$1,000,000; grist mill at Woodville, loss \$8,000; business block at Wingham, loss \$75,000; grocery store and neighboring houses at Eastview, loss \$3,500.

Manitoba.—Two apartment houses and store at Belmont, loss \$8,000; business block at Elkhorn, loss \$50,000; business block at Morden, loss \$5,000; barn and contents at Rosendale; at Winnipeg the following occurred: sash and door factory burned, followed by an explosion by which six persons were killed, loss \$75,000; piano factory and other stores, loss \$60,000.

Saskatchewan.—Land office at Cupar, loss \$10,000; livery stable at Fleming, loss \$5,000; garage at Moosejaw, loss \$10,000; barracks of the Royal Northwest Mounted Police at Regina, loss \$25,000; elevator at Weyburn, loss \$70,000.

Alberta.—Business section at Acme, loss \$200,000; business block, including *Cosmopolitan* Hotel at Blairmore, loss \$50,000; business block at Calgary loss \$8,000; elevator and flour mill at Grassy Lake loss \$18,000.

British Columbia.—Business block at Ladysmith loss \$75,000; sawmill at Nelson, loss \$50,000; also warehouse, loss \$15,000; *Great Northern* hotel at Princeton, loss \$17,000; general store at Penticton loss \$12,000.

Conditions in the Industries and Trades.

Conditions of employment during March in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

Farmers had a quiet month, little being done besides looking after stock and marketing produce. Farm products maintained good prices, an increase being reported for butter and eggs in some localities, the general tread of these commodities, however, being lower than that of last month. Operations in the maple sugar and syrup industry were hampered by the lateness of the winter season. Considerable difficulty is being experienced in the East in getting sufficient experienced farm help, numbers having gone west.

A meeting of the New Brunswick Farmers' and Dairymen's Association was held at Fredericton, March 18-21. The president, Col. Montgomery Campbell testified to the great interest being taken in agricultural matters and referring to the advance made in horticultural matters throughout the Province recommended that still more attention be paid to this profitable branch of the industry. Mr. C. H. Vroom, president of the Fruit-Growers' Association, spoke of the progress made in fruit-growing in the Province where 40,000 apple trees had been planted last year. An interesting review of the history of the canning industry was given by Mr. C. S. McGilvray, the Dominion Inspector of canned goods, who explained the possibilities of the business, stating that canned fruits and vegetables to the value of more than \$1,500,000 had been imported into Canada in ten months. Speaking of potato culture, the Secretary for Agriculture said that no part of the Dominion, as regarded soil

and climate, was better suited for this industry than New Brunswick. Last year the Province produced more than three million barrels and there was likely to be a good market for this commodity if the same high standard of quality was maintained.

Final estimates of the production of wheat in 1911 have been received from all the important countries. The total production in the Northern Hemisphere is 3,154,360,000 bushels against 3,185,565,000 in 1910, a decrease of 31,205,000 bushel. The exceptional decrease of 266,000,000 bushels in Russia was almost balanced by large increases in Canada and in most of the countries of Europe. The total for the Southern Hemisphere (preliminary estimate) is 290,988,000 compared with 275,810,000 in 1910. This makes the world' total, 3,445,348,000 bushels as against 3,461,375,000 produced by the same countries in 1910. Adding the production of a number of smaller countries as given by Dornbusch we have 3,568,148,000 bushels for 1911 against 3,575,375 for 1910. The world's total for 1911 according to Broomhall is 3,451,992,000 bushels, according to Beerbohm, 3,456,000,000. The total production of rye in the Northern Hemisphere was 1,574,633,000 bushels against 1,660,469,000 in 1910, barley 1,377,746,000 against 1,377,388,000; oats 3,655,650,000 against 4,003,261,000; corn 3,181,133,000 against 3,550,786,000. The production of oats in Argentina is estimated at 57,255,000 bushels against 34,337,000 in the previous year; New Zealand 17,597,000 against 11,578,000. The Argentina corn crop is 275,577,000 bushels against 27,558,000 last year when most of the area was abandoned.

Notwithstanding the increase in the home consumption, the total value of Canadian exports for 1911 of cheese, butter and milk, shows a substantial increase over the two previous years, the figures being:—

1909	\$21,996,662
1910	23,159,336
1911	23,709,014

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the of employment in the several trades and industries throughout the Dominion. The table has reference only to phenomena treated under separate headings in *The Gazette*. In tabulating the information in question, the tions were favourable or unfavourable, as follows: (1) fair, active and very active; (2) quiet and very

Fishing.

Catches in Atlantic waters have been light generally during March. The Lunenburg fleet left for the banks after having some difficulty in obtaining bait. During the first two weeks of the month about 300,000 pounds of fresh fish amounting in value to over \$2,000, arrived at Digby, Nova Scotia.

The herring fishing season in British Columbia closed on the first of March. The season's catch on the east coast of Vancouver Island amounted to about 14,000 tons, which is considered a fairly satisfactory one.

The coast whaling stations situated on the west coast of Vancouver Island and on the northern coast of British Columbia have resumed operations for the season. Several steamers have been added to the fleet and it is expected that the catch will be considerably larger than that of last year.

Lumbering.

Favourable condition for operations in the lumber industry prevailed during March. The weather remained constantly severe and good snow roads enabled a good supply of logs to be brought to the streams. In some parts the men have come in from the woods and have gone to work at the drives.

The East Canada Power & Pulp Co. Limited, reports profits from its first year of operation of \$86,382. Since organization of this company the development of hydraulic power and construction of plant has been going on, and it has been decided to increase the capacity of the mill by one-fifth to one hundred and twenty tons a day. Over 12,000 cords of pulpwood are already in store.

Total assets of the company amount to \$3,271,439, of which \$190,634 are current assets. Current liabilities amount to \$785,057. Surplus is \$86,383.

Mining.

The mining industry in the west has been quiet, home consumption being the chief market for western coal. Conditions in the east were more active and an increase in output of the Nova Scotia mines is recorded. Owing to the strike in Great Britain, vessels sailing from Canadian ports filled their bunkers for the round trip.

Fairly active conditions were maintained in the Cobalt camps. Shipments of ore since January 1st have been made to the amount of 5,103 tons.

The Mines Report for Nova Scotia recently tabled in the Provincial House gives the following comparative figures in regard to the mineral output for 1910 and 1911:—

	1910	1911
Coal raised (gross tons).....	5,477,146	6,280,444
*Iron ore (net tons).....	52,640	53,591
Pig iron made (net tons).....	431,674	397,611
Steel ingots made (net tons)....	409,663	438,922
Limestone quarried (net tons)...	483,100	525,281
Coke made (net tons).....	493,167	545,611
Gypsum, quarried (gross tons)....	322,974	297,641
Building stone quarried (net tons)	8,503	11,121
Bricks made.....	21,305,500	23,273,701
Drain pipe and tile made (feet)...	974,819	1,431,761
Grindstone, quarried (net tons)...	325	38
Gold bearing ore mined (net tons)	49,557	18,321
Gold produced (ounces).....	10,675	8,338
Manganese ore (net tons).....	25	15
Antimony concentrate (net tons)..	203	19
Moulding sand (net tons).....	180	38
Tungsten ore (net tons).....	75	7
Sulphate of Ammonia.....	3,622	3,971

*Iron ore imported, 1909 and 1910, 705,351
1910-11, 853,904 net tons.

In an advanced statement of the mineral production of the Province of Quebec, during the year ending December 31st, 1911, the total value of the products of the mines and quarries reached the figure of \$8,567,143, during the year ending December 31st, 1911. This is an increase of \$1,243,862, as compared with the previous year. The report states that despite the unfavourable conditions under which the asbestos industry laboured during the year 1911, the shipments of this substance, from the producers to the consumers, show a substantial increase as compared with the previous year 1910. The average value per ton has somewhat decreased, from \$33.09 in 1910, to \$29.58 in 1911. This is due in a great measure to the over-production of the previous year which glutted the market and caused a consequent fall in prices. On the whole, from the commercial and technical standpoints, the asbestos situation is satisfactory.

The total value of the mineral production in Ontario for 1911 was \$41,432,898, an increase of \$2,119,003, or 5.38 per cent., as compared with 1910, when the output had a value of \$39,313,895, or an advance of 25.62 per cent. over the production of 1909, which was \$32,981,375. There are seven mineral products that each had a value of one million dollars or over during 1911. Of these which show an increase in value of output over that of 1910 are silver, pig-iron, common brick, Portland cement and natural gas. Nickel and copper show a decrease.

Manufacturing.

Active conditions were maintained generally throughout the country in the various industrial establishments and reports from nearly all parts show the factories to have been running at full capacity. Especially active were the boot and shoe industries. Orders have already been received in several factories for such a large quantity of goods that a busy time is ensured for at least two or three months. Skilled

operatives have been in steady demand, though in some cases a shortage of coal has decreased the output of factories and lessened the demand for labour.

The net earnings of the Canadian Westinghouse Company for the year ended December 31, 1911, were \$1,010,153, an increase of \$312,759, or approximately 45 per cent. over the preceding year, which had been the largest up to that time. Dividends at the rate of 8 per cent. per annum were paid during the year amounting to \$350,128. The sum of \$100,000 was charged off for general depreciation of property and plant, \$50,000 reserved for inventory investment, \$50,000 for insurance funds, while \$135,794 was written off for property and plant, making a total of \$335,794 charged out of earnings for these purposes, as compared with \$200,522 in 1910. After all these charges the balance, \$674,359, is equal to 15.47 per cent. on the stocks. Earnings for the past seven years compare as follows:—

	Net earnings.	Dividends.		Surplus.
1911 . . .	\$1,010,153	\$350,128	8%	\$324,231
1910 . . .	697,394	306,662	7%	190,509
1909 . . .	498,379	261,540	6%	104,379
1908 . . .	220,377	249,937	6%	40,440
1907 . . .	427,053	215,221	6%	111,832
1906 . . .	346,961	179,550	6%	47,411
1905 . . .	220,545	149,100	6%	71,445

Railway Construction.

The protracted winter weather has interfered with operations in construction work but preparations have been carried on and it is probable that much work will be in progress shortly. A great number of contractors have not yet placed their orders for men so that it is early to say how the supply will compare with the demand.

The Grand Trunk Pacific Company's programme for 1912, will entail the expenditure of \$20,000,000. On the main line, 185 miles will be built east of Fort George, and 150 miles west of Fort George, with 500 miles of branch lines. Hotels will be erected in Edmonton and Regina containing 150 rooms each. Twenty-five general stores will

be built in various towns. The arrival of steel is needed to complete 610 miles which are as follows: Regina south 155 miles; Alberta coal branch 20 miles; Regina, Moose Jaw, 100 miles; Topfield-Calgary, 90 miles; Prince Albert, 20 miles; Battleford, 50 miles; Cut Knife, 50 miles; Biggar-Calgary, 100 miles; and Brandon, 25 miles.

The Canadian Northern Railway Company's construction program for the year 1912 includes 1053 miles. More than 10,000 men are at present engaged in the work and as the season advances this number will probably be doubled. Operations will be carried on as follows:

Montreal to Hawkesbury, 58 miles; Ottawa to Ottawa River, 32 miles; West from Ruel, Ont., 100 miles; East from Port Arthur, 108 miles; Branch lines and extensions in Alberta and Saskatchewan, 400 miles; British Columbia, 75 miles; Sydenham, O., to Ottawa, 80 miles; Relaying track on main line west, 200 miles.

At a cost of 12,000,000 the Canadian Pacific Railway Company have just let the contract for its new 185 mile line between Montreal and Toronto. Work has already started and it will take two years to complete. Branching from the present line at Glen Fay, fifteen miles west of Smith's Falls, the line will run south to touch Belleville, Trenton, Cobourg and Port Hope, re-joining the present line at Agincourt a little east of Toronto.

Legislation recently enacted in the Provincial Legislature of British Columbia provides for the closing link in the new route between the Kootenay and the coast by granting a cash bonus of \$10,000 per mile for the continuation of the Kettle River line from Coldwater Junction to Hope. This joins up with the present boundary branch of the Canadian Pacific Railway to Coldwater by the line now under construction from Midway westward and from Penticton eastward. This new route will provide a far shorter and better location than the main line, with the advantage of easier grades.

General Transport.

Winter conditions prevailed and there was no sign of the ice weakening on the St. Lawrence. Shipments have been good, however, though railway and transport workers were not as busy as they were during February. A slight congestion of freight traffic occurred due to the heavy storms hindering transportation in the United States and overtaxing the capacity of the Canadian roads. Generally speaking, the railways have been able to cope with the difficulties caused by heavy snow storms.

The gross earning for the Canadian Pacific Railway Company for the month of February, 1912, amounted to \$8,931,907.20, and the working expenses \$6,548,040.53, making the net profits for the month \$2,383,866.67, compared with net profits of \$1,082,857.70 in January. In February, 1911, the net profits were \$1,144,705.51, the gain this year for the month of February being, therefore, \$1,239,159.16.

The aggregate earnings of Canadian railways from all sources for 1911 were \$188,783,493—an increase of \$14,777,276 over 1910. This was equal to 8.7 per cent. Operating expenses amounted to \$131,033,784, which sum was \$10,628,343 larger than for 1910—or 8.8 per cent. Thus the increase in gross earnings was not quite equal to the increase in operating cost.

Gross earnings of the British Columbia Electric Company for February were \$473,036, an increase of \$124,704 over the corresponding month of 1911. Expenses also showed an increase standing at \$290,661 or \$78,422 more than a year ago. Renewals and maintenance charges were \$37,935, as against \$29,770. Additional income was \$25,000, as compared with \$20,000 leaving a surplus of \$169,440, as compared with \$126,323 for February, 1911. From July 1, gross earnings total \$3,791,677, an increase of just over one million dollars. Net for the same months increased \$242,756.

The Trades.

Building. — Protracted cold weather continued to interfere with operations in this line, particularly the outdoor side. A large percentage of skilled men have been out of employment.

Metal and woodworking trades. — Active conditions in these trades were general throughout the country. Little unemployment was recorded.

Printing and allied trades. — Increased activity was shown in the printing trades, and operatives generally were well employed.

Clothing trades. — Tailors and garment makers were fairly well employed in spite of the unrest prevailing in some districts; great activity was seen in the boot and shoe industry.

Textile trades. — Active operations continued in the cotton and woollen factories during the month.

Food and tobacco preparation. — Bakers, butchers and confectioners were steadily employed. Cigarmakers were generally active.

Leather trades. — Improved conditions existed in the leather trades, and employment was steady.

Miscellaneous trades. — Barbers and

restaurant employees were well employed; laundry workers were active.

Unskilled labour. — Less favourable conditions prevailed among unskilled labourers. In nearly all parts the supply exceeded the demand. Civic construction and repair work, however, gave employment to many.

Canadian Trade and Revenue.

Imperial and foreign trade. — During February, 1912, there was an increase of \$7,167,791 in the total value of imports entered for consumption into the Dominion of Canada over the corresponding month of 1911. During the 11 months ended February 29, 1912, there was an increase of \$51,080,857 over the corresponding period a year ago. The total value of domestic exports during February, 1912, showed an increase of \$3,775,671 over February, 1911. The total value of domestic exports during the 11 months ended February 29, 1912, showed an increase of \$11,290,789 over the corresponding period a year ago. During February there were increases in the exports of fisheries, agricultural and manufacturing products, and decreases in the exports of the products of mines, forests, animals and their produce, and miscellaneous merchandise. The accompanying table contains the latest official summary of Canadian foreign trade:—

Canadian Trade, February, 1912.

TOTAL IMPORTS ENTERED FOR CONSUMPTION IN THE DOMINION OF CANADA,

	ENTERED FOR CONSUMPTION.

Domestic trade. — Trade conditions continued fairly active during March, though the late season has hindered spring sales to a certain degree. Wholesale merchants reports collections fair and demand well maintained. Bank clearings continues to show an increase over those of the corresponding period of last year. According to R. G. Dun & Company, business failures in Canada during March numbered about 160 as compared with 129 during February.

The bank statement for February showed an increase of \$1,029,910 in paid-up capital over the previous month, the total at the end of February being \$110,448,244. Notes in circulation amounted to a value of \$73,259,141, a decrease of

\$8,206,961 from the previous month. Deposits in Canada, payable on demand, amounted to \$321,152,954, as compared with \$316,936,962 for January. Current loans in Canada amounted to \$793,853,547, an increase of \$17,881,304 over the previous month.

The following are the returns from Canadian Clearing Houses for the month of March, 1912:—

Halifax	\$ 7,148,116
St. John	5,945,964
Quebec	10,014,764
Montreal	195,780,541
Ottawa	21,991,015
Toronto	157,906,947
Hamilton	11,727,029
Brantford	2,183,901
London	6,432,750
Port William	2,080,536

Winnipeg	108,196,378
Brandon	2,076,821
Regina	8,767,403
Moose Jaw	4,216,220
Saskatoon	8,403,431
Calgary	19,450,310
Edmonton	17,550,365
Lethbridge	2,386,834
Vancouver	49,902,878
Victoria	13,246,577

The February Canadian Bank report shows that 19 new branches were opened during the month and five closed, thus making a total of 2,668 branches of the chartered banks of this country. The report shows there are now 2,596 branches in Canada divided amongst the provinces as follows:—Ontario, 1,029; Quebec, 409; Nova Scotia, 114; New Brunswick, 75; Prince Edward

Island, 14; Manitoba, 195; Alberta, 222; Saskatchewan, 321; British Columbia, 213; Yukon, 3, and N.W.T., one. The banks have also twelve branches in Newfoundland and sixty elsewhere.

Canadian Revenue. — Canadian revenue for the month of February, 1912, amounted to \$11,078,633.78, compared with \$9,491,997.97 in February, 1911. The total expenditure on capital account during February, 1912, was \$2,390,965.39, as against \$2,727,505.42 in February, 1911. The items of expenditure during February, 1912, comprised \$2,075,413.39 on public works, including Railways and Canals, and \$315,552 on railway subsidies.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST.

THE Board of Investigation under the Combines' Investigation Act, which was established to investigate the existence of an alleged combine in the manufacture and sale of boot and shoemaking machinery in Canada, has been holding sittings in Toronto for the taking of evidence during the past month. The Board had previously held sittings in Montreal and in Quebec.

New Brunswick Bureau of Labour.

The Provincial Government of New Brunswick has established a Bureau of Labour in connection with the Department of the Provincial Secretary. For some time past the Government has been considering this step. The passage of an order-in-council comes as the result of petitions and requests from the labour organizations of the Province.

In 1904 an Act was passed by the Legislative Assembly creating such a Bureau, but an order-in-council was necessary to bring the Act into force.

The duties of the new Bureau will include the collecting and publishing of information relating to labour organizations, including the number of men and women employed, hours of work, and scales of wages. All labour difficulties,

strikes, etc., as well as matters pertaining to the relations of labour and capital will come under the observation of the Bureau.

Provincial Secretary McLeod will have supervision of the new Bureau, having been appointed Commissioner of Labour while Mr. R. W. L. Tibbits, the Deputy Provincial Secretary, will be the Secretary. The work of the Bureau will be commenced immediately and will be vigorously prosecuted.

The Workmen's Store Company, Limited, Dominion, N.S.

The report and balance sheet of the Workmen's (co-operative) Store Co., Ltd., Dominion, N.S., for the second half of the year ending February 22, 1912, has been recently published. The total business for the six months amounted to \$72,463.41, an increase of \$15,149.89 over the previous term. The profits, after allowing for expenses and depreciation, amount to \$8,108.94. This is equal to 11.16 per cent. on the sales or over 35 per cent. on the capital at the credit of the members at the close of the six months. The business was conducted at a cost of less than 10 per cent.

Early Closing in Alberta.

The early closing bill, at present before the Alberta Legislature, states that the council of any city or town having a population of not less than a thousand inhabitants may fix the hours of the days of work at and after which either throughout the whole area of the city or town, or in any specified part of it, all shops are to be closed from serving customers. The act states that no closing hour shall be fixed earlier than six o'clock with the exception that on one specified week-day all shops may be closed after twelve o'clock noon. The occupiers of two trades or shops in the district to be effective must petition the municipality before "any closing by-law can be put into effect in that district." If, then, there are no special objections raised, the city or town council may proceed to pass the by-law.

Workmen's Compensation.

Following a discussion on the subject of Workmen's Compensation at a session of the Canadian Mining Institute, held on March 7, it was decided to appoint a committee of five to draft a resolution to be presented to the Government if approved by the meeting. In opening the discussion Mr. C. A. O'Connell stated that the question of compensation in mines, an industry in which the owner had no power to regulate the price paid for his output, was much different from that in other industries, where the manufacturer was able to affix the extra cost to the products **turned out in proportion** to the amount of money **paid for compensation**. He thought that if an owner was in any way held down to a certain amount there was a possibility of his making a reduction in wages to meet the fresh demands, and this might react to the disadvantage of the workmen. As a means of protecting the employer from the negligence of the men it was suggested that legislation looking to the regular inspection of the mines should be enacted. Compensation, in Mr.

O'Connell's opinion, should be given only in cases of accident, not where a disease was the cause of a man being incapacitated. In case the employer could prove gross negligence on the part of an injured workman, no compensation should be paid unless the accident had fatal results, when the victim's dependants should receive fifteen per cent. of what they or the victim would otherwise have received.

Technical Education.

The report of the Minister of Education for the Province of Ontario states that the new Act of 1911 providing machinery for the establishment of classes for industrial training has already lent stimulus to the movement for technical education. In a number of urban centres the advisory boards, whose special concern it is to institute and develop these classes, have been set up and the result thus far has been eminently encouraging. The appointment of Dr. F. W. Merchant as Director of Industrial and Technical Education will enable a thorough organization and inspection throughout the Province. During the coming year it is intended that the Director shall visit some of the chief centres of technical training in Great Britain and the Continent of Europe, with a view to applying here the latest experience abroad.

Workmen's Compensation in Nova Scotia.

A measure is now before the N. S. House of Assembly, introduced by one of the members from Cumberland, amending the Employers' Liability Act. It provides that it shall be illegal for any employer directly or indirectly to bring any workmen into Nova Scotia during a strike or lockout in the province or within twenty days previous to such strike or lockout without having given notice to such workman of the existence of such strike or lockout. The bill provides that any infraction of this provision shall make the employer liable

on conviction to a penalty equal to the expense of deporting said workman from the place where the conviction is made to the place from which he was brought. It shall be presumed by the Court act-

ing under the Summary Convictions Act, that such notice has not been given until the employer has proved to the satisfaction of the court that such notice was given to the workman.

II.—REPORTS OF LOCAL CORRESPONDENTS.

NOVA SCOTIA.

Sydney.

Industrial conditions continued active and labour generally was well employed except in the building and other allied trades. The leading industries, such as coal and steel, were active, and larger outputs were obtained than in March of 1911. The wood factories, foundries, railways and tramways, were all busy. As the policy of the operators in winter time is to keep their organizations well in hand and prepare for a more active season when navigation begins, the supply of labour was equal to the demand and prospects point to a busy season as soon as good weather sets in and the drift ice permits of shipping.

The coal industry for the first three months of the year shows an increase in output of 150,000 tons, being about equally divided between the Glace Bay and Sydney Mines districts. If the markets hold good, the increase for the year over that of 1911 will amount to 500,000 tons. Over 300,000 tons have been placed in the coal heaps and this amount will be largely increased before shipping begins.

The steel industry was active during the month and good results were obtained in the Sydney and Sydney Mines districts. The construction work at Sydney is well advanced and by June 1st a number of new mills will be in operation. The sulphuric acid plant has been working since the latter part of February and is giving satisfaction.

The new fertilizer plant has been in continuous operation since it started two months ago, and the company re-

port a fairly good demand for the product.

Freight traffic on the Intercolonial Railway continued heavy during the month. While much snow fell during the winter, the railways in this district were able to cope with it without much delay being caused.

The wholesale and retail trades did a good volume of business and were favorably affected by the good sleighing which continued almost unbroken for a period of twelve weeks.

Dairy products were affected during the greater part of the month. Butter increased 5c per lb., fresh eggs increased 5c per doz. and packed eggs 6c per doz. Canadian cheese increased 2c per lb. These increases were due to scarcity on the market, the wholesale prices having gone up.

Westville.

Labour conditions were active throughout the district during March with greater demand for labourers than during the corresponding month of 1911.

The Intercolonial Coal Mining Company are advertising for miners and labourers of which they require a large number. The other collieries are employing all who apply for work. There is also a shortage of help in other lines of industry.

A company has been formed to manufacture brick from the Logan clay deposits in Pietou; this industry will employ a large number of people in the near future.

The Fraser Machine and Motor Company of New Glasgow have increased

their capital stock by \$30,000 this money to be used in enlarging their plant to meet the demand for their gasoline motors of which they expect to sell 800 during 1912. They will employ about 80 men. Their sales last year amounted to \$78,932.56.

Wholesale and retail merchants report trade active.

Halifax.

The labour market during March, while not as active in certain lines as had been expected, showed on the whole an improvement over the similar period of 1911. Good average progress was made on outstanding contracts, although the weather has retarded marked activity on the rebuilding of the burnt districts. Work along the waterfront has been brisk, considerable activity being caused by the extra number of steamers whose bunkers had to be replenished with Canadian coal in consequence of the strike in Great Britain. Prospects in all lines seem bright, as besides the promised building briskness, unskilled labour should be in fair demand, in consequence of the contemplated expenditure of some \$100,000 by the corporation of Halifax for water service extension and sewer works.

Amherst.

There was little change in the labour market, all classes being well employed.

The indoor building trades were especially busy; not much work, however, was commenced on new industries. The metal trades were also active. Farm products, more especially butter and potatoes, increased in value during the month.

NEW BRUNSWICK.

Moncton.

Conditions in both commerce and labour were quiet and will continue so until the advent of spring weather

makes possible the resumption of outdoor enterprises. The building outlook for the coming season is considered good. Contracts amounting to \$14,404 have been awarded for plumbing, the erection of pavilions and other improvements to the Jordan Sanatorium at River Glade. The Moncton Tramways Electricity and Gas Company passed under new management in the middle of the month. The work of laying pipe lines and installing a service of natural gas in business establishments and private residences will be pushed forward rapidly as soon as weather conditions permit. With one exception local manufacturing concerns were all steadily running on full time. Wholesale and retail were well up to the average.

Farmers in the district have had a quiet month. With winter conditions still prevailing their operations were destroyed to the caring for stock, the moving of hay and the procuring of fuel and fencing. The 36th Annual Meeting of the Farmers' and Dairymen's Association of New Brunswick met at Fredericton, March 18th to 21st and was largely attended. Special importance was given to the topic of apple culture. In the localities where maple sugar is made the season is just beginning and activity in this direction will be shown for the next few weeks.

The provincial government of New Brunswick have established a Bureau of Labour in connection with the Department of the Provincial Secretary, the duties of which will include the collection and publication of information relation to labour organizations, hours and scales of wages, labour difficulties, etc.

Hillsboro.—The Albert Manufacturing Company have completed the erection of new plaster mills at Hillsboro to replace the ones destroyed by fire March 16th, 1911. The new plant is built almost exclusively of concrete and brick and is equipped with all modern machinery for crushing, grinding and calcining the crude gypsum. It will have the normal capacity of 1,000

barrels per day. The mills and quarries when in full operation will require over 300 operatives. The capacity of the former mill was 600 bbls. per day and the total output for the year 1910 was 138,803 barrels.

St. John.

The labour market shows a great improvement, and the outlook for the summer is considered good. Up to March 22 there had been filed at the Customs House cargoes for 76 steamships, which took away Canadian goods valued at \$11,532,819, and foreign goods valued at \$8,424,072, making a total valuation of \$19,956,891. For the same number of steamships last year the valuation of goods sent forward was \$16,623,100, showing an increase of \$3,293,791 in favour of the present season. Bank clearings for the four weeks ending March 21 were \$6,026,620, and for the corresponding period last year \$5,569,669, being \$456,951 greater in 1912 than in 1911, and \$120,112 less than for the four weeks ending February 22 of the current year. The Maritime Nail Company, Limited, notified their employees on March 20 that their wages will be increased eight per cent. from April 1. Anthracite coal is very scarce in St. John, only a few cargoes having been received since the first of the year, and dealers had all they could do to supply their customers. The price per ton is \$7.50 delivered in bulk, or \$8 delivered in bags. The Dominion Coal Company, owing to the strike Great Britain, have been working to full capacity finding bunker coal for the steamers, which are taking enough coal on board to last for the round voyage.

Woodstock. — The Dunbar Foundry Company has opened its new foundry. They will employ about fifteen hands, and will manufacture shingle machines, plows, etc.

Fredericton.

The condition of the labour market showed little change from that of the

preceding month, the supply being generally in excess of the demand, and particularly in regard to unskilled labour. The lumbermen have nearly all finished their operations in the woods and for the most part will remain idle until the streams open and the lumber driving season begins. Continued activity was shown in the boot and shoe factory, which has hardly been able to keep up to its orders, and the Larrigan Works, which has kept its large number of hands steadily employed. The cotton mill at Marysville has also been running at full capacity. As is usual at this period there was a considerable decline in the demand for carpenters, painters and masons, but with the approach of spring these branches of industry are showing signs of activity and soon will afford work for all. Within a few weeks construction work will be commenced on two important lines of railway in this vicinity—the St. John Valley Railway and the line from Gibson to Mint's giving connection with the coal fields of Sunbury and Queen's counties. These operations will give employment to a large number of men.

Newcastle.

Labour conditions were unchanged during March. Men engaged in lumbering operations have come in from the woods and some are engaged at the drives. There was no unrest in the labour situation.

QUEBEC.

Quebec.

Labour conditions were quiet. Failure of the water power resulted in the street cars having their numbers reduced some 55 being laid off; it also affected the big cotton mill which has been running.

Special activity was displayed in preparing vessels for the season of navigation. The government steamer *Montcalm* had another trip with safety and despatch to the several places on the

North Shore of the St. Lawrence which would seem to indicate that winter navigation to Quebec is practicable.

With the exception of marketing butter and eggs farmers have had little to do.

In the lumbering industry some of the gangs have returned from the winter camps; weather conditions are reported to have been good. The shoe manufacturing industry continued active and large orders have been received.

Sherbrooke.

With the exception of those engaged in outdoor labour, all branches of industry were fully employed during March. The season has been somewhat later than usual, but when the weather breaks up there will be a rush on building and other work that cannot be done so long as the cold conditions continue. All other industries in the city and district have been running to full capacity, and in particular the machine shops have been working overtime.

The Industrial Commission of the Board of Trade reports that several industrial propositions having in view the establishment of the same in Sherbrooke are pending. The opening up of new industries and the extensions to others already established will afford employment to many men in the near future.

Three Rivers.

The general condition of the labour market changed little from that of the previous month. Owing to cold weather a great number of those engaged in the building trade were unemployed but since the 15th a good many have resumed work with bright prospects of an early improvement.

The corporation of the City has employed a great number of men on the roads and sidewalks and with all the factories working full time there were few idle men in the city.

Farmers were busy hauling cord wood and farm products to the city for which they have been getting good prices. The cold weather has so far prevented any operations in regard to the maple sugar industry.

St. Hyacinthe.

The condition of the labour market during March was good. The building trades were the only quiet ones, but a revival of activity in these is expected next month. No new building was commenced. A new company, the American Amusements Company, has leased Laframboise Park for a place of amusement and about thirty men will immediately be put to work erecting all the buildings required for that industry. A steam railway will also be built from a point in the city to the park on which will commence as soon as the ground is free from snow; this will employ many joiners, carpenters and unskilled labourers.

The iron trades had a rather quiet month. Sash and door factories worked full time with full staffs. The boot and shoe industry was quiet, some factories preparing for stock-taking; but a good season is anticipated. The leather industry had a good month and everything points to a continuation of activity. Musical instrument factories were fully employed, working with large staffs.

Manufacturing was active in most lines and important additions to industrial plants are being planned. Retail trade was fair and activity is commencing to increase with the approach of spring weather, especially in the millinery and clothing lines. Wholesal trade had a fair month and a good season is anticipated.

Sorel.

Labour conditions were satisfactory workmen being in demand and wages generally good. At the government shipyard, in Sorel, a number of men have been engaged in repairing the various vessels, dredges, tugs, etc., in

order to put them in proper shape for the approaching season of navigation.

Domestic servants are in great demand and difficulty is experienced in procuring them even at high wages. The volume of business has been well sustained, and manufacturing profits made. Some of the manufacturing establishments, however, especially in Sorel, have suffered from the scarcity of coal, which it has been very difficult to get. This has caused a suspension of work for a few days.

St. Johns and Iberville.

Labour conditions were quiet and there was little demand for carpenters, bricklayers, masons and plasterers. Activity prevailed in the other building trades, also in the mechanical industries. Factories were working to their full capacity. The Singer Manufacturing Company received from Japan an order for eight thousand sewing machines. Banks reported a good month, but wholesale and retail trade was quiet. Unskilled labourers had little to do except street cleaning.

Montreal.

March has been a busy month in the city and district of Montreal, and but for the severity of the weather it would have been busier still. Work in most trades, especially in manufacturing has been steady and prospects all round are reported to be good. Activity is reported in the printing trades while the boot and shoe workers are also reported to be busier than they have been for some years. Railway and transport workers have not been so busy as they were last month, but this is accounted for by the breaking up of the winter roads in the country and the unseasonable weather.

Continued wintry weather has had an adverse effect on the building trades and operations have been quieter than usual at this time of the year. The prospects in this line, however, are bright, and many large and important

structures will be erected this season. Within the next few weeks ground will be broken for a number of large business concerns. A number of ten-story buildings will be constructed and contracts are announced for many other structures including some big apartment houses, factories, stores, small theatres, a rink, schools and garages. Many residences will also be erected and a large number of flats and cottages.

The civic authorities will shortly commence work on the building of a large new annex to the city hall; street paving operations costing \$1,100,000 will also be carried out.

Reports come to headquarters in Montreal of great activity at all the big pulp mills in different parts of the province. The existing plants are all working to the limit and important extensions are under way. Four or five big new concerns are almost ready to start work.

Announcement was made from the Montreal headquarters of the Dominion Textile Company that dating from March 11, a new scale of wages would be put in force among all their workers which would give a general increase of five per cent. in pay. This change has been made by the company in fulfilment of a promise given in 1908, when there was a reduction in pay owing to bad trade conditions, that as soon as business warranted, the wages would be increased. The increase affects eleven mills, and between 7,000 and 7,500 workers, while it will mean an increased wage list to the company of about \$125,000 a year. The number of employees has not increased. Five of the mills are in Montreal, one at Kingston, one at Montmorency Falls, two at Magog, one at Moncton, and one at Halifax.

The steady increase of business at the port of Montreal is shown in the figures of the customs collections for the fiscal year which closed on March 30. The total revenue for the year amounted to \$19,952,786 as compared

with \$18,327,193, for the previous year, an increase of \$1,625,593. The receipts of every month during the year exceeded those of the corresponding period of the year before. The amount collected in the month just closed \$1,881,844, established a record in the history of the port—surpassing the previous highest amount that of \$1,825,217, for March, 1911, by \$56,630.

The following is a comparative table of receipts at the Montreal Customs House for the fiscal years 1910-11 and 1911-12:

	1910-1911	1911-1912
April.....	\$1,314,951	\$1,332,096
May.....	1,534,203	1,727,948
June.....	1,559,117	1,562,173
July.....	1,514,967	1,535,684
August.....	1,642,628	1,656,863
September.....	1,622,632	1,715,915
October.....	1,393,656	1,689,682
November.....	1,565,985	1,750,492
December.....	1,418,228	1,725,744
January.....	1,548,369	1,572,323
February.....	1,387,240	1,802,022
March.....	1,825,217	1,881,844
Total.....	\$18,327,193	\$19,952,786

Maisonneuve. All the big industrial plants at Maisonneuve have been busy this month. New industries about to start include two shoe factories and one stove factory. A big shoe machinery factory is rapidly approaching completion. A new girl's school to cost \$140,000 will be erected this summer.

Outremont.—During the month the town of Outremont authorized the expenditure of \$400,000 on new sewers, permanent side-walks, underground conduits, water-mains, hydrants, making and macadamizing of roads, new police station, corporation stables, shops, etc. At Outremont the Montreal Water and Power Company has at present under construction a 45,000,000 gallon reservoir. It is being blasted out of solid rock. Building permits totalling \$65,000 for cottages and flats have been taken out at Outremont during the month.

Terrebonne County. — The County Council has decided upon the construction of a carriage road 61 miles long through the most picturesque part

of the Laurentian Mountains, establishing an avenue of communication between several small towns. The road, a broad macadamized highway will start at Ste. Therese passing through St. Janvier, St. Jerome parish, Shawbridge, St. Sauveur, Ste. Adele, St. Agathe des Monts, St. Faustin, and St. Jovite. This will greatly improve communication between Montreal and the Laurentian towns.

Beauharnois. — In the town of Beauharnois \$100,000 will be spent in the making and macadamizing of roads.

Hull.

Labour conditions were active during March. Winter work up the rivers is practically over and gangs of men who have returned are being hired for the drives, good wages for this kind of work being given. Wholesale and retail trade was active and the factories have been busy. Bank business in general is good, though collections have been a little slow. Appearances point to a great demand for labourers during the summer season.

The question of a white way for the city was mooted about a year ago and nearly all the business men of the city were in favour of the proposition. Nothing, however, has been done in the matter.

ONTARIO.

Ottawa.

The coming of milder weather served to brighten things generally in the labour sphere. Opportunities for employment became more plentiful than last month, a number of early spring building operations being started. Conditions are now in advance of those prevailing at this time last year. The city is conducting a number of street improvements, giving work to about a hundred men, and many have still found employment at snow cleaning.

Prospects for building activity in the city are bright.

Milder weather has caused a drop in the cost of living compared to last month. Notable reductions are eggs from 60 cents to 27 cents; veal, 12½-15 cents to 10-12½ cents; potatoes, \$2.25 to \$2.00.

Building permits, bank clearings and customs collections are all in excess of last month. For the first 27 days of March, customs collections amounted to \$151,600, which is \$20,000 more than those for the whole of March last year.

Interest in agriculture in this locality was stimulated by the announcement that Ottawa will get the annual \$50,000 grant for a National fair next September. Already plans are being made to carry on an exhibition on a large scale, and the agricultural side will be more prominent than ever.

Lumbering has been hampered in the push by the mild weather. Improvements to local saw mills are being rushed against the opening of the cutting season. Trade is reported brisk for this time of year.

Brockville.

All classes of labour were fairly well employed with the exception of the building trade in which except for a few alterations were the only operations. All the local manufacturers were fairly active and few men in these industries were idle. The Brockville and Buffalo Mining Company are resuming operations on April 1st after two months' suspension.

Farmers in this locality are active in the preparation and manufacture of maple sugar and maple syrup which is carried on to a considerable extent.

Kingston.

Labour conditions were quiet owing to the severity of the weather industrial concerns, however, in the city were busy.

Prospects in the building line are good. Among the large places to be erected are the following: Hotel Kingston, new addition to the post office, new dormitories at the R. M. C., Salva-

tion Army Barracks, alterations to Bank of Toronto, extensions to the locomotive works, etc.

The supplementary estimates contain the sum of \$100,000 for improvement of the Kingston harbour, \$50,000 was previously voted.

The civic finance committee fixed the tax rate at 23½ mills for this year, an increase of one, and one half mills.

Ship carpenters and marine men were busy along the harbour front preparing vessels for navigation.

The local customs import duties for the month of February amounted to \$18,033.60, this was a large increase over the corresponding period last year.

Merchants report trade quiet.

Belleville.

There was considerable demand for labourers despite the fact that spring operations have not yet commenced. The various industries at the city are at present all engaged in running full time and in some instances it is found necessary to work overtime to meet rush orders. There appears to be no trouble between employers and employees in any of the industries.

The entrance of the Canadian Pacific Railway to the city will mean considerable railway construction within the city limits. Plans for the said railway through the city were filed on the 19th of March. The engineer of construction has had a conference with the Railway Committee of the City Council and a satisfactory plan of entrance and right of way through the city has been arranged. Work of construction will be commenced here in the near future. The Canadian Northern Ontario Railway is also contemplating making some improvements here.

Peterborough.

The general condition of the labour market during March showed a slight improvement over that of February. Prospects for the building season of 1912 are good and contractors are be-

ginning to show signs of their midseason activity. The Canadian General Electric Company have invited tenders for a new warehouse and shipping building the construction of which will afford considerable employment. They have also purchased ten acres of land immediately north of the present location of the Canadian General Electric Company Works.

A "Made in Peterborough" exhibition will be held in the Armouries under the auspices of the Ladies' Auxiliary on the 3rd of June and will last the entire week.

The city is applying for legislation to enable it to expropriate any part of the plant or appliances of the Peterborough Light and Power Company.

The cold weather did not afford much opportunity for work among the farmers in this district although some commenced operations in the sugar bushes. Production in this line is not likely to equal that of past years as the snow is too deep for the farmers to move among the maples for the purpose of tapping trees and collecting the sap. The district Cheese Makers held their annual convention this month and elected their officers for the year. Many important matters were discussed.

Lindsay.—The Water Commissioners have decided to give a twenty per cent. discount this year; last year they had a surplus of \$7,619.27. The firemen were granted an increase of \$25.00 each per year.

Whitby. — Plans for the new provincial asylum have been completed. The construction will cost about a million dollars and will not be finished under three years. Accommodation will be provided for about 1,200 patients.

Orillia.

The lateness of the spring has seriously interfered with plans for an early start in building operations. Not much can be accomplished in any case until the brickyards begin to produce brick. Some buildings begun last fall

are being completed. The demand for houses exceeds the supply, and the building season is expected to be the busiest in the history of Orillia.

The factories are all busy, especially the carriage and motor factories. The destruction by fire of the planing mill owned by Messrs. J. R. Eaton & Sons, Limited, threw 75 men out of employment will, however, be absorbed by other factories and by building operations, pending re-construction.

March has been a comparatively quiet month commercially, the cold, stormy weather interfering materially with the sale of spring goods. The price of butter has dropped 25% and the price of eggs 33 $\frac{1}{3}$ per cent. during the month.

Toronto.

Owing to the cold weather which prevailed during the greater part of the month and strikes in the clothing trades conditions during March were less favourable than in the corresponding month last year, and a large number were out of employment. The indications point to great activity in the building trade as soon as the mild weather sets in, many large undertakings being under way.

Manufacturing operations, more particularly in the metal trades, were seriously affected by a shortage in the coal supply owing to a lack of sufficient motive power on the part of the railways, which has had a tendency to curtail the output and lessen the demand for labour. Latterly the situation has somewhat improved as regards the immediate supply, but the prospect of a coal-miners' strike in the United States affected business adversely, though in other respects conditions were satisfactory. The textile trades were active though disturbed by the strike of the cloak makers and garment workers of the T. Eaton Company, and that of the custom tailors. A number of the employing tailors have accepted the agreement proposed by the union and their employees have returned to work.

Wood workers and piano workers were well employed. Printers, bookbinders, and lithographers had steady work. The provision and tobacco trades were normal. Railway workers, expressmen, teamsters and others engaged in transportation had an active month.

Farmers are preparing for spring work, which will be later in beginning than usual. Owing to the long-continued cold weather fodder was scarce in some localities, but as a rule livestock wintered well and the supply of ensilage and root crops kept them in good condition. A large number of farms in the neighborhood of Toronto have been bought up at high prices for subdivision into building lots. Many men formerly employed as farm labourers have gone west and there is a great demand for farm help.

The contract for the new Canadian Pacific Lake Shore road, which branches from the present Toronto-Montreal line at Agincourt a short distance east of Toronto, and re-unites with it 20 miles west of Smith's Falls, a distance of 198 miles—has been let to Deeks & Binds of Toronto at a figure approximating \$10,000,000. The work is to be completed within two years and will employ 2,500 men.

A number of British immigrants have arrived, many of whom are looking for employment in the city. The supply of unskilled labour is at present in excess of the demand.

Niagara Falls

There was a noticeable decline in the demand for labour during March, due most entirely to the completion of out-door work in the building trades and the general waiting for spring weather before new work is commenced. The condition appeared to be natural and temporary.

Agricultural operations were quiet. Fruit growers have completed the pruning of orchards and vineyards. It is stated that wholesale prices of several sorts of garden produce will be increased by agreement among the growers.

Manufacturing concerns were generally busy. The sanitary can factory commenced its busy season after a quiet winter and the hat factory was busier than for some time. In other manufacturing conditions were steady and good.

A congestion of freight occurred in railway yards along the frontier, and the delivery of coal and merchandise shipped from United States to Canadian points was seriously interrupted. The condition was said to be done primarily to snow-blockades on American roads, the accumulation of freight afterwards over-taxing the motive power of Canadian lines.

The Niagara, St. Catharines & Toronto railway is adding to its rolling stock and motive power. The additions including a new type of electric locomotive.

Another line of steamers may be operated between Niagara river ports and Toronto this year.

The Canadian Northern Railway completed plans for the main line to the Niagara frontier and for extensions of subsidiary electric lines through the fruit districts.

Welland.—Local manufacturing concerns were busy. An electric sign company has purchased an unused factory building and will shortly commence business. There is every promise of an active and progressive season here.

Bridgeburg.—The new marble works will not be running till July. Sewer construction has been much delayed. The building trades expect a busy summer.

St. Catharines.

Industrial conditions were active and labour generally was well employed. Especial activity being shown in the indoor building trades.

All of the mills and factories were running full time and some over time.

Merritton. — Favourable conditions prevailed for the employment of labour.

Thorold.—The labour market was active and conditions of employment, good.

Port Dalhousie. — Labour was well employed.

Hamilton

General conditions of labour were more favourable than during the previous month for outside trades. The extreme cold weather continued until the middle of March, when it moderated a little and some of the work which had been started last fall was continued.

As soon as the weather becomes milder the city will start a number of men on the work that will be undertaken this year. City Engineer Macallum estimates that at least 500 men will be required for the departments under his control and the Hydro-Department will also require a large gang for the work it has planned. Large sums will be spent on the new central fire station, a new sewage disposal plant in the west end, general sewer, road and cement walk work.

Both wholesale and retail merchants report that satisfactory conditions prevailed and that indications are for a season of heavy business.

At a meeting of the haberdashers, merchant tailors and boot and shoe sections of the retail branch of the Board of Trade the committee appointed to draw up a petition and secure information on the early closing proposition reported that a large percentage of the merchants interviewed were in favour of closing three nights a week.

Brantford.

Labour was fairly well employed during March but conditions were not so favourable as during the corresponding month of last year. In the iron trades, the agricultural factories have not been running with a full complement of men, trade, however, was brisk in the engine factories and a number have been working overtime. For the most part

the other factories were busy, the fabric mills were advertising for additional operatives. The building trades showed some activity towards the close of the month, work being commenced on a number of houses and on the foundations for the Barber-Ellis Company factory. The American Radiator Company have executed tenders for large additions to their factory, it is expected that between \$40,000 and \$50,000 will be spent on such additions. The Brantford Co-operative Company assigned during the month, having carried on business for about seven years.

Guelph.

There was little change in the labour situation. The continued cold weather almost completely preventing out door work and causing most of those dependent on the building trades for employment to remain idle.

Unskilled labour had a quiet month, clearing out ditches and opening storm drains giving employment to some men.

Business in real estate was active. Men in this line of business state that conditions are the best in years. There is a great demand for workingmen's houses.

Wholesale and retail merchants report trade fair.

Farmers are in readiness for the spring work. Fall wheat promises well, the weather so far being favourable. A scarcity of farm labourers is reported.

Harriston. — The Davies Company have let contracts to the extent of \$15,000 in transferring their present packing house to a cold storage.

The Horse Fair which was held in Harriston on March 7th was very successful, there being a splendid display of animals especially of the heavy draught class. Good prices were realized and fancy prices in quite a number of cases. Tenders are being asked for rural mail delivery between Lebanon and Moorefield.

Berlin.

There was no material change in industrial conditions since the last month, and skilled labour of nearly every class except the building trades and cigar makers was well employed.

New Hamburg. — Several factories closed down for a few days on account of shortage of coal.

Waterloo is having another building boom this year, their board of trade is advocating for the town not to tax any new houses for two years with a view to encouraging working men to build their own homes.

From Elmira, Preston and Hespeler reports show that skilled labour was well employed except the building trades. The building boom will commence as soon as the weather permits.

Wholesale and retail trade was fair for the time of year; custom receipts for the month of February were \$30,-653.12.

There were only a few changes in regard to cost of living. Eggs went as low as 20c. per dozen while potatoes are still up to \$2.00 and \$2.15 per bag of 1½ bushels and difficult to obtain at that price; houses for working men are scarce, resulting in increased rent in many cases.

Woodstock.

There is some indication of the coming of spring in the reports of industrial conditions. A number of factory employees have already left for the west; a corresponding inflow of others, however, has kept the balance fairly well maintained. There is a demand for skilled men in the factories, especially cabinet makers and men skilled in furniture work. There has been and still is, some demand for moulders. Outdoor activities are increasing and there promises to be a good deal of building during the coming season. There is already considerable employment of labour in the making of excavations and other preparations for building. There does not seem to be any noticeable de-

mand yet for unskilled labour; there is on the other hand, not a great deal of unskilled labour seeking employment. Business generally is reported good, and the outlook is encouraging. Most of the factories are busy although there is a temporary slackness in the wagon-making trade. Furniture manufacturers are busy, and trade this year so far has been good.

Stratford.

There was not much change in industrial conditions and labour of all kinds was fully employed.

The contractors claim this year is going to be a busy one in the building trades; permits being issued for the erection of a new public school, costing over \$20,000; a new building for the Bank of Commerce, a new Salvation Army Barracks, and a number of residences.

The ratepayers are asked to vote on three by-laws on April 19 to provide for the erection of industrial establishments. If they are carried operations will be commenced and work given to a number of hands. Wholesale and retail merchants report trade good.

Farmers were occupied mostly with the care of stock. Owing to the severe weather the markets were poorly attended and prices were high for products.

Clinton.—The Bell Telephone Company had a large gang of men in town during the month putting in cable on the business streets. This is a large undertaking and will add greatly to the service.

Goderich.—A new industry will be opened here shortly known as the Huron Gasoline Engine and Machinery Company which will give employment to a number of mechanics.

London.

A backward spring has materially retarded the opening up of work in the building trades, although indications

along this line are better than for some years past.

In the factories and foundries business is good, and orders are in advance of last year.

A commissioner of industries has been appointed by the city at a salary of \$2,500 per year, whose business it will be to advance the city and bring new industries here.

The city is shortly to commence some large works in connection with the extension of the Hydro-Electric, Sewer and Water Works Systems.

Farm help continues scarce in this locality, and farmers are looking to the newly opened immigration office for a supply.

The Canadian Pacific Railway Company have announced their intention of continuing the improvements commenced in the city last year, and will spend a large sum of money on their stations, yards, tracks, etc., between here and Windsor.

St. Thomas.

Milder weather towards the close of March was responsible for a slight increase in activity in the building trades, and from the inquiries made by prospective builders, contractors are of the opinion that considerable work will be done in this city and district during the summer. Mechanics throughout the city were busy, but unskilled workers were not so well employed, the supply being in excess of the demand.

On the railroads regular men report a good average month. The Pere Marquette employees were busy, and the Wabash railroad found it necessary to add a number of heavy locomotives to the service in order to relieve the congestion at the terminals, with the result that traffic employees were busy. Wabash Canadian transportation employees, engineers, firemen, conductors and brakemen have concluded negotiations with the officials and they have been granted an increase in wages which will average about 10%. Working conditions have also been considerably improved. Hereafter firemen will

not be obliged to do any cleaning on their engines with the exception of work which may have to be done inside the cab. The schedule in effect on the Canadian Pacific Railway has been adopted almost in its entirety.

The Pere Marquette Car repairers' staff engaged in outside work, which some weeks ago was reduced to one or two men, has been increased to about thirty men. Piece work has not yet been put in operation, but it is the intention of the officials to inaugurate the system as soon as the piece work schedule is arranged and conditions are made satisfactory for introducing the new arrangement.

Census returns placed the population of the city at 15,453, which is a slight increase over the preceding year.

There were no requests for building permits during March.

Farmers were chiefly concerned in the care of the stock during March. The local markets were well attended and good prices prevailed. Experienced farm help is in great demand in the district.

Port Stanley.—Prospects are bright for a busy summer. Considerable work will be done on the harbour which will add materially to the advantages offered as a shipping port. The by-law providing for an improved waterworks system was carried by a large majority. \$22,000 will be expended in installing the system.

Chatham.

Labour generally was well employed although the first part of March remained too cold for much outside work.

The building trades were busy preparing for the activity that is looked for in the spring. Permits for March number 22, being 15 more than in the corresponding month of 1911, and call for an expenditure of \$32,285.

The fiscal year which closed 31st March was the largest in the history of the Customs Department for Chatham and surrounding ports. The receipts for the year exceeded those of any pre-

vious year by over \$30,000 the business transacted amounting to something over \$280,000. The increase for March over any previous month was \$30,000. Wholesale and retail trade was brisk.

All factories were running to their full capacity, planing mills being especially busy. Carpenters and joiners were in great demand.

The City Board of Works were unable to undertake much owing to the frozen state of the ground but have a large amount to be proceeded with as soon as they are able to commence operations.

Windsor.

Conditions in the labour market were active during March except in regard to outside work. Factories and mills were busy and wholesale and retail trade was good.

Building showed a decrease as compared with that of the corresponding month of last year. Prospects are good for a very active year in the district.

Cobalt.

Normal labour conditions prevailed in this section, and the usual quiet that precedes spring building boom was noticed. In Cobalt few new men were added to the usual staff, although several minor properties, on the outskirts of the camp in general, have started or will start development work shortly.

Mining was the main industry during March. The Nipissing Central extension of the trolley system between Cobalt and Haileybury to New Liskeard will mean considerable work there this spring, while the Haileybury spur line will also be built this year. The contract for the Elk Lake branch of the Temiskaming & Northern Ontario Railway will employ a large number of men, making the railway's contribution towards labour a large one during the coming months.

The Haileybury brick and tile company plan spending \$15,000 in improvements this year, making a total of \$80,-

000 investment. They will employ 22 men with the added improvements and have a capacity of 3,000,000 brick per annum.

Port Arthur and Fort William.

The labour market was quiet.

No new industries have been commenced and no operations were carried on in the building trades with the exception of a few repairs.

In Port Arthur a by-law for a new hardwood finishing factory has just been legalised and the building is erected and machinery being installed. It is expected to be in running order next month.

In addition to this the Port Arthur Wagon Works have installed a plant in their factory and expect to begin the manufacture of wagons by about the 1st of May.

In both Port Arthur and Fort William there is assurance of much work to be done in building construction, dock extensions, increased railway shops and new manufacturing plants during the coming summer.

Commercial and business interests were quiet, only a normal amount of business being done.

MANITOBA.

Winnipeg.

Labour conditions have been normal. There has been some migration to the city of labourers seeking employment for the summer and a large number of these are being sent out to camps in the West. The big movement in this respect will not commence, however, until the middle of April.

The weather conditions have prevented any extensive outdoor work. Bills are being considered before the legislature to incorporate a group of companies purposing to operate public utilities and to take over the present Winnipeg Electric Railway Company. If the desired legislation is obtained the promoters announce that \$14,000,-

000 will be spent in extensions of the present system of gas, electric light and street car services.

An appropriation has been made by the local government for the purpose of commencing the proposed new legislative buildings.

The building trade is particular active for this season of the year. The number of permits taken out so far exceed in amount the total for the corresponding period of any previous year. Most of the permits are for dwelling houses which are for the time being in great request.

Industrial establishments generally are busier than customary at this season.

Commerce generally is of a larger and more satisfactory volume than heretofore. Orders from the West are coming forward freely.

Brandon.

The labour market has been somewhat quiet, and does not compare favourably with the corresponding month of last year, severe weather being responsible for a delay in spring work.

There has been little distress, however, and retail business has been fairly good.

Operations in street paving will be shortly resumed.

Eggs have decreased in price while beans and evaporated apples show an increase. Though there has been an exceptional demand for small houses and workmen's residences up to the present no increase in price has been noted.

SASKATCHEWAN.

Regina.

There was little change in the general state of the labour market; conditions, however, were not so favourable as during the corresponding period of last year. The prevailing cold weather is partially responsible for this as seen

by the fact that many large buildings in construction which were closed down for the winter have not yet resumed operations.

Wholesale and retail trade continued to maintain a steady increase and an active spring trade is anticipated by those concerned.

Although the season is young exceptional activity prevails in real estate circles and big prices continue to be paid for business property.

The cold weather did not afford much opportunity for farm work throughout the surrounding district beyond hauling grain, attending stock, etc.

A large program of railroad construction has been mapped out for the coming season, and a shortage of labour in this connection is expected.

Moosejaw.

Labour conditions have been quiet generally owing to the steady cold weather.

The location of several expected industries in the early spring together with the great amount of building in sight and the work in connection with the entrance of the Canadian Northern Railway and the Grand Trunk Pacific Railway into the city will create great activity in the labour market and it looks at present as though there would be insufficient help.

The railway is still busily engaged in hauling grain and arrangements to ship it via Duluth has made a welcome outlet for the western farmer.

The decision of the Saskatchewan Flour Mills Company to rebuild their mill on the same site with a much greater capacity has been received with satisfaction by the people here. This concern employ a large staff of men and their product is well advertised and widely sold.

Saskatoon.

Labour in general has been slightly better employed than during the past two or three months; the supply, how-

ever, is still in excess of the demand. Owing to prolonged wintry weather little activity has been noticed in the building trades, and only about 40 per cent. of the skilled labourers in these lines have been regularly employed. The printing trades were actively employed, while a small foundry doing agricultural implement work has been fairly busy.

ALBERTA.

Edmonton.

Labour conditions were active and showed an improvement over the previous month and the corresponding one of last year.

Civic outside work has been carried on more extensively during the winter months than in the past and the present year promises to be a record one for general construction work.

The following figures show the business activity during February as compared with the corresponding month of last year:—

	February, 1911.	February, 1912.	Increase %
Bank clearings	\$8,213,881	\$16,648,355	103
Customs duties collected	50,035	101,437	103
(Strathcona)	740	1,457	
Building permits . . .	83,825	200,440	139
(Strathcona)	5,300	12,700	
Post Office (stamps only)	7,052	10,135	44
(Strathcona)	675	976	
Street Railway			
Passengers carried	329,149	613,351	86
Revenue	13,709	25,101	83
Homestead entries . .	237	356	50

Wholesale trade was good and collections were reported satisfactory. Prospects for a good building season are bright and there is a large amount of work already under way.

Active development is looked for during the coming season as a result of extension of transportation facilities. Over 500 miles of various lines are now under contract in Edmonton territory.

There was no unrest in the labour market and no changes in rates of wages or hours of labour.

Lethbridge.

Severe weather continued to prevent activity in various industries and little work was done compared with that of the corresponding period of 1911. A busy spring in all lines is anticipated. The municipally owned street railway will be commenced as soon as the frost is out of the ground. The city has 30 men unloading steel and other material for this work.

Lumber yards were active as also were farm implement industries. The demand was great in the latter line and shows that there will be a great increase in farming in this district.

Coal mining industry was quiet. The market being mostly for home consumption. A great deal of development work was, however, going on, which kept a number of men busy.

No railway construction was carried on. The Canadian Pacific Railway Company are building a concrete embankment in the river to protect the high level bridge. Immigration from the east and the United States was heavy.

BRITISH COLUMBIA.

Nelson.

Labour was well employed considering the period of the year. The mines were running well up to the average and more men were working than in the corresponding month of last year. The ice in the west arm of the Kootenay lakes has broken up and the boats are running on schedule time. The western shingle and box company factory was running over time. The foundry was busy and employed a full force of men. Boat builders have a number of gasoline launches and row boats under construction in preparation for the coming spring trade.

New Westminster.

The latter part of the month was marked by an increased activity in the labour market.

The majority of those unemployed during the winter months are now at work and the prospects for the season are bright. Sewer construction, road making, railway construction and extension have begun and a number of men are already at work. Many dwelling houses have been commenced and the plans for an eight story steel block are in the hands of the building inspector.

Trade in all lines is becoming brisk after the rather quiet winter.

Victoria.

There was an improvement in all classes of trade during March, and labour was more fully and regularly employed than for many months past. Owing to the fine weather which prevailed, contractors have resumed operations on street paving and other city works. The city also has large numbers of men engaged in sewer and other kinds of civic improvements, and the present indications are that many labourers will find employment for several months.

Building operations are active, many residences, business and public buildings being under construction, and with no labour troubles in sight, the outlook for the building trades is bright.

The Provincial Government decided to build a Normal School in Victoria at an estimated cost of \$250,000, also a new provincial gaol to cost \$200,000.

The total number of building permits issued during February was 155, aggregating in value \$1,671,070, which establishes a record for this city. For the same month last year 104 permits were issued, the value of which was \$182,940. The increase for, February, 1912, over the same month last year, being 814 per cent. The building permits issued by Oak Bay municipality for February amounted to \$81,465, as against \$10,900 for the corresponding month last year, being an increase of more than 700 per cent.

Wholesale and retail trade was active. The real estate market is in a prosperous condition, many sales being

made in both business and residential properties, with prices advancing rapidly.

Nanaimo.

Conditions in the labour market show a marked improvement over those of last month. Spring work is well ahead, but there are still a number of unemployed men in the district.

There is exceptionable activity in the building trades.

Passenger traffic still keeps steady and freight traffic is showing a steady increase. The wholesale and retail merchants report business as good.

There have been no changes in rates of wages or hours of labour during the month and little change in the cost of living.

Prince Rupert.

Labourers, skilled and unskilled, experienced a quiet month. There was enough local labour to supply all immediate demands and though there was no apparent distress caused by want of work, there were some building tradesmen unemployed. An increase in building trade activity is expected in the near future and the sash and door factory which closed down in the fall last year, is likely to be reopened. A planning mill which remained in operation during the winter employing about a dozen hands, is extending its business, and will double its staff. So far, however, demands for new buildings does not warrant reopening, or expansion.

Owing to orders having been issued by the Grand Trunk Pacific Railway Company that the business and public buildings on the Railway Reserve were to be removed to make way for grading operations, there was some extra activity in the business of house-shifting. The work of grading a large portion of the reserve for railway yards and depot site is expected to call for the employment of at least two hundred labourers. Steam shovels will be

set to work, and the contract is to be swiftly completed. Railway work generally is likely to be more active this spring. Steel laying and bridge building along the Skeena approaching Hazelton has been pressed on vigorously and progress has been kept up at the rate of two or three miles a day in spite of snow hindrance. It was stated by Grand Trunk Pacific authorities that the work of erecting the Skeena

crossing bridge would be in progress this month.

Local tradesmen have complained of slow purchasing amongst the working community owing to lack of abundant employment. Real Estate transactions have rather increased in the city, and a tri-weekly service of trains has been renewed up river, indicating the opening of the interior trade earlier this year than usual.

THE COURSE OF PRICES AND COST OF LIVING IN CANADA DURING 1911. — SPECIAL REPORT BY THE DEPARTMENT OF LABOUR.

THE Department of Labour issued during March a special report on the course of Wholesale Prices in Canada during the past calendar year. The report is the third to be issued by the department in the way of furnishing a detailed record of the course of wholesale prices in Canada. The first, it may be recalled, was published in 1910 and covered the twenty years 1890-1909 inclusive. In it the Department stated its intention of carrying the investigation forward currently and of issuing periodic reviews and analyses of the results. In accordance with this design a monthly summary of price fluctuations with an estimate of their relative importance now appears in the *Labour Gazette*, the official journal of the Department, while a special report in more detail is made at the close of each year. Such a report was issued in 1911 dealing with the course of prices during 1910. The present is the second of these supplementary reports, its general purpose being to furnish a statistical review of the price movements of the more important articles of production and consumption in Canada throughout the calendar year 1911, thus bringing the Department's survey of the subject from the beginning of 1890 down to date of December, 1911, i.e. over the past twenty-two years.

The Report Tabled.

In tabling the report in the House of Commons on March 28, the Hon. T. W. Crothers, Minister of Labour, spoke as follows:

"At the present moment no economic question is touching the lives of the people more vitally and in a more comprehensive way than the high cost of living. We all remember the widespread agitation which swept over this country and the United States about three years ago, when prices after a steady rise for more than ten years reached what was then regarded as an unprecedentedly high level. That was in 1907, the year of the meat boycott. The financial panic in the fall of that year somewhat checked the upward movement, and in 1908 and in 1909 there was what might be called a breathing spell. In 1910, however, the progress upward began again almost as rapidly as ever. It has continued since with increasing rapidity during the second half of last year until we have at present a situation quite as intense, if not more so, than has existed for many years past.

"As is well known, the Department of Labour maintains a record of price variations and tendencies in Canada with the object of being able to state at any time just what is the nature of

**Chart Showing the Course of Wholesale Prices in Canada during the
Twenty-two years 1890-1911 (inclusive).**

[Number of Commodities—235.]

[Average Price, 1890-1899—100.]

the movement of prices in any particular direction, whether up or down. A summary of this record is published monthly in the *Labour Gazette* and an annual report at the end of each year. (We are at the moment issuing from the press a special report embodying the results of the department's investigations throughout the calendar year 1911. We have endeavoured to secure the publication of these statistics more promptly than has been the custom in the past, and the report is now ready for distribution. It may be of interest here and now to lay the report on the table of the House for the immediate information of any who may be interested in the subject, though all the members will be furnished with a copy this week. Briefly it shows that prices are now considerably higher than at any time in Canada since the early eighties, and probably since the early seventies. Last year wholesale prices went up approximately 3 per cent., and retail prices approximately 5 per cent. over those of 1910; while compared with twelve or fifteen years ago the rise has been over 40 per cent. It may be added that the rise of the past year has been particularly serious from the cost of living standpoint. The general industrial expansion and trade prosperity has created an exceptionally keen demand for materials of all kinds with a resultant enhancement in prices, while at the same time the unfavourable crop reports, due to drouth during the summer, not so much in Canada as in the other food-producing countries of the world, has sent grains and fodder, dairy produce, fish and foodstuffs to very great heights.

"This whole question of high prices, it may be pointed out, is not Canadian in any sense, but is world-wide. At the present moment a movement is on foot for the appointment of an international commission to bring together the statistics collected in various countries and to collate them on the same basis in order that some comprehensive knowledge as to the causes of the rise may be obtained and a remedy suggested. The president of the Un-

ited States has taken the lead in this matter, and in a recent message to congress has asked for an appropriation of \$20,000 to enable the United States government to invite foreign governments to a conference looking to the establishment of the commission above mentioned. The action of the president is very significant of the fact that the question is not local in any sense of the term, but is world-wide in its application. It is to be hoped that so practical a suggestion will meet with the encouragement it seems to merit."

Findings of the Report.

In presenting the findings of the investigation during 1911 to which reference was thus made by the Minister, the report states as follows:

"Wholesale prices in Canada reached during 1911 a general level higher probably than in any previous year within the present generation. The detailed statistical record of the Department of Labour on the subject goes back to 1890; within that period prices have only once approached a high point comparable with those of the past year, namely, in 1907, and as may be seen from the diagram which is published on the preceding page, the level is distinctly higher now than then. Looking to the period prior to 1890, prices ranged very high in the early 70's but were lower in the later years of that decade; in the decade 1880-90 they rose again, reaching a higher level than in 1890-1900. Accepting the findings of the most authoritative foreign index numbers as roughly applicable to Canada for these earlier years, it is safe to say that prices have been higher in Canada in the year just past than at any time since 1882-4 or possibly since 1872-3.

"The upward movement during 1911 which effected this result did not develop with any degree of strength during the first six months of the year. From the middle of June onward, however, the advancing trend became pronounced and continuous, each month showing a material gain over its predecessor, the year closing with-

out appreciable check to the tendency and with November and December prices on the highest levels of the twelvemonth. Between January 1 and December 1, the average rise may be set down as approximately three per cent. How the level varied from month to month in the interval may be conveniently seen from the chart on the next following page in which the line indicates the course followed throughout 1911 by the combined prices of 261 articles, including the most important commodities of Canadian commerce, and selected as representative in so far as possible of all phases of production and consumption in Canada.

"Comparing the average level for the year as a whole with that of 1910, the Department's index number which was 124.0 for the 261 commodities above mentioned in 1910 was 127.2 in 1911. These numbers, it will be understood, are percentages of the average prices prevailing during the decade 1890-1899, this being the period selected by the Department as the standard of comparison throughout its investigation into wholesale prices. The statement, therefore, is equivalent to saying that wholesale prices were approximately 24 per cent. higher in 1910 than in the closing decade of the last century, and that they rose during 1911 to a point over 27 per cent. above that basis.

"An indication less specific than the above, though interesting in its way, of the extent of the rise in prices during 1911 may be obtained by noting that of the articles for which monthly price statistics are published in the present report and in the Department's similar report for 1910, and which are therefore available for immediate comparison, 124 showed an advance during the past year while 67 remained stationary, only 82 showing declines."

Circumstances of the Rise.

Reviewing the circumstances attending the rise above mentioned the report states:

"The year was one of general trade prosperity and industrial expansion in Canada. The heavy immigration movement, the very pronounced activity in railway construction and other building operations, the enlarged outputs of manufacturing establishments, and the increased volume of trade, foreign and domestic—in which fields the returns of the year uniformly indicated a marked advance over those of 1910—all united in causing an exceptionally keen demand for materials, with resultant enhancement in prices. In foodstuffs, at the same time, the unfavourable crop reports of the summer and autumn months worked similar tendencies. Grains advanced sharply, and though there was a decline in live animals and meats this was attributed to feed shortage and cannot be regarded as an alleviation in fundamental conditions. Moreover, imported foods, including sugar, were on decidedly higher levels. The financial tone was favourable, and the gold production the largest recorded. From a cost of living standpoint, therefore, notwithstanding declines in cotton, rubber, and a few important instances, the year must be regarded as having, through this double influence of crop shortage and accelerated consumption distinctly intensified the situation which had previously given rise to such widespread comment, though industrially and commercially it constitutes on the whole a very favourable record."

Features of the Advance.

Some light in detail on the movements above referred to is thrown by a table of the Department's index numbers throughout 1911 for the various groups of articles into which the investigation has been divided. It may be noted, for example, that grains and fodder, dairy products, fish, fresh fruits and vegetables, miscellaneous groceries and provisions, hides, leathers and boots and shoes, metals, implements, fuel and lighting, house furnishings, drugs and chemicals, and

Chart showing the Course of Wholesale Prices, Canada, by Months, 1911.

[Number of Commodities 261.]

[Average Prices 1890-99—100.]

liquors and tobaccos—all were higher in December than in January, animals and meats, textiles, and paints and oils being the only groups to show a contrary tendency. Fuller details, with charts by way of illustration, for each of these several groups are given later on. It is noted that the present high point is the culmination of a movement which began about the middle of 1909, previously to which a recession had been in progress following the financial stringency which occurred in the autumn of 1907. For the ten years previous to 1907, however, the tendency was one of rapid and all but continuous advance, following an almost equally rapid decline in the early nineties. Comments at some length have been made on these movements in previous reports. Compared with the low year, 1897, the rise shown by 1911 prices amounts to approximately 40 per cent.

The Movement of Prices by Groups and Commodities.

The following is a brief review of the more important changes shown from month to month during 1911, in the several groups and commodities covered in the Department's investigation:

Grains and fodder. — Grain and fodder prices which were downward in general tendency in the latter half of 1909 and in 1910, rose during the year just past to a point only slightly below the highest annual average recorded in the past twenty years. The rise was most rapid in September and October. Unfavorable crop conditions caused by drought in Ontario in the summer and by wet weather in the West and in the United States during the ripening and harvesting seasons were held accountable. Unfavorable reports of crop conditions in Europe and Argentina also exerted an influence.

Animals and meats. — It will be remembered that general prices in this group were on a higher level in 1910

than ever before recorded by the Department, a marked increase having taken place on the prices of 1909, which in turn were, up to that time, the highest on record. The Department's index number for 1910 was 163.4 and for 1909, 148.6. The net result of the changes of the past year has been to reduce the number slightly below that of 1909, namely to 146.7. The decline set in soon after the opening of the year, and though there was a partial recovery during the summer months prices eased off to their lowest in December. The loss was almost entirely in hogs and hog products, cattle, sheep, and their products being only a few points off.

Dairy products. — Though prices in December, 1911, were higher than at the beginning of the year, the general average for the year as a whole was slightly lower than that for 1910, as a result of comparatively low prices during the spring and early summer. Milk at Montreal was unchanged, but at Toronto showed a decided advance during the autumn as compared with the previous year. Information was also received at the Department that milk prices at many points in Western Canada were higher. Butter, creamery solids, averaged about the same as in 1910 at Toronto, but dairy prints were off about 1c. a lb. Cheese showed a slight decline. Eggs, storage and fresh at Toronto and Montreal respectively were on the whole slightly cheaper.

Fish. — Comparing the record with that of the previous year, prices were higher in nine months and lower in only the three months of April, July and September. The index number for the year as whole was 143.6 compared with 141.5 in 1910.

Miscellaneous foods. — The general price-movement during the past year in the forty-seven foodstuffs included under this heading was of the nature of a sharp advance. The Department's index number which stood at 108.1 in 1910 had risen to 120.9 in 1911, or approximately 12½ per cent.

Textiles. — Advancing prices for flax products, jutes, hessians, and oilcloths, brought the level of this group higher than the average than last year, notwithstanding that cotton and cotton goods declined materially during the second half of the year.

Hides, tallow, leathers, boots and shoes. — Prices in this group were materially higher than in 1910, an advance having set in with June which continued to its highest point in December.

Metals and implements. — The metal markets of 1911 exhibited as usual any features of interest. The Department's price record indicates a more or less steady upward trend due to advances in copper, spelter, lead and tin. The iron trade, however was somewhat dull though prices did not fall to any considerable extent. Implements were on the whole steady.

Fuel and lighting. — Nova Scotia bituminous coal at Montreal averaged the same as in 1910, but Crow's Nest Pass coal, f.o.b. mines was higher, as a result of strike conditions. Vancouver Island Bituminous was also somewhat higher. Anthracite at Montreal advanced, averaging \$5.95 per ton wholesale as compared with \$5.78 in 1910. Toronto anthracite, as quoted by the Canadian Mining Journal, did not change. Connellsville coke, furnace and foundry, was up after a rapid drop during the opening months of 1910. Gasoline showed an upward tendency, but coal oil was lower at the close than at the beginning of the year. Calcium carbide advanced. Matches were unchanged. The aggregate force of these changes left prices about the same as in 1910. The line of variation from month to month is indicated on the accompanying chart, the sudden rise in August illustrating the advance in western coal due to strike conditions at the mines.

Lumber. — The Department's record indicates a somewhat higher general level of prices for 1911 as a whole than in 1910, though as the chart shows

conditions at the close of the year were about the same as at the beginning. The advance in the yearly average was largely due to the continued rise in high grades of pine; laths also were upward, as was soft maple at Toronto. The lower grades of pine and hemlock, however, were cheaper than in the preceding year, the tendency of 1910 to show divergence in the price direction of high and low grades being accentuated. The average price at which the entire cuts of several mills in the Ottawa valley were sold was estimated to be slightly below that of 1910, namely \$20.00 per M. as compared with \$20.50 in 1910. New Brunswick spruce deals were lower, but shingles from that province averaged higher. The same situation developed in western Canada, B.C., fir being lower than in 1910, and cedar shingles at Winnipeg higher.

Miscellaneous building materials. — Twenty articles are taken as representatives of this class. Prices for 1911, when averaged, show little variation from those of 1910. Individual articles, however, fluctuated.

Paints, oils and glass. — A drop in linseed oil and turpentine prices had the effect of bringing the general price level of the group lower than that of 1910, notwithstanding that white lead advanced fully 20% during the autumn. The heavy flax crop was held to account for the decline in linseed oil, while in the case of turpentine oil alleged increasing use of substitute, induced by the high prices which have recently prevailed as well as increasing yields were alleged as causes. The increase in white lead followed the similar movement of the metal. Benzine advanced, but Paris green and shellac went down. Steady conditions were shown in the case of glue, putty, rosin, varnish, venetian red and window glass.

House furnishings. — In the sixteen articles selected as representative of house furnishings, including furniture, crockery, glassware, table cutlery, and kitchen furnishings,—prices were unchanged from 1910 except in the case

of brooms and sad irons, both of which advanced. Brooms which were quoted at \$4.25 per doz. in the autumn of 1910 and the first eight months of 1911 had risen to \$4.65 at the close of the latter year. The crop of broom corn was considerably larger than that of the preceding year but it was stated that exceptionally high prices had been paid to the growers early in the season.

Drugs and chemicals. — An advance in the general price level is indicated as compared with 1910. Borax, muriatic acid and sulphuric acid contributed to the rise, but alcohol and carbolic acid were lower. (Violent advances in opium and menthol have constituted the chief developments in the drug market during the year. The first-named commodity has risen to \$8.50 per pound for gum, the highest price seen in 37 years. The present price has been exceeded but twice during the last 42 years. A practical failure of the crop in Turkey has furnished the basis for the advance. A shortage in the yield of peppermint in Japan accounts for the rise in menthol. The trend of many other drugs, especially those of foreign growth, has also been upward, owing to curtailed crops.) — N. Y. Journal of Commerce.

Furs. — An advance in muskrat skins brought the index number from 283.0 in 1910 to 304.0 in 1911. The high prices of racoon, skunk and mink established in 1910 were maintained. Regarding these lines as representative, prices of peltries are a little over three times those of the decade, 1890-99.

Sundry. — Among the articles included under this heading the chief features were a drop of one cent per pound in the price of binder twine, sisal, and a pronounced decline in the price of Para Island Rubber due to a liberal increase in supplies of plantation grades. Bought without accumulation. Canada Laundry Starch averaged lower for the year, though the tendency has been upward during the past five months.

Liquors and tobaccos. — Divergent tendencies were shown in the articles selected as representative of this group. Among raw materials there has been a decided advance in malt and hops, the former rising from a price of 85c per bushel in January to \$1.25 in the closing months of the year, while Canadian hops advanced from 22c per lb. in the spring to over 40c. in the autumn, imported Bohemian hops rising from 30c. in January to 80c. in December. On the other hand, Canadian tobacco, (Ontario Burley, 'bar run') decline from 16½c. per lb. in 1910 to 12½c. in 1911. Manufactured products were more stable. Selected lines of Canadian whiskey and standard plug smoking tobacco manufactured from imported leaf remained unchanged, but a line of draught ale and porter showed a decline in the month of April from \$6.80 to \$6.25 per barrel. The effect of the whole was to cause a rise in the index number from 132.2 in 1910 to 151.2 in 1911.

Scope and Arrangement of the Report.

The original investigation covered 230 articles selected for their representative character. As explained in the first report, however, the list though as complete as was possible at the time, was not regarded as final, and efforts have since been made to extend it. Six additional commodities were included in the annual report for 1910. To these have been added in the present review twenty-four others. For each of the articles thus added a series of quotations has been secured back to 1890 so as to ensure uniformity of statistical treatment throughout, especially in the matter of including them in the Department's index number, for which the base period is the decade 1890-1899. These historical tables are published in Appendix A of the report. The Department's index number for 1911 accordingly covers 261 articles.

The manner of quoting prices is the same as in the earlier reports except that for certain articles subject to

rapid fluctuations (grains, live animals, butter, eggs and fresh fruits,—twenty-five in all) weekly instead of monthly quotations have been obtained.

The arrangement of subject matter is the same as in the report for 1910. A summary statement and analysis of the changes of the year are first given. This is followed by the actual statistics of prices, the latter being divided into two parts: Part I containing the weekly or monthly quotations for each article throughout 1911; and Part II consisting of tables of average annual prices back to 1890 reduced to the form of index numbers. A note on the world's gold output during 1911 will be found in Appendix B.

Retail Prices during 1911.

A new feature of the report is Appendix C, which gives a comparative view of retail prices throughout Canada during 1910 and 1911. Since the beginning of 1910 the Department has secured on the fifteenth of each month a return from the correspondents of the *Labour Gazette* (resident in each

locality of the Dominion having a population of 10,000 and over—forty-nine in all) showing the current retail prices of some thirty articles which enter prominently into cost of living, together with a statement in each case as to rentals. It is thought that probably 80% of the expenditure of the ordinary family is represented in these returns, while the localities selected are the most important industrially in the several provinces. The prices on the first of each quarter in the two years 1910 and 1911 reported in this way to the Department have been averaged and the results set forth in the table in Appendix C, with a brief analysis of the nature and extent of the changes shown as between 1910 and 1911. They amount to about 5% increase. As previously stated, it is the purpose of the Department to treat the subject of retail prices ultimately in much the same method as wholesale. In the meantime the matter of Appendix C may prove of practical bearing in connection with the subject-matter proper of the report on wholesale prices.

THE INDUSTRIAL DISPUTES INVESTIGATIONS ACT, 1907.—PROCEEDINGS DURING MARCH, 1912.

DURING the month of March the report was received of the Board of Conciliation and Investigation appointed to inquire into certain matters in dispute between the Michigan Central Railroad Company and the station agents, telegraph and telephone operators, and towermen employed on the Company's lines in Canada; also a minority report signed by the member appointed on behalf of the company.

Application received.

The department received on March 11 an application for the establishment of a Board for the adjustment of differences between railroad freight handlers and railway clerks employed at Winnipeg by the Canadian Pacific Railway the employees being members of Winnipeg Division No. 177 of the

Brotherhood of Railroad Freight Handlers and Railway Clerks. The number of employees affected was given as 220 directly and 230 indirectly. It was stated that the dispute was the result of a policy of alleged discrimination on the company's part against employees who belonged to the above mentioned Union, resulting in the dismissal of many of the Union members.

A Board was established on March 18, Messrs. Chas. P. Fullerton and Thos. J. Murray, both of Winnipeg, Man., being appointed members thereof—the former by the Minister in the absence of any recommendation from the Company and the latter on the recommendation of the employees concerned. At the close of the month the Board had not been completed by the appointment of a Chairman.

REPORTS OF BOARD IN DISPUTE BETWEEN M. C. R. AND CERTAIN EMPLOYEES.

THE Minister of Labour received, on March 12, the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Michigan Central Railroad Company and the station agents, telegraph and telephone operators, and towermen, members of the Order of Railroad Telegraphers, employed by that Company on its lines in Canada; also a minority report by Mr. J. E. Duval, member appointed on behalf of the Company.

In the application for the establishment of a Board in this matter it was stated that the differences in question grew out of the refusal of the Company to adopt certain amendments to the existing schedule of rules and rates of pay, the number of employees affected being given as 115 directly and 3,000 indirectly.

A Board was established by the Minister of Labour on December 26, and was constituted as follows: Messrs. Peter McDonald, Woodstock, Chairman; J. E. Duval, Montreal, Que., (named by the Company); and J. G. O'Donoghue, Toronto, Ont., (named by the employees). The Chairman was appointed by the Minister in the absence of any joint recommendation from the other members of the Board.

The Board met at Toronto on January 26; sittings were later held at St. Thomas, the final meeting, however, being held at the former place on March 6. The majority report of the Board, to which was appended a schedule of rules and rates of pay, was signed by the Chairman and Mr. J. G. O'Donoghue, member appointed on behalf of the employees, the minority report being signed by Mr. J. E. Duval, member appointed on behalf of the Company.

Reports of Board.

The text of the majority report of the Board of Conciliation and Investigation in this matter is as follows:

To the Hon. T. W. Crothers,
Minister of Labour,
Ottawa, Ontario.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Michigan Central Railroad Company, employer, and its employees in the station, telegraph, telephone and signal department, employees.

The undersigned members of the Board of Conciliation appointed under the Act in this matter have the honour to report as follows:—

The Board met at Toronto on January 26th, 1912, and took evidence as to the general outlines of the claims of the employees and the Company's defence thereto and concluded its sittings there on the same day and adjourned its sittings to St. Thomas, Ontario, where it met on February 2nd, 3rd, 7th, 8th, 13th and 14th, 1912, and at Toronto on March 5th and 6th, 1912.

The Company was represented by Mr. S. W. Brown, Detroit, and Messrs. H. Shearer, J. S. Graney and A. E. Evans, all of St. Thomas, Ont., and the employees were represented by Mr. D. Campbell, Toronto; Mr. D. Hoy, Fletcher, Ont.; Mr. J. H. Staley, Niagara Junction; and Mr. J. C. Culkins, Detroit.

A great amount of the time of the Board was taken up in the hearing of evidence and argument tendered by the employees and the Company upon the hours of labour, the cost of living and the different conditions and rates of pay by other railroads operating in

the same territory or territory contiguous to the Company's lines of railway.

After discussion, the Company and the Employees agreed upon the following Articles of the Employees' claim as amended and set out in the schedule annexed hereto, namely; Articles 2, 3, 4, 5; Sections 3, 4, 5, and 6 of Article 9, and Articles 10, 11, 12, 13, 14, 15, and 16. Article 17 of the proposed schedule was not pressed by the employees. On all other points it was found impossible to bring about an agreement between the parties.

Mr. J. E. Duval, the representative of the Michigan Central Railroad Company on the Board, does not agree with the undersigned members of the Board upon all points and he has filed a minority report which is annexed hereto and expresses his views upon the matters at issue.

It is a matter for congratulation that so little difference of opinion really exists between the members of the board upon these questions.

The principal point of dispute between the Company and the employees was "Article 1" in which the employees asked to have telephone operators, levermen, and station agents considered as telegraphers. The evidence given showed that the Canadian Pacific Railway Company included telephone operators and station agents in its schedule as telegraphers, and that the Grand Trunk Pacific Railway Company considered station agents performing telegraph duties of any duration as telegraphers in its schedule of "Rules and Rates of Pay Governing Agents and Telegraphers," which became effective on March 1st, 1910, and it was also shown that the Cleveland, Cincinnati, Chicago and St. Louis Railway Company (including the Peoria and Eastern Railway), usually known as the "Big Four," by an award in arbitration proceedings held in March, 1910, included telegraphers, telephone operators, station agents and levermen as telegraphers. It was also admitted by the Michigan Central Railroad

Company's representatives that the Company now paid its telephone operators the same wages as its telegraphers and that its tower or levermen are paid fifty dollars per month and upwards and that many of its station agents are promoted telegraphers who are sometimes required to do telegraphic work in the absence of the operators. In view of these facts the undersigned members of the Board decided to allow Article 1 of the Telegraphers' schedule as to telephone operators and to specify the certain tower or levermen and the specific agencies, which are included in "Article 1" of the Schedule annexed hereto.

The other main points of difference were as to the proposed increase of fifteen per cent in the wage scale and a reduction of two hours per day in the number of hours constituting a day's work. After giving these matters due consideration it was decided by the undersigned members of the Board to grant an increase of ten per cent in the total wage fund made up of the amount paid to those included in the Schedule of April 1st, 1910, and the amount paid to those others now added by Article 1 of the annexed schedule—the said increase of ten per cent. to take effect on January 1st, 1912, and be apportioned as may hereafter be agreed upon by the Company and its Telegraphers. It was also decided that no charge should be made in the Company's schedule of April 1st, 1910, as to the question of the number of hours constituting a day's work. It was not thought proper to grant a meal hour at midnight nor to raise the rate of pay for overtime from twenty-five to thirty cents per hour as asked for by the employees.

All the evidence and arguments written and verbal submitted by the parties to the dispute have been duly considered and the undersigned members of the Board would recommend to the Company and the employees the schedule of conditions and the rates of pay hereunto annexed believing that

these conditions and rates of pay, if placed in operation by the Company and agreed to by the men, would be fair and equitable as between the parties as a settlement of the dispute.

We beg to congratulate the representatives of the men and of the Company upon the very careful and efficient manner in which their respective cases were prepared and submitted to the Board and we also wish to thank them therefor, and to express our appreciation of the courtesy and good feeling which prevailed between them during the sittings of the Board.

All of which is respectfully submitted.

Dated at Toronto, Ontario, this Sixth day of March, A.D. 1912.

(Sgd.) PETER McDONALD,
Chairman.

(Sgd.) J. G. O'DONOGHUE,
For the Employees.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Michigan Central Railroad Company, Employer and its employees in the Station, Telegraph, Telephone and Signal Department, Employees.

Schedule of wages for Telegraphers referred to in the annexed report of the Board of Conciliation, dated March 6th, A.D. 1912. This schedule to become effective January 1st, 1912.

ARTICLE 1.

All employes performing Railway telegraph or telephone service of any character or duration (except train despatchers) also levermen and station agents as shown in Article establishing wage scale will be considered as telegraphers, within the meaning of this Schedule with the following limitations, namely;—

The tower men so added to the said Schedule shall be the following:—

At Windsor, Towers 1, 2, 3 and 4, 2 men each.

At Essex, 2 men.
At St. Thomas, 3 men.
At Appin, 2 men.
At Air Line Junction, 2 men.
At Yarmouth, 2 men.
At Welland Drawbridge, 3 men.
At G. T. R. Crossing, 2 men.

and also tower men at Fargo, Hagersville and Niagara Junction and that the following Agencies shall be added,

“Essex, Fargo, Ridgetown, Waterford, Hagersville, Welland, Niagara Falls, Bridgeburg and Charing Cross.

ARTICLE 2.

Section 1.—Telegraphers will be regarded in line for promotion, and where ability is sufficient, seniority will prevail. In making transfers and promotions seniority will govern, provided ability to fill the position is sufficient. Seniority will date from the last time of entering the service, and will extend over each Superintendent's Division. Transfers from one Division to another will be at the discretion of the General Superintendent, and will be made when a position cannot be filled on account of lack of ability among the Telegraphers on the division on which the vacancy exists. The Superintendent of the Division on which the vacancy exists, or the Superintendent of Telegraph will be the judges as to the ability of the applicant. Temporary vacancies on any Division will be filled by transfer from the general list (extra) by the Superintendent of Telegraph. Telegraphers transferred from one Division to another will carry their seniority with them.

Section 2.—Vacancies will be promptly bulletined to all offices on each Division and will be filled by the Division Superintendent, or Superintendent of Telegraph, in accordance with Section 1. A vacancy will be filled as soon as practicable. Applications for the vacancy must be filled within six days after the issuing of the bulletin. When a Telegrapher is transferred or

promoted and after a fair trial is found incapable, he will take his place on the extra list, but will retain his seniority rights. Telegraphers declining to accept promotion or transfer to any position do not forfeit their rights to it or another position when vacancy occurs.

Section 3.—In the event of a reduction of Telegraphers, the men on the extra list will be laid off first, and the men last appointed to a regular position will be the first to be placed on the extra list. Appointment to a regular position will be governed by fitness and ability, according to Section 1, Article 2. The oldest man on the extra list shall be first considered.

In the event of any position shown in the Wage Scale being abolished, the Telegrapher thereby displaced will be entitled to the position held by the junior permanently located Telegrapher, provided his seniority entitles him to it and he is properly qualified.

Section 4.—A list of Telegraphers on each Division will be prepared according to seniority, posted in the telegraph office at Division headquarters, and revised annually.

Section 5.—Seniority will only be effective when vacancies occur, or new positions are created.

ARTICLE 3.

When new positions are created compensation will be arranged in conformity with positions of the same class as shown in this schedule.

ARTICLE 4.

Telegraphers will not be suspended or discharged without just cause. When they consider they have been unjustly treated they will have the right to appeal to the Division Superintendent, General Superintendent and General Manager in the order named. In case a Telegrapher has been disciplined or discharged and after an investigation found not at fault he will be reinstated and paid for all time lost. Such investigation is to be held within

ten days after the request of the party designated. Telegraphers may be accompanied by one or more co-employees from their department at any or all investigations if they so desire.

ARTICLE 5.

Telegraphers absent from regular duty on business of the Company, whether attending court, or other assigned duties, will be allowed their regular pay and authorized expenses while away from home.

ARTICLE 6.

One hour will be allowed for meals for all telegraphers, working more than eight hours per day, when consistent, between the hours of 11.00 a.m. and 1 p.m. If less than one hour is allowed for meals, one hour over time pro rata, but not less than Twenty-five cents per hour will be paid.

ARTICLE 7.

Section 1.—Where but one operator is employed twelve consecutive hours, including meal hour, shall constitute a day's work, except operators at Chicago GG & OW, Niles Kalamazoo, Jackson, Jackson Junction, Z Office, Car Shops, Bay City, Detroit F and St. Thomas, where ten consecutive hours, including meal hour, will constitute day's work. Where more than one operator is employed, ten consecutive hours, including meal hour, will constitute day's work.

Section 2.—At stations where but one operator is employed and who works ten hours or more per day, such operators will, after a continuous service in the Telegraph Department of four years or more, be given fifteen days' vacation yearly under full pay or be paid in lieu thereof fifteen days' extra pay at the rate applying to their station. Vacations can be granted only up to the ability of the Company to provide relief, and applications will be granted according to the seniority of the applicants; all applications to be

filed during the months of January, February and March for vacations during the current year.

ARTICLE 8.

Section 1.—When Telegraphers are required by the Train Despatcher to remain on duty longer than the number of hours constituting a day's work, they will be paid overtime.

Overtime will be based on the regular salary. The rate per hour will be determined by dividing the monthly rate by the number of hours required for the month's work, provided that the rate per hour will in no case be less than twenty-five cents. Allowance will be made for the actual time of service computed to the nearest five minutes.

Section 2.—When Telegraphers are called to the office by proper authority outside of their usual hours for duty, the compensation for one hour's work or less shall be twenty-five cents when the call is within three hours after the appointed time for relief, otherwise, it will be fifty cents. If held more than one hour, overtime will be paid as per section 1.

Section 3.—Day Telegraphers are expected to report at an appointed hour on Sunday, but if held by the Despatcher for work they will be allowed overtime. Day Telegraphers are expected, however, to know that their relief reports for duty Sunday night.

Section 4.—When day Telegraphers are required to work Sundays, overtime as per Section 1 (this Article) will be allowed.

Section 5.—Night Telegraphers will be paid one day extra at the schedule be paid one day extra at the scheduled daily rate for each Sunday they are required to work.

Section 6.—At three trick telegraph offices, the second and third trick men will be considered as night operators.

ARTICLE 9.

Section 1.—Telegraphers will not be required to scrub waiting-rooms, offices or outbuildings, clean or disinfect stock cars.

Section 2.—When Telegraphers are required to attend pumps they will receive five (\$5.00) Dollars per month extra compensation.

Section 3.—When Telegraphers are required to attend switches or work interlocking levers in interlocking towers they will be paid five (\$5.00) dollars per month extra compensation. This extra compensation paid for attending to switches will include attending to the lamps pertaining to said switches.

Section 4.—Telegraphers required to attend pumps and switches will be paid seven (\$7.50) dollars and fifty cents per month extra.

Section 5.—Telegraphers will be allowed four (\$4.00) dollars extra compensation per month for taking care of six (6) switch or semaphore lamps, or less, and fifty cents for each additional lamp per month will be paid, it being understood that in cases where the Day and Night Operators share in the performance of the work, the compensation shall be equally divided.

ARTICLE 10.

Section 1. — Regular Telegraphers transferred or promoted, or extra telegraphers assigned to regular positions will be furnished free transportation for themselves, family and effects.

Section 2. — Regular Telegraphers transferred or promoted will not suffer any loss of pay on account of the time lost in making the transfer, but will be paid at the rate of the position left until they go on duty in the new position.

ARTICLE 11.

Telegraphers will be granted leave of absence from time to time for the purpose of attending their meetings, provided such leave of absence does not interfere with the business of the Company and they will be granted the necessary transportation over the lines of the Michigan Central Railroad.

ARTICLE 12.

Telegraphers will not be discriminated against on account of their serving on Boards of Adjustment representing the Telegraphers, and will be furnished transportation over the lines of the Michigan Central Railroad, and relieved without unnecessary delay for that purpose.

ARTICLE 13.

In case Telegraphers are dismissed or should resign and should be re-instated or re-employed within one year they shall retain their rights; after one year they shall be considered as new men.

ARTICLE 14.

Telegraphers shall receive the same rate of pay as Agents or telegraphers relieved. Nothing in this Article shall be construed as meaning that Telegraphers shall suffer a reduction in their pay while temporarily relieving an Agent or Telegrapher.

ARTICLE 15.

Nothing in these Articles will relieve Telegraphers from responsibility under the Rules.

ARTICLE 16.

These rules will be effective January 1st, 1912, and will remain in effect subject to thirty days' notice by either party.

ARTICLE 17.

A net increase of ten per cent. on the total wage fund of all those employees mentioned, or referred to in Article 1 hereof is granted; this amount to be distributed as may be mutually agreed upon by the representatives of the Company and of the employees.

All of which is respectfully submitted by the Board of Conciliation at Toronto, Ont., this sixth day of March, A.D., 1912.

(Sgd.) PETER McDONALD,
Chairman.

(Sgd.) J. G. O'DONOGHUE,
Representing Employees.

MINORITY REPORT.

The text of the minority report in this matter is as follows:

Toronto, March 6th, 1912.

To the Honourable
The Minister of Labour,
Ottawa, Ont.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Michigan Central Railway Company, Employer, and its Employees in the Station, Telegraph, Telephone and Signal Department.

The material changes from the schedule of April 1st, 1910, contained in the proposed Schedule and the request for an increase of wages were strongly opposed by the Company, who urge that the conditions on its Railway are such as to materially relieve its employees of onerous duties which exist upon other Canadian Railways; that the wages earned as a whole are greater than upon other Railways in Canada; and that, therefore, there should be no change in the existing Schedule.

Notwithstanding the contention of the Company, I am prepared to accept the recommendation of the other members of the Board in the following:—Articles 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14 and 15 of the amended Schedule as set forth and attached to their Report, but disagree with their recommendation in Articles 1, 16 and 17 in the amended Schedule referred to, and would recommend in lieu thereof the following:—

ARTICLE 1.

“This Schedule applies to Telegraphers. A Telegrapher is defined as one who fills a position other than an official or semi-official position in which ability to telegraph is a necessity.

“Nothing in this Article is to be construed as meaning that a Telegrapher is ineligible for promotion to any agency or any other position in the Company's service, for which he may be considered fit.”

ARTICLE 16.

“These rules shall be effective on the first day of the month following their acceptance, and remain in effect for one year thereafter, and may then be terminated at the expiration of thirty days' notice given by either party to the other.”

ARTICLE 17.

“A net increase of 10% shall be granted and added to the monthly rate on active positions, as shown in the Schedule of April 1st, 1910, or an amount equal to 10% of such monthly rates shall be distributed over said Schedule as may be agreed to by the Company and a Committee representing its Telegraphers.”

In support of the above recommendations, I would submit the following explanation:—

Article I. As to Towermen and Signalmen: No evidence has been submitted which convinced me that signalmen or towermen, whose duties do not require them to handle train orders or transmit messages, either by telephone or telegraph, and whose duties are confined exclusively to regulating the movement of trolley or steam cars crossing the tracks of the Railway, or the regulation of drawbridges permitting vessels to pass, or the operation of interlocking plants for yard purposes by mechanical appliances, should be included in the Schedule.

As to the proposed additional agencies: After carefully considering the arguments presented by both sides, I have come to the conclusion that it would not be to the interest of good railroad operation to include these Agencies in the Schedule. The Company claim that the positions are semi-official, and in a more or less degree confidential, (and as there was no evidence to the contrary), that to include these agencies would prevent the Company from advancing employees from other Departments to the positions of agents at stations named. Promotion to fill vacancies at these stations have been made from the ranks of the Telegraphers to a greater or less extent, and their omission from the Schedule I do not consider would work any material hardship to the Telegraphers as a body.

Article 16 is self explanatory. Change in date Schedule becomes effective, etc.

Article 17.—The evidence submitted not only disclosed that the present earnings of all employees covered by the Schedule of April 1st, 1910, were higher than those of employees on other Railways in Canada, but that a very considerable increase in remuneration of employees has taken place since the year 1902. The average earnings for operators were shown to be for the month of October, 1902, \$45.28; for October, 1904, \$53.15; and for Oc-

tober, 1910, \$70.95—an increase in earnings for the operators per month of \$25.67, equivalent to an increase of 56.6 per cent. over that for October, 1902.

Notwithstanding this fact, I would

recommend an increase in pay to be applied and distributed as outlined in recommended Article 17, quoted above.

All of which is respectfully submitted.

(Sgd.) J. E. DUVAL.

THE STRIKE OF COAL MINERS IN GREAT BRITAIN.

FEW industrial disturbances of recent years have been attended with more far-reaching results than which occurred during March in the coal mining districts of Great Britain and which did not reach a termination until the opening week of the following month. Fully 850,000 workmen were directly affected, while more than half that number in addition were thrown out of work through the shortage of fuel which ensued while many more were reduced to short time. Traffic by sea and land was interrupted; many mills and factories shut down; and an incalculable amount of want and suffering among wage-earners was occasioned. The effect of the dispute, moreover, was not confined to Great Britain. Europe depends largely upon British coal; from recent trade returns it is understood that France received more than 10,000,000 tons in the calendar year 1911, while Italy and Germany took more than nine and eight million tons respectively. It can readily be seen that such a strike would divert the trade of these and other countries into new channels. In Canada the direct and immediate effects were slight. Some diversion of trade occurred, and larger supplies of coal than usual were required for vessels at Atlantic ports which filled their bunkers for return trips. Prices were very firm, but this was rather from fear of similar disturbances in the United States.

Origin and Cause of the Strike.

The strike, while it nominally began about the 1st of March, 1912, may be

said to have been organized in the fall of the previous year, when a joint conference of the representatives of the mine owners and men throughout the country was held under the auspices of the Miners' Federation to consider a demand on the part of the men for the payment of a minimum rate of wages to miners working in "abnormal places." In view of the variation of customs and circumstances in the different districts, the coal owners while unable to deal with the question collectively recommended the owners in the various districts of the country to meet the men's representatives in regard to the minimum wage question when requested by the latter to do so. The owners in South Wales, Scotland, Northumberland, Durham, and certain other districts had various meetings with the representatives of the men at which the minimum wage was discussed but no settlements arrived at. In the Federated Area, which includes the coal mines of North Wales, the Midland Counties, Yorkshire and Lancashire, the owners accepted the principle of the minimum wage and negotiations proceeded. A ballot was taken among the men in January and a large majority (445,801 to 115,721) were in favour of giving notice to establish the principle of the minimum wage for every man and boy working underground in the mines of Great Britain. On the other hand, following a national conference of coal owners on February 7, a resolution was given out to the men's representatives that the owners "are convinced that the principle of payment in proportion to the amount of work performed is the

only one which can be applied successfully in the case of coal getters."

Intervention by Government.

The first step taken by the government in the matter occurred on February 20 when the Prime Minister invited representatives of both parties to meet him and other members of the government at the Foreign Office. Conferences were held on February 22 with representatives of the British coal owners and also with those of the Miners' Federation. The latter stated the views of the men on the questions at issue but explained that they were not in a position to come to any decision without consulting the National Conference of the Miners' Federation. Further conferences were held between representatives of the government and members of the Coal owners Consultative Committee and the position of the coal owners in regard to the minimum wage question was explained. The Prime Minister and his colleagues then met the members of the Miners' National Conference on February 27 and heard the attitude of the men. Subsequently the following proposals for a settlement of the dispute were submitted by the Prime Minister on behalf of the government:—

1. His Majesty's Government are satisfied, after careful consideration, that there are cases in which underground employees cannot earn a reasonable minimum wage, from causes over which they have no control.

2. They are further satisfied that the power to earn such a wage should be secured by arrangements suitable to the special circumstances of each district. Adequate safeguards to be provided to protect the employers against abuse.

3. His Majesty's Government are prepared to confer with the parties as to the best method of giving practical effect to these conclusions, by means of district conferences between the parties, a representative appointed by the Government being present.

4. In the event of any of the conferences failing to arrive at a complete settlement within a reasonable time, the representatives appointed by His Majesty's Government to decide jointly any outstanding points for the purpose of giving effect in that district to the above principles.

The owners in the Federated Area and those of Durham and Cumberland passed resolutions accepting the pro-

posals of the government but the Scotch, South Wales, and Northumberland owners declined to accept them. On February 29, by which date the men in some districts had ceased working owing to the termination of agreements, the Prime Minister addressed the members of the Miners' National Conference, reminding them of the serious consequences of a prolonged stoppage of work and announced that in the opinion of the government the case had been made out for ensuring to the underground workers a reasonable minimum wage and that the government were prepared to take steps to attain that object. After meetings between the representatives of the government and the Industrial Council the Prime Minister submitted the following proposal to the Executive Committee of the Miners' Federation:—

"His Majesty's Government consider that the proposals which they have already placed before the representatives of both parties offer the fairest means of arriving at a satisfactory settlement of the dispute. In view, however, of the difficulty of making any progress toward a settlement without mutual discussion, His Majesty's Government invite both parties to meet them jointly in conference, without prejudice, with a view to the free discussion of the whole situation."

A Minimum Wage Bill Passed.

The invitation thus extended was accepted by the Miners' Federation and the Coal owners in the various districts and a joint conference under the chairmanship of the Prime Minister was arranged for March 12 and continued on the next two days. At the close of the proceedings the Prime Minister stated that the government would ask from parliament legislative declaration that a reasonable minimum wage, accompanied by adequate safeguards for the protection of the employer, should be a statutory term in the contract of employment of underground miners. As to how much a minimum wage was to be ascertained for any particular district, the Prime Minister, without pledging the government to any precise form of machinery, indicated that the district minimum should be locally fixed by a joint board in each district.

suggestions were put forward by both parties regarding details of the proposed measure.

The Minimum Wage Bill providing for the payment of underground workmen wages at not less than the minimum rate settled under the Act was introduced by the Prime Minister on March 19. The rates were to be established by district boards composed of representatives of employers and employed with an independent chairman chosen by agreement, or failing that, by the Board of Trade.

The bill passed the second reading on March 21 by a large majority. It was read a third time on March 27, and passed by a still larger majority, receiving Royal assent and becoming law on March 29. The importance of

the strike can be seen in the fact that up to this date it had cost the miners' unions more than £1,000,000, while £500,000 had been paid out by unions in other industries, representatives of which were thrown out of employment by the strike. Simultaneously with the bill becoming law, balloting among the miners commenced throughout Great Britain to settle whether the strikers should return to work or let the mines be idle pending a decision by district boards provided for in the bill. The result of the ballot showed that in a total vote of 445,000 on the question of terminating the strike 244,000 were against resumption and 201,000 for it. Notwithstanding this result, the decision of the Miners' Federation reached on April 6 to end the strike was generally approved by the miners.

WAGES OF G.T.R. TRAINMEN AND YARDMEN.

ON January 1, 1912, a new arrangement affecting trainmen and yardmen in the employ of the Grand Trunk Railway Company went into operation. The text of the rules and schedules in question together with a statement as to the circumstances under which it was brought into effect was published in the *Labour Gazette* for February, 1912.*

Early in March a circular giving notice of certain changes proposed in the rates of pay and regulations governing employees in train and yard service, dated January 1st, 1912, was issued by the company under the terms of Rule 48 and Rule "M" of the schedules referred to, in which the Company reserves the right to change the rates and regulations upon giving thirty days' notice. In this connection the following statement was made by the company:

"The rates of pay to trainmen in the schedule referred to, as applied to Branch Lines and other light runs, have

resulted in such abnormal increases in certain directions, taking into consideration the duties and responsibilities involved as compared with other and heavier runs, that it is felt an injustice, to other employes and to the Company as well, would be created by the continuance of these conditions. It has therefore been decided to make the adjustments named on the following pages and re-establish from April 1st, in lieu of the rates in the schedule of January 1st, 1912, the rates applying to particular runs specified, in effect during 1911, all of which were very considerable increases over the previous schedule.

"The Board of Railway Commissioners having given consideration to the number of men to be employed on trains and yard engines, and decided that it was a matter to be left entirely to the judgment of the Operating Officials of the Railways, this will be taken as notice that this Company will exercise its prerogative in this respect.

"Rule 34 and Rule "L" will be eliminated from the schedule of January 1st, 1912.

W. G. BROWNLEE,

General Transportation Manager.

Approved,

HOWARD G. KELLEY,

Vice-President.

"Comparative rates of pay for specified "Runs," under the different schedules, for the years shown in the respective columns below; those under the column headed "1911" being the rates intended to be made effective by this Circular."

THE SHEEP INDUSTRY IN CANADA, GREAT BRITAIN AND THE UNITED STATES.

A REPORT of the Commissioners appointed to investigate the sheep and wool industries as carried on in Canada, Great Britain and the United States shows that, notwithstanding the fact that conditions in Canada, natural and otherwise, are such as to lead one to expect a continually expanding trade in these industries, sheep raising as a business has never assumed that importance in this country which it is usual for it to attain in the great agricultural countries of the world. In Great Britain it is shown that with its comparatively small area, there are 31,852,777 sheep; in New Zealand 23,792,947; in Australia 94,241,226 sheep of shearing age; in Argentina 67,211,754; in the United States 51,216,000 including lambs; while in Canada there are but 2,106,000 head.

Eastern Canada, including Ontario, Quebec and the Maritime Provinces, has produced in the past more sheep than were consumed locally, and exported annually some thousands of head. While there has been very little variation in the numbers produced in the country, the exports of sheep have continually declined, as the following figures indicate:

Total sheep exported:—

Calendar year 1908	67,701
Calendar year 1909	50,443
Calendar year 1910	5,584

Of these totals the following went to the United States of America:—

Calendar year 1908	37,469
Calendar year 1909	44,790
Calendar year 1910	2,482

The exports to the United States for the two previous years were:—

For five months ending March 31, 1906....	57,200
For twelve months ending March 31, 1907..	130,817

Sheep imported from the United States to Ontario:—

For twelve months ending March 31, 1911..	2,365
For three months from March 31, 1911, to June 24, 1911	14,276

The contrast between the years 1907 and four years later is outstanding. At that time the United States were buyers from Canada to the extent of 130,817 head and for three months only, in 1911, we buy from them 14,276. These figures are significant and indicate that consumption here is increasing out of all proportion to supply.

The figures given below show the comparative decrease in the number of sheep and the increase in price during the same period, in the province of New Brunswick:—

Year.	No. of sheep.	Prices received.
1901.....	125,546	\$1.50 to \$2.50 per head.
1907.....	71,470	4½c to 5c per lb.
1909.....	75,000	4½c to 5¼c per lb.
1910.....	75,600	5c to 5½c per lb.

The report states that there is a very decided shortage in the mutton supply from Ontario west to the Pacific coast and as the population increases disproportionately to the production of meats, the shortage is likely to become more pronounced in the future. During the fiscal year 1910-1911, besides importations from Ontario and the Maritime Provinces, 40,300 live sheep were imported into Western Canada for slaughter, and in addition to this, 2,744,990 lbs. of dressed carcasses were brought in from the United States of America, New Zealand and Australia, principally from the latter country. The dressed mutton is sold by the carcass at from 10c to 12c per lb., and if the quality is considered this must be recognised as a high price. It would seem to be natural to expect that instead of increased competition from these quarters less may be looked for in the future.

The United States at one time produced much larger quantities of meats than were required for home consumption and an extensive import business was carried on in consequence. Since the rapid increase in population and wealth and the decreasing range production the supply has dropped to a near level with the demand.

The commissioners conducting the investigation were impressed by the prominence given to agriculture and especially to live stock by the people of every class in Great Britain. Sheep take a prominent part in maintaining and increasing the productiveness of the land. On a total area of 120,678 square miles and with a population of

46,000,000 people, the United Kingdom maintains approximately 33,000,000 sheep. This means one sheep on every two acres of land and four to each five persons of the population. Even with such a large home production, 40 per cent. of which is estimated to be slaughtered annually, it is necessary to import large quantities of foreign and colonial meats. Statistics for 1909 show the importations of mutton and lamb as follows:— 8,131 live sheep and lambs; 193,479 cwt. fresh killed; 318 cwt. chilled, and 11,067,152 carcasses, frozen.

Taking a survey of the wool situation in Canada the Commissioners state that it has steadily decreased until there are now only two million sheep available for wool production. In the fiscal year ending March 31, 1910, the Canadian manufacturers imported 857,855 lbs. of wool from the United States, and again in the fiscal year ending March 31, 1911, they had imported 876,406 lbs. For both these lots they not only paid the prices received by the producer, but the additional cost of grading at Boston or Philadelphia. The exportation of wool from Canada in 1905 amounted to 2,400,559 lbs., a quantity which dropped to 1,137,099 in 1909. In the fiscal year ending March 31, 1911, the wool exportation from Canada reached a total of 1,196,924 lbs.

The following figures show the importation of wool into Canada during the last twelve years:—

1898	11,785,899 lbs.
1899	9,413,739 "
1900	8,054,699 "
1901	8,574,605 "
1902	10,360,738 "
1903	7,994,702 "
1904	7,339,369 "
1905	7,617,211 "
1906	6,311,837 "
1907	3,928,791 "
1908	6,129,216 "
1909	5,683,948 "

The report concludes with some recommendations in regard to the organization and systematic direction of the sheep industry.

INTERIM REPORT BY ONTARIO COMMISSIONER ON WORKMEN'S COMPENSATION.

IN June, 1910, Chief Justice Sir William Meredith, was appointed a commissioner by the Ontario government "to inquire and report as to the laws relating to the liability of employers to make compensation to their employees for injuries received in the course of their employment which are in force in other countries, and as to how far such laws are found to operate satisfactorily, and to cause to be prepared and report a bill embodying such changes in the law as in his opinion, should be adopted." During the past month, the following interim report was made by the commissioner to the Lieutenant-Governor of the Province:

No Final Recommendation.

"I have the honor to report that although considerable progress has been made in the prosecution of the inquiries which I was by your Honor's commission bearing date of 30th day of June, 1910, appointed to make "as to the laws relating to the liability of the employers to make compensation to their employees for injuries received in the course of their employment which are in force in other countries and as to how far such laws are found to work satisfactorily," I am as yet unable to make any recommendation for enacting in this province any of the provisions of these laws embodying changes in the law which in my opinion, should be adopted.

"A considerable volume of oral evidence has been taken and with the aid of the able and indefatigable secretary of the commission, a large mass of doc-

umentary evidence has been obtained and collated, including copies of the laws which have been enacted in the countries of Europe and North America.

Ontario Law Inadequate.

"Sufficient progress has, however, been made to warrant the statement that the law of Ontario is entirely inadequate to meet the conditions under which industries are now carried on or to provide just compensation for those employed in them who meet with injuries or suffer from occupational diseases contracted in the course of their employment.

"It is satisfactory to be able to say that there is practical unanimity on this point and that those who speak for the employers, concede the justice of the claim made on the behalf of the employees that the industries should bear the burden of making compensation.

"The employers, however, contend that the whole of this burden should not be borne by them, but that the employees should share it and suggest as fair contribution by the employees ten per cent. of the amount required to provide for the compensation.

"This contention is strenuously opposed by the employees who take the position that the whole burden should be borne by the employers.

Form of Legislation.

"The basic principle that the burden of providing compensation should be borne by the industries being conceded, the question arises as to what form the

legislation necessary to give effect to it should take.

"Those representing the employers who have appeared before me favor what is practically a plan of mutual insurance under the management of a board appointed by the Crown, that the industry should be divided into groups or classes and that an annual assessment should be made by the board to meet the claims for the preceding year, each group or class being assessed only for the compensation for injuries happening in establishments within it with a special additional assessment in all cases to provide a reserve fund.

Basis for Legislation.

"This plan seems to be favored by the representatives of labor organizations as will be seen from their statements as to the form which in their opinion the proposed legislation should take which was submitted to me—schedule 1.

"There being practically unanimity on the part of the employers and the employed as to the two main principles, it would seem to follow that they should form the basis for Provincial Legislation and as at present advised I shall be prepared to recommend a plan such as is at present proposed if after careful and thorough inquiry and examination I am satisfied that it economically sound and workable.

"There are yet to be considered many subsidiary, but very important questions and among them the following:

"1. To what industries or employments the law should extend and whether.

(a) As in most countries it should be limited to dangerous occupations;

(b) It should extend as it does under the British Act to the farming industry and to domestic servants;

(c) It should extend to establishments in which less than a stated number of workmen are employed.

"2. Whether there should be any and if so, what, "waiting period," that is, a period for which no compensation can be claimed, if the disability resulting from the injury does not last beyond it.

"3. Whether in and if so, what cases the employee should not be entitled to compensation; e.g.; where the injury is the result of serious and wilful misconduct on his part or drunkenness or violation of the law or of a rule of the establishment.

"4. Whether the compensation provided should be in lieu of the common law or other statutory right of the employee against his employer.

"5. How the Board should be constituted.

"6. Whether the decision of the Board should be final or subject to appeal and if appealable to what tribunal the appeal shall lie.

Cost of Administration.

Careful inquiry must also be made as to the probable cost of administration, and machinery must be provided for collecting the assessments and for the investigation and adjustment of claims and this machinery must be made as simple and inexpensive as possible.

"Whether or not use should be made of the municipal bodies for some of

these purposes is, I think, worthy of serious consideration.

"If the industries are to be divided into groups or classes, care will have to be taken in the selection of those which are to form each group.

"It will also be necessary that a scale be adopted according to which the industries are to be assessed, as this will, of course, vary according to the nature, of the industry and the hazard to which the employees are exposed. The preparation of this scale will require much consideration and must be entrusted to experts.

"It will be necessary also in order to

provide for claims during the first year that a special contribution be made, and to enable an estimate to be formed of the rate of this contribution, an investigation as to the pay rolls of the industries within the scope of the act and other inquiries requiring care and time will be requisite.

"I have thought it well to make these references to the work yet to be done and the principle points to be considered in order that the attention of those interested may be directed to them, and that they may be prepared to assist me by such suggestions as occur to them in the solution of the questions yet to be dealt with.

PRICES, WHOLESALE AND RETAIL, CANADA, MARCH, 1912.

I. WHOLESALE PRICES.

WHOLESALE prices on the whole were on practically the same level as in the preceding month continuing much higher than at the same period of 1911. The Department's index number stood at 134.2 for March as compared with 134.3 in the preceding month and 126.3 in the corresponding month last year. The numbers it will be understood, are percentages in each case of the average price level prevailing during the decade, 1890-1899, the period selected by the Department as the standard of comparison throughout its investigation into wholesale prices. Some 250 articles carefully selected to represent Canadian produc-

tion and consumption are included in the calculation.

Features of the past month have been a decline in dairy products and an advance in animals, meats, fruits and vegetables. The chief increases during the past year occurred in grains and fodders, dairy products, fish, fruits and vegetables, liquors and tobaccos, there having been a considerable decrease only in paints and oils.

The following table of the Department's index numbers, arranged by groups of commodities into which the investigation has been divided, shows the average price level for March, 1912, compared with that of the preceding month and with that of the corresponding month last year:—

TABLE SHOWING INDEX NUMBERS BY GROUPS OF COMMODITIES FOR MARCH, 1912.

More detailed information as to the price movement during March as compared with the preceding month is as follows:—

Grains and fodder. — Grains in Ontario on the average reached the same price level as in February, wheat and peas being steady, oats and corn higher, and barley and rye lower. Manitoba wheat rose from 95½c at the end of February to 99¾c during March, the quantity in the United States being estimated as much less than at the same time last year. Oats rose for the same reason. Barley was lower, demand from the United States being less. Flax fluctuated somewhat, but averaged about the same as in February. Hay remained firm at Montreal and Toronto, and car shortage was reported to have prevented larger supplies from being brought in from country points. Straw was also steady, while bran and shorts advanced \$2.00 per ton and were reported as difficult to obtain at the higher prices.

Animals and meats.—Butchers' choice cattle advanced 50c per cwt. at Toronto and Winnipeg. The British market had improved and supplies have not been heavy. Dressed beef dropped \$1.00 per cwt. early in the month, as cattle had fallen considerably during February from the high level in January. Veal was steady. Hogs rose steadily at Toronto from \$6.45-6.50 to \$7.35-7.45. Dressed hogs also advanced 25c per cwt. Bacon and hams advanced 1c at Montreal on account of the high price of hogs and an advance in England. Barrelled pork and lard were firm. Sheep advanced from \$4.50-5.00 to \$5.25-5.50 at Toronto and mutton was steady. Fowls were 2c higher and turkeys rose 1c.

Dairy products. — The feature of the month in this group was the great fall in the price of eggs. After the severe weather of January and February, with railways and country roads blocked with snow, when storage stocks were exhausted and large imports came from the United States,

large supplies of fresh eggs came on the market and the price fell at Montreal from 38-40c to 25-27c, and at Toronto from 37-40c to 24-25c. On the other hand butter advanced two cents in Montreal in the last week of the month as it was still scarce in spite of continued imports from New Zealand. At Toronto the price was steady. Cheese was steady with the market somewhat quiet.

Fish. — Prices in fish were well maintained, supplies were not heavy and demand was good throughout Lent. Salmon trout advanced at Toronto from 8½c to 8½-10c. Ae Canso, N.S., halibut rose from 10c to 12c.

Fruits and vegetables. — Prices of winter apples were steady, while lemons and oranges were higher. A severe frost in California destroyed half the crop of navel oranges and injured the quality of the remainder. Prunes and evaporated apples also advanced, the former being scarce and very firm, the latter somewhat easier in the month. Potatoes were steady at Montreal but advanced at Toronto. Turnips were also higher; Canadian onions were reported almost off the market. Canned vegetables were steady and some lines of canned fruits advanced, the market being good owing to the scarcity and high prices of fresh fruits and vegetables.

Miscellaneous groceries and provisions. —In the first week of the month Manitoba flour was advanced 10c per barrel by some millers in Ontario and later the advance became more general and extended to the Maritime Provinces. Lower estimates of the world's supply of wheat and the scarcity of Manitoba wheat in Eastern Canada were the causes. Sugar was 20c per barrel higher at the first of the month but was easier toward the close. Glucose had also advanced 10c per cwt. again. Oatmeal rose again in price, in sympathy with the high price and scarcity of oats.

Textiles. — Wool was steady and firm while raw cotton had risen from

9.90 on February 1st to 10.40 on March 1st. Manufacturers have bought heavily in Great Britain as well as in America and the price was somewhat higher later in the month. The decline in manufactured cottons continued. Raw silk was slightly lower, buying by manufacturers being light. Jutes and hessians were higher. Burlaps are scarce and prices are well maintained, the strike in the jute mills at Dundee having curtailed production. Flax products were firm.

Hides, leather, boots and shoes. — Hides were firm while slaughter sole and heavy upper leather advanced sharply. An advance in some lines of men's boots has been announced for the first of April, due to the increasing cost of raw material.

Metals and implements. — Prices in iron and steel remained steady but pig iron was scarce at Montreal and on account of the strike in Great Britain the opening of navigation may not afford relief and prices may rise. The iron and steel markets in the United States have improved greatly and some lines of steel have advanced. Considerable construction and building is expected in Canada, with a good demand for materials. Brass and copper advanced under a good demand and light stocks. Nickel fell 5c at New York and quicksilver rose to \$46.00 per flask. Silver has fallen somewhat from the high point in the middle of February. Spelter was lower in the beginning of the month but like tin and lead was very scarce at the close of the month.

Fuel and lighting. — No changes in quotations occurred but during the month both anthracite and bituminous coal became very scarce or impossible to obtain in some localities in Eastern Canada on account of difficulties of transportation from the United States and threatening strikes in both bituminous and anthracite coal mines there. The situation in soft coal was relieved at the close of the month.

Building materials. — The market for lumber throughout Canada was report-

ed favourable under a good demand for building. New Brunswick shingles advanced on account of scarcity but spruce deals remained at the same price, the market being overstocked in the United States and freights being high. Linseed oil and turpentine were still lower at the first of the month but a later advance at Savannah was reflected in a rise of 2c at Toronto, with stocks low.

House furnishings, drugs and chemicals were steady.

Miscellaneous. — Canadian hops were slightly lower with British Columbia hops higher at the coast and Bohemian hops steady at Montreal. Pulp, ground wood, mechanical, was \$1.00 lower as rains in the United States caused a decline in the demand there. The demand for newsprint, book and writing papers was better in the United States. Mills in Canada have been hampered by frost and stocks are low so that declines in prices are not expected as early in the season as usual. Raw rubber was higher again. Soap returned to the advanced prices from which it declined a few weeks ago, raw material being high. Starch advanced $\frac{1}{4}$ c for laundry grades and $\frac{1}{2}$ c for the lower culinary grades on account of the high price of raw material.

II. RETAIL PRICES.

THE feature of the month in the retail price movement was a very general decline in the price of eggs, due to the advance of the season. The severe weather in January and the early part of February with the heavy snowfall so curtailed the supply of fresh eggs that storage stocks were soon sold out and in March were off the market throughout Ontario, but imports from the United States and a good supply of fresh eggs when the cold abated caused a drop in price throughout the country. Though potatoes declined in some cities on the whole prices advanced considerably, notwithstanding heavy imports. The tendency in meats was upward, es-

OF CONSUMPTION, CANADA, DURING MARCH, 1912.

month preceding the present issue of the *Labour Gazette*, of the more important staple commodities entering statement is given of the rental of a representative workingman's dwelling of the better class in the every care has been taken to ensure that the quotations in each case refer to the same class of commodity, representative of every Province in the Dominion.

pecially in mutton and veal, though pork products were somewhat downward. There was a general advance in butter due to the high price and scarcity of feed. Coal was very scarce and rose in price at many cities in Ontario, Quebec and the Maritime Provinces, on account of difficulties of transportation and threatened strikes in the United States. Rentals were upward at a number of cities.

Notes on Retail Prices.

Beef.—Sirloin steak and medium chuck roast declined at Ottawa but advanced at Saskatoon, Sask., and Nelson, B.C. Sirloin steak was higher at Lethbridge, Alta., but lower at Three Rivers and Hull, Que. Chuck roast was higher at Moncton, N.B., but lower at Chatham, Ont.

Veal was cheaper at St. John's and Hull, Que., at London and St. Thomas, Ont., at Lethbridge, Alta., and Nelson, B.C., but was dearer at Saskatoon, Sask., and Edmonton, Alta.

Mutton.—The price of mutton advanced at Guelph, Ont., Saskatoon, Sask., Lethbridge, Alta., and Nelson, B.C., and declined at St. Thomas, Ont. and Edmonton, Alta.

Pork.—At St. John's, Que., both fresh and salt pork were higher but both were lower at Hull, Que., and St. Thomas, Ont. The price of fresh pork increased at St. Catharines, Ont., Saskatoon, Sask., and Edmonton, Alta. Salt pork declined at Ottawa and Chatham, Ont., and advanced at Saskatoon, Sask.

Bacon was quoted lower at St. John's and Hull, Que., at Ottawa and Stratford, Ont., at Winnipeg, Man., and Lethbridge, Alta. The price was higher at London, Ont., Saskatoon, Sask. and Edmonton, Alta.

Fish were higher at Halifax, N.S., Newcastle, N.B. and Montreal, Que., but lower at Orillia, Ont. Scarcity and the Lenten season were given as causes.

Lard.—The price of lard advanced at Westville, N.S., St. Thomas and Cobalt, Ont., Saskatoon, Sask., Edmonton, Alta. and Nelson, B.C. Decreases occurred at St. John's, Que., Montreal, Ottawa, London, Ont. and Nanaimo, B.C.

Eggs.—Both fresh and packed eggs declined at seventeen of the cities and fresh eggs alone were lower at twenty-six cities. Packed eggs were off the market in all the cities in Ontario except Ottawa, Belleville, Stratford and Cobalt and Port Arthur. Eggs advanced at Sydney, N.S., Sorel and St. John's, Que.

Milk was quoted lower at Belleville, and higher at Cobalt, Ont.

Butter.—Dairy and creamery butter both were higher in thirteen cities, dairy butter alone advanced at Sorel, Que., St. Thomas, Ont., at Nelson and Victoria, B.C., while creamery butter was higher at Cobalt, Ont., Winnipeg, Man. and Lethbridge, Alta. Decreases in the price of dairy butter took place at Montreal, Que., Belleville and Cobalt, Ont., creamery butter declined at Ottawa and both dairy and creamery butter were cheaper at Westville, N.S., Quebec, Que., Kingston, and Stratford, Ont. Scarcity was reported in many localities and bad country roads prevented larger supplies from being brought to markets.

Cheese.—The price of old cheese was higher at Sorel and St. Hyacinthe, Que., new cheese was higher at Hull, Que., and Berlin, Ont., while both old and new cheese advanced at Sydney, N.S. and St. Catharines, Ont., but declined at St. Thomas, Ont.

Bread.—At Port Arthur, Ont., the price of bread was changed from three loaves for 25c to two loaves for 15c.

Flour advanced at St. Thomas, Ont., Edmonton, Alta., and Nelson, B.C., declining at St. John's, Que., and Saskatoon, Sask.

Rolled oats were higher at Edmonton, Alta. but lower at St. Thomas, Ont.

Rice advanced at Toronto and Edmonton but declined at Sorel, Que.

Beans were higher at St. John, N.B., Port Arthur, Ont.; Brandon, Man., Edmonton and Lethbridge, Alta. The price declined at Saskatoon, Sask. and Nanaimo, B.C.

Prunes. — The price of prunes advanced at St. John's, and Sorel, Que., Belleville and Cobalt, Ont., Edmonton and Nanaimo, B.C.

Sugar.—Yellow and granulated sugar declined at St. John's, Que., Belleville, and Woodstock, Ont., and at Saskatoon, Sask., but advanced at Port Arthur, Ont. Granulated sugar was lower at St. John, N. B. and Brandon, Man.

Tea. — Both black and green tea were reported higher at Sorel, Que., and lower at St. Thomas, Ont. Green tea was quoted higher at Cobalt, Ont. and Saskatoon, Sask.

Coffee was steady

Potatoes. — The price of potatoes advanced in eighteen of the cities and declined in ten cities. Imports from Ireland and Scotland steadied the market considerably and kept the price from mounting still higher.

Vinegar and starch were reported higher at Saskatoon, Sask.

Coal. — Bituminous and anthracite coal advanced at Halifax as supplies were consumed and the possibility of a coal strike prevented more from being brought in. Anthracite coal was higher at St. John, N. B.; Quebec, Sorel, St. Hyacinthe, St. John's, Montreal, and Hull, Que.; at Kingston, Belleville, Cobalt and Port Arthur, Ont. The severe winter and difficulties of transportation were given as causes. Soft coal was higher at Woodstock and some industries were threatened on account of the scarcity. Similar conditions prevailed at Berlin and district and were reported from other centres.

Wood. — Hard wood was higher at Brockville and Peterborough, Ont., and soft wood advanced at St. John's, Que.

Coal was higher at Westville, N. S. and Saskatoon, Sask.

Rentals. — At St. Hyacinthe, Que., rentals were upward as there was a better demand for houses with sanitary conveniences, the population increasing with the building of new factories. At Sorel, Que., Kingston, Orillia and Berlin, Ont.; and at Saskatoon, Sask. the tendency in rentals was upward also.

TRADE DISPUTES DURING THE MONTH OF MARCH, 1912.

FEW great disturbances of industrial conditions through trade disputes occurred during March, the only one affecting more than two hundred employees being that of tailors at Toronto.

Analysis of Trade Disputes during the Month.

Number and magnitude. — The total number of trade disputes reported to have been in existence in Canada during March was fourteen, being three more than in February, and three more than in March, 1911. About fourteen firms and two thousand employees were in-

volved in these disputes, of which about one thousand employees were affected by the disputes which commenced during March.

Loss of time in working days. — The loss of time to employees through trade disputes during March was approximately 44,800 working days compared with a loss of 10,080 days during February, and a loss of 33,600 in March, 1911.

Trades affected by new disputes. — The following table shows the trades affected by new disputes and the number of employees in each group of trades:—

TRADES	No. of dis- putes	No. of em- ployees
Building.....	2	230
Metal.....	3	243
Clothing.....	1	550
Miscellaneous.....	1	58
Total.....	7	1081

Localities affected by new disputes. —

Four new disputes of the month occurred in the Province of Ontario, two in Manitoba and one in Quebec.

Causes of disputes. — The following were the causes of the new disputes of the month:—

CAUSE	No. of dis- putes
For increase in wages and other changes.....	1
Against reduction of wages.....	1
For shorter hours and other changes.....	1
Failure to reach new agreement.....	1
Refusal to itemize accounts of work.....	1
For change of pay-day and other changes.....	1
Against new rules and regulations.....	1
Total.....	7

Methods of settlement. — Of the fourteen disputes in existence during March, definite settlements were reported in four. In one the places of the strikers were filled, but the men claim that the strike is still on. The results in the disputes that were settled were all arrived at after negotiations between the parties.

Results of disputes. — One dispute ended in a compromise. In one the men's demands were partly acceded to, and in the other two disputes the men were successful in obtaining their demands.

Disputes which commenced Prior to the beginning of the Month.

The trade disputes in existence during March which began in previous months comprised strikes of structural iron workers at Toronto, Ont., moulders at Moncton, N.B., and Montreal, Que., machinists and boilermakers at Westport, Ont., and Edson, Alta., pulpmill

hands at St. George, N.B., cloak and garment workers at Toronto, Ont., and garment workers at Montreal, Que.

Strike of Structural Iron Workers at Toronto.

On February 19, forty-two structural iron workers in the employ of the Dominion Bridge Company at Toronto ceased work which was being done on the Canadian Pacific Railway office building. The men stated that they objected to risking their lives by working in the company of an incompetent person, who, they claimed, occupied a position of responsibility and was thus accountable for the safety of his fellow workmen. The Company on the other hand claimed that the men struck on account of the employment of men who did not belong to their union. At the close of the month no settlement of this dispute had been reported to the Department.

Strike of Iron Moulders at Moncton, New Brunswick.

Thirty iron moulders in the employ of the Record Foundry and Machine Company ceased work on January 27. A 20% increase was given the employees last year, and at the annual meeting this year it was decided to reduce the wages to the rate prevailing before the increase took place. A strike occurred of which no settlement had been reported at the end of the month.

Strike of Iron Moulders at Montreal.

On February 5, forty moulders in the employ of the Record Foundry and Machine Company of Montreal went on strike in sympathy with employees of the same company in Moncton, N.B. No demand of any kind was made by the men, and the dispute was left unsettled at the end of the month.

Strike of Machinists and Boilermakers of the Grand Trunk Pacific Ry.

No definite settlement was reported in a strike of machinists and boilermakers

of the Grand Trunk Pacific Railway which began on October 10, 1911, and extended from Westport, Ont., to Edson, Alta. The Company claimed to be no longer affected; representatives of the organization to which the men belong, however, maintain that the strike is still on. About 300 men were involved in this dispute.

Strike of Pulpmill Hands at St. George, N.B.

In the case of a strike of forty-two pulpmill hands at St. George, N.B., who stopped work on April 26, 1911, on account of the refusal of the employer to grant a demand for an eight-hour day instead of thirteen and eleven hours with an increase in the minimum wages, the company stated that work was being resumed by new men; the men, however, claim that the strike is still on.

Strike of Cloak and Garment Workers at Toronto, Ont.

On February 14, fifty-five men in the employ of the T. Eaton Company, of Toronto, were discharged for refusing to sew with machines the linings in women's coats. They claimed that this change in the method of finishing garments would deprive finishers of their work. On the following day 500 employees of the same Company, 200 of whom were females, were discharged for refusing to work. No settlement was reported at the end of the month.

Strike of Garment Workers at Montreal, Que.

On February 27, fifty-four garment workers in the employ of the T. Eaton Company, of Montreal, struck work in sympathy with employees of the same Company at Toronto, who were on strike. No settlement of this dispute was recorded during the month.

Strike of Cloakmakers at Toronto, Ont.

In reference to a strike of cloakmakers at Toronto in the employ of

Messrs. M. Pullan and Sons, a termination of which was reported in the February issue of the *Labour Gazette*, the Department has received a letter from the Company in which they state that the strike occurred primarily for the recognition of the union, which demand was refused, and that there was no dispute with regard to the adjustment of prices for the making up of garments and no cause for complaint with regard to the condition of the factory. The Company stated further that there was no agreement signed by either party, but that the employees returned to work on the conditions offered previous to the strike.

New Disputes.

The new disputes of the month comprised strikes of structural iron workers at Winnipeg, Man., carpenters at Brandon, Man., steel and iron workers at Ottawa, Ont., moulders at Hamilton, Ont., blacksmiths and helpers at Ottawa, Ont., tailors at Toronto, Ont., and hotel waiters at Montreal, Que.

Strike of Structural Iron Workers at Winnipeg, Man.

On March 9, two hundred structural iron workers in the employ of the Manitoba Bridge and Iron Company struck work owing to the posting by the Company of a new set of shop rules and regulations, to some of which the men objected, one in particular granting a Saturday half holiday only during the months of June, July and August. After a conference between the representatives of the men and the Company's officials, a compromise took place by which agreement the men were to have the Saturday half holiday from May till September.

Strike of Carpenters at Brandon, Man.

A strike of carpenters took place at Brandon on March 13, owing to the men's refusal to itemize accounts of work done as desired by the Superintendent. This dispute, which involved thirty employees, was terminated on

DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLE SERIES C, No. 137

TABLE OF TRADE DISPUTES DURING THE MONTH OF MARCH 1912.

Occupation	Locality	Alleged Cause or Object	No. of Firms or Establishments affected		Approximate No. of Employees affected.				Date of commencement	Date of termination	Result
			Directly	Indirectly	Directly		Indirectly

Moulders.....	Hamilton.....	Against reduction of wages.	1	14	"	1	No settlement reported at end of month.
Blacksmiths and Helpers	Ottawa.....	For increase in wages and other changes.....	1	50-60	"	22	27 10 per cent. increase granted.
<i>Clothing Trades—</i> Tailors.....	Toronto, Ont.....	Failure to reach new agree- ment.....	350	200	"	4	No settlement reported at end of month
<i>Misc. Trades—</i> Hotel Waiters.....	Montreal, Que.....	For shorter hours and other changes.....	1	60	"	2	No settlement reported at end of month. Company report strikers' places filled.

* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments af-
fected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense,
it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual
effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes pub-
lished in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the
carrying on of the industrial or business operations of the firm or establishments concerned. Mention, moreover, is not made of disputes involving less than six
employees, or of less duration than 24 hours.

March 18, when the men returned to work on the understanding that they would not have to itemize work.

Strike of Iron and Steel Workers at Ottawa, Ont.

A strike of employees of the International Marine Signal Company, Limited, occurred at Ottawa on March 16. The men demanded payment on Fridays instead of on Saturdays, payment for overtime irrespective of whether full week's time had been worked or not, and recognition of Saturday afternoon as a holiday. Work was resumed on March 20 when the following adjustment was made, according to the statement of the Company:—(1) men to be paid on any day desired except Friday, (2) overtime to be paid only after full week's time had been worked unless in case of illness, etc., (3) Saturday afternoon to be recognized as a holiday during the summer months, when time and one-half will be paid if men are required to work. One hundred and eighty employees were affected by this strike.

Strike of Iron Moulders at Hamilton, Ont.

Thirteen employees of the Bowes, Jamieson Stove Foundry struck work on March 1 on account of a reduction of twenty-five per cent. in their wages. At the end of the month no settlement of this dispute was reported to the Department.

Strike of Blacksmiths and Helpers at Ottawa, Ont.

Sixty men employed by the Ottawa Car Company went on strike on March

22. The cause of the dispute was a demand for increase in minimum wages, time and one-half for overtime, and a holiday on Saturday afternoons during the summer months and a nine-hour day. The men commenced work on March 28 after they had been promised an increase of ten per cent. and at the rate of time and a half for overtime.

Strike Tailors at Toronto, Ont.

On March 4, a strike of tailors occurred at Toronto. An agreement under which the men have been working expired on March 1, and attempts to reach a new agreement, involving certain changes in the working scale of prices, failed. Five hundred and fifty employees struck work. Since that time a number of firms individually have signed a new agreement and more than two hundred strikers have returned to work.

Strike of Hotel Waiters at Montreal, Que.

A strike of waiters occurred at the Windsor Hotel on March 2. The Company claimed that a number of grievances were presented to the head waiter and the employees struck because he would not sign an agreement without consulting the Managing Director. They also claim that the places of the strikers were all filled immediately. The employees, on the other hand, claim that the strike is still on. They complained that they worked long hours for insufficient payment, and also of the system of fines which were imposed upon them.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior.

THE total immigration to Canada during the eleven months from April, 1911, to February, 1912, inclusive, was 311,846, compared with 271,392 in the corresponding months of 1910-1911, an

increase of 15 per cent. Of the total arrivals during the eleven months, 194,388 compared with 164,486 in the corresponding months of the previous year. There was an increase in the number of arrivals from the United States from 106,906 during the eleven months ending February, 1911, to 117,458 in the eleven months ending February, 1912.

According to the Bureau of Railway Economics, railway employees in the United States received as wages for the fiscal year 1911 an amount greater by \$41,868,822, or four and three-tenths per cent, than they would have received had the 1910 rates of wages been in effect; and greater by \$69,297,678, or seven and four-tenths per cent, than they would have received had the 1909 wage rates been in effect. These results were obtained from the reports of railways over 500 miles long, which pay about 83 per cent of the total railway wages of the country. These calculations take account solely of the augmentation in the wage aggregate resulting from increases in rates of pay. Increases or decreases in wage totals due to variations in the number of employees are eliminated from consideration. The increases have accrued to all employees except general and other officers.

Notwithstanding an increase of 2,108

miles in the steam railway mileage of the United States, the number of employees on railways over 500 miles long was less on June 30, 1911, by 31,037, or 2.1 per cent, than on June 30, 1910. This is a decline of 252 employees per 1,000 miles of line, or 3.2 per cent. Switch-tenders, trackmen, telegraph operators, and trainmen are the classes in which there were the greatest decreases.—Bureau of Railway Economics.

Although for United States railways over 500 miles long the total number of employees on June 30, 1911, was less by 31,037, or 2.1 per cent, than the total number of employees on June 30, 1910, the total compensation paid to the total number of employees during the fiscal year 1911 was greater than the total compensation paid to the total number of employees during the fiscal year 1910 by \$49,976,216, or 5.0 per cent.—Bureau of Railway Economics.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF MARCH 1912.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of British Columbia, to the office of the factories inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 272 individual work people in Canada during the month of March,

1912, were reported to the Department of Labour. Of these 90 were fatal and 182 resulted in serious injuries. In addition, 13 fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before March, 1912.

In the preceding month there were 74 fatal and 178 non-fatal accidents reported, a total of 251, and in March, 1911, there were 104 fatal and 218 non-fatal accidents, a total of 322. The number of fatal accidents reported in

March, 1912, was therefore, sixteen more than in the preceding month and fourteen less than in March, 1911. The number of non-fatal accidents reported in March, 1912 was four more than in the preceding month and thirty-six less than in March, 1911. Altogether there were twenty more individual accidents reported in March, 1912, than in the preceding month and fifty less than in the same month of the preceding year.

The following is a record of the accidents of the month by industries and groups of trades:—

Nature of Fatalities and Accidents.

The disasters of the month involving more than one fatality were as follows:—

The wreck of the Gloucester fishing schooner *Patrician* near Jordan Bay, Shelburne, N.S., on March 15, caused the death of the captain and nine of the crew, ten of the crew escaping. In trying to make Shelburne harbor the ship lost its bearing in the darkness and thick weather and ran into the rocks, breaking up immediately. The

ten lost were washed from the ship before they could reach boats.

An explosion in a coal mine at Merit, B. C. on March 7 caused the death of seven miners and two others were seriously burned.

An accidental fall of coal in a mine at Sydney, N. S., on March 11, and another at Springhill, N.S., on the 22nd, each resulted in the death of two miners who were buried under the coal.

A runaway car in a mine at Westville, N.S., on March 26, jumped the track and struck and killed two miners and injured others, one of them seriously.

On February 29, near Fitzhugh, Alta., a premature explosion of dynamite on the construction line of the Grand Trunk Pacific Railway killed nine employees.

Record by Industries and Groups of Trades.

Agriculture. — There were seven fatal and six non-fatal accidents recorded during March, 1912, as compared with three fatal and seven non-fatal accidents during the preceding month and seventeen killed and eighteen injured during March, 1911. Of the fatal accidents two were due to caving in of gravel, one by caving in of a well, one by falling sawdust and another by falling lumber. One fatality was due to a straw cutting machine, and one to drowning.

Fishing and hunting. — There were ten killed and none injured during March as compared with one killed and none injured during February, and two killed and none injured during March, 1911. The ten fatalities were due to the wreck of a fishing schooner near Shelburne, N.S., and the fatality in February was due to gangrene from a shot in the leg while hunting, death ensuing on March 5.

Lumbering. — During March there were five fatal and six non-fatal accidents, as compared with one fatal and eight non-fatal accidents during February, and ten fatal and seventeen non-

fatal accidents during March, 1911. Of the fatal accidents two were due to machinery, and two to being struck by lumber, and the other to a fire.

Mining. — In this industry seventeen fatal and thirteen non-fatal accidents were recorded as compared with five fatal and eight non-fatal accidents during February, and eleven fatal and nineteen non-fatal accidents during March, 1912. Of the fatalities seven were due to a single explosion in a coal mine, four to falling coal, four to mine cars, one to another explosion, and one to a cave in.

Railway-construction. — Four fatal and five non-fatal accidents were recorded during March as compared with twenty-three fatal and eight non-fatal accidents during February. Of the fatalities three were due to explosions of dynamite and one to a fall of earth. Of the non-fatal accidents three were due to dynamite explosions and two to falling rocks.

Building trades. — There were five fatal and sixteen non-fatal accidents recorded for the month of March as compared with three fatal and eight non-fatal accidents during February, and five fatal and fifteen non-fatal accidents during March, 1911. Of the fatal accidents four were due to falls and one to a falling tile. The majority of the non-fatal accidents were due to falls.

Metal trades. — Five fatal and thirty-five non-fatal accidents were recorded during March as compared with four killed and forty-eight injured during February and eight fatal and fifty-three non-fatal accidents during March, 1911. Of the fatal accidents two were cases of electrocution, and three were due to being caught in machinery. Among the non-fatal accidents mishaps with machinery, falls, and explosions of gas, steam and gasoline were chief causes.

Woodworking trades. — There were one fatal and three non-fatal accidents recorded during March as compared with one fatal and six non-fatal acci-

dents during February and none killed and thirty-eight injured in March, 1911. The one fatality was due to being caught in machinery, as were two of the non-fatal accidents.

Printing and allied trades. — No fatal and only one non-fatal accident was recorded during March as compared with none in either class during the preceding month and one non-fatal accident during March, 1911. The one non-fatal accident was caused by the man's foot being caught in a hole in the floor.

Clothing. — No accidents were recorded during the month of March as compared with two non-fatal accidents during February and one non-fatal accident in March, 1911.

Textile. — No fatal and two non-fatal accidents were recorded during March as compared with three non-fatal accidents during the preceding month, and one non-fatal accident during March, 1911. The two accidents were due to being caught in machinery.

Food and tobacco preparation. — One fatal and six non-fatal accidents were recorded during March as compared with two non-fatal accidents during the preceding month, and one fatal and three non-fatal accidents during March, 1911. The one fatality was caused by a miller being caught in machinery.

Leather. — There were no accidents in this industry during March as compared with two non-fatal accidents during February and two non-fatal accidents during March, 1911.

Steam railway service. — Twenty fatal and forty-one non-fatal accidents were recorded during March as compared with twelve killed and twenty-one injured during February, and eighteen killed and twenty-six injured in March, 1911. Of the fatalities two were conductors, three engineers, two firemen, seven brakemen, one yardman, three shop employees, one sectionman and one car-checker. Of the non-fatal accidents four resulted in the loss of one or both legs, and one in the probable loss of the hand.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MARCH, 1912.

Trade or Industry	Locality.	Date.	Number.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	St. Agatha, Ont.....	Mch. 22	1	Crushed by frozen sawdust falling.
".....	North Easthope, Ont.....	" 16	1	Cave in of gravel
".....	Hagersville, Ont.....	" 18	1	Crushed by falling lumber.
".....	Mannville, B.C.....	" 16	1	Cave in of well.
".....	Dorchester, Que.....	" 21	1	Caught in a straw cutting machine
".....	Stratford, Ont.....	" 8	1	Cave in at gravel pit.
".....	West Coast, Vancouver I.....	" 4	1	Fell off log and drowned.
<i>Fishing and Hunting—</i>				
Fishermen.....	Shelburne, N. S.....	" 16	10	Perished in a storm.
<i>Lumbering—</i>				
Employee (sawmill).....	Anglelake, B. C.....	" 29	1	Struck by a piece of lumber.
".....	Cap de la Madeleine, Que.....	" 29	1	Mutilated by saw.
".....	Villeray, Que.....	" 5	1	Caught in a belt.
" camp.....	Near Jonquieres, Que.....	" 21	1	Caught in burning camp.
".....	Near Powell River, B.C.....	" 30	1	Struck by skidding log, cable broke
<i>Mining—</i>				
Miner.....	Merritt, B. C.....	" 7	7	Explosion in a mine.
".....	Springhill, N. S.....	" 22	2	By fall of coal.
".....	Sydney, N. S.....	" 11	2	By fall of coal.
".....	Cumberland, B.C.....	" 16	1	Explosion in a mine.
".....	Westville, N.S.....	" 26	2	Struck by mine cars.
".....	Fernie, B.C.....	" 29	1	Cave-in in mine.
".....	Hosmer, B.C.....	" 27	1	Crushed by mine cars.
Mine Driver.....	Nanaimo, B.C.....	" 12	1	Caught between cars and rib.
<i>Railway Construction.....</i>				
Labourer.....	St. Joachim, Qué.....	" 19	1	Explosion of dynamite.
".....	Brochets, Alta.....	" 27	1	Thawing out dynamite.
".....	Sydenham.....	" 22	1	Fall of earth
Employee.....	St. Joachim, Qué.....	" 21	1	Explosion of a stick of dynamite.
<i>Building Trades—</i>				
Carpenter.....	Thetford Mines.....	" 19	1	Fall from scaffold.
".....	Winnipeg, Man.....	" 4	1	Struck by falling tile.
Foreman, Builder.....	Montreal, Que.....	" 30	1	Fell Coft.
Carpenter.....	Montreal, Que.....	" 1	1	Fall from a scaffold.
Concrete Worker.....	Toronto, Ont.....	" 27	1	Fell down elevator shaft.
<i>Metal, Engineering and Ship-building trades—</i>				
Steel worker.....	Sydney, N.S.....	" 16	1	Electrocuted.
Machinist.....	Stratford, Ont.....	" 6	1	Caught in drilling machine.
Mechanic.....	Brantford, Ont.....	" 15	1	Caught in machinery.
Boilermaker.....	Vancouver, B.C.....	" 26	1	By falling boiler.
Lineman.....	Toronto, Ont.....	" 19.	1	Electrocuted.
<i>Woodworking trades—</i>				
Wood worker.....	Winnipeg, Man.....	" 27	1	Caught in machinery.
<i>Food and Tobacco preparation—</i>				
Miller.....	Brandon, Man.....	" 27	1	Caught in machinery.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MARCH, 1912.

Trade or Industry	Locality.	Date.	Number.	Cause of Fatality.
<i>Transportation—</i>				
<i>Steam Railway Service—</i>				
Conductor	Grondines, Que.....	" 6	1	Run over by train.
"	Hull, Que.....	" 8	1	Head-on collision.
Engineer	Birch, Ont.....	" 23	1	In head-on collision.
"	Hawarden, Sask.....	" 3	1	Derailment of train.
"	Richmond, Que.....	" 6	1	Fell under train in attempting to jump off.
Fireman	Birch, Ont.....	" 23	1	Head-on collision.
"	Three Valley, B. C.....	" 5	1	Rear end collision.
Brakeman	St. Alexander, Que.....	" 23	1	Struck by a train.
"	Pointe St. Charles, Que.....	" 2	1	Crushed by cars.
"	Louisburg, N.S.....	" 4	1	Crushed between cars.
"	Mimico, Ont.....	" 28	1	Fell from train.
"	Welford, N. B.....	" 26	1	Fell between cars.
"	Riviere du Loup, Que.....	" 21	1	Crushed by cars.
"	Charney, Que.....	" 1	1	Crushed by falling car, broke tackle.
Yardman	Hamilton, Ont.....	" 27	1	Struck by a train.
Mechanic	Stratford, Ont.....	" 6	1	Caught in machinery.
Carman	Drummondville, Que.....	" 4	1	Crushed under falling car.
Mechanic	Montreal, Que.....	" 9	1	Caught in machinery.
Sectionman	Windsor, Ont.....	" 8	1	Struck by train.
Car checker	Tillsonburg, Ont.....	" 26	1	Run over by a train.
<i>Navigation—</i>				
Deckhand	West Robson, B. C.....	" 13	1	Drowned, fell from barge.
<i>Miscellaneous Transport—</i>				
Teamster	Toronto, Ont.....	" 16	1	Struck by crank unloading car of coal.
"	Granby, Que.....	" 2	1	Kicked by a horse
"	Quebec, Que.....	" 9	1	Buried under falling coal.
"	Vancouver, B.C.....	" 20	1	Struck by an engine.
"	"	" 19	1	Fell under wheel of wagon.
<i>Public Employees—</i>				
Labourer	Toronto, Ont.....	" 9	1	Asphyxiated by sewer gas.
Policeman	Woodstock, Ont.....	" 5	1	Arm sprained.
Constable	Vancouver, B.C.....	" 25	1	Shot while arresting a man.
Construction foreman	Point Grey, B.C.....	" 27	1	Crushed under falling embankment.
<i>Miscellaneous skilled trades—</i>				
Sexton	Grimlesby, Ont.....	" 4	1	Explosion of acetylene gas.
Well-digger	Dunnville, Ont.....	" 6	1	Crushed by machinery.
Prospector	West Coast, Vancouver Island	" 2	1	Accidental discharge of gun.
Surveyor	Duncan, B.C.....	" 12	1	Fatally kicked by horse.
Timber cruiser	Campbell River, B.C.....	" 14	1	Drowned, canoe upset.
<i>Unskilled Labour—</i>				
Labourer	Fort William, Ont.....	" 2	1	Burned, died of injuries.
"	Lethbridge, Alta.....	" 21	1	Explosion of dynamite.
"	Cartierville	" 22	1	Fell from scaffold.
"	Verdun, Que.....	" 22	1	By fall of frozen earth.
"	Victoria, B.C.....	" 20	1	In a cave-in.
"	Glenwood, Ont.....	" 13	1	By a gas explosion
"	Fernie, B.C.....	" 6	1	By a fall of gravel.
"	Côte St. Michel, Que.....	" 5	1	Explosion of dynamite.
"	Montreal, Que.....	" 27	1	Fell down elevator shaft.
"	"	" 4	1	Fell from roof of building.

ACCIDENTS OCCURRING DURING FEBRUARY BUT ONLY REPORTED IN MARCH, 1912.

Trade or Industry	Locality.	Date.	Number.	Cause of Fatality.
Carpenter.....	Vancouver, B.C.....	Feb. 26	1	Struck by a crane
Electrical worker.....	Vancouver, B.C.....	" 26	1	Electrocuted.
Construction hands.....	Near Fitzhugh.....	" 29	9	Premature explosion of dynamit
Hunter.....	St. Evariste, Que.....	" 20	1	Gangrene from wound in leg.
Sectionman.....	Toronto, Ont.....	" 28	1	Killed by shunting engine.

Electric railway service. — Four non-fatal accidents were recorded during March as compared with one fatal and four non-fatal accidents during the preceding month.

Navigation. — There were one fatal and four non-fatal accidents during March as compared with one fatal and three non-fatal accidents during February, and seven killed and one injured in March, 1911. The one fatality was the drowning of a deck-hand who fell overboard. The non-fatal accidents were due to falls and being struck by goods.

Miscellaneous. — Five fatal and five non-fatal accidents were recorded during March as compared with four fatal and fifteen non-fatal accidents during February, and four killed and eleven injured during March, 1911. The five fatalities were severally due to a blow from a crank unloading coal, a kick from a horse, a blow from an engine, falling

under a wheel of a waggon, and to being buried under falling coal.

Public employees. — Four fatal and twelve non-fatal accidents were recorded during March as compared with three fatal and nine non-fatal accidents during the preceding month, and two killed and sixteen injured during March, 1911.

Miscellaneous trades. — Five fatal and sixteen non-fatal accidents were recorded during March as compared with three fatal and five non-fatal accidents during February, and five killed and seven injured in March, 1911.

Unskilled labour. — Ten fatal and seven non-fatal accidents were recorded during March as compared with eight fatal and nine non-fatal accidents during the preceding month and thirteen killed and thirteen injured during March, 1911. Falls, explosions, and caving in of earth were the chief cause of the fatalities.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during March, 1912:

DOMINION REPORTS.

Census.

Special report on Area and Population, 1912. Ottawa, King's Printer; pages, 172.

THE special report on the fifth census of Canada, taken June 1, 1911, contains statistics of the area and popula-

tion of the Dominion enumerated for provinces, territories, districts and sub-districts, together with comparative populations for the census taken in 1901.

The rural population in 1911 was 3,924,083 and the urban population 3,280,444. In 1901 the rural population was 3,369,018 and the urban population 2,002,297. The increase of rural population in the ten years is therefore 555,

65 and of the urban 1,278,147, which is 16.48 per cent. for the former and 3.83 for the latter.

Comparing the census years of 1911 and 1901, the population of Canada is shown by provinces and territories in the following table, together with the increase in the period of ten years and the increase per cent., viz.:—

Provinces.	1911	1901	Increase	Increase per cent.
Alberta.....	374,663	73,022	301,641	413.08
British Columbia.....	392,480	178,657	213,823	119.68

*Decrease

Tables of population are in process of compilation as to ages, origins, natives, religions, &c., and progress is being made with schedules of manufacture and agriculture.

Mines.

Preliminary Report on the Mineral Production of Canada during the calendar year 1911 by John Leish, B.A., Chief of the Division of Mineral Resources and Statistics. Ottawa: King's Printer, 1912; pages, 23.

Preliminary statistics, based upon direct returns from mine and smelter operators, show the total value production of minerals in 1911 to have been \$102,291,686, a falling off of \$4,531,937 or 4 per cent. when compared with the production of \$106,823,623 in 1910. The value of the metallic products in 1911 was \$46,197,428 as compared with \$49,48,873 in 1910, a decrease of \$3,241,455. The value of nonmetallic products in 1911 was \$57,384,750 which shows a decrease of \$1,290,492 from that of 1910.

The sub-division of the mineral production in 1910 and 1911 by provinces is approximately as follows:—

Province.	1910		1911	
	Value of production	Per cent of total	Value of production	Per cent of total
Nova Scotia.....	14,195,730	13.29	15,354,928	15.01
New Brunswick.....	581,942	0.54	611,997	0.60
Quebec.....	8,270,136	7.74	9,087,698	8.88
Ontario.....	43,538,078	40.76	42,672,904	41.72
Manitoba.....	1,500,359	1.40	1,684,677	1.65
Saskatchewan.....	498,122	0.47	618,379	0.60
Alberta.....	8,996,210	8.42	6,404,110	6.26
British Columbia.....	24,478,572	22.92	21,237,801	20.76
Northwest Territories.....	4,764,474	4.46	4,619,592	4.52
Dominion.....	106,823,623	100.00	102,291,686	100.00

Practically all of the metals with the exception of pig iron show a falling off in production in 1911 in so far as value is concerned. In the case of copper there was an increased output of the metal although the average price per pound was slightly lower than in 1910.

There is comparatively little change in the relative importance of the provinces as mineral producers—Ontario contributed nearly 42 per cent. of the total in 1911; British Columbia nearly 21 per cent.; Nova Scotia 15 per cent.; Quebec nearly 9 per cent. and Alberta 6 per cent. The order in 1910 was the same except that Alberta slightly exceeded Quebec in production. The provinces showing an increased output for the year are Nova Scotia, New Brunswick, Quebec, Manitoba and Saskatchewan; those showing a falling off being Ontario, Alberta and British Columbia. In Nova Scotia the coal industry was particularly active, and to that and the clay and stone industries is the increase in this province to be chiefly ascribed. There was a slight increase in New Brunswick. In Ontario the net result was a decrease of about \$1,000,000, being chiefly in nickel, copper and petroleum; on the other hand there were substantial increases in nearly all of the other products of which a great variety is obtained in this province. Manitoba produces gypsum, clay and stone products, and Saskatchewan coal and clays.

The exports of coal in 1911 were 1,-

500,639 tons, valued at \$4,357,074 as compared with exports of \$2,377,049 tons in 1910, valued at \$6,077,350, a decrease in exports of 876,410 tons.

Imports of coal during the year include bituminous 8,905,815 tons, valued at \$18,407,603; slack 1,632,500 tons, valued at \$2,090,796 and anthracite 4,020,577, valued at \$18,794,192 or a total of 14,558,892 tons valued at \$39,292,591. The imports of coal in 1910 were, bituminous 5,966,466 tons; slack 1,365,281 tons and anthracite 3,266,235 tons or a total of 9,872,924 tons.

Immigration.

Report of the Chief Inspector of British Immigrant Children and Receiving Homes for the year ending March 31, 1911, Part of Part II., Annual Report of the Department of the Interior, 1911. Ottawa: King's Printer, 1911.

That the importance and utility of juvenile immigration becomes greater every year is evident from the report of the Chief Inspector of British Immigrant Children and Receiving Homes for the fiscal year ended March 31, 1911. Canadian Farmers, especially in the older provinces, depend largely upon the help rendered to them by the youthful immigrants, in consequence of which the demand continues largely in excess of the supply.

The following condensed statement shows the number of juvenile immigrants who arrived in Canada during the years mentioned, together with the number of applications received by the various agencies during the same period:—

Fiscal Year.	Children Immigrated.	Applications received.
1900—1	977	5,783
1901—2	1,540	8,587
1902—3	1,979	14,219
1903—4	2,212	16,573
1904—5	2,814	17,833
1905—6	3,258	19,374
1906—7 (9 months) ..	1,455	15,800
1907—8	2,375	17,239
1908—9	2,421	15,417
1909—10	2,422	18,477
	21,456	149,302

The task of selecting suitable home and situations for these young people would appear to have been conducted on the whole with reasonable caution.

Mr. Smart states that visits of inspection have been paid at the various receiving and distributing branches during the year. On each occasion he has observed on the part of those in charge of nearly all of these centres of activity a sympathetic and untiring interest and consideration for the welfare and success of their wards. The result of his observations shows these children to have been exceedingly free from diseases or other ailments than those incidental to childhood. In a total of 1707 children reported on as to health, 1658 were in the enjoyment of excellent health. 37 were in fair or good health and 12 were reported on as in poor or unsatisfactory health. Every year is adding to the list of those who are making a success of life in this country. They are well received and treated; there is no lack of employment for them, while the remuneration is considerably more than they would receive in the country of their birth.

Commission of Conservation.

The Prevention of the Pollution of Canadian Surface Waters, Ottawa. The Lowe-Martin Company Limited, 1912.

In a reprint of a series of articles written by Mr. T. Aird M. Murray, member of the Canadian Society of Civil Engineers, the author deals with the necessity for the prevention of the pollution of Canadian surface waters. It is pointed out that Canada has to depend more upon its waterways and water courses for its domestic supply than most other countries and that generally as compared with other populated countries Canada presents more favourable conditions with reference to such waterways. Typhoid fever is acknowledged to be a waterborne disease and according to the medical adviser of the Commission of Conservation, the two countries which represent the highest typhoid rates, viz., Canada and the

United States are practically dependent upon waterways for their domestic supply. With a view to collecting data in regard to the number of sewerage systems in Canada which discharge into waterways, a committee of the Canadian Society of Civil Engineers sent out question forms to municipalities all over the Dominion. Sixty-four places reported combined sewerage systems, thirty-eight separate systems and sixty-four no sewerage; thus making a total of 102 sewerage systems reported. Of this number, eighty-nine reported discharges into fresh water and thirteen into salt water unfit for water supply. Of this number, only eighteen places reported any kind of attempted purification, and twelve of them were limited to tank treatment for the removal of solids only. Apart, however, from these returns to the Society, there are several places which have of late entered into the practical question of modern sewage purification and have such works now under construction. Another year will see at least twelve modern sewage disposal installations completed in the East and the West, and this number will probably be constantly added to.

NOVA SCOTIA REPORT.

Inspection of Factories.

Fourth Annual Report of Factories Inspector for year ended September 30, 1911. Halifax: King's Printer, 1912; pages, 61.

That a marked improvement is noticeable in all matters coming under the factory laws is evident from the report of the Inspector of Factories for Nova Scotia for the year ended September 30, 1911. The report deals with, accidents, protection, ventilation, sanitation, child labour, complaints, fire escapes and Workmen's compensation in its relation to factory inspection.

The number of accidents reported during the year was 902, of which 12 were fatal, 273 severe and 617 slight. As compared with those of last year, these figures show an increase, but it is

not necessary to suppose that they represent an increase in the percentage of workmen injured. The railways in connection with some of the large plants are dangerous, being accountable for five of the fatal accidents in the Province and a number of the serious non-fatal ones. Several serious accidents have happened to foreign workmen, the cause being attributable to the fact that they either did not understand English at all or understood it very imperfectly. The purchase of machinery with the latest protection devices attached is increasing yearly. The Workmen's Compensation Act which came into operation during the year, though it has not, perhaps, been long enough in force to show any distinctive features in its relation to factory inspection, will probably assist in the prevention of accidents. The factories, according to the report of the inspector, require much that is desirable in the way of proper ventilation, yet considerable thought is being given to the subject by some of the employers. A great improvement in sanitation is also noticeable in many of the factories. The importance of having sufficient exits in case of a fire or panic has not been overlooked, and fire escapes have been ordered wherever necessary. During the year three employers were summoned for employing children under the legal age, two in Halifax and one in New Glasgow. A fine of twenty dollars was imposed in each of the Halifax cases and one of ten dollars in the New Glasgow case. The publicity given to these prosecutions has effected an improvement regarding care on the part of employers, before engaging young persons to work.

The report of the Factories Inspector states that manufacturers appear to be enjoying a fair share of the general prosperity. Skilled labourers, especially in the metal and building trades, have been kept steadily employed, and there were times when sufficient mechanics could not be had.

ONTARIO REPORT.

Game and Fisheries Department.

Fifth Annual Report of the Game and Fisheries Department of the Province of Ontario for the twelve months ending 31st October, 1911. Toronto: King's Printer; pages, 193.

The fifth annual report of the Game and Fisheries Department of Ontario

gives statistics, reports of inspectors wardens, overseers, and deputy wardens and information on matters in connection with the administration of the Department. The following table gives the quantities and values of some of the more important kinds of fish caught in the different districts of the Dominion during the year 1910:—

DISTRICT	Herring Salted	Herring Fresh	Whitefish Salted	Whitefish Fresh	Trout Salted	Trout Fresh
	bbls.	lbs.	bbls.	lbs.	bbls.	lbs.
Lake of the Woods and Rainy River.....			1,200	663,556		43,120
Lake Superior.....		801,500		281,170	8,416	2,304,431

Values.....	\$2,8380	\$445,431.95	\$24,340	\$401,543.40	\$114,290	\$585,152

SASKATCHEWAN REPORT.

Grain Crops and Live Stock.

Bulletin No. 29 of the Statistics Branch of the Department of Agriculture of the Province of Saskatchewan for 1911. Regina: King's Printer, 1912; pages, 30.

The final report on Grain Crops and Live Stock of the Province of Saskatchewan gives a review of the season of 1911, showing the harvest to have been a good one in spite of the unfavourable conditions which prevailed. While the gradé was low, a great quantity was threshed and the price for lower grades showed an advance on previous years.

The total production of the four principal grain crops is shown to have been 212,710,363 bushels in 1911, or 67,825,513 bushels over the previous year. This was grown on 8,602,455 acres or 1,220,390 acres over 1910. This total production includes \$96,796,588 bushels of wheat (including 89,280 bushels of fall wheat) which was raised on an acreage of 5,232,248 or 567,414 over last year.

The total acreage under oats is \$2,192,806 or 110,199 over last year. On an average yield of 45 the total production is 98,676,270 bushels or 35,360,975 bushels over the previous year. The increase in the average yield over 1910 is 45 as against 30.40 the previous year or 14.6 bushels per acre.

Compared with 1910 there is an increase in the acreage under barley of 6,599, while there is an increase in the yield of three and two-fifths bushels per acre, giving a total production of 6,859,804 as against 5,859,018 bushels in 1910.

Flax shows the largest increase of all grains; the previous year's record, which was also large, being more than doubled. The acreage under flax in 1911 was 932,408 or 536,178 over 1910. The average yield which is 11.13 also exceeds that of the previous year and brings the total production up to 10,377,701 bushels or 7,333,563 bushels more than in 1910.

The report states that the rush of spring work will, in many instances, necessitate leaving the balance of the

1911 crop until after the 1912 crop has been put in the ground, and that whether the onthreshed balance will be worth threshing by the time that farmers can get at it will depend to a large extent upon weather conditions in the spring.

The following figures show Saskatchewan's total production of small grains in 1911 compared with that of the leading grain growing states of the Union:—

	Total grain production
Saskatchewan.....	212,710,363
Illinois.....	166,022,000
North Dakota.....	154,623,000
Iowa.....	148,573,000
Minnesota.....	146,862,000
Wisconsin.....	97,527,000
Kansas.....	83,435,000
Nebraska.....	78,346,000
Washington.....	71,877,000
Michigan.....	70,556,000
South Dakota.....	35,051,000

According to the shipping receipts at the Winnipeg stock yard the number of horses, including those brought in by settlers and horses imported for breeding purposes, shipped to points in Saskatchewan and further west, was 19,064, a decrease of 4,802. While there would appear to be no diminution in the demand for horses, the decrease would indicate that western breeders are recognising the importance of the home market and are putting forth greater efforts to meet the demand. There was a marked decrease in the number of cattle exported during 1911 from the west. This is partly accounted for by the heavy shipments of the previous year and by the successful competition of South American chilled meat in the British markets. The sheep receipts show an increase but this was due chiefly to shipments from the States. There was also a decrease of over 6,000 in the number of hogs received at the Canadian Pacific Railway yards and this decrease was still further accentuated by shipments from the east to the number of 5,276.

BRITISH COLUMBIA REPORT.

Mines.

Preliminary Review and Estimate of Mineral Production for year 1911 by Wm. Fleet Robertson, Provincial Mineralogist. Victoria: King's Printer, 1912; pages, 29.

A preliminary review and estimate of the mineral production of British Columbia for the year 1911 shows the total value of the production to be about \$3,165,250 less than that of 1910, and less by a different amount than that of each other year since 1905. The report states that the curtailment of output is attributable for the most part to the effects of the strike of coal mine employees in the Crows Nest District, South-east Kootenay. The suspension of work at the mines and coke-ovens lasted for practically two-thirds of the year, and prevented production of coal and coke during that period to an extent that involved a decrease in value from East Kootenay alone of nearly \$3,000,000. British Columbia's proportion of the mineral production of the whole of Canada is comparatively large, being nearly twenty-seven per cent. of the total value of the production of the Dominion during the last twenty-six years. The total value of the production for 1911 amounted to \$23,211,816 as compared with a value of \$26,377,066 in 1910. The decrease is made up as follows:—

Decrease in metalliferous minerals.....	\$1,544,415
Decrease in coal and coke	2,120,835
	<hr/> \$3,665,250
Less increase in building materials, etc.	500,000
Net decrease in year's production	\$3,165,250

QUEENSLAND REPORT.

Labour, Factory Inspection, etc.

Report of the Director of Labour and Chief Inspector of Factories and Shops for the year ended June 30, 1911.

The report of the Director of Labour of Queensland states that all classes of industries throughout the State are in a prosperous condition, the factories in many instances being unable to cope with their orders through scarcity of

labour, and consequently a great amount of trade is diverted to some of the other States. In the building and kindred industries, the supply of bricks, sawn timber, and such like material does not keep pace with the need of rapid creation of suburban residences and works of greater importance in the cities and town throughout the State. This condition may be due as much to insufficiency of up-to-date plant as it is to scarcity of labour, but when taken in conjunction with the meagre supply of competent artisans progress is considerably retarded, and many building ventures are in abeyance until more favourable opportunities arise.

The reports received from Labour Agents each month during the year are practically uniform in recording the satisfactory condition of the agricultural and pastoral industries. In the mining industry a certain amount of slackness is observable in some places, whilst in others the demand for miners is much in excess of the supply, but taking the industry as a whole, it is evident that it is in a prosperous state when viewed in its relation to employment of labour.

In reference to the supply of and demand for labour throughout the twelve months ended 30th June, 1911, the following table shows that, out of 11,496 persons registered, 8,722 or 75.87 per cent. were found employment. This percentage is 9.05 per cent. higher than that of last year, also 952 more persons were registered and 1,675 more persons sent to employment.

The following is a summary of the year's transactions:—

	1910 Six mos. ended 31st Dec.	1911 Six mos. ended 30th June	1910-1911 Twelve mos. ended 30th June
Registration of persons seeking employment.....	5,477	6,019	11,496
Number found employment.....	4,427	4,295	8,722
Percentage of number registered found employment	80.83 p.c.	71.35 p.c.	75.87 p.c.

UNITED STATES REPORT.

Bureau of Statistics.

Thirty-fourth annual report of the Bureau of Statistics of Labour and Industries of New Jersey, 1911.

The report, for the year ended October 31st, 1911, of the Bureau of Statistics of New Jersey contains three parts, the first of which deals with statistics covering the operations of factories and workshops for the year 1910. The second part relates to Employment, Working Hours and Wages on Steam Railroads of New Jersey, Cost of Living, Statistics of the Fruit and Vegetable Canning Industry and the Industrial Insurance System of Germany. The third part is an industrial chronology of New Jersey, containing the year's record of Accidents to Workmen While on Duty, Changes in Working Hours and Wages, the Loss of Factory Property through Fire, New Manufacturing Plans started during the Year, and the Enlargement of Establishments already in Existence, Strikes and Lockouts, and the Organization of New Trades Unions.

The average number of wage earners in the manufacturing industries in the State was 302,265 in 1910, 74 per cent. of whom were men 16 years old and over. This represents an increase of 22,914 over the average number employed in 1909. The average yearly earnings per employee was \$531.94 as compared with an average of \$516.57 in the previous year.

The presentation of the second part of the report shows the magnitude of the railroad interests centred in New Jersey. For the fiscal year ended June 30, 1911, there were 45,311 persons employed on the 1,969 miles of railroad in the State. The average number of days employed by such persons during the year was 301, the average number of working hours per day being 10.2. In the previous year the average number of days worked was 293. The average yearly earnings per employee was \$720.62, an increase of \$57.43 over the average yearly earnings for the previous year.

ious year. 1,984 employees were injured during the year on the railroads and 79 deaths resulted from injuries. The number of deaths in the previous year was ten in excess of this number.

The total number of serious accidents in the State during the twelve months ending September 30, 1911, is shown to have been 1,118, of which 340, or 34.4 per cent., resulted in death either at the time of occurrence or shortly thereafter. Minor injuries were received by workmen to the number of 738.

For the year ending September 30, 1911, the total number of fires in industrial plants was 106, and the total aggregate loss amounted to \$1,302,860, with two factory fires from which no report of damages was received. During the previous twelve months there had been 117 factory fires, resulting in a total loss of \$2,853,041; the losses for 1911 were therefore \$1,550,181 less than was shown by the record of 1910.

A table dealing with strikes and lockouts from October 1, 1910 to September 30, 1911, gives the total number of strikes that occurred during that period as 74. 17,886 persons were involved in these strikes and the aggregate number of working days lost was 115,982. Twenty-five strikes ended in favour of the employees; they were partly successful in eleven, while the remaining thirty-eight ended in failure. Twenty-one strikes, or 28.4 per cent. of the total number that occurred, were for increased wages, thirteen, or 17.5 per cent., were against the discharge of fellow workmen. In the previous twelve months the number of strikes was 112, so that a decrease of 38, or a small fraction less than 34 per cent. is recorded for the twelve months ending September 30, 1911.

The Forestry Wealth of Canada.

Part VII., Annual Report of the Superintendent of Forestry for the year 1910-1911. Ottawa: King's Printer; pages, 1,333.

The annual report of the Superintendent of the Forestry and Immigration

Branch of the Department of the Interior gives some interesting statistics relating to the wood products of Canada. About 2,896,000,000 cubic feet of wood are cut annually in the forests of Canada. One-half of this is used for firewood, three-tenths for lumber and shingles, one-tenth for poles, posts and rails. The total value, at the point of production, of the annual forest products of Canada is at least \$166,000,000. This is \$22.44 for every person in the country, March 31, 1909.

Lumber is Canada's most valuable forest product. There were cut in 1909 about 4,900,000 board feet of lumber, worth at the mill \$80,700,000. Two-fifths of the lumber of Canada is produced in Ontario, one-fifth in British Columbia, and one-fifth in Quebec; New Brunswick and Nova Scotia together make up the greater part of the remaining fifth, and but proportionately small quantities are manufactured in Saskatchewan, Manitoba, Alberta and Prince Edward Island. The per capita lumber production in Canada in 1909 was about 684 board feet, in the United States 470 board feet. The report states that it is probable that with an increased demand due to forest depletion in other countries, with the development of transportation system to northern forest regions, now inaccessible, the forest production of Canada will still further increase even though it has already reached proportions which under present systems of administration the forest of this country cannot permanently support.

The forest products of Canada are more valuable each year than any of the field crops, are nearly twice as valuable as the total mineral products, and are over five times as valuable as the total of inland and ocean fisheries. About 2,330,000,000 shingles, worth \$4,400,000, were manufactured in 1909. Two-fifths of the shingles manufactured are produced in British Columbia, almost one-fifth in Quebec; the remaining two-fifths are supplied chiefly by New Brunswick and Ontario.

It is estimated that in addition to the

sawmill waste used for fuel, about 15,000,000 cords of firewood, valued at \$45,000,000, are consumed yearly in Canada. There are used each year about 400,000 poles over twenty feet in length, and about 110,000,000 posts and rails, of a total value of \$11,000,000. Nearly 95 per cent. of such poles are cedar, mostly eastern white cedar. The cut of pulpwood for 1909 was nearly 1,700,000 cords, valued at \$10,000,000. Over one-half of the pulpwood domestically manufactured is manufactured in Quebec, about 30 per cent. in Ontario, 14 per cent. in New Brunswick and 4 per cent. in Nova Scotia. Nearly all the pulpwood exported and about 70 per cent. of all the pulpwood produced in Canada is cut in Quebec.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

QUEBEC CASES.

Violation of Alien Labour Act.

FOLLOWING a strike of waiters in the employ of the Windsor Hotel, Montreal, on March 2, five actions were instituted against the Windsor Hotel Company Limited for violation of the Alien Labour Act by assisting and encouraging the immigration into Canada of waiters from the City of New York. The cases were heard by Mr. Recorder Weir, Montreal, whose judgment was delivered on March 27. The Recorder found that the Alien Labour Act had been violated in four cases, and imposed a penalty of \$50 in each case. The notes of judgment in this matter are as follows:

Recorder's Court for the City of Montreal.

W. W. Hinton, plaintiff vs. The Windsor Hotel Co. Ltd., defendant.

NOTES OF JUDGMENT.

Five actions have been taken against

the Windsor Hotel Company, Limited for violating the Alien Labour Act by assisting and encouraging the immigration into Canada from New York of A. Maina, Albert Donnerstag, Emile Karsten, Thomas Lyons and Alphonso Alberti, alleged aliens and foreigners, to perform labour and service in Canada.

The Alien Labour Act is a retaliatory one, and in the present instance it is alleged and proved in the manner required by the Statute that the United States is one of the foreign countries that has enacted laws restricting and prohibiting the importation of labourers from Canada. The economic wisdom of legislation of this kind which does not pretend to be justified upon considerations of the health, ability or good character of those excluded, or upon consideration of the general public welfare, is perhaps doubtful. I am concerned, however, with the purely legal aspects of the complaints before me and find that, except in the case of Alberti which I dismiss, the essential allegations are sufficiently proved.

It appears that on Saturday afternoon the 2d March instant, a number of waiters employed in the Windsor

Hotel went on strike. Their places were filled, in five instances, by importations from New York. The efforts of Counsel for the prosecution have failed to connect the management or the directors of the Hotel with any record in the Company's books of these importations; but it has been shown that the head waiter, Benaglia, to whom the duty of engaging new waiters was entrusted, knew that in four of these cases at least, the waiters came from New York. These four waiters, being called to testify, have each shown that they saw notices posted in the office of the International Geneva Association at New York, informing them that six waiters were wanted for the Windsor Hotel, Montreal, at once; that they were engaged at \$30.00 per month; that their transportation was paid for them; that they were enjoined not to speak to each other on the way hither, so as not to attract the attention of the immigration officers; that their clothing was all put in one trunk with the same object; that identifying slips or cards were given them; that arriving at Montreal they were directed to the Windsor Hotel and handed their slips or cards to Benaglia, the head waiter; and that they were engaged by him, and entered upon their duties at the Windsor Hotel. There can be no question that Benaglia knew that these men came expressly from New York and as there is no denial of the payment of transportation, the conclusion is irresistible that there was such an "assistance" and "encouragement" of imported foreign labour as to constitute a violation of the Act. As to whether these men were aliens in the sense of the Statute, I have no doubt. Their origin and place of residence as disclosed by the proof establish this, and no counter proof of British or Canadian citizenship has been offered.

There is an exception in the Act in favour of skilled workmen of foreign countries, and I have been asked to decide whether a waiter comes under this category. Some of the waiters called deny it. "You may be a shoemaker to-

day and a waiter tomorrow" says one. It is admitted that this does not apply however, to waiters trained in Europe. I shall not attempt to solve this question, seeing that the exception relates only to some new industry not at present established in Canada.

I agree with the contention of defendant that the advertisement mentioned in the Act must contain a promise of employment, if any presumption of a contract in violation of the Act is sought to be established (*R. v. Disney* 14 Cr. Ca. 152) but I base my finding on the facts which accord with sec. 2, making it unlawful for any person to prepay transportation in any manner, or to assist, encourage or solicit in any way, the importation or immigration of any alien or foreigner into Canada under agreement, parole or special, express or implied, to perform labour or service of any kind in Canada.

For every violation of these provisions a penalty not exceeding \$1000 and not less than \$50 is prescribed, and the penalty when recovered shall be paid to the Minister of Finance. As I am far from being convinced that any public or private interest has been seriously affected by the acts of the defendant I impose the minimum penalty in each of the four cases mentioned. I grant no costs as the Act is silent on the question of costs.

I may add that the contracts made by these waiters with the Windsor Hotel Company, by operation of law, are null and void.

(Sgd.) R. STANLEY WEIR,
Recorder of Montreal.

The Recorders Chamber,
Montreal, March 27th, 1912.

A true copy of my notes of judgment.

(Sgd.) R. STANLEY WEIR,
R. of M.

Accident to workman not in course of his work.

The Corporation of the City of Sherbrooke was sued for damages by the

widow of a blacksmith employed by the Corporation. The plaintiff alleged that the deceased man was killed by touching a live wire and that the City was responsible owing to want of care and in not notifying its employees of the danger to which they were exposed. In the Superior Court, on March 25, it was held that the accident in question did not happen to the deceased in the course of his work and the corporation were therefore not liable in damages for the accident in question.

ONTARIO CASES.

Accident to Miner caused by falling rock.

The plaintiff, Siven, brought an action against the Temiskaming Mining Company to recover \$3,000 damages for injuries sustained by the falling of a large rock down a shaft, alleged to be due to defective condition of the works, within provisions of the Ontario Mining Act, 1908, s. 164, s.-ss. 17, 31. The statement of claims alleged that the plaintiff while in the employment of the defendants as a miner, on the 13th of January, 1910, was engaged in running a drill at the bottom of a shaft in the defendants' mine, when a piece of rock came down the shaft and severely injured him. Claim was made that the injury was caused by a defective condition of the ways, works, etc., of the defendants' mine whereby the same were left unprotected or insufficiently protected; that the defendants were further negligent by a failure to have its working parts examined by a competent officer, and in not ascertaining that they were in a safe and efficient working condition, and in not sufficiently protecting the head of such shaft as required by section 164, sub-sections 17 and 31 of the Mining Act, 1908, and amendments thereto.

The defence stated that competent servants had been employed and supplied with proper material and appliances for the efficient maintenance of the defendant's premises, plant and business, and that the negligence, if

any, was that of a fellow-servant, that the defendants' system of carrying on their business was the best and safest which they had been able to discover or devise, and that the plaintiff voluntarily assumed the risk; as to the claim under the Workmen's Compensation Act, that no notice of the claim had been given within the time specified in the Act, nor had the action been brought within the period therein prescribed.

Chief Justice Falconbridge held that the defendants failed to comply with s.-ss. 17 and 31 of s. 164 of the Ontario Mining Act and gave judgment for plaintiff for \$2,500 and costs.

An appeal by the defendants in the Court of Appeal was heard by the Honourable Sir Charles Moss and ended in favour of the plaintiff after trial by jury, who delivered the following opinions:

- (1) That the plaintiff's injuries were caused by the negligence of the defendants.
- (2) That such negligence consisted of not providing proper pentice over the manhole.
- (3) That the defendants failed to comply with sub-section 31 of section 164, by examining the working shaft, level and stope, in order to ascertain that they were in a safe and efficient working conditions.
- (4) That the plaintiff was not guilty of negligence which caused the accident, or which so contributed to it that but for his negligence the accident would not have happened.

Non-payment of Wages.

An important judgment was delivered at Hamilton on March 7th when the Bowes, Jamieson Company were charged by five moulders with refusing to pay wages that were due them. The evidence for the complainants, on behalf of whom Mr. J. G. O'Donoghue acted, was that they were employed by the firm for some time, but that, upon finding that they could make more

money labouring than moulding, they decided to leave. The firm thereupon refused to pay them not only the wages for part of a week then not payable, but also for a whole week which had become due and payable but had not been paid. The employers proved that the men had been notified that if they left the employment without giving a week's notice they "forfeited all wages due." The magistrate would not give to this notice the wide meaning claimed by the employers, but what was likely to have been the meaning given to it by the men themselves, that the words "wages due" did not include wages due and payable, but wages credited to the men day by day, and he held that for the broken week the men had forfeited their wages, but not for the week which had expired. Following the decision it is reported that the Company stated that the amounts given by the claimants as being due them did not tally with the amounts shown in the timekeeper's books. This matter was left for the men to settle with their foreman. Judgment was given for part payment of the amounts claimed by the men, a ruling which appeared to give satisfaction to the complainants.

Injury due to negligence of fellow-workman.

The plaintiff Magnussen was working for L'Abbe and Bengsten in construction of a trench in Port Arthur when he was struck on the head by a pole falling into the trench which produced concussion of the brain. The case, tried before a jury, was dismissed by Chancellor Boyd on the 28th of June, 1911, and a new trial without a jury was ordered by the Divisional Court. It was held by Mr. Justice Clout that the defendants were guilty of negligence in not taking proper precautions in shoring-up the sides of the trench or adopting other means to prevent the cave-in which caused the pole to injure the plaintiff. He further held that the defendant's foreman was guilty of negligence which caused in-

jury to another man and the defendants were liable for such negligence. Judgment was given in favour of the plaintiff with costs of action of former trial and appeal to Divisional Court.

SASKATCHEWAN CASES.

Injury to person crossing street railway track.

The plaintiff Carleton was thrown out of his buggy and injured by a collision with one of the street cars belonging to the city of Regina when he attempted to cross the avenue on which the rails were held. He said that he saw the car when it was turning into the avenue (i.e., when it was 630 feet from the point of collision), and thought he had plenty of time to cross, and, when he came to the avenue, did not look to see if the car was coming, and did not see it until it was upon him, and did not hear it approaching.

The motorman said that, as he approached the crossing, he reduced the speed from eight miles to six miles per hour, and sounded the gong; that, when he was almost a car-length from the crossing, he noticed a man driving on the intersecting street and approaching the car line; that he sounded the gong and put on the brakes; that he believed the man would come close to the car tracks and stop there until the car had passed; that, as soon as it appeared that the man was going to cross in front of the car, he (the motorman) released the brakes, reversed the lever, and applied the power so as to send the car in a backward direction; but that, notwithstanding this, the car could not be stopped until after the fender had come into contact with the hind wheel of the plaintiff's buggy.

It was held:

(1) That the motorman in charge of the car was both careful and efficient; that the car was being driven at an ordinary and reasonably safe rate of speed; and that, on approaching the crossing, the motorman sounded the

gong in the usual manner, and followed that up by sounding it violently when he observed the plaintiff approaching the rails.

(2) That it was the plaintiff's duty to look to see if a car was approaching before attempting to cross; and his failure to look was negligence on his part. (*Danger v. London Street R.W. Co.*, 30 O.R. 493, and *O'Hearn v. Town of Port Arthur*, 4 O.L.R. 209 followed).

(3) That the motorman was justified in not reversing until it appeared that the plaintiff was not going to stop; there was nothing to indicate to the motorman that the plaintiff was not going to follow the ordinary and prudent practice of stopping before reaching the car line; and, as soon as it appeared that the plaintiff was bound to cross, the motorman did all in his power to avert a collision; and was in no way guilty of negligent conduct. (*Fewings v. Grand Trunk R.W. Co.*, 14 O.W.R. 591, and *Jones v. Toronto and York Radial R.W.C.*, 25 O.L.R. 158, referred to).

(4) That the collision was the result of the plaintiff's own negligence; and his action to recover damages for his injuries must be dismissed.

Damages for breach of contract.

Municipal Construction Company v. City of Regina.

The defendants, a city corporation, being desirous of constructing certain sewers and waterworks, drew up specifications and asked for tenders in the spring of 1907. The plaintiffs tendered for all the work to be done. The city council, by two resolutions, passed on different days, accepted (a) the plaintiffs' tender for sewer construction and (b) the plaintiffs' tender for waterworks construction. The defendants notified the plaintiffs of the resolutions immediately after each was passed. A formal contract was drawn up and executed by the plaintiffs and by the mayor and city clerk on behalf of the defendants under their corpor-

ate seal. This contract covered both classes of work. The second resolution provided that the mayor and city clerk be authorized to execute a contract for the waterworks construction. There was no such clause in the first resolution; and no authority was given to the mayor and city clerk to execute any contract other than as set in the second resolution.

On the 18th of July, 1907, the city engineer notified the plaintiffs to proceed with the work of laying sewer-pipe as per their contract, and on the 22nd of July he notified them to begin laying the water pipes. The plaintiffs began the work specified, but did not finish it within the two months stipulated in the agreement. At the expiration of the two months, no complaint, so far as the evidence shows, was made to the plaintiffs on account of their not having completed their work within the specified time. The plaintiffs continued working until the end of December, when, without permission from the defendants, they suspended operations owing to the cold weather. About one-half of the work had been completed by this time, and for this the plaintiffs were fully paid by the defendants.

On the 1st of June, 1908, the council adopted a report of the waterworks committee which recommended that the city engineer be instructed to notify the plaintiffs that, owing to their failure to complete their work in 1907, it had been resolved to cancel the said contract "as regards the waterworks therein specified and unfinished." The plaintiffs were notified to this effect on the 5th of June and no further work was done by them under their contract.

The plaintiffs claimed damages for breach of contract by the defendants in refusing to allow them to finish the construction of the work for which they had received the contract.

The defendants counterclaimed for damages for the non-completion by the plaintiffs of the work. They claimed under two separate items: (1) to be entitled to \$10 per day as liquidated dam-

ages from the time the plaintiffs should have, according to the contract, completed the waterworks, until the 5th of June, 1908, when the plaintiffs were notified that their contract was cancelled; (2) general damages for the failure of the plaintiffs to complete the contract and the additional cost to the defendants rendered necessary by such failure.

It was held:

(1) That there were two separate contracts — not an entire contract; and the cancellation by the defendants of the portion relating to the waterworks was not a cancellation of the remainder; and it was open to the plaintiffs to go on and complete the sewers, which they did not do.

(2) That the defendants were not justified in cancelling the waterworks contract. If time ever was of the essence of the contract, it was waived by the defendants; and it was, therefore, the duty of the defendants to notify the plaintiffs that they must complete within a specified time,

which must be a reasonable time; and, not having done so the defendants were liable in damages for the loss sustained by the plaintiffs.

(3) That the measure of damages was the difference between the contract price for the unfinished portion of the work and the cost necessary to complete that work in one month, which would be a reasonable time.

(4) That the defendants were not entitled, upon their counterclaim, to recover the sum of \$10 per day, which the contract provided should be deducted from any moneys which might be due to the plaintiffs for each day that the work remained uncompleted after the specified time of completion; as the defendants had not made the deduction, they had waived their right to collect the \$10 per day.

(5) That the defendants were entitled, upon their counterclaim, to recover general damages from the plaintiffs for the breach by the latter of the sewer construction contract by failure to complete the work.

THE

LABOUR GAZETTE

MAY, 1912.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF
APRIL, 1912.

1.—GENERAL SUMMARY.

A SOMEWHAT backward spring affected conditions adversely in the agricultural and lumbering industries, though the season compared favourably with last year, especially in Western Canada; in other respects the month was a good one from the standpoint of labour. Farmers were late in getting on the land, the threshing of last year's crops being completed in many instances only during April, and operations in this line hindering seeding for a time. In the lumbering industry the drives will be somewhat late. The mining industry continued active in most parts and outputs were heavy. Manufacturing in most branches was actively carried on in all parts of the country and many cases are reported of factories working overtime and taking on additional hands. Railway traffic during the month was heavy. Work in nearly all the skilled trades was briskly carried on. The inactivity of last month in the outdoor building trades gave way to active operations; the season's building operations appears likely to exceed that of any previous year in Canada. Immigration and trade returns show an increase over those of March and also over those of April, 1911. Domestic trade in wholesale and retail branches continued firm. Railway construction work was being resumed extensively and operations in this line helped to absorb a great part of the newly arrived immigrants.

The Department's index number of wholesale prices, which covers over 250 articles selected as representative of production and consumption and is designed to reflect general industrial and trade activity as well as cost of living, stood at 135.4 in April as compared with 134.2 in the preceding month, and 126.4 in April a year ago, being the highest point in the records of the Department back to 1890.

Changes in Wages and Hours of Labour.

With the opening of the season of active outdoor employment there was a movement in nearly all parts of the country towards a higher rate of wages than existed during 1911. The demand for men in the agricultural, mining and lumbering industries was good and a high rate of wages was maintained. In the building trades many arrangements were made for schedules to go into effect during April, and there was a general tendency towards a higher rate in this line. The following is a statement, by industries and groups of trades, of the more important changes, concerning which a report was made to the Department during April, 1912:

Agriculture. — Farm help was in good demand and wages ruled high for experienced men.

Building. — The following are the more important changes with regard to

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

which detailed information was received in the Department during April. Painters (80) in Quebec, received an increase of 2½ cents per hour; granite cutters (20) in Brownsburg, Que., were given a similar increase on the same date; masons, bricklayers and plasterers (30) in Brockville, Ont., had their wages raised 25 cents per day; stone masons and bricklayers (60) in Guelph, Ont., were given an increase of 1½ cents per hour.

Textile. — Mill hands (105) in Hamilton, Ont., were given a five per cent. increase in piece work prices on April 15.

Street railway employees. — Workers in this class (400) at Winnipeg, Man., were given an increase of 1 cent per hour; employees (20) of the St. Thomas Street Railway were given a similar increase, an exception being made in the case of track foremen who were given an increase of 2 cents per hour.

General transport. — Teamsters in Hamilton, Ont., raised their charges 13 cents per hour on the 15th of April; the same class in the employ of the Hendrie Cartage Company in Hamilton were given an increase of \$2.00 per month, the change affecting seventy employees; corporation teamsters (45) in Berlin, Ont., were given an increase of 5 cents per hour on April 1.

Civic employees. — Firemen (3) in St. Thomas, Ont., were given increases ranging from \$80 to \$160 per year on April 1; corporation labourers (200) in Berlin, Ont., were given an increase in wages; garbage collectors (4) in the same city were given an increase of \$50 a year; city labourers in Niagara Falls, Ont., received an increase of 25 cents a day, the change taking effect on the first of the month.

Interruptions to Industry.

An increase in the number of disturbances of industrial conditions through strikes occurred during April according to reports received in the Department of Labour. A strike involving a

large number of railway construction hands took place in British Columbia at the end of March and continued during April. None of the disputes commencing during the latter month, however, were of unusual importance from the standpoint of the number of workers thrown out of employment.

Among industrial establishments, etc., destroyed by fire or through other causes during April, as reported in the press of the Dominion, the following may be mentioned:—

New Brunswick. — Establishment (O'Leary and Montgomery), Chatham, loss \$7,000; warehouse at Courtenay Bay, loss \$2,000; residence and barns with contents at Kingsclear; cotton mill and contents at St. John, loss \$10,000.

Quebec. — Fish and fruit warehouse at Beauport, loss \$10,000; powder factory at Beloeil destroyed by an explosion, loss \$15,000; stores and residences at Hull, loss \$30,000; at Montreal the following fires occurred: barns and stables with contents of live stock of the Mont La Salle College, loss \$20,000; Reformatory shop building, loss \$10,000; warehouse, loss \$25,000; shovel manufacturing establishment, loss \$2,000; store, loss \$3,000; 3 business blocks, loss \$50,000; brewery drying-tower, loss \$15,000; foundry (75 men temporarily out of employment); photo-engraving establishment with other stores. Residences and barns with contents at Plessisville; office building (People's Chambers), loss \$20,000; village of St. Damase destroyed by fire, origin of which was the explosion of a gasoline lamp; Boys' Farm and Home, Shawbridge, loss \$5,000; residence and barns with contents at Trois Pistoles.

Ontario. — Workshop at Belleville, loss \$5,000; drill-shed at Bowmanville, loss \$3,000; sampling plant at Cobalt, loss \$5,000; foundry at Deseronto, loss \$50,000; business block at Port William, loss \$132,000; also a skating rink, loss \$30,000; can factory at Hamilton, loss \$15,000; facing mills at Hamilton, loss \$10,000; hardware store at Kingston, loss \$40,000; car barns at Oshawa, loss \$20,000; planing mill at Peterborough, loss \$6,000; cork factory at Port Colborne (partially destroyed), loss \$2,000; at Toronto the following fires occurred: rolling mills, loss \$125,000; warehouse, loss \$30,000; metal manufacturing establishment, loss \$10,000.

Manitoba. — Business section of Elkhorn, loss \$55,000; pool-room at Morden, loss \$3,500; at Winnipeg the following fires occurred: planing mills, loss \$200,000; business block, loss \$20,000, and a piano warehouse, loss \$17,000.

Saskatchewan. — Flour mills at Estevan, loss \$15,000; garage at Moosejaw, loss \$10,000; motion-picture theatre at Saskatoon, loss \$5,000.

Alberta. — Motion-picture theatre at Medicine Hat, loss \$5,000; barns and stables with contents at Pincher Creek.

British Columbia. — Business block at Nelson, loss \$7,000; art gallery at Nelson, loss \$5,000; drying kiln at New Westminster, loss \$15,000; lumber mills with partial stock of lumber, Rock Bay, loss \$80,000; at Vancouver the following fires occurred: grocery store, loss \$6,000; and business block, loss \$232,000.

Conditions in the Industries and Trades.

Conditions of employment during April in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

A somewhat backward season prevented agriculturists from making good progress with seeding operations until late in the month; conditions, however, were more favourable in this line than they were at the corresponding time last year. The soil is on the whole in good condition and seeding was general during the middle part of April. Farmers began to complete the threshing of last year's crop as soon as the snow disappeared and a somewhat unusual feature in the agricultural industry was seen in an endeavour to carry out the operations of seeding and threshing simultaneously. Reports from all parts of the country indicate that the grain threshed during April came through the winter in surprisingly good condition. Fall wheat generally wintered well and looked promising at the beginning of the month; later frosts and winds damaged it so seriously that in many cases fields have been ploughed up for re-seeding. Fodder was scarce during the month and the price of mill feed, hay and straw was high. The maple sugar industry has been good in some parts, though in others a small output is recorded, less than that of last year.

In the Ottawa district an effort to arouse a keener interest in agriculture has taken the form of a potato growing contest for boys of twelve to eighteen years of age of farms of not less than fifty acres in area. Valuable cash prizes have been offered to the successful competitors. The Central Canada Exhibition to be held at Ottawa is exciting more interest than in previous years, the

increased prize list being partly responsible for this.

During the month a number of British agriculturists for the Canadian Pacific Railway Company's farms in Alberta have reached their destination. These men are experienced in mixed farming and are calculated to have a good influence of western farming generally. The farms to which they have gone are from eighty to three hundred acres in extent. Each farm has fifty acres broken and seeded, and barns and houses have been erected by the company. The newcomers who are the first of a number coming to Canada under the above conditions have ten years in which to pay for their farms.

Fishing.

Quietness prevailed in this industry during April. The lobster season opened in the Maritime Provinces, but catches were light and drift ice hampered operations considerably. A fair run of spring salmon is reported in British Columbia. The cannery industry is re-opening and prospects are favorable for the season.

An important announcement has been made that a large cannery and fertilizer plant will be erected on the shore of Tuck's inlet, a branch of Prince Rupert Harbour, which concern will employ more white fishermen than has been usual with canneries in that district. An extensive addition will also be made to the fishing fleet in order to provide a greater supply of halibut and cod.

Lumbering.

Backward weather delayed work on the drives and the saw-milling season was late in commencing. The opening up of the spring demand for building materials caused great activity in the lumber industry and saw mills and pulp factories were busy at the middle of the month in British Columbia and generally in the East by the end of the month. A steady improvement is noted in the demand from the United States for eastern products. The Canadian

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the of employment in the several trades and industries throughout the Dominion. The table has reference only to phenomena treated under separate headings in *The Gazette*. In tabulating the information in question, the tions were favourable or unfavourable, as follows: (1) fair, active and very active; (2) quiet and very

As employed are divided into two groups, the order indicating in each, the degree to which general conditions are affected.

[illegible]

trade, too, continues firm and a prospect of extensive building gives promise of a good year's business in the east. In the west the industry is not quite so active. The Ontario trade is satisfactory. In the St. John Valley, N.B., the opening of river navigation gave an impetus to operations. A good season's trade is expected, the South American market being active.

The total shipments of lumber from New Brunswick to transatlantic ports during 1911 and three previous years were as follows:—

	Tons.	Deals, &c., sq. ft.
1908..	720,804	306,445,056
1909..	822,272	325,213,639
1910..	847,845	327,519,421
1911..	725,443	285,981,379

A recent decision in the Supreme Court of British Columbia in a suit entered for damages for timber losses sustained by fire originating from sparks from railway engines is of interest to owners of timber adjoining railway lines. It establishes the fact that a fire which originates on a company's right-of-way, even after it has spread from the original starting place is still within the responsibility of the company and that they are liable for damages caused by such fire.

Mining.

The coal mining industry continued much the same as during March. Conditions in the east were active; in the western mines, however, a slackness in some quarters prevailed. Great activity was reported in the Glace Bay and Sydney Mines districts, while the Dominion Collieries had a good month, with prospects bright for the future. By the opening of Sydney Harbour considerably earlier than last year the shipping of coal began very early in April and the Maritime and American markets were supplied early. In the Cobalt district mining in all its branches was brisk and prospects for summer work are bright. The re-opening of a large

asbestos mine in the Thetford Mines District at the end of March gave employment to nearly 400 men during April. All the mines in that district are now working steadily. The asbestos trade is good and mine owners and merchants are looking forward to a prosperous season.

Manufacturing.

General activity prevailed in most parts of the country. Numerous enlargements of factory premises bear testimony to the fact that increased developments in the various industries are contemplated. Exceptional activity was seen in the machine and iron industries in which some of the factories were working overtime; boot and shoe factories continued to maintain or even increase their briskness of the previous month.

The annual meeting of the shareholders of the Steel Company of Canada was held recently and the financial statement and the directors' report were presented. The directors stated that they were able to show a net profit of \$1,373,522 after \$404,453 was spent on repairs, machinery and improvements. Attention was drawn to the fact that while the demand for the products of the Company was good, it was forced to sell at a low profit on account of competition and regulations regarding rebates on iron for the manufacture of agricultural machinery. Provision had been made for the issue of \$650,000 bonds, making a total bond issue of \$7,500,000. Extensive additions to the plant were expected to be made in the near future.

Announcement has been made that a "Made in Canada" exhibition train will tour Western Canada to give information to the western dwellers regarding the quality and variety of Canadian made goods. The institution is expected to help to show how much the development of manufacturing industries in the West will mean to the Canadian people in general and in particular to the Western farmers. Winnipeg man-

ufacturers have requested two cars, a request which gives a partial indication of industrial development in the middle west.

The eleventh annual meeting of the shareholders of the Nova Scotia Steel and Coal Company was held at New Glasgow on the 27th of March. Regarding operations in the steel industry during the year 1911 the report of the General Manager shows that the Company increased the volume of its business and trade, and marketed larger quantities of finished steel products than in any year of its past history. Conditions in the market, however, largely offset the advantages which this increased output would have given. The total quantity of coal mined by the Company was 780,468 tons, a decrease of about 60,000 tons from the previous year. This decrease was largely caused by a serious accident in the largest producing mine of the company, which caused a heavy falling off in the output for about nine months in the year. During the year 1911, a sum of \$3,044,903.03 was paid in wages. The average number of men employed throughout the year was over 5,500. There was a great difficulty in obtaining an adequate supply of ordinary labour throughout the year, due largely to the great amount of railway and other public work in progress in Newfoundland and Eastern Canada.

Railway Construction.

Considerable progress has been made in the various construction work going on in the country. It is stated that in spite of the relaxation of the immigration restrictions and the large influx of immigrants, railways and contractors are already finding it difficult to obtain an adequate supply of labour to carry on their numerous extensions. Much money will be spent on railway development in Western Canada during the year and employment will be provided for many thousands of men.

It is announced that the Canadian Northern Railway Company will under-

take the construction of the new freight yards to the east of Winnipeg; also that contracts have been let for the construction of 310 miles of new grade in the provinces of Alberta and Saskatchewan. The increase of freight traffic on the Canadian Pacific Railway at Fort William has made expansion necessary, and work is now progressing rapidly on the new freight shed on the Kaministiquia River. It is expected that this will be in readiness some time in May. The Canadian Pacific Railway Company are building a bridge across the Saskatchewan which will extend their lines greatly in the west and assist in developing a great part hitherto not opened up. The Grand Trunk Pacific Railway are laying steel west of Edmonton. It is understood that the Company will run a branch line north from Edmonton into this country.

General Transport.

Railway traffic during April was heavy in spite of the fact that navigation was late in opening. A shortage of cars was still experienced and hindered trade in several directions; conditions, however, in this respect show an improvement over those of last month. A great deal of wheat was moved from the west during April. A heavy export traffic was reported in the case of the Halifax and St. John ports, and extra shifts were necessary to handle the volume of trade. In the Montreal harbour a large new elevator with a capacity of nearly two million bushels will be ready for business, and shipping men anticipate a busy season. It was announced that the Canadian Pacific Railway Company, largely on account of the steadily increasing needs of the grain traffic in the West and the increased accommodation rendered necessary by the development of the country, have given an order for more than 200 engines and 12,000 box cars. The Company's line east of Port Arthur is also receiving attention which will enable it to handle trains more rapidly.

The total earnings of the Halifax

Electric Tramway Company, Limited, for the year ended December 31, 1911, amounted to \$502,399, as compared with \$477,109 in 1910, and \$447,579 in 1909. Net earnings were \$215,525, as compared with \$200,474 in 1910, and \$177,973 in 1909. Operating expenses were 51.97 per cent. of income, as against 51.94 per cent. in 1910 and 53.54 per cent. in 1909. Dividends were paid at the rate of 8 per cent. per annum, as compared with 7 per cent. the preceding year. The total number of passengers carried was 5,212,257, as against 4,848,767 in 1910.

A statement of the earnings of the Montreal Street Railway for March shows a substantial increase in all departments over the same period last year. The total earnings for the month were \$427,663, as against \$371,992 for March of last year, an increase of nearly 15 per cent. Net earnings were \$156,695, an increase of about 14 per cent. Earnings for the six months ending March 31st make an even better showing, the surplus being \$702,559, as against \$603,236 for a similar period last year.

The gross earnings of the Canadian Pacific Railway Company for the month of March, 1912, amounted to \$10,519,318 and the working expenses \$6,800,917, making the net profits for the month \$3,718,401, compared with net profits of \$2,383,866 in February.

The Trades.

Building. — Returns with regard to building permits in a large number of Canadian cities show a pronounced increase as compared with those of the corresponding month of last year. The permits issued in March in thirty-two of the principal cities of the Dominion exceed by more than a million dollars the amount of those issued during March of 1911. Skilled workmen in the building trades had a busy month, though a shortage of materials interfered with operations in some localities. The outdoor trades resumed work after the slackness of the winter*

Metal and woodworking trades. — Activity prevailed in these trades with a prospect of similar conditions for some time to come.

Printing and allied trades. — Employees in these trades were actively employed in nearly all localities.

Clothing trades. — Unrest among tailors and garment workers caused less briskness in these trades than would otherwise have been the case; boot and shoe workers continue to be very actively employed.

Textile trades. — Cotton and woollen mills continued active operations.

Leather trades. — Employment in the leather trades did not maintain its standard of activity of the preceding month in some localities; generally, however, employment was steady.

Food and tobacco preparation. — Workers in the branches of this trade had a good month; cigarmakers were especially active.

Miscellaneous. — Barbers and hotel employees were well employed, laundry workers were especially busy.

Unskilled labour. — Conditions in this line showed a marked improvement during April. Railroad construction and work on civic improvements gave employment to many and in some quarters there was a shortage of men.

Canadian trade and revenue. — During March, 1912, there was an increase of \$10,100,319 in the total value of imports entered for consumption into the Dominion of Canada over the corresponding month of 1911. During the twelve months ended March 31, 1912, there was an increase of \$85,484,558 over the corresponding period a year ago. The total value of domestic exports during March, 1912, showed an increase of \$4,616,515 over March, 1911. The total value of domestic exports during the twelve months ended March 31, 1912, showed an increase of \$15,907,304 over the corresponding period a year ago. During March there were increases of the domestic exports of the products of mines, fisheries, agriculture, manufac-

*A table showing the number of permits issued in March appears elsewhere in the present issue.

tures and miscellaneous merchandise, and decreases in the domestic exports of forests and animals and their produce. The accompanying table contains the latest official summary of Canadian foreign trade:—

Canadian Trade, March, 1912.

TOTAL IMPORTS ENTERED FOR CONSUMPTION IN THE DOMINION OF CANADA,				
	ENTERED FOR CONSUMPTION.			
	Month of March		12 Months ending March

Domestic trade.— Trade conditions continued normal during April. Wholesale and retail trade was good, though somewhat affected by the backward season. No special activity was in evidence. Collections were fair during the month and compared favourably with those of March. The volume of general trade shows a satisfactory increase over that of the corresponding month of last year. According to R. G. Dun and Company commercial insolvencies in the Dominion during April were fewer in number than in any month of the year, and also compared favourably with those of the corresponding period of last year. Total failures numbered 107 for \$745,622 against 115 failures for \$1,341,591 in the previous year. The total number of commercial failures

during the first quarter of 1912 was 429 as compared with a total of 367 during the first quarter of 1911. Of these, 279, or nearly two-thirds, occurred in the Provinces of Ontario and Quebec. Total assets amounted to \$2,178,573 and total liabilities were \$3,120,015.

The bank statement for March showed an increase of \$9,624,655 in paid-up capital over the previous month, the total at the end of March being \$120,072,899. Notes in circulation amounted to a value of \$95,918,404, an increase of \$2,659,263 over the previous month. Deposits in Canada, payable on demand, amounted to \$331,896,238, as compared with \$321,152,954 for February. Current loans in Canada amounted to \$815,948,308, an increase of \$22,094,761 over the previous month.

The Bank of British North America recently issued its report for the year

1911, the figures of which make it clear that it was a year both of increased business and enlarged profits. Deposits and current accounts at the close of the year showed an advance from \$32,070,246 in 1910 to \$36,067,709, an advance of nearly \$4,000,000, about 12 per cent. The profits of 1911 were \$632,117 as compared with \$554,942 in the previous year, an increase of \$77,175.

Canadian revenue. — Canadian revenue for the month of March, 1912 amounted to \$12,099,769.22 compared with \$10,363,520.65 in March, 1911. The total expenditure on capital account during March, 1912 was \$894,946.49 as against \$1,842,536.21 in March of the previous year. The items of expenditure during March, 1912, comprised \$1,864,770.49 on public works including Railways and Canals, and \$30,176.00 on railway subsidies.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST.

THE tenth annual convention of the Labour Educational Association of Ontario has been called to meet at Peterborough, May 24. The question of a Provincial Federation of Labour will be discussed.

Technical Education and Manual Training.

A resolution was recently unanimously adopted by the Legislative Assembly of the Province of New Brunswick that the Federal Government should appropriate annually for the next ten years the sum of \$4,000,000 a year to be expended solely upon Agricultural or Industrial Education, and that such sum should be paid over by the Federal Government to the Governments of each

Province of the Dominion in sums pro rata to their population, as shown in the census of 1911. It was further resolved that each Province pledge itself to expend such sum for Agricultural and Technical Education and should appoint one member of its Cabinet to make an annual report to the Federal Government showing in detail where and how such sums were expended.

Free Employment Bureau at Montreal.

The following table, details of which were supplied by the Free Employment Bureau established by the Provincial Government of Quebec, relates to the operations of the Bureau during the months of February, March and April, 1912.

	February			March			April		
	Male	Female.	Total	Male	Female.	Total	Male	Female.	Total
No. of employees wanted by employers	387	183	570	432	289	721	145	162	1307
No. of applicants for situations.....	435	24	459	523	36	559	547	18	555
No. of situations offered.....	308	23	331	397	35	432	526	29	555

Of the applicants for situations during the three months six were under the age of sixteen years.

Co-operation Notes.

The eleventh half-yearly report of the Workmen's Store Company at Dominion, N.S., shows that total sales during the past six months amounted to \$72,463, an increase of \$15,149 over the previous term. The eleventh half-yearly balance of the Inverness Co-operative Society shows sales amounting to \$21,357, an increase of \$1,913 over the previous half year. The Co-operative Union of Canada has been admitted as a member of the International Co-operative Alliance.

Economic Prizes.

In order to arouse interest in the study of economic questions, four prizes are offered for the ninth year through the generosity of Messrs. Hart, Schaffner & Marx of Chicago, Ill., for the best essay on the following subjects:—

1. Is a money trust possible?
2. How far is competition actually crippled to-day in American industries?
3. A study of various forms of combination.
4. Recent developments of the German Kartel.
5. A study of the industrial effects of the dissolution of the tobacco trust.
6. Methods of forcing employers to accept the demands of labour unions.
7. How far is the theory of trust regulation applicable to labour unions?
8. A study of the code of ethics peculiar to labour unions.

A first prize of \$1,000 and a second prize of \$500 are offered to contestants in Class A, which includes any American, while a first prize of \$300 and a second prize of \$200 are offered to con-

testants in Class B, which include only those who, at the time the papers are sent in, are undergraduates of any United States or Canadian college. The papers are to be sent in on or before June 1, 1913.

International Opium Convention.

An international convention for the gradual suppression of the abuse of opium and morphine, cocaine and similar drugs, was signed at The Hague on January 23rd, 1912, by representatives of Great Britain, Germany, the United States, France, Russia, Italy, Portugal, China, Japan, the Netherlands, Persia and Siam. The convention was signed by the British delegates, however, as applying only to the United Kingdom, British India, Ceylon, the Straits Settlements, Hong Kong, and Wei-hai Wei, the British Government reserving the right to sign or to denounce the convention separately in the name of any other of His Majesty's Dominions, Colonies, Dependencies or Protectorates.

The agreement provides that the contracting powers shall enact effective laws or regulations for the control of the production and distribution of opium, morphine, cocaine, etc., and shall prohibit or restrict the export or import of raw or prepared opium. It is also agreed that the contracting powers shall take measures for the gradual and effective suppression of the manufacture of, internal trade in, and use of prepared opium, unless regulations on the subject are already in existence.

On the recommendation of the Secretary of State for External Affairs, with the concurrence of the Minister of La-

bour, an Order in Council dated April 25th has been passed, approving of the adherence of Canada to this convention, and pointing out that the Act passed by the Dominion of Canada on May 19, 1911, entitled "An Act to prohibit the improper use of opium and other drugs," authorizes the framing of regulations which would be sufficient to enable the Dominion Government to conform fully to the convention.

U. S. Phosphorus Match Law.

On April 3, the United States Senate passed the phosphorus match bill of the American Association for Labour Legis-

lation by a practically unanimous *viva voce* vote. The House passed it March 28, by a vote of 163 to 31. It was signed by President Taft April 9.

Investigations of "phossy jaw," the occupational disease of match factory workers, led to the introduction of the bill in June, 1910.

The law prohibits the importation and exportation of poisonous phosphorus matches and places a prohibitive internal revenue tax on their manufacture within the United States. Drastic penalties are provided for violations of the law, which will be administered through the efficient federal internal revenue service of the Department of the Treasury.

II.—REPORTS OF LOCAL CORRESPONDENTS.

NOVA SCOTIA.

Sydney.

Labour conditions were unchanged from those of March and all works and industries which were busy in that month continued active during April. Shipping was slightly improved and Sydney harbour was opened by the help of an ice-breaker twenty days earlier than in 1911. Cold weather during the greater part of the month prevented the building trades from getting an early start. The heavy coast ice passed off early in the month but large strips of drift ice hung off the shore and prevented lobster fishermen from setting their traps. Business generally compares favorably with that of April, 1911.

The coal industry was active, all the collieries in the Glace Bay and Sydney Mines districts working steadily, and large outputs were obtained. The Dominion Collieries had a record output in March three of the collieries being up to within a few tons of their record in the busy summer season. Prospects for the rest of the year are very good.

The steel industry was active and everything points to a busy summer at

both the Sydney and Sydney Mines Steel plants. Railway traffic was fairly heavy during the month. The Sydney Ferry service opened on the 2nd of April and the shipping of coal from Sydney harbor began about the same date. Most of the coal shipped was to Halifax, St. John and Portland, as the St. Lawrence was not clear of ice, and the Maritime and American markets were supplied early. The foundation and other preliminary work for new business blocks and residences in Sydney were started as soon as the weather permitted but building operations are no further advanced than they were this time last year. If anything, building seems to be more backward.

Woodworkers in factories were well employed and outdoor labour generally had a fair month. The wholesale and retail trades did a large volume of business during the month. Unskilled labor has been plentiful at the collieries during the first four months of this year. Potatoes increased in price 15c per bushel. Eggs decreased 15c per doz. and veal 2c per lb.

The fishermen were busy getting their lobster traps and other gear ready for use when favorable conditions ap-

peared but very little coast fishing was done owing to drift ice off shore.

Westville.

Labour was well employed during April. There was a shortage in many lines, particularly in mining, where all who applied were given employment. There was also a good demand for skilled mechanics at the Trenton plant of the Nova Scotia Coal and Steel Company. The leading industries of this district which are coal and steel were active during the month with large outputs. The Canada Consolidated Clay Company have received a large order for brick and will begin to manufacture as soon as the necessary machinery is installed.

Freight traffic has been heavy on the Intercolonial Railway in this district during the past three months, and the pay-roll for March was exceptionally large for trainmen, owing to the amount of overtime which they had to work to move trains.

Halifax.

Labour generally showed an improvement over March. While the actual work so far begun on new building and altering operations is not as yet a factor in the improved conditions, still the increased activity was most marked. During the first three weeks of the month 29 building permits were taken out, representing a valuation of about \$25,000; but it was no indication of the real work in hand, nor the magnitude of some of the big contracts contemplated. Excavation work is progressing on a good portion of the burnt district, and one reason assigned for inactivity on others is that the owners have not satisfactorily made arrangements for their re-building or the disposal of the sites. One big contract finished during the month was the completion of the new quarters for the Halifax branch of the Union Bank of Canada.

The big biscuit factory being built by Moirs, Limited, is nearing completion, and will be occupied early in May. The

principal contracts awarded during the month were for a new \$35,000 school building, work on which began April 29, and a \$5,000 interior alteration. Several transfers of properties have been made and others are in progress looking to the acquiring of sites for business concerns.

Work along the waterfront has been actively carried on during April. With the arrival of steamer after steamer, carrying big freight and passenger lists, the resources of the port as to wharf space, transportation facilities and longshoremen have been taxed to the utmost. Several shipments of spruce deals to the United Kingdom were among the large amount of freight handled, and with better port facilities big shipments in the future are confidently looked forward to.

The manufacturing establishments fully maintained the good average of March.

Railroad construction on the Eastern Extension was pushed forward as well as climatic circumstances permitted. Branch lines of the Halifax Electric Tram Company also gave employment to quite a number of men, some of whom are working day and night; double tracking is the principal work.

Shelburne. — A steamer was launched on the 22nd April from the yard of Joseph McGill. She is 85 ft. long, 20 ft. beam, 9 ft. hold, and was built for the new Burrell Johnson Iron Company of Yarmouth, who will fit her out with machinery. She was named the "Stadium" and will be operated by C. T. White & Son, Apple River, U.S. A fishing schooner of 85 tons is also under construction in the same yard for Capt. J. W. Sarty, of Pleasantville, Lunenburg.

Amherst.

Labour conditions during April remained much the same as during the previous month. An exception is seen, however, in the building trade, which is beginning to get very active. Several new industrial buildings were un-

der construction and there is promise of a very busy year in industrial activity.

The fine weather during the latter part of the month has allowed the farmers an early opportunity to begin their work preparing for seeding. Fishermen also are making preparations for the season. Saw milling is quite active at present. Coal miners are actively engaged and things are running smoothly in this line in the district.

Manufacturing is exceptionally active, and the prospects are that the same conditions will exist for some time.

NEW BRUNSWICK.

Moncton.

Labour conditions during April showed considerable advance in activity over those of the preceding month. The weather being for the greater part fine and comparatively mild was very favourable towards the early resumption of outdoor enterprises. Building operations are quite brisk, and an increased demand for carpenters, masons and stonecutters is noticed. Builders are optimistic as to the outlook for the coming season and forecast a buiser one than that of last year. Painters, decorators and paperhangers are in active demand with supply inadequate. Civic corporation work has commenced, and several large contracts which will employ much labour have been let in connection with the waterworks extension and the laying of permanent sidewalks. Of the latter 28,480 sq. ft. are to be laid. With the exception of the foundry all manufacturing plants are actively operating. In the Intercolonial Railway shops much work is being done. In addition to the general repair work which is very heavy at present one first-class and two second-class Pullmans and a large number of new box cars have been constructed. The Moncton Tramways Electricity and Gas Company have installed the natural gas in the Abrams Machine Shop and in their own operating plant with highly satisfactory re-

sults. As soon as the frost is out the work of laying the pipes for the general delivery of the gas throughout the city will be rapidly pushed. Navigation between Point du Chene and Summerside, P.E.I., opened April 23rd, the S.S. Empress making her first trip on that date. Wholesale and retail trade have both been active. Considerable movement in real estate has taken place and at firm prices.

St. John.

As the spring advances labour conditions continue to improve, and the outlook for a prosperous summer brightens. Work has been resumed on the new armoury, and several contractors are busy renovating and improving buildings for occupancy on the first of May. Work has been commenced on the new wharf at St. John West for the Dominion Government, and it is expected that the Norton Griffiths Company will soon make a start on the Courtenay Bay improvements. The Canada Woodenware Company, which was recently reorganised, has again commenced operations. The total value of exports to the United States for the quarter ending March 31 was \$426,834.74. The total for the same quarter in 1911 was \$318,344.89, an increase of \$108,489.85 for this year. The customs receipts for the last fiscal year were ahead of previous years. The total receipts for the year 1910-11 were \$1,349,614.04, and for the fiscal year of 1911-12, \$1,465,577.05, an increase of \$115,963.01. Bank clearings for the five weeks ending April 25 were \$7,609,456, and for the corresponding period last year \$7,089,874, being \$519,582 greater in 1912 than in 1911, and \$1,582,836 in excess of the four weeks ending March 21 of the current year. During the fiscal year ending March 31 there was deposited in the Dominion Savings Bank the sum of \$927,501.04, and the withdrawals amounted to \$926,708.24. For the four weeks ending April 20, the city cashier paid out to civic employees \$8,517.29, and to workmen \$10,517.70, making a total of \$19,-

034.99. Lard is still advancing, wholesale quotations by the tub being 15 to 15 $\frac{1}{4}$ cents per pound.

Fredericton.

There was a marked improvement in the labour situation during April, and at the present time there is little unemployment. Unskilled labourers are now finding various avenues of activity that were wanting during the winter months, and with the construction of the St. John Valley Railway and the Gibson-Minto Railway, on which work will start during the first week in May, there will be a large demand for outside labour. Painters and paperhangers are now busily engaged with the usual spring rush. The opening of river navigation daily brings steamboats and other vessels into port, while a large force of men have been given employment at the lumber booms. There is a steady increase in railroad and steamboat transportation, the freight shipments being very good for the time of year. The housing problem will have to receive consideration at an early date, as there is a great scarcity of tenements already, and the activity in railroad construction is certain to increase the demand. Wholesale and retail merchants report business good.

The majority of the lumber mills in this district are now in operation, and give employment to a large number of men. At the Hartt Boot and Shoe Factory the summer run will commence next week. Two carloads of shoes are being shipped this week to Western points, and the firm have a large order list ahead of them, which will keep them active throughout the summer.

Quebec.

The prevalence of cold weather with snow and sleet retarded outside work, yet despite these conditions the building trades had a fairly good month. Work was commenced upon the new wing of the Provincial Departmental Buildings, and upon the new shops for the Canadian Northern Railway. Operations

were also begun upon a new wing to the St. Roch's convent that will cost fifty thousand dollars. Navigation to the north shore by coasting steamers was open during the month.

Farmers are busy making sugar, and although the season started late the maples are running well. In the lumbering business the drive has commenced, large numbers of men leaving for the different rivers. In the shoe manufacturing line most of the factories have a great quantity of orders that will ensure activity well into the month of May.

Sherbrooke.

Labour generally has been well employed during April, especially towards the latter end when outside work could be resumed. Building operations have commenced and this gave employment to unskilled labour. All other industries have been fully employed, especially in the machine shops. As during last month this class of work is very busy, and in some instances men have been advertised for in the moulding department. The new ready-made clothing industry has started operations and within a short period a considerable number of hands will be employed. Wholesale and retail trades report a good month.

A labour bureau has been established in Sherbrooke, under the auspices of the Provincial Government, so that those requiring help in the city and surrounding district can do so with less trouble than heretofore.

Towards the latter part of the month, farmers began their spring work. Many farmers, who have sugar bushes, and depend upon the product of the maple tree to help things out, report that the season was a very poor one and in many instances the outcome did not pay for the labour expended. Lumbermen have in the majority of cases, got their logs well started, and it is not expected that so much capital will be tied up along the river banks as was the case last year. All manufac-

turing concerns were well employed, and running to full capacity. In the asbestos mining district of Central Quebec the different properties have started up, with the result that several hundred men have been given employment.

Three Rivers.

Conditions in April showed an improvement compared with March, but were little better than during the same month of last year, which is due partly to the recent flood,—the water surrounding every building in the lower part of the city called St. Phillip's Ward, and affecting retail trade to a certain extent.

The civic authorities have given an extension of time to May next to the St. Maurice Cotton Company to start work on the construction of their new factory.

Exceptional activity prevailed in the real estate business this month. Several large lots have been sub-divided and offered for sale, bringing good prices to their owners. Commercial activity was fairly good. The harbour was quiet, owing to navigation not being opened yet. Butter has been high all the month, and potatoes are still going up on account of scarcity.

St. Hyacinthe.

Labour conditions during April were good in St. Hyacinthe and district. The building trades alone were still quiet, but they anticipate an exceptionally active season. All the various factories were working steadily with full staffs, and it is feared certain industries will soon be short of hands. Two new factories will be established here within a short time, the ratepayers having voted in favour of by-laws to that effect, and a new company employing 500 hands wants to know what the town is willing to do for it. Business, wholesale and retail, has been good. Banks reported a good month with easy collections. There were no changes in the rates of wages or hours of labour and relations

between employers and employees were most cordial.

Farmers were busy getting ready for seeding. The maple sugar season was a profitable one: syrup is selling \$1.25 per gallon and sugar 15 cents per pound. Dairy products also sell well, although the price of butter and eggs came down. Farm work has become active and a demand for good farm hands is already felt.

St. Johns and Iberville.

Conditions in the labour market of St. John's and district were active during April. A large number of summer cottages are being built in St. John's. The sash and door factories had a very active winter season, working with full staffs. All the other factories, shops and foundries worked full time employing their complete staffs. Business, wholesale and retail, was good for the season. Banks reported a satisfactory month.

Sorel.

The general condition of labour during April was satisfactory. There was a great amount of work, both at the Government shops and the numerous industrial establishments in Sorel, and the District of Richelieu. That industrial activity existed was evidenced by the increase in the number of employees and the demands for new hands especially at the foundries.

The cost of living has been generally the same as that of the previous month, and no important change in the price of necessities was noted.

The principal industries in Sorel and district of Richelieu have been doing well and factories were running at full capacity with an increase of hands and wages.

There was an unsatisfied demand for men on the Quebec, Montreal and Southern Railway Company's shops: difficulty was also experienced in obtaining a sufficient supply of unskilled labour. There was no great activity in the building trades.

Montreal.

Active conditions prevailed in practically all lines of industry and commerce in the city and district of Montreal through April. Although the persistence of cold weather to the end of the month was unfavourable to the general resumption of outdoor operations a large amount of building work was commenced, and all indications point to a busy season in the Montreal building trade.

Building permits taken out during the month at the City Hall were in advance of those taken out in April, 1911. The figures are as follows: April, 1912, new buildings \$2,100,245; alterations, \$213,778; total \$2,314,023. April, 1911, new buildings \$1,588,400; alterations, \$123,131; total \$1,711,531; an increase for April of this year of \$602,492. Many of the permits taken out are for new factories and other industrial establishments, and a marked feature of the building this year will be the number of big, new office buildings that will be erected in the down-town district. Building operations may be hampered to some extent by a lack of materials, and a shortage of labour, both skilled and unskilled is already reported by the contractors. One of the large permits taken out is for the construction of a new public library to cost \$200,000 to be built by the authorities of the seminary of St. Sulpice.

Manufacturing is quite active. Labour generally is in greater demand than it was in March, and general conditions are better than they were at this time a year ago. In most lines there is a brisk demand for first-class skilled labour; while unskilled men who had a somewhat hard time of it during the winter could easily secure employment at the end of April.

Commercial activity, both wholesale and retail, was marked throughout the month, and big increases were shown both in the custom house collections and in the bank clearings. The Custom House returns at the port showed a record increase in April, so far as con-

cerns the increase of any one month over the corresponding month of the previous year. The returns for April, 1912, amounted to \$1,796,099 against \$1,332,096 for April, 1911, showing an increase of \$464,003. The bank clearings for April, 1912 amounted to \$222,790,180 compared with \$176,450,366, an increase of \$46,339,814.

The coming of spring brought welcome relief, in some cases, from the high prices of food-stuffs that prevailed all through the winter.

Maisonneuve. — All the big industrial plants at Maisonneuve were busy throughout April. There is a great deal of building going on, including some big factories and many homes for the workers. The municipal authorities are carrying out a big scheme of street improvements.

Lachine. — Important public works will be carried on this summer in the city of Lachine, and \$275,000 will be spent as follows: street improvements, \$130,000; new city hall, \$75,000; new pumping station, \$70,000. All the big industrial plants are busy in Lachine and Rockfield, especially the structural iron and car building establishments.

Westmount. — Westmount will shortly erect a big, new municipal building, including city offices and fire and police stations.

St. Lambert. — Work is progressing rapidly on the new station of the Montreal and Southern Counties railway, extensions of the road to La Prairies, Richelieu, and Boucherville are being rushed again.

St. Pierre aux Liens. — An abbatoir to cost \$250,000 is to be constructed; the town has granted tax exemptions for ten years.

Hull.

The labour situation in general was good during April.

Saw mills will open during the present week and there will be a good demand for labour.

The contractors Bisson & Carriere have started their work for the corporation of the city of Hull. They are actually employing 50 or 60 men.

There is also a great demand for carpenters, bricklayers, masons, etc.

Retail and wholesale prices are about the same as in March. Trade both wholesale and retail is still active compared with March, 1911, and will gradually increase with the coming of the summer season.

Pulp factories are very busy and activity will increase as soon as the electric plant of E. B. Eddy is completed.

Manufacturing establishments in nearly all lines were busy with a good number of orders in hand and still more activity is expected at the opening of the summer season.

ONTARIO.

Ottawa.

The employment of labour generally during April was good, and in some lines, the demand for workers has exceeded the supply, the coming of warmer weather having opened the way for trades which were more or less dormant during the winter. Conditions in the building trades are fair with bright prospects.

Work has been started on the new machinery hall to be built at the exhibition grounds. The contract price is \$81,309. Plans are being prepared for a new \$15,000 addition to the Protestant General Hospital, to be built this summer.

The Ottawa Improvement Commission's estimates for work to be done this year amount to \$147,000. The principal work is road extension. Some \$15,000 will be spent in converting the old cemeteries into a park. The total estimate for new work is \$68,000.

The city has completed a new agreement with the Bell Telephone Company, giving the latter a five-year exclusive franchise. The annual payment to the city is increased from \$5,000 to \$12,000. The Capital Brewing company

has purchased a large strip of land on Wellington street for the erection of a new brewery to replace the one expropriated by the government.

The inland revenue collections at Ottawa for the fiscal year ending March 31 totalled \$357,724.72, an increase of \$7,795.01 over last year's collections. March, 1912, collections were \$28,434.47, a little behind those of March, 1911, which came to \$29,073.45. Customs collections for the fiscal year ending March 31, 1912, were \$209,147.33 in excess of the previous year's collections for March, 1910-1912 the collections were \$166,429.13, an increase of \$34,904.39 over the same month in 1911.

The annual report of the city building inspector shows that 657 permits were issued in 1911, compared with 671 in 1910. The total approximate cost was \$2,997,610, compared with \$3,022,650 in 1910. New buildings erected included two new churches and one school.

The labor situation is peaceful, although various trades are expecting increases before the start of generally active operations this summer.

Brockville.

All classes of labour were well employed during April and conditions were better than during the previous month. The building season is opening well and there is considerable activity in this line, especially in the erection of several dwellings.

There were four building permits issued during April, at a total cost of \$8,700.00. Trade is brisk. The unsold stock of the Canadian Foundries and Forgings, Limited, is selling at par, an increase of 2% over last month. Among the new companies formed is the Brockville Building Association, with a capital of \$64,000.00. There is a movement in Brockville to form a Brockville Boys' Association, and to this end April 24th was decided on for a day to make a canvass, which resulted in the raising of nearly \$6,000.00 for the enterprise named. The rate of taxation has been

reduced for the present year by 3 mills, being 26 mills instead of 29 mills as during 1910 and 1911.

Kingston.

The general condition of the labour market during April showed a slight improvement over that of March, although building operations have not fully commenced yet, owing to the unsettled weather.

Work has been resumed on the new addition to the Post Office, the building of the wharves at the Royal Military College being also in active operation, while the building of the now dormitories is expected to start immediately, a great deal of the stone being all ready cut for the same.

The building permits issued during the month of March showed an estimated value of \$15,125, being an increase of \$4,017 over March, 1911.

Marine men are very busy and navigation is getting well under way, many men leaving to rejoin their boats on the shipping highway.

During the month of March customs collections amounted to \$23,226.75. The inland revenue for March amounted to \$8,776.66, whilst the declared value of exports for the quarter ending March 31st totals \$134,408.71, an increase of \$87,864.99 over the same period for 1911.

Belleville.

Labour conditions were active in the city and the prospects are that this will be an exceptionally busy season, as building operations will be brisk and labour plentiful. The work about the city will be abundant with the putting down of sewers, building of granolithic walks and other civic improvements.

In railway matters there will be much activity here as the Canadian Pacific Railway will build a line through the city. Work has already commenced a short distance west of the city limits.

In the various industries there is abundant work. The Marsh & Hen-

thorn foundry company propose to erect more commodious buildings, tenders for the excavation work of which are already advertised. There is no sign whatever of any trouble existing between employers and employees as regards wages.

Although the spring has been rather backward farmers are now upon their land preparing same for seeding. The fall wheat came through the winter in an excellent condition and promises to be a good crop. This section is an extensive cheese centre and nearly all factories are now in active operation, with a prospect that the output this year will exceed that of former years.

Peterborough.

Most lines of industry showed activity, and there was a marked improvement in general business. Prospects are bright for a busy season in the building trades, a number of large contracts being in sight. The largest contracts this year so far as known will be the erection of the new Canadian General Electric Company storehouse, the contract for which has been awarded to the H. Gay and Sons Company of Oshawa, Ont. Tenders are being called for two new schools to be built this year. J. J. Turner and Sons are building an addition to their factory, and a good number of dwellings have been started. The city has passed a by-law for the establishing, maintaining and regulating of a system for the collection and disposal of ashes, refuse and garbage. They will purchase a piece of land outside of the city for a dumping ground for the garbage. A sanitary inspector has also been appointed at a salary of \$700 per year. The Great North Western Telegraph Company have agreed to remove their poles from George street, the city paying them \$350, which will be the actual cost of making the change. The Peterborough Radial Railway Company are making an extension of their road in the south end of the city; they are also putting on pay-as-you-enter cars and making a number of other improvements.

Whitby. — The town council have decided to build and maintain a free public library at a cost of \$10,000 for the building.

Orillia.

The late spring has had a depressing effect on both trade and outside industrial operations. Lack of brick also is interfering with building, though there is every indication that there will be more to be done than can well be got through in the season. Some frames of brick-clad houses are already going up, and a lot of preliminary work is being done. It is expected that it will be the 1st of June before local brick will be available. The factories are all busy, particularly the carriage and automobile factories. The Tudhope-Anderson Company is removing the Sylvester plant to Orillia from Lindsay. The Presbyterian Church is about to call for tenders for a Sunday School building, estimated to cost about \$45,000. It is anticipated that the C.P.R. will begin running trains through Orillia on its Georgian Bay and Seaboard Branch during May.

There has been an increase of about ten per cent. in the prices of meats during the past month.

Toronto.

Labour conditions during April improved greatly with the advance of the season. The building trade showed great activity towards the close of the month many large contracts being undertaken. Navigation was rather later than usual in opening, but the season promises to be a busy one. All classes of labour are well employed, and the incoming immigrants are being rapidly absorbed. Work has been started on the new club house which will house all the social and athletic associations of the University of Toronto, and will cost over \$1,000,000. The Swift Canadian Company will erect a cold-storage plant at the corner of St. Clair avenue and Keele St., to cost \$200,000. Norman G.

Heyd and A. H. Garrett have taken over the old fire hall site on Temperance street on which a ten-storey building will be erected to cost about \$260,000. The National Drug & Chemical Company will erect two five-storey buildings of re-inforced concrete on the corner of Beverley and Phoebe streets to cost about \$200,000. A new company is being organized to manufacture automobiles, which will erect a five-storey factory at the corner of John and Mercer streets, at a cost of \$55,000. A contract has been let for the Duke of Connaught school on Morley avenue for \$96,798. A large number of apartment houses are under construction or being planned.

The Polson Drydock and Shipbuilding Company Limited, has commenced the construction of a steel floating drydock at the foot of Sherbourne street at an estimated cost of about one million dollars. It will be 330 ft. long, 100 ft. wide and 35 ft. 4 in. in depth and the pumping equipment will have a capacity of 42,000 imperial gallons per minute. Work has been begun on the new Ashbridge Bay dock for which the city has made an appropriation of over \$100,000. It will be 600 ft. long by 175 ft. wide and its construction will employ about 200 men.

The city's tax rate has been fixed at 18 mills. The civic expenditure for the year is estimated at \$8,750,000, an increase of \$676,000 as compared with last year.

The civic housing scheme has taken definite shape. A company is being organized to carry it into effect under the name of the Toronto Co-partnership Garden Suburbs, Limited, capitalized at \$1,000,000, and upwards of \$80,000 of the amount has been subscribed, and provisional directors chosen.

Weston. — The town council has adopted plans for a sewer system the initial cost of which will be \$40,000 the money to be raised on debentures running for 30 years. The ratepayers will vote on the bylaw on May 8th.

Niagara Falls.

Backward spring weather had an ill effect on industrial conditions during April. Agriculture and building trades were chiefly affected. Conditions and prospects in other lines being good.

Some extensive sewer construction was commenced and plans for a great amount of street paving were being considered.

Building operations to be carried out include enlargements to the Sanitary Can Company and the Stuart Brothers oil factory, also the erection of extensive coal chutes. Plans were also prepared for an entirely new pumping and power plant for the city water works. A by-law to raise money to purchase a site for a proposed steel-working industry was voted upon and carried.

Welland county council made large purchases of road machinery and appointed officials for the building of the county good roads system for which \$100,000 was voted. Work on 27 miles of road will be commenced at once.

Financial conditions, wholesale trade and transportation were reported satisfactory. Retail trade was quieter.

There is said to be an unsatisfied demand for small dwelling for rental.

Agricultural operations were hindered by backward spring weather and wet land.

Manufacturing concerns were all busy. During the month the Sanitary Can Company advertised for men, the Spirella Corset Company for 25 girls, and the Carriage Mountings Company wanted men and boys.

Welland. — The street railway was in successful operation. Contract was awarded for brick paving of streets to the extent of \$110,000. Welland Machine & Foundries, Limited, will enlarge their plant by erecting a new foundry, paint shop and pattern vault. Several new business blocks will be built during the summer. A considerable number of foreign labourers arrived to work in local factories.

Fort Erie. — Fifty thousand dollars will be spent on buildings at Erie Beach. Contract for 35 houses was let. The Landon Works, Limited, has started a smallwares factory with 30 hands. The village will build \$3,000 worth of granolithic sidewalks.

Port Robinson. — The British-Canadian Cannery, Limited, awarded contracts for a factory, and boiler and engine house. A frame boarding-house will also be erected to accommodate 90 employees. In the rush season the plant will employ 150 persons.

Port Colborne. — Lake and canal steamboats were put in commission, but heavy ice delayed the opening of navigation. The price of natural gas was increased to 30 cents per 1,000 feet. By-laws fixing assessment of the proposed steel works at \$50,000 and of the Grand Trunk railway at \$18,000 and giving privileges of railway yard enlargement were carried. The steel works will be erected by the Canadian Furnace Company and the initial installation will employ 150 men. Standard foundry, malleable, bessemer and basic pig iron will be produced. Extensive harbour improvements, dock construction and railway extensions will be required.

St. Catharines.

Industrial conditions continued active and labour generally was well employed. All factories were working full time. The new Steel Radiation factory and the new Yale and Town factory are nearing completion.

The city council by a vote of the people were instructed to extend the artificial gas plant at a cost of sixty-five thousand dollars, \$65,000.

Port Dalhousie. — Labour was well employed during April.

Merritton. — Favourable conditions prevailed for the employment of labour which was active.

Thorold. — Favourable conditions prevailed. The labour market was active.

Hamilton

The general conditions of the labour market during April were more favourable than those of the previous month, as far as building and other outside work was concerned, but spring work is not as far advanced as it was at this time last year. At the present time the city has two thousand men on its payroll. This number includes only those who are working for the city direct. This summer the number will be increased several fold on account of the extra work and extensions on hand. Work has been commenced on the improvement to Hamilton's waterworks system, and from now on gangs of men will be employed on the new pumping station at the beach and the construction of the new conduit pipe from the station to the filtering basins. Several men have been started on sewer work in the east end of the city.

Hamilton at present is getting a big share of the immigrants coming to the country, and no complaints are being heard of a shortage of labourers.

A new lake line to be known as the Inter Lake Line, Limited, has been formed. The capitalization is \$2,000,000.

The rumour that there would be a serious brick famine in Hamilton this year owing to the enormous activity in building operations has been denied by local brick manufacturers who state positively that there will be enough brick for all purposes. The report of Building Inspector Anderson for the first quarter of the year indicates that 1912 will be an exceptionally good year for building in the city. The value of the permits issued for the three months amounted to \$706,000. Those issued during March amounted to \$440,500, an increase of \$90,250 over the same month last year.

Bank clearings for the month of March amounted to \$11,727,549, as compared with \$8,656,763 for the corresponding month last year. Customs collections at the port of Hamilton for the month of March amounted to \$255,374.57, an increase of \$40,111.68 over the same month last year. The collec-

tions for the year ending March 31 amounted to \$2,520,325, an increase of \$377,849 over the collections of the previous year. Inland revenue returns for March amounted to \$61,270.00, a decrease of \$12,558.65 from the same month last year. Collections for the year 1911-1912 were \$1,137,848.08.

Local wholesale merchants and manufacturers have been considerably inconvenienced lately by the slowness with which freight is being moved by the railroads.

The formation of a Provincial Carpenters' Conference took place here on April 5th. Twenty delegates representing local unions of the United Brotherhood of Carpenters and Joiners in this district were present. The object of the conference was to discuss matters affecting the interests of the trade hereabouts.

The scarcity of workingmen's houses has become so serious here that a public meeting was called on April 24th in the Board of Trade rooms to provide ways and means of supplying proper accommodation. A committee was appointed to investigate the matter, and it is likely that the city will deal with the matter at an early date.

Brantford.

Labour generally was better employed than during March, particularly toward the close of the month and conditions compared favorably with April of last year. In the rural districts the late season has held back spring seeding, and it is now apparent that the severe winter has killed much of the fall wheat.

The building trades are busy and indications point to an exceptionally active building season. In the iron trades considerable overtime has been worked, but the agricultural implement factories were not as active as they were last year.

The Grand Trunk Railway Company are about to commence on the Holmedale switch; this will require the construction of seven bridges and subways.

The city engineer's department have commenced extensive operations for the construction of sewers and sidewalks to the amount of over \$275,000; the services of 200 men will be required when this work is at its height; in addition to this over 500 houses will be connected with the sewers.

Paris. — Labour generally was better employed than during March, the mills and factories were busy.

Guelph.

Labour conditions during April, while not so active, owing to the backward weather as during the corresponding month last year, showed a marked improvement over the preceding month.

Those engaged in the building trades were well employed and contractors claim that a busy season is ahead.

The total building permits issued during March amounted to \$101,000 an increase of 500 per cent. over the same month last year.

The Dominion Linen Company of Bracebridge have decided to establish their new plant at Guelph. Plans are being drawn for the new mills, the main building of which will be 380 ft. by 150 ft., the whole to cost about \$35,000.

Two hundred hands will be employed at the outset.

The Colonial Knitting Company have started operations in the factory lately vacated by the Colonial Whitewear Company.

They report a scarcity of female operatives.

Manufacturers were all busy; in some cases additional hands were taken on.

Wholesale and retail merchants report trade good.

The civic finance committee fixed the tax rate at 23 mills for this year, an increase of one mill over last year.

Customs returns for the month of March were \$24,028 an increase of \$3,030.08 over the corresponding month last year.

Fergus. — Two by-laws were submitted to, and carried, by the ratepayers of Fergus on April 15th. One provided for an expenditure of \$35,000 on the water works system, work to be commenced thereon this year. The other fixed the assessment on the Canadian Milling Company at \$15,000 for ten years.

Elora. — The annual Spring Horse Show of Elora was held on the 12th of the month and proved to be a great success in every respect. A large crowd who were keenly interested was in attendance.

Berlin.

Labour generally has been well employed during April with the exception of bricklayers, among whom a quietness was caused by the cold weather at the beginning of the month. The other trades were doing better than in the corresponding month of last year, especially in the furniture lines where some factories were working overtime. The work on the addition to the Canada Furniture Company's factory was begun during the month this alone will amount to \$20,000.00. Permits have also been granted to the Berlin Robe & Clothing Company for addition to amount of \$11,000.00, D. Hibner & Company Furniture Manufacturers, addition \$14,000.00 and to the Canadian Pacific Railway freight sheds at Berlin for \$6,000.00, in all there were 47 permits issued for \$111,293.00. The custom returns for the last month amounted to \$29,752.27.

The cost of living is practically the same as last month. Potatoes are still as high as \$2.10 to \$2.25 per bag of 1½ bushels. Eggs dropped as low as 18c. per doz. in some cases, 19 and 20c., however, was the prevailing price at the end of the month. Rent is steadily advancing on account of the demand for working men's houses, these being very scarce. Farmers are busy with spring ploughing, they report that the fall wheat (though it wintered well) was seriously damaged by the frosts dur-

ing the spring. Hay is selling at \$20 per ton.

The rubber factories as well as the shirt and collar factories are in need of female labourers. It is estimated that 300 girls could easily find immediate employment in the above named industries in Berlin.

Preston. — The Canadian Office and School Furniture Company has worked overtime during April. Building permits issued for town of Preston from Jan. 1st to April 1st amounted to \$54,900.00, this includes several large blocks. The Car and Coach Company of Preston reports a shortage of mechanics.

Elmira. — All factories working full time. Several new houses were commenced. There is a demand for several carpenters, paper hangers and wood-working machine hands.

Waterloo. — All factories were running full time.

Woodstock.

Industrially conditions were, on the whole, fairly favourable, and present indications point to this being the busiest season in the building trades that Woodstock has had in several years. For some time there has been a growing demand for dwelling houses, and more skilled men could be and would be employed at the factories if more dwelling house accommodation could be secured. There is a good demand for building labour; but no serious complaint yet as to scarcity.

A falling off in the demand for reed organs is reported. Generally speaking, however, the trade in musical instruments—organs, pianos and pipe-organs—is good. The furniture trade is also good, and the outlook encouraging. In the wagon trade prospects at the present moment are, perhaps, not so bright as they have been previously. The explanation given is that western customers are holding their orders to see what the crop prospects will be. On the other

hand the stove and furnace manufacturers report that they are making preparations for an extensive year's business.

Storekeepers report business good. Farmers in the district are busy seeding. Many of them are well advanced with the work; there is, however, a fairly active demand for farm labour. Unskilled labour also is in demand at the factories.

A by-law granting some financial aid to an automobile factory has been passed by the council after a favourable vote by the people.

Stratford.

Labour conditions were favourable during April. The building trades were active, and no men were idle. All manufacturers were doing a good trade. On April 26th four by-laws were voted on and carried: (1) The market by-law providing for the erection of a market shelter and enlarging the fire hall, costing \$13,000; (2) The MacDonald Thresher Company was voted a free site valued at \$5,700 for the erection of a new plant to cost \$50,000; (3) The Williams by-law gives a loan to Mr. Ben Williams of \$8,000 to erect a \$12,000 knitting factory; (4) The Griffiths by-law providing for the erection of a bonds of G. L. Griffiths of Melbourne, Ont., for \$5,500, in consideration of an agreement to establish a wholesale harness factory in the old Ballantyne factory. Wholesale and retail merchants report trade good. There were no changes in hours of labour or rates of wages with the exception of wages of locomotive engineers who received an increase of 10 to 11 per cent.

Farmers were busy bringing farm products to market and were receiving good prices for them. Ploughing and seeding commenced during the latter part of the month. It is claimed that the fall wheat is not good in some places owing to the severe frost. Market prices are: Eggs, 20 cts. a doz.; butter, 32 cts., a lb.; maple syrup, 40 cts. a quart; potatoes, \$2.25 a bag.

Goderich. — Work has commenced on the Canadian Pacific Railway siding at the dock. The work on the sewers on Britannia Road is nearing its completion.

London.

Inside work during April was plentiful, and most of the factories and foundries were busier than for the same period last year. On outside work the promised boom has not yet developed, and some building tradesmen did not get full months. On the railroads traffic is heavier than it has been for a long time, and train crews are extra busy. The city has had a large force of labourers and teams employed all the month scraping and cleaning the streets. The large McClary works are exceptionally busy manufacturing stoves and tinware, and now employ about 1,200 hands. It is their intention to erect three additional buildings this year, to accommodate their increasing trade. The London Printing and Lithographing Company have taken out a permit for a \$16,000 building to run in conjunction with their old one. The Perrin Biscuit and Candy Company have decided to rebuild on the site of their burned buildings, and will expend about \$75,000 on this work. The Battle Creek Toasted Corn Flake Company are erecting a new building in the east end, and will move there as soon as it is completed.

St. Thomas.

Labour conditions generally remained much the same as during March; little activity was shown in the building trades. Building permits to the amount of about \$45,685 were issued during April. Merchants, generally, report business quieter throughout April than in the corresponding month of last year.

A by-law will be submitted to the citizens authorizing the expenditure of \$30,000 on the St. Thomas Street Railway. Local railway engineers are concerned in the negotiations being carried on between the Brotherhood of Locomotive Engineers and the General Mana-

gers' Association with regard to the adoption of the standard wage for Eastern roads.

Local industries report the month a good average. Unskilled labour was well employed; good wages prevailed for this class of work in the district.

Chatham.

Labour conditions were good especially activity being shown in the building trades, notwithstanding the shortage of building material. Brick, lime, sand and the cheaper grades of lumber. The building permits issued numbered twenty-four and were for residences of medium size amounting to \$22,500 in value. The Dominion Cannery were asking tenders for a large addition to their already extensive plant in this city. Tenders are also asked for a modern opera house.

House rent advanced all over the city where changes were being made from \$2 to \$4 on medium sized residences.

Final returns of the assessors give the increase in population over the previous year 573. Total for the city 11,333; assessment increases \$202,000.

All branches of trade were active. Factories were advertising for mechanics and were in some instances compelled to accept inferior classes in order to carry on their work.

Windsor.

The fine weather during April considerably improved the condition of labour and all classes of workmen were well employed. Building trades especially were active. One contracting firm reports having thirty-five brick houses worth from \$2,500 to \$4,000. Work has also commenced on additions to several industrial establishments. Scarcity of brick is holding back a few buildings.

Cobalt.

Industrial conditions proved normal during April without any special change. Mining work in all its branches proved brisk. The lumbermen ex-

pect to start work on their drives about the middle of May, but as yet none of the rivers or lakes are open for navigation. A commencement is looked for about the first week in May after which the lumbering industry will prove busy especially in the matter of drives. Railroad construction is also brisk about 500 men are at work on the Elk Lake branch which was started three weeks ago and which will keep this force of men busy until September. The Nipissing Central extension will employ a force of fifty men in the course of a few weeks.

With the additional mining work being done in all the camps, railroad extension and general building opportunities for employment throughout the district should be brisk this year. Elk Lake and Gowganda will have a renewal of mining activity and many properties, that have been closed down for some time, will be re-opened in the course of the next month or so, while many of the properties in the newer camps will employ large gangs of men in surface work during the summer. The farmers of Temiskaming have formed a co-operative society and will grow potatoes extensively this year with a view to supplying all the demand in the north country, including railway construction camps and mines.

Port Arthur and Fort William.

Labour conditions were about the same as during March. Navigation being late, many men were idly waiting for the work along the docks incidental to marine activity. No new industries have been started, but the Waggon Works factory at Port Arthur is about ready and will probably be in operation next month. It was the intention of the company to open this month, but the installation of machinery has delayed the opening. Commercial activity is normal for this season of the year, but everyone is looking forward to a busy season. The wholesale and retail trade is steady, showing no great activity, but remaining decidedly solid on prices and all goods consumed by the public. The real es-

tate market has been particularly active and many sales have been effected, this being partly due to the projected great industries coming to both cities in the shape of car works and the proposed steel plant.

Many of the men back from the bush are now on their holdings, clearing and burning in preparation for the spring sowing.

MANITOBA.

Winnipeg.

During April the weather has been exceptionally favorable for outdoor employment and as a consequence the available supply of the labour has been well absorbed. Towards the latter part of the month the employment agencies were very active filling orders for men wanted for railroad construction work. British Columbia demands are exceptionally heavy in this respect. So far the number of men offering their services is keeping pace with demands but the general opinion is that the supply will be short before the end of May. Open weather has also stimulated activity in the building trades and work is much farther ahead than at the corresponding period of last year. In the garment factories there is exceptional activity. Practically all other industries likewise are active. Those depending upon building activity, such as foundries and planing mills are feeling the pressure of increased business. During the last week of the month the planing mill of Messrs. Brown & Rutherford was entirely destroyed by fire which threw out of employment 150 hands.

Brandon.

There was considerable increase in the demand for labour during April. The supply of farm help has hardly equalled the demand for it. The work of paving the business section of the city and the laying of street car tracks was resumed for the season and the work will be carried out quickly. The

street car franchise question has been settled and several miles of railway will be built this season. A by-law was recently carried authorizing the spending of \$10,000 for the improvement of the city's water system. The Summer Fair Association will also spend a large sum in adding to and improving the grounds of the association.

SASKATCHEWAN.

Regina.

Conditions during the past month were, generally speaking, more favourable than those of March. This may be largely attributed to the incoming of spring weather, which has been ideal for building construction. Operations in this line are not, however, so far advanced as they were last year owing to the lateness of the season. By reason of a steady influx of artisans into the city, labour meets all demands. Wholesale and retail business continues to maintain an active standard, and those concerned express satisfaction with the increased spring trade.

Moosejaw.

The breaking up of the winter weather has resulted in labour being generally well employed, and the supply does not seem to exceed the demand. Day labourers are hard to get and the farmers are experiencing difficulty in hiring help for the season. The rebuilding of the Robin Hood Flour Mills which were burnt a few months ago will give employment to a great number of men; employment will also be supplied for the next three or four weeks to a number of carpenters and labourers on the construction of a large elevator. The demand for carpenters is increasing, frames being required for a great number of new houses for which excavations have been commenced. The railways are still hauling wheat and will be kept actively engaged in this operation until the middle of the summer, most of the elevators being filled. Threshing operations have again commenced and the crop that was left in

stack and in stook last fall will be threshed out within the next month.

General prices remain about the same, few articles having decreased in price. Wholesale and retail trades report active business, and bank clearings show an increase as compared with the corresponding month of last year. Implementation houses find some difficulty in getting cars to ship machinery ordered to nearby points. There are a great number of cars on order from the east and difficulty is experienced in getting supplies of material. Steam plow outfits are at work on the land, much of which is being broken up.

A considerable amount of lignite coal has been uncovered about fifty miles south of Moosejaw, and a number of mining leases have been taken out. This coal area will in a short time produce a good amount of coal which will be used locally for steam and fuel purposes.

Saskatoon.

Labour of all kinds was actively employed and the demand was better than that of last month and also better than during April, 1911.

Especially activity prevailed in building trades. The season is fairly started and promises to be a busy one.

In the agricultural districts the farmers are busy getting their land ready for seeding, and some are still doing their last season's threshing, which was delayed owing to the exceedingly wet season and severe winter. In the northern part of the Province Railroad construction is progressing. Lumbering is quiet since the snow disappeared.

ALBERTA.

Edmonton.

Throughout the past month exceptional activity has existed in all branches of labour, especially in the building trades, which have taken advantage of the weather conditions that have been so favourable to construction.

Though there is an abundance of work, the supply of labour apparently meets all demands owing to the large influx of immigrants. Work is progressing favourably on the East End bridge and the steel is being erected on the Canadian Pacific Railway high level bridge.

Work is now in progress or will immediately commence on the following buildings:—

Addition to Tegler Block	\$350,000
Canadian Pacific Ry., Office Building	250,000
City of Edmonton, Office Building ..	302,000
Revillon Bros., Ltd., Wholesale Warehouse	300,000
Campbell Bros. & Wilson, Wholesale Warehouse	about 50,000
Edmonton Brewing and Malting Co., Brewery	250,000
Konnick Sandstone Brick Co., Plant	100,000

Wholesale, retail and transportation companies were active. The painters union signed an agreement with the employing painters fixing the minimum rate of wages at 50 cents an hour and Saturday half holiday. General business conditions are indicated by the following statistics:—

	Mar., 1911	Mar., 1912	Increase
Bank Clearings	\$8,804,702	17,550,365	99
Customs Returns	58,547	117,771	101 %
Building Permits ..	276,825	821,322	209 %
(Strathcona)	14,250	79,900	
Post Office (Stamps only)	8,501	11,150	33 1/2
(Strathcona)	814	991	
Street Railway—			
Passengers Carried	402,817	710,033	76 %
Revenue	\$16,843	29,113	73 %
Homestead Entries ..	440	492	12 %

Lethbridge.

During April work has opened in all directions. The supply of labour has still been greater than the demand on account of the difficulty of getting material to start the various works. As compared with last month the labour market is lively. Opportunities are opening up every day. On April 8th a start was made on the Lethbridge Civic street railway which the city purpose to have finished by the 1st of October. The work is at present kept back for the want of ties which are overdue. About 50 men are employed at present; when the ties arrive the force will be doubled.

Since the commencement of the month the building operations have become very active and brick and lumber yards are busy. A new automobile garage is being built and a number of men will find employment on repairs. Both wholesale and retail houses are busy.

The following table shows the trend of business in March compared with that of the corresponding month of last year:—

	March 1912.	March 1911.	Increase 1912 over 1911.
Building permits issued.	\$ 176,215.00	\$ 99,400.00	\$76,815.00
Customs receipts	50,019.44	32,522.22	17,497.22
Money orders issued (2086) ..	29,349.89	32,471.77	
Money orders paid (781)	18,139.82	12,478.95	5,660.87
Postal notes issued (692) ...	1,659.89	1,275.48	384.50
Postal notes paid (544)	1,070.50	701.07	389.43
Postage stamp sales	3,336.85	2,385.00	951.85
Clearing house returns ...	2,386,834.00	2,153,190.00	233,644.00

Farmers are very busy and in several cases are reported to have been ploughing by artificial light during the night.

Coal mining is very dull, few miners being at work and the work being very unsteady. Active operations on the construction of the Lethbridge-Weyburn line has commenced. About 300 men will find employment besides a large number of teams.

BRITISH COLUMBIA.

Nelson.

There has been a marked improvement in nearly all classes of outdoor labour during April, building operations have begun in earnest and are giving employment to a number of men, especially to bricklayers and cement men. The city is employing quite a force of men, road grading, laying of water and sewer pipes. Several large buildings have been commenced. Indic-

ations point to a busy summer in this vicinity. As yet there are no signs of a scarcity of labour.

A firm of American capitalists have bought a site with a view to erecting a large paper mill, which when completed will employ about one hundred and fifty men. The saw mills all through the Kootenays are commencing operations and a large cut is contemplated this summer. Mines are showing activity though a great many of them are being hampered by slides.

New Westminster.

Labour has been more generally employed during April than in any previous month of 1912. The building trades being exceptionally busy. Few unemployed workers can be found except among unskilled labourers and of these land clearing operations and railway construction work will absorb a large number. For all kinds of skilled labor the outlook for the season is good.

Numerous new buildings are being erected comprising dwellings of a superior class and a few large business blocks. The building permits for the first two weeks of April totalled nearly \$50,000.

Victoria.

Labour was extensively and continuously employed during April building operations and civic works giving work to large numbers of men. The weather remained dry and warm and good progress was made with every description of outdoor work. The company having the contract for the construction of the Sooke Lake water works having failed to live up to the terms of their contract, the city council has cancelled the contract, but it is not known whether new tenders will be called for the work, or whether the city will complete the work by day labour.

The number of building permits issued during March was 64, compared

with 121 for the same month a year ago. The aggregate value of the permits for March this year was \$861,770 (one permit alone calling for an expenditure of \$400,000.) For the same month a year ago, the total value of the permits was \$271,945.

The total customs revenue for March was \$199,420 and for March last year \$192,294.

The clearing house returns by months for the year to date compared with the same months in the two previous years, are as follows:—

	1912.	1911.	1910.
Jan. . . .	\$11,902,519	\$9,013,716	\$7,390,767
Feb. . . .	12,610,627	9,978,887	6,404,370
Mar. . . .	13,246,571	12,358,320	7,170,088
Total . . .	\$37,759,723	\$31,350,917	\$20,965,225

Business, both wholesale and retail, is in a healthy condition. The real estate market is active with values increasing.

The Canadian Pacific Railway is going to build new machine shops, round houses, etc., on their recently acquired terminals on the old Indian reserve, at a cost of several thousand dollars. The Canadian Collieries (Dunsmuir) Limited, are making extensions and additions to their mining properties on Vancouver Island, at a cost of more than a million dollars.

Nanaimo.

Conditions in the labour market showed a slight improvement during April over those of last month and there are fewer idle men in the district.

Transportation conditions are better. The Canadian Pacific Railway will shortly put on a new and faster boat between Nanaimo and Vancouver to run two trips a day instead of one as at present. There was no change in the cost of living during the month.

Printers report work as fair during the month.

Cigar makers report work as fair.

Teamsters and expressmen report work as good during the month.

Unskilled labour has been fairly well employed during the month but there are still quite a number of men looking for work.

Prince Rupert.

Immediate demand for labour was not increased as compared with last month, but there are good prospects of considerable employment for skilled and unskilled men on all constructional work, especially in the building trades. Two large undertakings by the Grand Trunk Pacific Railway Company are taking definite shape. These are the clearing of the depot site and central railway yards, and the construction of the \$2,000,000 dry dock and accompanying yards, roundhouses, etc. Contracts have been let for these undertakings and work employing some 200 men will be commenced by the end of the month. Meanwhile municipal employment is not as active as it was last month; progress on the Woodwork Lake water supply and Hydro-Electric scheme being very slow and employing few hands. Further reduction of the city engineering staff is contemplated.

A very large lumber concern (The Lester W. David Company of

Ocean Falls) is locating in the city, and will employ a large pay-roll. The sash and door factory which closed down in the fall is re-opening, and another sash and door supplying concern is employing about twelve new hands. Numerous new residences are planned, and several places of business. A new substantial frame building to be used for accommodation of the post office, the customs house and other tenants, is making progress. The new city hall will be opened early in May.

There was a steady increase in traffic at the waterfront, and while business generally in the city is not booming, there is still abundant confidence and considerable prosperity. No important changes in rates of wages or hours of labour are reported, and the only industry showing extra activity is the laundry business, which is increasingly active almost continually. Competition in this line also increases, and there are many Chinese laundries.

There have been no disturbances in the labour system of Prince Rupert and district so far this spring, and the outlook is a good one. A considerable resumption of mining activity may be looked for in the northern districts as the season advances.

THE INDUSTRIAL DISPUTES' INVESTIGATION ACT, 1907.— STATEMENT FOR YEAR 1911-12, ETC.

THE Industrial Disputes Investigation Act, 1907, received the Royal assent on March 22, 1907, and had, therefore, been in operation five years at the close of the month of March last.

A table is presented in the present issue of the *Labour Gazette*, showing the proceedings under the Act during the year ending March 31, 1912, as follows: (1) the dates on which the various applications for Boards of Conciliation and Investigation were received; (2) the names of the parties concerned; (3) the name of the party making the application; (4) the local-

ity affected; (5) the number of persons affected; (6) the nature of the dispute; (7) the names of the members of Boards in cases where Boards have been established; (8) the dates of the establishment of Boards; (9) the dates of the receipt of Board's report; and (10) the result of the reference under the Act.

In all eighteen applications under the Act were received during the year ending March 31, 1912, as a result of which fifteen Boards were established. In the three remaining cases the matters in dispute were adjusted by mutual

agreement whilst communications were passing with the Department in respect of the establishment of a Board.

In addition to the eighteen cases above mentioned, proceedings under the Act during the past year occurred also in connection with an application which was received prior to April 1, 1911. Correspondence was also exchanged between the Department and persons concerned in various disputes in which, however, the circumstances did not call for any formal procedure under the Act.

Industries Represented.

The disputes dealt with under the Act during the year were distributed among the different industries as follows, namely:—

Coal mining	2
Metal mining	1
*Railways	10
Street railways	1
Commercial telegraphers	1
Telephone workers	1
Electrical workers	2
Boot and shoemaking	1
	19

The number of employees concerned in the nineteen applications received under the Act during the year was 37,626.

In connection with each of the nineteen disputes above mentioned sworn statements were furnished to the Minister of Labour to prove that, failing an adjustment of the differences or a reference of the same under the Industrial Disputes Investigation Act, a strike or lockout, as the case might be, would be declared.

During the fiscal year ending March 31, 1912, there were four cases in which strikes were not either averted or ended.

*Among the classes of labour concerned in these ten disputes were the following: section men, carmen, machinists, boilermakers, telegraphers, telephone operators, tovernmen, station agents, maintenance-of-way men, coal handlers, cablemen, repair men, hoistmen, engineers, firemen, baggagemen, checkers, truckers, yardmen, storemen, sleeping and dining car employees, accountants, freight handlers and clerks.

Important Adjustments Under Act.

One of the disputes adjusted under the Industrial Disputes Investigation Act during the year was that between the Great North Western Telegraph Company of Canada and its telegraph operators, which involved the subject of wages, hours, and other conditions of employment, also alleged discrimination against certain employees on account of their connection with the Commercial Telegraphers' Union of America. The number of operators concerned in this matter was 200 directly and 1,100 indirectly. The report was signed by all three members of the Board, Messrs. Markey and Campbell each dissenting, however, on one point. The Department was subsequently informed of the acceptance of the Board findings by the Company and the employees affected.

The Board which was appointed to deal with a dispute between the Canadian Northern Coal and Ore Dock Company, Limited, of Port Arthur, Ont., and its employees, after conference with the respective parties, succeeded in bringing about a settlement effective for one year from the 1st of May, with provision for a further meeting between the parties on January 15, 1912, to draw up a new agreement for the ensuing year. The number of employees affected was given as 150 directly and 200 indirectly. The points in dispute related to the employees' demand for increased wages, increased compensation for overtime, and alleged discrimination on the Company's part against members of the Coal Handlers' Union. It was reported by the Board that concessions were made by both sides, the men modifying their demands respecting wages and compensation for overtime, and the Company, on the other hand, granting the employees' demand that members of the Union should not be discriminated against.

The reference under the Act of a dispute between the cities of Port Arthur and Fort William, Ont., and their elec-

trical employees resulted in the conclusion of a formal agreement between the parties for a period of one year, to continue in force from year to year thereafter unless three months' notice of its termination was given by either party on or before April 1 of any year. The matters in dispute related to wages, hours, overtime, hours of payment, and alleged discrimination. The number of employees affected was given as 32 directly and 66 indirectly. In acknowledging receipt of the Board findings the City Clerk of Fort William stated that the same had been presented to the City Council at a meeting held on July 1 and that "the members had expressed themselves as being entirely in accord with the award of the Board of Conciliation, and, as far as known, the terms of the award are perfectly satisfactory to the men. In acknowledging receipt of your report I was instructed to convey to your Department the thanks of the Council for the successful adjustment of this dispute between the electrical workers and this city."

The Board appointed to deal with certain differences between the city of Edmonton, Alta., and the workmen employed in its telephone, lighting, electric power, and street railway utilities, after inquiring fully into the matters in dispute, drafted a set of working rules and a schedule of wages which were unanimously agreed to by the civic authorities and the employees concerned. The number of employees affected was given as 35.

The efforts of the Board of Conciliation and Investigation to effect the settlement of a dispute between the Pere Marquette Railway Company and its maintenance-of-way employees, to the number of 140, resulted in a full agreement on the several points at issue, which included wages, hours, and other conditions of employment. Following the publication of the Board findings a set of rules and rates of pay governing the Company's section foremen and section men in Canada was promulgated by the Railway Management, the

same being in the terms of the Board report. A letter was also received in the Department of Labour in this matter from the employees' representative stating that "the employees of said Pere Marquette Railway are well pleased and satisfied with the report of the Board."

Three disputes, in connection with which applications had been made for the establishment of Boards, were settled whilst proceedings were under way looking to the establishment of such Boards. One of these disputes grew out of a reduction in wages among the section men employed by the Michigan Central Railway Company, 1,200 to 1,400 in number. Whilst communications were passing between the Department and the parties concerned relative to the granting of a Board an officer of the Department of Labour proceeded to St. Thomas at the Minister's request for the purpose of conferring with the parties. As a result of this conference the Company restored the scale of wages which had existed prior to May 1, 1911, and announced its willingness to re-engage its former employees, of whom a number had ceased work by way of protest against the Company's action. One of the other disputes referred to was one between the Quebec Central Railway Company and its telegraph and station employees, to the number of 70, growing out of a demand on the part of the latter for the adoption of a new schedule of rules and rates of pay. An officer of the Department of Labour proceeded to Sherbrooke at the Minister's request for the purpose of conferring with the parties. In the course of ensuing correspondence the Department was informed on November 20 that an agreement had been arrived at between the parties, the application under the Industrial Disputes Investigation Act being accordingly withdrawn. The third dispute referred to in which a settlement was reached whilst proceedings were pending for the establishment of a Board under the Act was one affecting the Quebec and

Lake St. John Railway Company and its carmen, to the number of 80 directly and 15 indirectly. The matters at issue related to wages and conditions of employment. At the time of the dispute the Railway Company's properties were in the hands of a receiver. Whilst communications were passing between the Department and the parties concerned relative to the establishment of a Board an officer of the Department of Labour visited Quebec for the purpose of conferring with the Company and employees concerned. A settlement was later reached by direct negotiation and proceedings under the Act accordingly discontinued.

All the disputes referred to under the Act during the year, with one exception, related to mines or industries of the public utilities class to which the Act primarily applies. The exception was that of a dispute between the John Ritchie Company, William A. Marsh Company, Gale Brothers, and J. M. Tobo, boot and shoe manufacturers of the City of Quebec, and their employees, 68 of the latter being affected directly and 875 indirectly. The reference was made to a single Board by consent of all the parties concerned, and the Board findings, dealing with the wages paid for certain classes of work, were accepted by the employing companies and the employees affected.

Four Strikes After Enquiry.

The cases in which strikes were not averted after enquiry either averted or ended are as follows:—

1. A dispute between the Coal Mining Companies comprising the Western Coal Operators' Association, operating mines in southeastern British Columbia and southern Alberta, and their employees to the number of approximately 6,000. A cessation of work in this instance occurred on March 31, 1911, on the termination of a two years' agreement between the parties. The matters in dispute related to wages and other conditions of employment. The dispute resulted in an almost total

cessation of work in these coal fields from April until the middle of November and consequent serious diminution in the available fuel supply of the Provinces of Saskatchewan and Alberta, which was, however, partly offset by importations from the United States and the remission of customs duties on such importations during the summer and autumn months.

In this case the cessation of work occurred before an application for a Board was received. A Board was established, at the employees' request, on April 13. The Board report was accompanied by a minority report of Mr. A. J. Carter, the employees' nominee. The Western Coal Operators, on being apprised of the terms of the Board findings, signified their conditional acceptance of the same in July, and their willingness to negotiate an agreement along the general lines which the Board suggested. The Board report was later referred by the employees' executive to a referendum vote which was understood to have resulted in a majority against the acceptance of the findings. In the middle of October Honourable Robert Rogers, Minister of the Interior, held a series of conferences with the parties concerned at which an agreement was arrived at for the settlement of the various points at issue. This agreement was signed on November 17 and is to continue in force until March 31, 1915. Operations in the mines were resumed on November 20.

It was claimed by the employees' representatives, in communications addressed to the Minister of Labour, that their suspension of mining operations on the termination of their agreement with the Western Coal Operators' Association on March 31 was due to the fact that the parties, who had been in conference with each other during the month of March, had been unable to reach any agreement to take the place of the agreement expiring on March 31, and that in ceasing work the employees had not committed any breach of the Industrial Disputes Investigation Act.

2. A dispute between the Hudson Bay Mining Company, of Gowganda, Ont., and employees, members of Gowganda Miners' Union of the Western Federation of Miners. This dispute grew out of an alleged reduction of wages in the Company's mines, the number of employees affected being about 30. The employees, refusing to accept the Board findings, declared a strike in the month of June. Operations were resumed in the mines at the end of July. A number of the Company's former employees remained, however, on strike throughout the ensuing summer, fall, and winter months.

3. A dispute between the Grand Trunk Pacific Railway Company and machinists and boilermakers in its employ, to the number of 300. The differences related to wages, hours, and conditions of employment, and the employees' demand for a schedule of agreement. On October 6 the company closed down certain of its shops. On October 10th employees declared a strike. Shortly afterwards the Board made its findings. The employees signified their acceptance. The findings were not accepted by the Company, who claimed to be paying the same scale of wages as their competitors, in Western Canada. The Company's claim in this respect was disputed by the employees. The Company claimed to be unaffected by the strike, but the employees represented that the strike was effective and such representations continued to be made to the close of the fiscal year, March 31.

4. A dispute between the Alberta Coal Mining Company, Limited, to Cardiff, Alta., and employees, to the number of 80. The points at issue related to wages and conditions of employment. After the Board findings had been communicated to the Company and employees concerned there was a cessation of work for a few days, following which the Department was informed by the Company that a settlement had been reached on the basis of

the Board findings. In this connection it was claimed on behalf of the employees that the Board findings were not accepted by the Company. Writing to the Department of Labour on January 13 Mr. George S. Montgomery, the Company's Manager, said "We are satisfied that this is the proper way of settling disputes, and as far as we are concerned, we will do all in our power to see the law enforced. The Company accepted the Report of the Conciliation Board and changed its scale of wages to conform thereto, which was only in minor points, and, as stated above, the business of mining coal has been resumed without any prospect of further trouble."

Five Years' Proceedings Under Act.

During the five years which elapsed between the enactment, in March, 1907 of the Industrial Disputes Investigation Act, and the end of March, 1912 one hundred and twenty-four applications were received for the establishment of Boards of Conciliation and Investigation, as a result of which one hundred and ten Boards were established. In the fourteen remaining cases the matters in dispute were adjusted by mutual agreement while communications were passing with the Department in respect of the establishment of the Board. In ninety-three out of the one hundred and ten cases referred for investigation the inquiry resulted either in a direct agreement between the parties, or in such an improvement of relations as led to the settlement of the dispute.

In the case of a dispute between the North Atlantic Collieries Company, Limited, of Port Morien, N.S., and its employees, operations in the Company's mines had been discontinued at the time of the investigation, the Company itself having gone into liquidation.

In the case of a dispute between the Montreal Street Railway Company and employees proceedings before the Board were unfinished on March 3, 1912, the Board having been restrain

d from proceeding by order of court, pending determination of an application by the Company to the Superior Court for a writ of injunction declaring the Industrial Disputes Investigation Act to be ultra vires.

There have been in all fourteen instances during the five years in which strikes have occurred after the reference of disputes under the terms of the Act. Four of these fourteen disputes concerned the railway industry, nine related to the mining industry, and the other one related to the street railway industry. In seven cases these disputes had to do in whole or in part with the question of alleged discrimination against or the recognition of certain labour unions.

The fourteen cases in question are as follows: (1) Cumberland Railway & Coal Company of Springhill, N.S., and its employees; (2) Canadian Pacific Railway Company and its mechanical employees; (3) Nicola Valley Coal & Lumber Company of Middlesboro, B.C., and its employees; (4) British Columbia Copper Company of Greenwood, B.C., and its employees; (5) Dominion Coal Company of Glace Bay, C.B., and its employees; (6) Cumberland Railway & Coal Company of Springhill, N.S., and its employees; (7) British Columbia Copper Company of Greenwood, B.C., and its employees; (8) Canadian Northern Railway Company and its carmen and steamfitters; (9) Grand Trunk Railway Company and its employees in train and yard service; (10) Winnipeg Electric Railway Company and its employees; (11) Coal Mining Companies comprising the Western Coal Operators Association and their employees; (12) Hudson Bay Mining Company of Gowganda, Ont., and its employees; (13) Grand Trunk Pacific Railway Company and its machinists and boilermakers; and (14) Alberta Coal Mining Company of Cardston, Alta., and its employees.

In No. 1, the strike lasted from August 1, 1907, to August 31, 1907. When the employees returned to work on the conditions recommended in the

report of the Board. In No. 2, the strike lasted from August 5, 1908, to October 5, 1908, when the employees returned to work on the conditions recommended in the report of the Board. In No. 3, the employees went on strike on April 28, during the process of establishing a Board, and returned to work early in June on lines recommended by the Board. In No. 4, the strike lasted from June 28 to July 24; in this case several reports were put in by the members of the Board, and the settlement was on the lines substantially of the Chairman's recommendations. In No. 5, the strike lasted from July 6, 1909, to April 28, 1910, when the employees returned to work on the lines recommended in the report of the Board, with such modifications as had been made in the same by an agreement subsequently effected. In No. 6, the strike lasted from August 9, 1909, to May 27, 1911, when a settlement was effected by negotiation between the parties. It should be noted that the parties concerned in Nos. 1 and 6 are identical. In No. 7, the strike lasted from April 19 to May 11, when the employees returned to work on the conditions recommended in the report of the Board. Nos. 4 and 7 are also identical. In No. 8, the strike lasted from July 7 to September 27, when the employees returned to work on the conditions recommended in the report of the Board. In No. 9, the strike lasted from July 18 to August 2, when a settlement was effected through Government intervention. In No. 10, the strike lasted from December 16 to December 31, when the strike was terminated through the efforts of a committee of citizens. In No. 11, the strike lasted from April 1, 1911, to the middle of November, when a settlement was arrived at following a series of conferences between the parties, at which the Honourable Robert Rogers, Minister of the Interior, was present. It was understood that in drawing up the terms of settlement the report of the Chairman of the Board was taken as a basis. In No. 12, the strike occurred in the month of June. Operations in the

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

TABLE SHOWING PROCEEDINGS UNDER ACT FROM MARCH 31 1911, TO MARCH 31, 1912.

Applications concerning disputes in mines and public utilities.							Total number of strikes not averted or ended.

Disputes referred for adjustment under Act.....	2	1	10	1	2	1	19
Strikes not averted or ended...	2	1	1	0	0	0	4

1.—The proceedings under the Act during this year include one case in which certain proceedings had taken place also during the preceding year, viz.: a dispute between the Great North Western Telegraph Company of Canada and its telegraphers.

2 At the close of the financial year results were still pending in connection with two applications, viz.: (1) application made on behalf of the employees of the Montreal Street Railway Company; and (2) application made on behalf of the railroad freight handlers and Railway clerks employed by the Canadian Pacific Railway Company at Winnipeg, Man.

INDUSTRIAL DISPUTES INVESTIGATION, OCTOBER, 1907.

Proceedings under the Act from March 31, 1911, to March 31, 1912.

A.—MINES, AGENCIES OF TRANSPORTATION AND COMMUNICATION, AND OTHER PUBLIC SERVICE UTILITIES.

1. Appointed by the Minister, under sec. 8, sub-sec. 1, of the I.D.I. Act, on recommendation from party concerned.
2. Appointed by the Minister, under sec. 8, sub-sec. 2, of the I.D.I. Act, in the absence of a recommendation of party concerned.
3. Appointed by the Minister, under sec. 8, sub-sec. 3, of the I.D.I. Act, on the joint recommendation of the two members first appointed.
4. Appointed by the Minister, under sec. 8, sub-sec. 4 of the I.D.I. Act, in the absence of a joint recommendation by the two members first appointed.

MINING AND SMELTING INDUSTRY.

1. COAL MINES

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality	No. persons affected.	Nature of Dispute.	Name of Members Board: (c) Chairman; (m) Men.	Date on which Board was constituted	Date of receipt of report of Board.	Result of reference.
1911 April 13	Western Coal Operators Association and employees, members of District No. 18, United Mine Workers of America.....	Employees....	Eastern British Columbia and Southern Alberta.....	6,400 dir., an indefinite number indir.	Concerning making of new agreement.....	Rev. C. W. Gordon, D.D., (c)4..... Colin Macleod, (m)1..... A. J. Carter (m)1 ..	1911 April 21...	1911 July 10.... July 11....	The employees concerned in this dispute ceased work on March 31, 1911, on the termination of a two years' agreement with the employing Companies. A Board was established by request of the employees on April 13. The Board's report was accompanied by a minority report by Mr. Carter. The Operators signified their willingness to negotiate an agreement along the general lines suggested by the Board in its majority report; the employees, on the other hand, accepting the minority report of Mr. Carter. The majority of the mines remained closed down until the middle of November, when a new agreement was signed by the parties concerned, effective to March 31, 1915.

Oct. 23...	Alberta Coa Mining Company Limited and employees.....	Employer....	Cardiff, Alta.....	80.....	Concerning wages and conditions of employment.....	Norman Fraser (c)3 J. O. Hannah (x)1. Clement Stubbs, (x)1.....	Nov. 27.... Dec. 12....	Report was signed by all three members of the Board, with slight objections noted by MM. Hannah and Stubbs. After the award of the Board had been communicated to both parties concerned there was a cessation of work for a few days. The Department was later informed that a settlement had been reached on the basis of the Board's findings, and work resumed.
------------	---	--------------	--------------------	---------	--	---	-------------------------	---

2. METAL MINES

May 25..	Hudson Bay Mining Company, Ltd., and employees, members of Gowganda Miners Union No. 154 Western Federation of Miners.....	Employees....	Gowganda, Ont....	30.....	Concerning reduction in wages.	George Ritchie, K. C., (c)4..... Prof. John Sharp, Duncan J. McDonnell, (x)1.....	June 9..... July 10....	Report of Board was accompanied by a minority report signed by Mr. McDonnell. The employees, being unwilling to accept the Board report, declared a strike which no formal settlement was reported. Operations were resumed in the company's mine at the end of July.
----------	--	---------------	-------------------	---------	--------------------------------	---	-------------------------	---

II. TRANSPORTATION AND COMMUNICATION.
1. RAILWAYS.

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality	No. of persons affected.	Nature of Dispute.	Names of Members Board: (c) Chairman ; (e) Employer ; (m) Men.	Date on which Board was constituted	Date of receipt of report of Board.	Result of reference.
1911 May 11.	Michigan Central Railway Company and section men.	Employees.	St. Thomas, Ont.	1,200 to 1,400.	Concerning proposed reduction in wages.				The employees concerned in this dispute ceased work on May 1, on account of a proposed reduction in their rate of pay. Application was later made by the employees for the establishment of a Board. Whilst communication were passing between the Department and the employees an officer of the Department proceeded to St. Thomas at the Minister's request for the purpose of conferring with the parties concerned. As a result the Company restored the scale of wages which had existed prior to May 1, 1911, and announced its willingness to re-engage those who had ceased work.
May 17.	Canadian Northern Coal and Ore Dock Company Ltd., and employees, members of Coal Handlers' Union No. 319.	Employees.	Port Arthur, Ont.	150 dir. 200 indir.	Concerning wages and conditions of employment.	His Honour Judge John McKay (c) George F. Horrigan (e)1... Andrew Boyd (m)1.	June 2.	June 19.	A unanimous report was presented by the Board in which it was stated that a settlement had been effected of all points at issue, an agreement effective from May 1, 1911, to April 30, 1912, having been signed by both parties to the dispute.
May 17.	Quebec and Lake St. John Railway Company and carmen, members of the Brotherhood of Railway Carmen of America.	Employees.	Québec, Que.	80 dir. 15 indir.	Concerning wages and conditions of employment.				Whilst proceedings looking to the establishment of a Board were in progress, the Department was informed that a settlement had been reached on the various points at issue.

July 18...	Grand Trunk Railway Company and Machinists, members of the International Association of Machinists	Employees...	G.T.R. System...	2,000 dir... 6,000 indir	Concerning demand for a new schedule of rules and rates of pay	Hon. Mr. Justice J. V. Teezel (c)3... Hon. Wallace Nesbitt, K.C. (s)1... J. G. O'Donoghue, (m)1.....	Oct. 11.....	Oct. 23.....	Report was signed by all three members of the Board, Mr. O'Donoghue, however dissenting in certain particulars. Department was informed that the findings of the Board were not acceptable to the employees concerned. No cessation of work however, occurred.
July 31...	Grand Trunk Pacific Railway Company, and Machinists members of the International Association of Machinists	Employees...	G.T.P. Ry. System	150.....	Concerning wages, and hours, and conditions of employment, also demand schedule	Dr. J. W. Sparling, (c)4..... Rev. J. L. Gordon, (s)2..... Thos. J. Murray, (m)1.....	Oct. 12.....	Oct. 28.....	A unanimous report was presented by the Board which was favourable to the employees concerned and was accepted on their behalf. The Company, in a letter dated November 2, declined to accept the Board's findings. On October 6, the Company's shops at Edmonton and Rivers were closed down and the employees concerned declared a strike on October 10, which was still in progress on March 31, 1912.
Aug. 8...	Grand Trunk Pacific Railway Co., and boilermakers, members of the International Brotherhood of Boilermakers, Iron Ship Builders and Helpers of America.	Employees...	G.T.P. Ry System.	150.....	Concerning wages, hours, and conditions of employment, also demand for schedule.				

The two applications here recorded are regarded as one in the tabular statement.

2. Honourable Wallace Nesbitt, K.C., was at first appointed a member of the Board, but, being unable to act, withdrew on October 5.

1. RAILWAYS—Continued.

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality	No. of persons affected.	Nature of Dispute.	Names of Members Board: (c) Chairman; (e) Employer; (m) Men.	Date on which Board was constituted	Date of receipt of report of Board.	Result of reference.
1911 Sept. 11	Canadian Pacific Railway Company and various employees, members of the Canadian Brotherhood of Railroad Employees.	Employees.	Calgary and Medicine Hat, Alta.	6,500 direct 6,500 indirect	Concerning alleged discrimination against members of Union.	John Anthony McDonald (m)1.			Proceeding discontinued.
Nov. 14	Quebec Central Railway Company and station employees members of the Order of Railroad Telegraphers.	Employees.	Quebec Central Railway lines.	70	Concerning demand for a new schedule of rules and rates of pay.	...			Pending establishment of Board, a settlement was arrived at.
Dec. 12	Michigan Central Railroad Company, and station agents, telegraph and telephone operators, and tower men, members of the Order of Railroad Telegraphers.	Employees.	M.C.R. lines in Canada.	115 direct 3,000 indirect	Concerning demand for the adoption of certain amendments to the existing schedule.	Peter McDonald, (c)4. J. E. Duval (e)1. J. G. O'Donoghue, (m)1.	Jan. 17	Mar. 12	Report of Board was accompanied by a minority report signed by Mr. Duval. As a result of the enquiry the Company granted an increase of wages and made certain modifications in its rules governing the employment of its station agents, telegraphers, etc. No cessation of work occurred.
Dec. 29	Pere Marquette Railway Company, and maintenance-of-way employees and pump men, members of the International Brotherhood of Maintenance-of-Way Employees.	Employees.	Buffalo Division of the Pere Marquette Railway.	140	Concerning wages, hours, and demand for a set of rules governing both the foregoing.	Hon. Chief Justice Sir Glenholme Falconbridge (c)3. Hon. Wallace Nesbitt, K.C. (e)1. J. G. O'Donoghue, (m)1.	Jan. 20	Feb. 19	A unanimous report was presented by the Board, making certain recommendations for the settlement of the dispute which were accepted by both parties concerned.

1912 Mar. 11.	Canadian Pacific Rail- way Company, and railroad freight hand lers and railway clerks, members of Winnipeg Division, No. 177, Brother- hood of Railroad Freight Handlers, and Railways Clerks.	Employees.	Winnipeg, Man....	220 dir.... 230 indir....	Concerning alleged dis- crimination by Com- pany against mem- bers of the Union...	Chas. P. Fullerton, (e)2..... Thos. J. Murray, (a)1.....	At the close of the fiscal year the Board had not been completed by the appointment of a chair- man.
------------------	--	------------	-------------------	------------------------------	---	---	-------	---

2. STREET RAILWAY

1911 June 19.	Montreal Street Rail- way Company and employees, members of the Amalgamated Association of street and Electric Railway Employees of Ameri- ca, No. 328.	Employees...	Montreal, Que....	30 dir.... 1,970 indir	Concerning dismissal of certain employees and alleged discrim- ination against them as members of Un- ion.....	Hon. Justice Thos. Fortin (c)4..... J. L. Perron, K.C. (e)1..... Charlemagne Rod- ier, (a)1.....	Aug. 11....	Board restrained from proceeding by order of Court pending de- termination of an application by the Company to the Superior Court for a writ of injunction, declaring the Industrial Dispu- tes Investigation Act to be ultra vires.
------------------	--	--------------	-------------------	---------------------------	---	---	-------------	---

3. COMMERCIAL TELEGRAPHY.

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality	No. persons affected.	Nature of Dispute.	Names of Members Board: (c) Chairman; (e) Employer; (m) Men.	Date on which Board was constituted	Date of receipt of report of Board.	Result of reference.
1911 Mar. 3....	Great North Western Telegraph Company of Canada and telegraphers, members of the Commercial Telegraphers Union of America.....	Employees....	All offices operated by the G. N. W. Telegraph Co. of Canada.....	200 indir 1,100 indir	Concerning wages and conditions of employment; also alleged discrimination against members of the Union.....	Hon. Mr. Justice J. V. Treadwell (c) J. Frederick H. Mackay (e) J. D. Campbell (m) 1	Mar. 30....	July 17....	Report of Board was signed by all three members, Mr. Mackay and Mr. Campbell, however, each dissenting on one point. The findings of the Board were accepted by both parties concerned.

4. TELEPHONES.

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality	No. persons affected.	Nature of Dispute.	Names of Members Board: (c) Chairman; (e) Employer; (m) Men.	Date on which Board was constituted	Date of receipt of report of Board.	Result of reference.
Sep. 6....	British Columbia Telephone Company and employees, members of Local Union 213, International Brotherhood of Electrical Workers.....	Employees....	Lines of the B. C. Telephone Company.....	220....	Concerning wages and Company's attitude toward Union men....	John H. Senkler, K. C., (c) J. William M. Barker, (e) J. Chas. Farright (m) 1	Oct. 6....	Nov. 28....	Report of Board was accompanied by a minority report signed by Mr. Barker. The Department was not informed of the acceptance or non-acceptance by either party of the Board's findings. No cessation of work however, occurred.

III. MUNICIPAL PUBLIC UTILITIES.

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality	No. persons affected.	Nature of Dispute.	Names of Members Board: (c) Chairman; (e) Employer; (m) Men.	Date on which Board was constituted	Date of receipt of report of Board.	Result of reference.
May, 27....	Cities of Port Arthur and Fort William, Ont., and electrical workers, members of International Brotherhood of Electrical Workers of America, Local Union No. 339.....	Employees....	Port Arthur and Fort William, Ont.....	32 dir 66 indir	Concerning wages and hours.....	Rev. S. C. Murray, D. D., (c) J. Dix Fraser (e) 1, C. W. Foster (m) 1	June 8....	July 3....	A unanimous report was presented by the Board in which it was stated that an agreement had been signed by both Cities and their electrical workers, the agreement being effective for one year, from June 1, 1911.

B.—INDUSTRIES OTHER THAN MINES, AGENCIES OF TRANSPORTATION AND COMMUNICATION, AND OTHER PUBLIC UTILITIES.

May 29...	City of Edmonton, Alta. Employees... Edmonton, Alta.	35.....	Concerning wages and conditions of employment.....	C. Taylor (c)3... Arthur W. Ormsby, (e)1..... W. Symonds (m)1..	July 5.....	A unanimous report was presented by the Board in which it was stated that a schedule of wages and a set of rules for each department had been drawn up and accepted by both parties to the dispute effective from July 1, 1911, to May 1, 1913.
-----------	--	---------	--	--	-------------	---

Apr. 3....	John Ritchie Company Limited; William A. Marsh Company Limited; Gale Bros., and J. M. Stobo Boot and Shoe Manufacturers, Quebec, and employees.....	Employees...	Quebec, Que.....	68 dir.... 875 indir....	Concerning wages.....	Dr G. W. Jolicœur, (c)3..... Felix Marois (e)1.. Joseph Alphonse Langlois (m)1....	June 26....	A unanimous report was presented by the Board, making certain recommendation for the settlement of the dispute. It was understood that the Board's findings were accepted by the parties concerned.
------------	---	--------------	------------------	-----------------------------	-----------------------	--	-------------	---

mines were, however, resumed in the month of July. A number of the Company's former employees still remained on strike on March 31, 1912. In No. 13, the Company's shops at Edmonton and Rivers, Alta., were closed down on October 6, and on October 10 the employees declared a strike which

was still in progress on March 31, 1912. In No. 14, the strike occurred in the month of December. Following the communication of the findings of the Board to the parties concerned there was a cessation of work for a few days. A settlement was, however, reached on the basis of the Board findings.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907. — PROCEEDINGS DURING APRIL, 1912.

THE unanimous report was received on May 3 of the Board of Conciliation and Investigation appointed to inquire into certain matters in dispute between the Canadian Pacific Railway Company and the railroad freight handlers and railway clerks in the Company's employ at Winnipeg, Man.

Application received.

The Department received on April 29 an application from the Train Service Organizations to which the Canadian Northern Railway Company's employees at Winnipeg belonged. In the application it was stated that the dis-

pute grew out of the alleged action of the Canadian Northern Railway Company in leasing running rights over its tracks between Winnipeg and Emerson to the Midland Railway of Canada, and the anticipation that certain Canadian train employees would thereby be replaced by American crews of the Great Northern and Northern Pacific Railways with which the Midland Company is closely associated. The number of employees concerned was given in the application as 2,000.

A Board was established by the Minister on May 3rd, Mr. Thomas J. Murray, Winnipeg, Man., being appointed a member thereof on the recommendation of the employees concerned.

DISPUTE BETWEEN C. P. R. AND FREIGHT CLERKS, ETC.

THE Minister of Labour received on May 3 the unanimous report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Canadian Pacific Railway Company and the railroad freight handlers and railway clerks employed by that Company at Winnipeg, Man., the employees being members of Winnipeg Division No. 177 of the Brotherhood of Railroad Freight Handlers and Railway Clerks.

In the application for the establishment of this Board it was stated that the dispute grew out of the Company's policy of alleged discrimination against employees belonging to the above mentioned Union and dismissals of many of

the Union members. The number of employees affected was given as 220 directly and 230 indirectly.

A Board was established by the Minister on March 18, and was constituted as follows: Honourable Mr. Justice H. A. Robson, Winnipeg, Man., Chairman, appointed by the Minister in the absence of any joint recommendation from the other members of the Board; Mr. Charles P. Fullerton, Winnipeg, Man., appointed by the Minister to represent the Company; and Mr. Thos. J. Murray, also of Winnipeg, Man., the employees' nominee.

The Board met at Winnipeg on April 8, and succeeded in securing an amicable adjustment of the points at issue.

Report of Board.

The text of the report of the Board of Conciliation and Investigation in this matter is as follows:

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Pacific Railway Company, employer, and Railroad Freight Handlers and Railway Clerks at Winnipeg, Manitoba, employees,

To the Registrar of Board of Conciliation and Investigation:

The undersigned members of the Board of Conciliation and Investigation established by the Honourable The Minister of Labour by order dated the 18th day of March, 1912, have to report that after severally taking the requisite oath they held their first meeting on the 8th day of April, 1912, at Winnipeg meeting again on subsequent days until matters were closed.

It was decided that informal efforts towards amicable adjustment of the dispute should be made. Representatives of the employer and employees were interviewed at several different times. Of the thirty seven employees who had been dismissed it was found that about twenty were desirous of returning to work. The Company after consultation found itself in a position to renew the employment of these twenty men. It was willing to restore them to their respective positions in the service and in satisfactory grades of the work in which they had been engaged. Accordingly the men referred to have resumed work. It does not seem to the undersigned that any good end will be gained by setting forth the controversy at any greater length or by further elaborating this report.

Dated at Winnipeg this 29th day of April, 1912.

(Sgd.) H. A. ROBSON, *Chairman.*

(Sgd.) CHARLES P. FULLERTON,

(Sgd.) THOS. J. MURRAY.

JUDGMENT OF SUPERIOR COURT REGARDING PERMANENT BOARD OF CONCILIATION BETWEEN MONTREAL SHIPPING COMPANIES & LONGSHOREMEN.

ON the 15th of April judgment was rendered by His Lordship Mr. Justice Greenshields in the Superior Court, Montreal, on an application of the Syndicated Longshoremen of Montreal for the annulment of a contract which was made between the applicants and the Shipping Companies of the Port on May 13, 1910, for the establishment of a Permanent Board of Conciliation to deal with disputes arising from time to time between these Companies and the longshoremen in their employ. This action was based on the claim that the defendants had failed to carry out the obligations imposed upon them under their contract, and claim was made by the longshoremen for the recovery of a deposit of \$2,000 which had been posted by the Shipping Companies two

years ago as security for the observance of this agreement.

The judgment of the Superior Court is in the following terms:

IN THE SUPERIOR COURT.

On this 15th day of April, 1912.
Present: His Lordship Justice Greenshields.

The Syndicated Longshoremen of the Port of Montreal, corps politique et incorporé, ayant sa principale place d'affaires en cette province dans la Cité et le district de Montréal, plaintiffs, vs. the Allan Line, Donaldson Line, Thompson Line, White Star Line, Leyland Line, Manchesters Liners, Canada Line, South African Line, Mexican Line, Black Diamond Line Head

Line, formant maintenant la Shipping federation of Canada et la Canadian Pacific Railway & Steamship Company, tous corps politique et incorporés ayant leur principale place d'affaires en cette province dans la cité et le district de Montréal, defendants.

The court, having heard the parties by their counsel and their witnesses upon the issues joined in this cause; having examined the pleadings and documents of record, and deliberated:

Whereas the plaintiffs ask by their action that a certain contract *sous seing privé* dated the 13th day of May, 1910, be declared annulled and forfeited, and the defendants condemned to pay to the plaintiffs \$2,000.00, and allege in effect; that in the month of April, 1910, with a view of avoiding a strike, the plaintiffs, then being employees of the defendants, entered into a certain contract, *sous seing privé*, dated the 13th day of May, 1910, which contract is fully recited and set forth in plaintiffs declaration; that to guarantee the fulfilment of said contract, the plaintiff and the defendants, each, deposited with the Royal Trust Company \$2,000.00, and at the same time, following the recommendation made by a certain Board of Conciliation or Arbitration, formed a permanent Board of Conciliation; that differences arose under said contract, and the same were referred to the said permanent Board of Arbitration, which Board rendered a decision upon the same, which decision is also fully set forth in plaintiff's declaration, and is dated the 29th day of June, 1911; that one Gustave Franq was the member of said permanent Board representing the plaintiffs, but has since resigned, and another one has been named to replace him; that the said defendants have failed to carry out the obligations under said contract, as fully set forth in detail in paragraph 7 of plaintiff's declaration and the subparagraphs thereunder;

Whereas the defendants plead; denying the material allegations of plaintiffs declaration, and alleging that in

any event the complaints or grievances alleged in plaintiffs declaration are grievances arising under the contract of the 13th day of May, 1910; that the said plaintiffs and defendants agree that all such differences, disputes or complaints should be submitted to a permanent Board of Conciliation or Arbitration; that the said agreement is valid and binding, and was a condition precedent to the taking of any action under said contract, such as the action presently taken by the plaintiffs;

Whereas the plaintiffs answer the said plea generally:

Considering that at the bearing, the plaintiffs and defendants, in order to save costs of enquete, agreed that judgment should be rendered on the question, as to whether the agreement to submit all differences or grievances arising under said contract to a Board of Arbitration, was valid and binding upon the parties, and was a condition precedent to the taking of the present action;

Considering that by the agreement between the parties, dated the 13th of May, 1910, it was agreed that, in order to give effect to the recommendation contained in the award of the Board of Conciliation and Investigation, dated the 19th of April, 1910, all grievances arising between the parties should be submitted to a permanent Board of Conciliation composed of one member appointed by each party, and a third to be chosen by the two, and failing an agreement the third to be appointed by a Judge of the Superior Court;

Considering that said permanent Board was appointed and acted as such;

Considering that one of the members of the said Board, to wit, Gustave Franq, resigned, and on the 23rd of August, 1911, the defendants put the plaintiffs in default to name another to replace him, which the plaintiffs failed to do;

Considering that the agreement to refer all grievances under said contract

to a permanent Board of Conciliation, is a valid and binding agreement;

Considering that the said agreement does not purport to oust the Court of its jurisdiction, but is a condition precedent which must be fulfilled before an action in Court would lie;

Considering that the plaintiffs have failed to comply with the said agreement, and are without right to sue, and their present action is premature;

Considering that the defendant's plea in that respect is well founded;

Doth declare the plaintiff's action premature; doth maintain the defendant's plea, for the present, and

Doth dismiss plaintiff's action, but without costs, reserving to the plaintiffs all future rights.

(Signed) R. A. E. GREENSHIELDS,
J. S. C.

REPORT ON VARIOUS LAWS AFFECTING LABOUR DISPUTES IN PUBLIC UTILITY SERVICES.*

A VERY interesting volume has been published by the Labour Department of the British Board of Trade in response to inquiries which were made in the House of Commons during the autumn session of 1911 and in other ways for information relative to the Canadian and other laws in the British Dominions and in foreign countries respecting strikes and lockouts, with especial reference to disputes affecting public utility services. This volume was compiled in the main from information which was already in the possession of the Labour Department.

In the account which is given of the laws in question a uniform plan of treatment has been adopted as far as possible; the stages through which the various Acts have reached their present form have been briefly indicated; and their salient provisions, together with, when the material is available, their general operations have been described. Under the last head particulars have been given in several cases as to the extent to which strikes or lockouts have or have not been avoided, and an attempt has, in some cases, been made to indicate the extent to which penalties laid down by the var-

ious Acts have been imposed and their provisions enforced. In several cases, however, especially in the section dealing with foreign countries, information has been limited to the text of the measures themselves, and particulars as to their administration and enforcement are lacking. In spite, however, of its incompleteness in these respects a large and serviceable body of material has been brought together in this report, and in various cases this has been appreciably strengthened by particulars furnished by the various governments concerned.

The volume devotes considerable attention to the Industrial Disputes Investigation Act of Canada and to the results which have attended its operation during the four years ending March 31, 1911. The report treats also of the Industrial Disputes Laws in force in the Commonwealth of Australia and its constituent States, in New Zealand, and in the Transvaal. The legislation with which the return deals varies greatly in character, and changes in the Australasian laws were in progress at the time the memoranda were compiled.

The differences in the character of the legislation turn largely on general scope and aim, and more specifically on the machinery set up under the Acts, on the penalties they impose, and as to their bearing on what are known as the "public utility services." It is

*Memorandum prepared from information in the possession of the Labour Department of the British Board of Trade, relating to the text and operation of certain laws in the British Dominions and Foreign Countries affecting Strikes and Lockouts, with especial reference to Public Utility Services.—London; Wyman and Sons; pages, 162; price, 1s. 5d.

pointed out that this expression "public utility services" is one having no exact definition. Primarily the services of water supply, gas and electric lighting, and those of public locomotion, transport and communication are connoted. In some cases public utilities have been closely grouped with other industries also regarded as of prime importance to the community, such as mining in the Industrial Disputes Investigation Act of Canada. In the New South Wales Industrial Disputes Act "necessary commodities" are defined as including in general, coal, gas, water, and "any article of food, the deprivation of which may tend to endanger human life or cause serious bodily injury." The Industrial Conciliation and Arbitration Act, 1908, of New Zealand contains special conditions to safeguard the supply of gas, electricity, water, milk, meat, coal, and the operation of ferries, tramways, and railways. In Russia the definition covers "all undertakings having a social or governmental character . . . if the suspension of work of the employees or work people threatens the security of the State or gives cause for fear of a national calamity." In such fields strikes or lockouts are rendered illegal, but in Holland, on the other hand, the applied definition is much narrower, the special legislation prohibiting strikes in that country being confined to the main lines of the railway service; while in Belgium it covers all persons employed by the State, including those in the railway, postal, telegraph and telephone services.

Although in the Acts of New South Wales and New Zealand, to which reference has just been made, special penalties or conditions apply in connection with the public utility services, the most general aim of the Acts themselves is, apart from the improvement of industrial conditions in the weaker trades, the maintenance of industrial peace. In the foreign legislation, as a rule, the prime object is rather to ensure to the public the provision of what are regarded as most necessary

services and, although the two ends of industrial peace and the public welfare tend to converge, a characteristic difference in the nature and scope of the two classes of legislation emerges.

British Dominions.

In most cases the employees of the public services, such as those of the post office, and (when owned by the State, as is almost universally the case in Australia, New Zealand and the Transvaal) of the railways, are brought under special measures granting certain privileges and also imposing special obligations of discipline and obedience. These special measures appear, however, to impose no clear statutory limitations on the right of combined action.

Such limitations of this right as exist in the Dominions are to be found in the new body of industrial legislation dating from 1896. In this legislation limitations applying specially to the public utility services are imposed only in four cases—namely, in those of New South Wales, New Zealand, Canada and the Transvaal, and in all these the limitations are imposed by Acts that have a wider application, and that, in imposing penalties for lockouts and strikes that take place under certain conditions, also set up machinery for the settlement of industrial disputes. It may be noted that in none of the Dominions save in the State of Western Australia, where the public utility services are put on the same footing as general industry, and possibly in that of New South Wales, are lockouts or strikes made unconditionally illegal.

The restrictions imposed by the legislation of Canada (including that of the Transvaal) on lockouts and strikes may be broadly divided into two groups—one in which the observance of prescribed or of agreed and filed conditions of employment as regards wages, etc., is potentially a matter of legal compulsion, as in Australia and New Zealand, and the other, from which this element of compulsion is ab-

at, as in Canada and the Transvaal. The first class may be subdivided into three: (1) In which a legal tribunal—the Industrial Arbitration Court—is the principal instrument for the legal settlement of disputes, as under the Commonwealth Act; (2) in which awards, composed, apart from the chairman, of employers and workers or representing, the trade concerned, take the place of the Court, as in South Australia and Tasmania; and (3) in which there has been evolved a combination of these two plans as now in New South Wales and in New Zealand. Victoria, from this point of view, forms a class apart, and in Queensland the legal restrictions of the right to the lockout or strike are imposed. Legislation also exists in the province of Nova Scotia, imposing fines on employers and loss of wages on employees for non-compliance with the award of arbitrators appointed under a provincial act of 1900 in coal-mining disputes.

Foreign Countries.

Of the foreign countries covered by the Memoranda there are in Europe none which have legislation specially designed to avert strikes on the part of those employed in public utility services.

Of these countries, five—viz., Russia, Roumania, Holland, Belgium and Italy—have enacted laws absolutely prohibiting workpeople employed in certain public utility services from engaging in strikes. In Russia and Roumania the law covers the whole field of what may be termed public utility services, whether governmental or local. In Belgium it applies to all persons in the service of the State, including the railways, post office, telegraphs and telephones; in Italy it applies to all persons in the service either of the State or of a railway company, while in Holland only those employed on main lines of the railway service are included. In three countries—viz., Spain, Portugal, and the Ottoman Empire—have enacted laws applicable to all public utility services, and declaring concerted

stoppages of work illegal unless certain conditions have previously been fulfilled. In Spain the conditions are that notice of the strike or lockout shall have been given to the authorities either eight days or five days beforehand, according to the nature of the undertaking, and that such notice be accompanied by a statement of the cause of the strike or lockout. The Portuguese law insists on twelve or eight days' notice being given of the strike or lockout, according to the nature of the undertaking, and requires that such notice be accompanied by a statement of the causes or objects of the strike or lockout. Under the same law all "officials, public servants, or those receiving salaries from the State" incur the penalty of dismissal if they combine to suspend work.

The last of the nine European countries that call for mention in this connection is France, where the only persons employed in public utility services who incur legal penalties for participating in strikes are the engine drivers, guards and brakemen actually in charge of trains, and the outdoor staff of the postal service.

In Germany and Austria, so far as the railway, postal and allied services are concerned, strikes on the part of the staff are rendered impossible in practice by the policy pursued by the authorities towards any manifestations of trade union activity among members of these services.

In Denmark and the Swiss Canton of Geneva permanent Courts of Arbitration, equally representative of the interests of employers and of workpeople, have been established and endowed, under certain circumstances, with the powers of ordinary courts of justice as regards compelling the attendance of witnesses and the production of relevant documents. Under the Danish law the Courts of Arbitration have, moreover, the power to inflict and enforce penalties for non-observance of agreements.

In the United States of America special measures for safeguarding pub-

lic utility services from interruptions due to strikes and lockouts have from time to time engaged the attention both of the Federal and the State Legislatures. The laws specially enacted for this purpose are, however, concerned solely with the railway service, and in no case do they involve any derogation from the principle of freedom on the part of railway servants to engage in strikes, except in so far as engine drivers and others actually in charge of trains incur penalties of imprisonment or fine for deserting their posts before the train reaches its scheduled destination. Provisions of this nature, moreover, have found their way into the statute books of only eight States of the Union—namely, Connecticut, Delaware, Illinois, Kansas, Maine, Pennsylvania, New Jersey and Texas. In three of these States (Delaware, Maine and Pennsylvania) penalties of fine or imprisonment are also incurred by any railway servant who, for the purpose of furthering a strike on another railway, either within or without the State, refuses or neglects in the course of his employment to aid in the movement of cars owned by the other railway over the lines of the railway by which he is employed.

The only example of Federal legislation enacted for the specific purpose of safeguarding public utilities from interruption arising out of strikes and lockouts is a law of June 1st, 1898, applying arbitration to labour disputes on inter-State railways. Under this law the President of the Inter-State Commerce Commission and the Federal Commissioner of Labour are requir-

ed, on the petition of either side, to endeavour to mediate whenever a dispute arises seriously interrupting or threatening to interrupt the business of any inter-State railway undertaking. No power either of independent initiative or of compulsion is, however, reserved to the Government.

While "the right to strike for any cause or no cause is clearly and fully sustained by all authority" in the United States, injunctions are frequently issued by the American Courts restraining railway servants from striking on the ground that such action on their part is in contravention of the provisions of certain federal statutes, more especially those of the Anti-Trust Act, the Inter-State Commerce Act, and the Obstruction of Mails Act.

Finally, it may be noted that the principle of investing permanent Boards of Arbitration with the powers of ordinary courts of justice as regards compelling the attendance of witnesses is one that has long been applied by many of the State Legislatures of the American Union. In a few cases (Colorado, Illinois, Missouri and Ohio) such Boards are given power to enforce their awards. In no case, however, do the provisions as to enforcement of awards amount to compulsory arbitration. In all the four States mentioned the compulsion provided either can be applied only when both parties have voluntarily agreed to the arbitration, or (in Missouri) it can be applied in the case of a party who did not accept arbitration only when that party has voluntarily acquiesced in the award.

REGULATING WAGES BY LAW.

(La Fixation Légale des Salaires, par R. Broda, Professeur au Collège libre des Sciences sociales, Directeur des *Documents du Progrès*.)

THIS little book of 173 pages is a careful study of the labour problem and seeks to find a remedy for existing conditions on the European continent by means of laws regulating both wages and conditions of labour, the enforcement of said laws to be entrusted to inspectors and wages committees instead of to courts of justice. Its aim is set out in the following sentence of the *Preface*: 'There must be substituted for the anarchistic methods of strikes and lockouts the methods invented by Canada and Australia, and thus bring about the coming of an era wherein wages and conditions of labour shall only be dictated by science, by the exigencies of social hygiene, and the progress of national economy.'

The historical part of the book is most interesting and instructive. The State long ago undertook to regulate wages, but it was mainly by fixing a *maximum*: the employer was prohibited from offering more than a certain amount, and the employee from asking for or accepting more than the sum established by law for work in his particular trade. The writer brings us as far back as the year 1351, when the *First Statute of Labourers* was passed in England, regulating wages in every branch of industry. In 1603 only did a law allow workmen to try to get more than the established maximum wages, providing at the same time for penalties against employers who were not paying the minimum wages established by the Act. In 1747 the Government ceased interfering with wages and the work of settling differences between employers and employees was entrusted to justices of the peace.

In the nineteenth century wages and conditions of labour were left to the mercy of "the law of supply and demand." A keen competition between producers made the condition of the working people worse and worse year by

year, and the various governments had to interfere again for the protection of the defenseless masses. England once more led in this work, in the first half of the century, and was soon followed by France, Germany, Austria and most of the other civilized countries.

But to Canada and Australia, according to the author, belongs the credit of having found a practical remedy for the existing conditions in these countries. In the latter country, after a thorough investigation, it was found that home work (or, in other words, the *Sweating System*) had taken the place of factory or shop work, especially as far as women workers were concerned. Wages committees, under an Act passed in 1896, were established, with powers: (1) to regulate minimum wages for time or piece work; (2) to restrict the number of apprentices under 18 years of age. The operation of this Act covers almost all industries in the State of Victoria, and to-day 75,000 working people, out of a total of 79,000 in the State, are under the jurisdiction of the Wages Committees, and, according to the present author, both employers and employees are perfectly satisfied with the improved conditions.

In Canada the work has been carried with special reference to public utilities, such as mines, railways, etc., where a suspension of work is likely to cause incalculable injury to the whole community. The Act of 1907 allows employees to go on strike, but only after their differences with their employers have been submitted to a Board of Conciliation and an award has been made. Mr. Broda speaks very favourably of the working of this Act and recommends that similar measures should be taken with reference to other industries than public or semi-public utilities, and cites the example of the State of Victoria where strikes are practically unknown

since the introduction of the new system.

England and France are also attempting to solve the problem. In 1910 was passed by the British Parliament an Act identical with the Australian measure and Wages Committees are now established in four industries with very good results. The author remarks that the establishment of these Wages Committees met with far less opposition in England than in Australia, and that, judging from the results achieved by the English Committees, the only serious difficulty to be encountered, to wit: the larger population of certain European states, may be easily overcome by the appointment, as was done in England, of *Regional Wages Committees*, the same reporting to the Central Committee.

In France, a government Bill was introduced in November of last year, dealing with the question of "home" work, but instead of following the example set by Australia of fixing wages *by the hour*, it only insists on a minimum price for piece work, taking as a basis the *average* wages of unskilled workers, while in the

British countries the basis is the wages paid by the *best* employers in each branch of industry. In spite of these shortcomings, however, much good is expected from this legislation.

Mr. Broda believes that "regulating by law wages and conditions of labour is not only *possible*, but also *necessary* in the case of home work, as well as in the case of shop work in industries in which working people are under the same unfavourable conditions as home workers, and are, as experience teaches us, incapable of defending themselves, that is in all industries employing *female* labour." He also claims that "the fears expressed by the powerful English syndicates and by the most skilled English workers, who are afraid that the introduction of minimum wages may cause the wages of the elite to fall to the level of those of the masses, are victoriously refuted by the numerous experiences of Australia and New Zealand. The difference between the wages of the elite and those of the masses always remain the same; the latter increasing, the former also increase. The thing to disappear is the *Struggle* for an increase of wages, and not that increase itself."

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR, CANADA, DURING THE FIRST QUARTER OF 1912.

AN upward movement in wages continued during the period from January 1 to March 31, a number of important changes being made in that time. Substantial advances were given to municipal employees in six cities; unskilled labour was generally better paid by municipalities than was the case during last year. Changes in working hours were few, a reduction of six hours per week being recorded in three cases only. Full details of the various changes recorded during the quarter will be found in the accompanying tabular statement.

Changes by Industries and Trades.

Agriculture. — Wages generally remained the same as in 1911; experienced farm help being scarce and commanding good wages.

Building trades. — On January 1, cement finishers at Nelson, B.C., received an advance in wages of \$3.00 per week. The rate prior to that time being \$24.00 per week of 48 hours. Painters, decorators and paper-hangers to the number of sixty-one in the City of Hamilton received an increase of 2½ cents per hour on March 1, the prevailing rates now being 32½c-35c per hour. Bricklayers and stone masons (700) in Winnipeg, Man., received an advance of 2½ cents per hour on January 1.

Metal trades. — The strength of competition was stated to be the reason for a reduction in wages of heaters in rolling mills at Montreal. This reduction which affected thirty-two men amounted to 10 per cent. or from \$4.80 to \$5.40 per week. Iron moulders in Brantford received an increase in wages on Feb-

bruary 15, the advance of 10 cents affecting thirty-two employees and raising the minimum wage from \$14.85 to \$15.40 per week. On the same date twelve coremakers in the same city were given an increase of 10c per day, the scale of wages rising from \$2.25-\$2.50 to \$2.35-\$2.60; steamfitters (150) in Winnipeg, Man., were given an advance from 50 cents to 55 cents per hour, the changes taking effect on January 1.

Clothing trades. — About fifty-five cloak-makers in Toronto were affected by a change in piecework prices which involved an increase of 10-15 per cent. This change went into effect on January 28.

Food and tobacco preparation. — Brewery workers (18) at St. Catharines, Ont., received an increase of \$1.50 per week on March 16th.

Textile trades. — A general increase in wages was given on March 9 to cotton mill operatives in the employ of the Dominion Textile Company at Halifax, N.S., Moncton, N.B., Magog, Montmorency, and Montreal, Que., and Kingston, Ont. A reduction of two working hours per week was made in the case of the same employees, the change going into effect on January 1, 1912. Full details of individual agreements were not made public, but it is understood that the increase in wages was a general one of about 5 per cent. and affected 6,300 employees, all of which were involved in the change of working hours.

Railway employees. — Machinists (50) at St. Thomas, Ont., were given an increase of 1 cent per hour. This change, which was arranged after negotiations, went into effect on March 1, 1912. As a result the scale of wages became \$18.63 per week as against \$18.09 before the change. Railroad telegraphers on the Grand Trunk Railway System were given extra pay on February 1 for necessary overtime work on Sundays, the number of men affected being 778. On Jan. 1, 1912, also an important change went into effect relating to wages of trainmen employed by the Grand Trunk Railway Company, details regarding which were

published in the *Labour Gazette* for February, 1912. Early in March the company decided to make adjustments in these changes in wages and regulations and re-establish new rates in lieu of those named in the schedule of January 1. The further changes, information regarding which is published in the *Labour Gazette* for April, 1912, went into effect on April 1.

Electric and street railway employees. — Street railway employees (98) at London, Ont., were given increases on January 1. Forty-two relief men were given an advance of one cent per hour, from 18 to 19 cents, and the wages of fourth year men (56) were increased from twenty to twenty-two cents per hour. Employees of the Ottawa Electric Railway Company to the number of 457 received increases on January 1. The majority of the men had their wages advanced 1 cent per hour; ten linemen were given an increase of 2 cents per hour.

Woodworking trades. — Twenty woodworkers at Fredericton, N.B., were affected by a change in hours on January 1 from 10 per day to 9 per day with a corresponding reduction in wages. The wages were previously from \$1.50 to \$2.50 per day, the reduction in hours being usual at this time of the year.

General transport. — Teamsters at Nelson, B.C., had their hours reduced from 54 to 48 per week, the change going into effect on January 1.

Civic employees. — Several important increases were made in the case of municipal employees. Firemen (42) in Ottawa, Ont., received increase in January of \$1.04 per week, one member of the same force being given an advance of \$2.09 per week; policemen (7) in Peterborough, Ont., received increases on January 1 ranging from \$50 to \$100.

At Niagara Falls twelve municipal employees on January 1 received increases of \$24.00 to \$200.00 per annum. In March, policemen in Hamilton were given an advance of sums ranging from \$50.00 to \$150.00 per year. Members of the police force in Guelph to the number of six received a similar increase during the same month. Seventy-one firemen in Hamilton were given in-

creases in March; the same class in London were given an advance of 10c per day, while important changes were made in the salaries of the employees of the hydro-electric department of the latter city, the increases going into effect on March 1. Four policemen at Chatham were given an increase of \$5.00 per month and ten call firemen in the same city were given increases. Policemen (8) at St. Thomas, Ont., received increases on March 1, ranging from \$60.00 to \$100 per year. At Lethbridge civic employees (7) were given increases at the rate of \$50.00 to \$300.00 annually, the change dating from March.

Unskilled labour. — Labourers employed by city corporations in a number of places were benefited by increased wages. In St. John, Que., twenty labourers received an advance of 25 cents per day with a reduction of working hours from 60 to 54 per week. Eighteen hundred of the same class in Montreal had their wages increased from \$2.00 to \$2.10 per day, the change going into effect on January 1. The City Council of Toronto, Ont., granted

an increase of 25 cents per day to labourers, the increase involving 300 men and taking effect on January 1. A recommendation of the Board of Control adopted by the City Council of Hamilton, Ont., provided for an increase to corporation labourers in that city. The change from 20 to 22 cents per hour went into effect on March 1, at which time two hundred men were employed. In the summer more than 1,800 men will benefit by the increase. In Victoria, B.C., eleven hundred labourers were given an increase of 25c per day on March 1, rock drillers (400) in the same city benefiting by a similar increase on the same date. At Nelson, B.C., a change took place in wages and hours of labourers in the employ of the city corporation. The change went into effect in January and involved an increase of 20 cents per day and a reduction in working hours from 54 to 48 per week.

Miscellaneous trades. — Broom and whisk makers (16) at Hamilton were given an increase of 3½ cents per dozen brooms which involves a change of about \$2.00 to their weekly earnings.

PRICES, WHOLESALE AND RETAIL, CANADA, APRIL, 1912.

I. WHOLESALE PRICES.

NOTWITHSTANDING that wholesale prices advanced at an exceptionally rapid rate during the first three months of the year and stood in February at the highest point recorded probably within the present generation, the past month has witnessed a still further increase, the Department's index number standing at 135.4 for April as compared with 134.2 in March. In April last year it stood at 126.4. The numbers, it will be understood, are percentages in each case of the average price level prevailing during the decade 1890-1899, the period selected by the Department as the standard of comparison throughout its investigation into wholesale prices. Some 250 articles carefully selected to represent Canadian production and

consumption are included in the calculation.

The chief features in the rise during the past month were advances in western grain, animals and meats, fruits and vegetables, hides, metals, coke, raw cotton and raw rubber. Dairy products were lower. The chief increases during the past year occurred in grains and fodder, animals and meats, dairy products, fruits and vegetables, hides and leathers, furs, liquors and tobacco, there having been considerable decreases only in paints and oils.

The following table of the Department's index numbers, arranged by groups of commodities into which the investigation has been divided, shows the average price level for April, 1912, compared with that of the preceding month and with that of the corresponding month last year:—

TABLE SHOWING INDEX NUMBERS BY GROUPS OF COMMODITIES FOR APRIL, 1912.

More detailed information as to the price movement during March as compared with the preceding month is as follows:—

Grains and fodder. — Grain in Ontario was on nearly the same level as in March, wheat, oats and corn were somewhat higher, barley was lower, peas being steady and rye quotations only nominal. Western grains were considerably higher as the movement east was much better and the opening of navigation on the lakes was much nearer. Reports of the world's wheat crops gave wheat an upward tendency, the demand for oats was strong as corn and other feed was scarce in the United States, barley was higher and flax was in good demand. Baled hay was 50c lower at Montreal but advanced 50c at Toronto, bran and shorts were steady though scarce while baled straw was slightly lower.

Animals and meats. — Western cattle were advancing as fat cattle were in good demand and rather scarce. At the first of the month cattle were slightly lower at Toronto but rose later, dressed beef also advancing in the latter part of the month. Veal quotations remained unchanged. Hogs and hog products reached the highest point yet recorded since 1890 by the Department. Live hogs rose to \$8.15-8.25 f.o.b. at Toronto in the latter part of the month, the highest quotation previously having been \$8.00 in September, 1909. Dressed hogs advanced similarly. Bacon and hams also advanced to levels previously reached only in 1906 and the autumn of 1909. Barrelled pork rose to \$25.00 which was equalled in 1902 and 1908 though higher in 1909. Lard was similarly high. Sheep advanced in price and are reported rather few in number. Mutton and poultry were steady.

Dairy products. — Butter fell steadily being quoted at 26c at the close of the month at Montreal as compared with 22c last year and 29-30c at Toronto as compared with 21-22c at the same time last year. Better supplies have been coming in steadily and many creameries commenced operations for the season.

Cheese from the new season's make also came on the market at lower prices and was weaker at the close of the month. The wholesale price of milk was announced lower for the first of May at Toronto and Montreal. Eggs also fell steadily but were still high as compared with last year being quoted at 22-23c in Toronto as compared with 18c in the same period of 1911. This is usually the cheapest time of the year for eggs but the season is estimated to be about two weeks later than usual. Storage houses report that the price is still too high for storing eggs.

Fish. — All fish were firm, stocks of prepared fish being reported pretty well cleared out during Lent and fresh fish not yet plentiful. Fresh lobsters came on the market for the season at 15c as compared with 10c last year.

Fruits and vegetables. — Winter apples were \$1.00-\$1.50 per barrel higher, as good apples were reported scarce. Bananas and lemons were steady but oranges were lower. Prunes also declined. Canadian onions were slightly higher and scarce, but Egyptian onions came on the market. Potatoes were slightly higher at Montreal but somewhat lower at Toronto. Canned goods were steady.

Miscellaneous groceries and provisions. — The wholesale and retail price of bread was raised 1c per 24 oz. loaf at Ottawa for the first of May. Flour was firmer in April and advances in Manitoba flour became general. Export demand was spasmodic but domestic demand was good. Rolled oats advanced in the middle of the month in sympathy with the higher price of oats. Sugar was 20c per barrel lower, being weaker in New York and England. The Brussels convention has allowed Russia to export a considerable part of her surplus and since the coal strike in England sugar prices have weakened in common with many other prices. Glucose advanced considerably in sympathy with the advancing price of corn. Molasses opened high in the sales at Barbados but was expected to be weaker in sympathy with the lower prices

of sugar. Prices of salt changed, fine salt declining 1c per barrel, dairy and cheese salt 2c, while table salt advanced 5c per barrel.

Textiles. — Raw cotton advanced again at New York, demand being good and the surplus of last year's crop having been taken up largely by British manufacturers last fall. There were also some unfavourable reports as to this year's crop in the United States. Raw silk was also higher under good demand and manufactured silks were therefore firmer. Linen rope advanced 3c per lb. in sympathy with the high price of raw material.

Hides, leather, boots and shoes. — Hides and calfskins were 1c to 1½c higher, while leathers were firm. All lines of boots have been advanced 2½c.

Metals and implements. — Iron and steel prices have been much firmer, scarcity on the English markets strengthening prices in America, where the demand has been improving and has not been checked by a recent advance in most lines of steel in the United States. Pig iron was scarce at Montreal but relief was expected from the opening of navigation and Canadian Foundry was lower. Antimony was very scarce at Montreal and advanced. Aluminium and copper were higher at New York and brass and all copper goods advanced considerably. Copper is under strong demand and production is reported less than at the same time last year though more mines are being operated. Lead and tin were higher chiefly on account of the British coal strike. Spelter was very scarce and advanced, the movement from United States producing centres being very slow. Silver was steadier. Chain coil declined in price.

Fuel and lighting. — Coke has continued a steady advance since the first of the year, Connellsville furnace coke being \$2.35-2.40 as compared with \$1.50-1.55, f.o.b. ovens in December.

Building materials. — Lumber trade was reported good and demand for building heavy, especially in Western

Ontario. Prices were good and car shortage caused an upward tendency. New Brunswick spruce deals advanced as freights and shipments to United States markets were better on the resumption of the coast shipping. N. B. shingles were quoted lower and also pine, good sidings, and spruce at Ottawa. Building paper, tarred and plain sheeting, was lower. Iron wire and iron pipe were lower while lead pipe and copper wire advanced. Linseed oil was 4c per gallon higher as the Argentine crop was reported to be not as good as anticipated. Putty was very firm in sympathy with linseed oil and whiting. White lead advanced on account of the high price of linseed oil and lead. Turpentine declined after an advance of 2c as freights in the United States were lower and the price was easier at Savannah. Paris green prices for the year have been set lower. An advance of 10-15% in window glass was announced. This had been expected for some time but was precipitated by the impeding of manufacture due to the coal strike in England.

House furnishings, drugs and chemicals were steady.

Miscellaneous. — Pulp, ground wood, mechanical, was lower as is usual at this season and sulphite, unbleached, was quoted slightly higher. The demand for paper is very good. Rubber was higher but is reported to have reached the high water mark for the year as Brazilian supplies are expected to be heavy. Laundry starch advanced from 5½c to 5¾c in sympathy with corn.

Course of Prices in Canada, Great Britain, and the United States.

The following table which includes the latest findings available of the most authoritative index numbers of prices in Great Britain and the United States will enable a review to be made as to recent movements and tendencies in prices in these countries as compared with Canada:—

	Canada	Great Britain		United States	
	Department of Labour	Economist	Sauerbeck	Bradstreet	Gibson
1911	127.3	2,549	79.7	8.7,132	109.2
1912					
Jan.	131.4	2,613	81.8	8.9,493	112.4
Feb.	134.3	2,667	82.9	8.9,578	112.2
Mar.	134.2	2,731	84.4	8.9,019	115.7
Apr.	135.4			9.1,010	120.5

It will be seen from the above that the general tendency has been uniformly upward in the three countries. The sudden rise in the *Economist's* number in March was largely due to the advance in coal owing to the strike, while the April rise in Bradstreet's number is attributed in the main to adverse cotton and cereal crop and supply reports.

II. RETAIL PRICES.

THE feature of the month in retail prices was a continued decline in eggs and a continued rise in potatoes, due to the advance of the season. Meats, especially hog products, were also higher, animals fit for killing being reported very scarce throughout the country. Sugar was reduced in price at some cities, and rolled oats, evaporated apples and cheese were somewhat higher. Anthracite coal was very scarce and very high in price in many cities in eastern Canada. Rentals also showed an upward tendency.

Notes on Retail Prices.

Beef. — Both sirloin steak and shoulder roast advanced in price at Quebec, Que., and at Brockville, Orillia and Hamilton, Ont.; steak alone was higher at Ottawa, Belleville, Peterborough, and Guelph, Ont., and at Lethbridge, Alta., while roast beef was higher at St. Thomas, Ont., and Edmonton, Alta., but declined at London, Ont. Both sirloin steak and shoulder roast were lower at Montreal.

Veal. — The price of veal advanced at Halifax, N.S., Quebec and Hull, Que.; Peterborough and Orillia, Ont.; Lethbridge, Alta., and Victoria, B.C., but declined at Sydney, N.S., St. John, N. B., Belleville and St. Thomas, Ont.

Mutton was higher at St. John, N.B.; Quebec, St. John's and Hull, Que.; Ottawa, Belleville and Brantford, Ont.; Winnipeg, Man., and Prince Rupert, B. C. At Winnipeg fresh mutton was on the market instead of frozen.

Pork. — Both fresh and salt pork were higher at St. John, N.B., St. John's, Que., Brockville, Brantford, St. Thomas and Chatham, Ont. Fresh pork alone was higher at Quebec, Three Rivers, St. Hyacinthe, Que.; Ottawa, Peterborough, Orillia and Hamilton, Ont. Salt pork alone was higher at Hull, Que., but declined at Winnipeg, as it was not so scarce. At Brandon, Man., fresh pork was cheaper as the quality was lower.

Bacon advanced in price at Montreal, Que., Brockville, Belleville, Peterborough and Berlin, Ont.

Fish. — At Westville, N.S., haddeck rose from six to seven cents. Halibut rose from twelve to fifteen cents at Toronto as the fresh supply came in slowly and frozen fish were off the market, and advanced 1½c at Berlin, Ont. Salmon fish were higher at Brandon, Man. All fresh fish were higher at Belleville and Woodstock, Ont., but were lower at St. John's, Que.

Lard advanced at Moncton and Fredericton, N.B.; Brockville, Peterborough, Orillia, Toronto, Brantford, Guelph and Chatham, Ont.; and at Saskatoon, Sask. Lower prices were reported at St. Hyacinthe, Que., Cobalt, Ont., and Lethbridge, Alta. A general scarcity and high prices of hogs were reported as the causes for the advance.

Eggs. — Fresh and packed eggs were lower in all the cities reporting except in Orillia and Woodstock, Ont., where fresh eggs advanced slightly, having fallen considerably the previous month, in Winnipeg where fresh eggs were steady, and in Victoria, B.C., where packed eggs were steady though fresh eggs declined. Packed eggs were on the market in only twelve cities.

RETAIL PRICES OF STAPLE ARTICLES

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the into the cost of living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a quarter of each locality usually occupied by workmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and in order that the statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* quoted, etc., from the Department.

						60	60	50		10						40	50.00	35.00

11. At Saskatoon coal is \$7.50 for lignite, Alberta, and \$8.50 for bituminous, Penn.

12. Potatoes per 100 lb. bag.

13. Delivery extra, 75c-\$1.50.

14. 3 loaves for 25c or 16 for \$1.00.

15. At Nelson, B.C., coal at \$12.00 is Vancouver Island at \$8.75 lignite.

Milk was lower in price at Three Rivers, and St. Hyacinthe, Que., Ottawa, Ont., Brandon, Man., and Saskatoon, Sask.

Butter. — Both dairy and creamery butter declined at Amherst, N.S., St. John's, Que., Toronto, Woodstock, Berlin and London, Ont., but advanced at Halifax, N.S., Kingston, Belleville, Orillia, and Windsor, Ont., Moose Jaw, Sask., Edmonton, Alta., and Nelson, B.C. Creamery butter was lower at Sherbrooke, Que.; Hamilton, and Cobalt, Ont.; Winnipeg and Brandon, Man.; and was higher at Sorel, Que., on account of improvement in quality, and at Peterborough, St. Thomas and Chatham, Ont., and Saskatoon, Sask. Dairy butter declined at St. Hyacinthe, Que., and St. Thomas, Ont., but advanced at St. John, N.B., and at Belleville, Ont., as creameries commenced operations.

Cheese. — The price of old cheese rose at Three Rivers, Que., Ottawa, Peterborough, Toronto, and St. Thomas, Ont. and at Saskatoon, Sask., but fell at Brandon, Man., and Regina, Sask. New cheese advanced at Orillia, London and St. Thomas, Ont., declining at Woodstock, Ont.

Bread. — At Ottawa, Ont., plain white bread was advanced on May 1st.

Flour. — At Peterborough, Ont., and Nelson, B.C., the price declined slightly, but at Toronto, Ont., it advanced on account of the high prices of wheat and advances made by the millers.

Rolled oats advanced in price at Fredericton, N.B., Toronto, Ont., and Prince Rupert, B.C., and declined at Peterborough, Ont.

Rice advanced at Moncton, N.B., and Three Rivers, Que., and declined at Lethbridge, Alta.

Beans were higher at Moncton, N.B., and lower at Lethbridge, Alta.

Apples, evaporated. — The price advanced at St. John, N.B., Brockville, Ont., and Prince Rupert, B.C., declining at Port Arthur, Ont. At Berlin, Ont., the factory product was on the market instead of the farmers' home-dried apples and was higher in price.

Prunes declined at Port Arthur, Ont., and advanced at Prince Rupert, B.C.

Sugar. — Both granulated and yellow sugar were lower in price at Westville, N.S., Quebec, Sherbrooke, Que., Belleville, Woodstock, London, St. Thomas, and Port Arthur, Ont., and at Lethbridge, Alta. The price rose at Moncton, N.B., and St. John's, Que. At Brandon, Man., yellow sugar was lower. Declines in wholesale prices were given as the causes.

Tea and coffee were steady.

Potatoes. — At twenty-two of the cities potatoes were higher but were lower at Sydney, N.S., London, Ont., Winnipeg, Man., and Regina, Sask., as larger supplies were brought in from the country. Scarcity was reported throughout the country.

Vinegar was steady.

Starch advanced at Sherbrooke, Que., but declined at Prince Rupert, B.C.

Coal. — Anthracite coal was higher at Halifax, N.S., Newcastle, N.B., Quebec, St. John's, and Montreal, Que. Supplies are reported very low in these cities and it is reported to be very difficult to get cars of coal from the United States. At St. Hyacinthe, Que., the price of both anthracite and bituminous coal was lower as supplies had been obtained from the mines. At Belleville, Ont., anthracite coal was lower as shipments had been received.

Wood. — At Brockville, Ont., wood was higher but at Winnipeg, Man., the price declined slightly as supplies were larger. At Montreal wood was scarce owing to difficulty in obtaining cars for shipping it in.

Coal oil. — At Orillia, Ont., coal oil was cheaper on account of competition among the dealers.

Rentals. — At St. John's, Que.; Belleville and Hamilton, Ont., Winnipeg, Man., and Saskatoon, Sask., rents were higher on account of many new residents. At Hamilton in addition to this three hundred houses have to be removed from the right of way of the Canadian Northern Railway. At Berlin, Ont., cheaper houses were scarce and rents were upward.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF APRIL, 1912.

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals and the Department of Marine and Fisheries, which has received the signatures of both parties, together with the fair wages schedules inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

POST OFFICE FITTINGS, NIAGARA FALLS, ONT.

FITTINGS for Post Office at Niagara Falls, Ont. Name of contractor, the J. T. Schell Company; Alexandria, Ont. Date of contract, December, 1911. Amount of contract, \$2,859.

Fair Wages Clauses.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life and property or in case of other emergencies. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the Contractor.

BREAKWATER AT WEST ADVOCATE, N.S.

A delegation from the Federated Boards of Trade of the Eastern Townships waited upon the Dominion and Provincial Governments to impress the need that the Eastern Townships should be better advertised, so that a quota of those coming from Great Britain

would settle in the eastern section of Canada. In both instances the representatives of the Boards of Trade were well received, and plans are now being prepared whereby the Eastern Townships may expect to get a proportion of those coming out to Canada.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF APRIL, 1912.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of British Columbia, to the office of the factories inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 289 individual work people in Canada during the month of April, 1912, were recorded by the Department of Labour. Of these 62 were fatal and 227 resulted in serious injuries.

In the preceding month there were 90 fatal and 182 non-fatal accidents recorded, a total of 272, and in April, 1911, there were 79 fatal and 121 non-fatal accidents, a total of 200. The number of fatal accidents recorded in April, 1912, was, therefore, 28 less than in the preceding month and 17 less than in April, 1911. The number of non-fatal accidents recorded in April, 1912, was 45 more than in the preceding month and 106 more than in April, 1911. Altogether there were 17 more industrial accidents recorded in April, 1912, than in the preceding month, and 89 more than in the same month of the preceding year.

The following is a record of the accidents of the month by industries and groups of trades:—

STATEMENT OF ACCIDENTS DURING THE MONTH OF APRIL, 1912, BY INDUSTRIES AND GROUPS OF TRADES.

Nature of Fatalities and Accidents.

The only disaster of the month involving the death of more than one workman occurred on construction work at Callander, Ont., on the line of the Canadian Northern Railway, where two men were killed by flying rock which penetrated a shanty in which they had taken shelter during blasting operations.

Record by Industries and Groups of Trades.

Agriculture. — There were five fatal and six non-fatal accidents recorded during the month of April, 1912, as compared with 7 fatal and 6 non-fatal accidents during March, and four fatal and

twenty-two non-fatal accidents during April, 1911. Two of the fatal accidents were caused by machinery, and one each by a falling tree, a railway train and live stock.

Fishing and hunting. — There were no accidents recorded during April, 1912, compared with none in March, and seven fatal accidents during April, 1911.

Lumbering. — There were four fatal and ten non-fatal accidents recorded during April, 1912, compared with five fatal and six non-fatal accidents during March, and two fatal and six non-fatal accidents during April, 1911. Of the fatal accidents one each was caused by a falling tree, drowning, machinery, and an explosion of dynamite.

Mining. — There were ten fatal and eleven non-fatal accidents recorded during April, 1912, compared with seventeen fatal and thirteen non-fatal accidents in March, and nine fatal and eight non-fatal accidents during April, 1911. Seven of the fatal accidents were caused by the fall of coal and rock, and one each by a premature explosion, asphyxiation and a fall.

Railway construction. — There were eight fatal and seven non-fatal accidents recorded during April, 1912, as compared with four fatal and five non-fatal accidents during March, and two fatal accidents during April, 1911. Four of the fatal accidents were caused by flying material (after a blast), two by falling material, and one each by an explosion of dynamite and by being run over by a train.

Building trades. — There were five fatal and six non-fatal accidents during April, compared with five fatal and sixteen non-fatal accidents during March, and seven fatal and ten non-fatal accidents during April, 1911. Four of the fatalities were caused by falls, and one by a falling derrick crane.

Metal trades. — There were two fatal and seventy-five non-fatal accidents recorded during April, as compared with five fatal and thirty-five non-fatal acci-

dents during March, and thirteen fatal and twenty-two non-fatal accidents during April, 1911. Of the fatalities one was caused by an elevator and one by crushing.

Woodworking trades. — There were fourteen non-fatal accidents recorded during April, as compared with one fatal and three non-fatal accidents during March, and seven non-fatal accidents during April, 1911.

Printing and allied trades. — There were no accidents recorded during April, compared with one non-fatal accident in March and one non-fatal accident in April, 1911.

Clothing. — There were no accidents recorded during April, as compared with none during March and one non-fatal accident in April, 1911.

Textile. — There were no accidents during April, compared with two non-fatal accidents during March, and one fatal and one non-fatal accident during April, 1911.

Food and tobacco preparation. — There were one fatal and five non-fatal accidents recorded during April, compared with one fatal and six non-fatal accidents during March, and two non-fatal accidents during April, 1911. The fatality was caused by falling ice.

Leather. — There were two fatal and one non-fatal accidents recorded during April, as compared with none in March, and one non-fatal accident in April, 1911. One of the fatalities was caused by machinery and the other by electrocution.

Steam Railway Service. — There were twelve fatal and twenty-seven non-fatal accidents recorded during April, as compared with twenty fatal and forty-one non-fatal accidents during March, and ten fatal and fifteen non-fatal accidents in April, 1911. Four of the fatal accidents were caused by collisions, two each by derailments and by being run over, and one each by burning, a fall, and by striking an overhead object in passing.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF APRIL, 1912.

Trade or Industry	Locality.	Date.	Number.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Zurich, Ont.....	April 11	1	By a falling tree
".....	Georgetown, Ont.....	" 21	1	Rear-end collision
".....	Lower Brighton, N.S.....	" 23	1	Caught in shaft of wood-sawing machine
".....	Regina, Sask.....	" 29	1	Gored by a bull
Farm hand.....	Lumsden, Sask.....	" 19	1	Struck by rod of threshing machine
<i>Lumbering—</i>				
Logger.....	Kaslo, B.C.....	" 4	1	By a falling tree
Lumberman (drives).....	Salmon River, N.B.....	" 19	1	Drowned
".....	Ferguson's Lake, Ont.....	" 9	1	Fell on circular saw
".....	La Tuque, Que.....	" 29	1	Explosion of dynamite
<i>Mining—</i>				
Miner.....	Thetford Mines, Que.....	" 5	1	By a premature blast
".....	" " ".....	" 17	1	Crushed by fall of rock
".....	Riondel, B.C.....	" 2	1	Overcome by gas
".....	Phoenix, B.C.....	" 17	1	Neck broken by rolling muck
".....	Fernie, B.C.....	" 15	1	Fall of coal
".....	Bellevue, Alta.....	" 13	1	Cave-in in mine
".....	Corben, B.C.....	" 2	1	By fall of rock
".....	" " ".....	" 15	1	Fall of coal
".....	Phoenix, B.C.....	" 16	1	Fall into a chute
".....	Black Lake, Que.....	" 29	1	Struck by falling rock
<i>Railway Construction—</i>				
Brakeman.....	St. Joachim, Que.....	" 18	1	Fell under moving train
Bridgeman.....	Red Deer, Alta.....	" 23	1	Collapse of falsework
Foreman (Ballasting gang).....	Near Edson, Alta.....	" 23	1	Struck in abdomen by end of broken tie
Powderman.....	Cisco, B.C.....	" 20	1	Explosion of detonating caps
Labourer.....	Lake Opinicon, Ont.....	" 23	1	Struck by blasted rock
".....	Transcona, Man.....	" 23	1	Struck by falling material
".....	Callender, Ont.....	" 25	2	Struck by blasted rock
<i>Building Trades—</i>				
Carpenter.....	Toronto, Ont.....	" 20	1	Fell from scaffold
".....	" " ".....	" 30	1	Fell off a hoist
Painter.....	Montreal, Que.....	" 11	1	Fell from scaffold
Labourer.....	Toronto, Ont.....	" 15	1	Fell down elevator shaft
".....	Quebec, Que.....	" 30	1	Struck by falling derrick crane
<i>Metal, Engineering and Ship-building trades—</i>				
Steel worker.....	Sault Ste Marie, Ont.....	" 8	1	Struck by an elevator
Boilermaker.....	Toronto, Ont.....	" 9	1	Crushed between boilers
<i>Food and Tobacco preparation—</i>				
Butcher.....	Quebec, Que.....	" 16	1	Crushed by falling ice in ice-house

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF APRIL, 1912.

Trade or Industry	Locality.	Date.	Number.	Cause of Fatality.
Leather—				
Tanner	Acton, Ont.	" 6	1	Caught in machinery
"	Toronto, Ont.	" 12	1	Electrocuted
Transportation:—				
Steam Railway Service—				
Engineer	Port Hope, Ont.	" 12	1	Rear end collision
"	Savona, B.C.	" 10	1	Train derailed by a rockslide
Fireman	Port Hope, Ont.	" 12	1	Rear end collision
"	Savona, B.C.	" 10	1	Train derailed by a rockslide
"	North Bay, Ont.	" 8	1	Burned, boiler tube burst
"	Trenton, Ont.	" 8	1	Struck by a train
Brakeman	Georgetown, Ont.	" 21	1	Rear end collision
"	Port Hope, Ont.	" 12	1	"
"	Thorold, Ont.	" 3	1	Struck bridge girder while riding on top of train
Yardman	Moosejaw, Sask.	" 23	1	Fell under moving train
Sectionman	Wasson Brook, N.S.	" 20	1	Fell off car
"	Calgary, Alta.	" 19	1	Run over by train
Aviation—				
Captain (schooner)	Quebec, Que.	" 19	1	Drowned, fell from boat ladder
" (tug)	Southampton, Ont.	" 30	1	Drowned, fell overboard
Longshoreman	Kingston, Ont.	" 23	1	Struck by boat fender
Miscellaneous Transport—				
Chauffeur	Winnipeg, Ont.	" 23	1	Crushed by electric delivery lorry against wall
Driver	Toronto, Ont.	" 20	1	Thrown from wagon and run over
Public Employees—				
Fireman	Vancouver, B.C.	" 12	1	Fell when aerial truck collapsed
Miscellaneous skilled trades—				
Watchman	Hamilton, Ont.	" 23	1	Overcome by smoke
Superintendent in explosive factory	Northfield, B.C.	" 10	1	Explosion in mixing room of factory
Woodcutter	Calgary, Alta.	" 18	1	By bursting saw
Employee (paint works)	Montreal, Que.	" 16	1	Caught in belting of machinery
Messenger Boy	"	" 29	1	Crushed by elevator
Unskilled Labour—				
Labourer	Victoria, B.C.	" 18	1	Crushed in concrete-mixing mach.
"	Hamilton, Ont.	" 15	1	Falling earth

Electric Railway Service. — There were two non-fatal accidents recorded during April, as compared with four non-fatal accidents during April, and none in April, 1911.

Navigation. — There were three fatal and five non-fatal accidents during April, compared with one fatal and four non-fatal accidents during March, and seven fatal and one non-fatal accidents in April, 1911. Of the fatalities, two were caused by drowning, and one by a loosened boat fender striking victim.

Miscellaneous transport. — There were two fatal and nine non-fatal accidents recorded during April, compared with five fatal and five non-fatal accidents during March, and four fatal and six non-fatal accidents during April, 1911. Of the fatal accidents, one was caused by crushing and the other by being run over.

Public employees. — There were one fatal and sixteen non-fatal accidents re-

corded during April, compared with four fatal and twelve non-fatal accidents during March, and one fatal and three non-fatal accidents during April, 1911. The fatal accident, of which a fireman was the victim, was caused by the collapse of an aerial truck.

Miscellaneous skilled trades. — There were five fatal and sixteen non-fatal accidents recorded during April, compared with five fatal and sixteen non-fatal accidents during March, and nine fatal and seven non-fatal accidents during April, 1911. Three of the fatal accidents were caused by machinery, and one each by an explosion of chemicals and by suffocation.

Unskilled labour. — There were two fatal and seven non-fatal accidents recorded during April, as compared with ten fatal and seven non-fatal accidents during March, and three fatal and eight non-fatal accidents during April, 1911. One fatality was caused by machinery and the other by falling earth.

TRADE DISPUTES DURING THE MONTH OF APRIL, 1912.

AN important strike affecting a great number of men employed in railway construction work in British Columbia was reported to have taken place in the latter part of March. Apart from this, few disputes of importance were reported to the Department in addition to those already existing in the country.

Analysis of Trade Disputes during the Month.

Number and magnitude. — The total number of trade disputes reported to have been in existence in Canada during April was nineteen, being five more than in March and five more than in April, 1911. About fifty firms and six thousand employees were involved in these disputes of which about seven hundred employees were affected by the disputes which commenced during April.

Loss of time in working days. — The loss of time to employees through trade disputes during April was approximately 150,000 working days compared with a loss of 44,800 days during March and a loss of 202,275 in April, 1911.

Trades affected by new disputes. — The following table shows the trades affected by new disputes and the number of employees in each group of trades:—

TRADES	No. of disputes	No. of employees
Mining.....	1	189
Building.....	1	15
Printing.....	1	28
Transport.....	3	99
Miscellaneous.....	1	37
Unskilled Labour.....	1	350
Total...	8	718

Localities affected by new disputes. — One of the disputes which commenced during April occurred in New Brunswick, five in Ontario, one in Alberta, and one in British Columbia.

Causes of disputes. — The following were the causes of the disputes commencing during the month:—

CAUSE	No. of disputes
For increase in wages	5
Failure to reach new agreement	1
Against employment of particular persons	1
Against dismissal of employees	1
Total	8

Methods of settlement. — Of the nineteen disputes in existence during April a definite termination was reported in the case of five. In three cases new men were taken on by the companies and conditions were reported as having ceased to be affected. Eleven disputes were left unsettled at the end of the month according to reports received in the Department.

Results of disputes. — In one dispute of those terminated during the month an agreement was signed by both parties, in the others the men returned to work under conditions existing before the strike or their places were filled by other workers.

Disputes which commenced Prior to the beginning of the Month.

The trade disputes in existence during April which began in previous months comprised strikes of structural steel workers at Toronto, Ont., moulders at Moncton, N.B., and Montreal, Que., machinists and boilermakers at Westfort, Ont., and Edson, Alta., pulpmill hands at St. George, N.B., cloak and garment workers at Toronto, Ont., garment workers at Montreal, Que., iron moulders at Hamilton, Ont., tailors at Toronto, Ont., railway labourers between Hope and Kamloops, B.C., and boot and shoe workers at Toronto Ont.

Strike of Structural Iron Workers at Toronto.

A strike of forty structural steel workers in the employ of the Dominion Bridge Company occurred at Toronto during February. According to a statement of the company received in the Department on the 19th of April about fifteen strikers had returned to work before that date and the places of others had been filled.

Strike of Iron Moulders at Moncton, New Brunswick.

In regard to a strike of iron moulders in the employ of the Record Foundry and Machine Company at Moncton, N.B., it is understood that negotiations were being conducted between the parties with a view to terminating the strike. Indications at the end of the month were that an arrangement might be effected in the near future.

Strike of Iron Moulders at Montreal, Que.

No change in conditions was reported to the Department in regard to a strike of iron moulders in the employ of the Record Foundry and Machine Company at Montreal, Que., in which forty men were involved.

Strike of Machinists and Boilermakers of the Grand Trunk Pacific Ry.

No definite termination of this dispute was reported to the Department at the end of the month. Details are given in the accompanying table.

Strike of Pulpmill Hands at St. George, N.B.

In the case of a strike of forty-two pulpmill hands at St. George, N.B., who stopped work on April 26, 1911, the representative of the men's organization in a communication to the Department at the end of April, 1912, reported that conditions were practically the same as before. The company, however, claim-

TABLE OF TRADE DISPUTES DURING THE MONTH OF APRIL 1912.

Occupation	Locality	Alleged Cause or Object	No. of Firms or Establishments affected		Approximate No. of Employees affected.				Date of commencement	Date of termination	Result
			Directly	Indirectly	Indirectly		Date of commencement				
					Males	Fe- males		Males			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.											
<i>Building Trades—</i> Structural Iron Workers.....	Toronto, Ont.....	Against employ'm't of incompetent men; company claim strike was due to employment of non unionists.....	1	1	42			Feb. 19	April	Fifteen strikers returned to work; others' places filled	
	Moncton, N. B.....	Against reduction of wages.....	1	1	30			Jan. 27		No settlement reported at end of month.	
<i>Metal Trades—</i> Moulders.....	Montreal, Que.....	Sympathetic.....	1	1	40			Feb. 5		No settlement reported at end of month.	
	Hamilton.....	Against reduction of wages.....	1	1	13			Mar. 1		No settlement reported at end of month.	
<i>Railway Service—</i> Machinists and Boilermakers.....	Westfort Ont and Edson, Alta.....	Failure to reach agreement as to hours wages and conditions of employment.....	1	1	300			Oct. 1911		Men claim strike is still on

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments af-
fected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense,
it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual
effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes pub-
lished in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the
carrying on of the industrial or business operations of the firm or establishments concerned. Mention, moreover, is not made of disputes involving less than six
employees, or of less duration than 24 hours.

ed that the work had been resumed by degrees and that they were no longer affected by the strike, the mill being run with a staff largely composed of new men.

Strike of Cloak and Garment Workers at Toronto, Ont.

The company at the end of the month stated that eight hundred and eighty-two employees were on strike at that time, twenty-two having returned to work.

Strike of Garment Workers at Montreal, Que.

No definite termination of this dispute was recorded at the end of the month. It was reported to the Department, however, that the men's places had been gradually filled with union and non-union men and that the establishment was running full time.

Strike of Tailors at Toronto, Ont.

In regard to a strike of journeymen tailors which occurred at Toronto, Ont., on March 4, the representative of the employing tailors informed the Department that at the end of April only two hundred of the striking tailors were still out, the number of establishments affected being twenty-one.

Strike of Iron Moulders at Hamilton, Ont.

No change in conditions in regard to this strike, details of which are given in the accompanying table, was reported to the Department at the end of the month.

Strike of Boot and Shoe Workers at Toronto, Ont.

A strike of sixty employees of the Regal Shoe Company occurred on March 27 on account of an objection to the employment of an Italian laster. The men returned to work on the following day, the employee objected to being retained in the service of the company.

Strike in Railway Construction Men in British Columbia.

Following a demand for higher wages and better conditions of employment a strike of more than four thousand workers in the employ of companies having contracts for the construction of the Canadian Northern Railway between Hope and Kamloops, B.C., occurred on March 30. It was reported in the press that several of the strikers had returned to work at the end of the month; a definite termination of the dispute, however, had not been reported at that time.

New Disputes.

The new disputes of the month comprised strikes of silver miners at Cobalt, Ont., carpenters and machinists at Milltown, N.B., printers at Edmonton, Alta., wire drawers at Hamilton, Ont., checkers and freight handlers at Brantford, Ont., maintenance-of-way employees on Grand Trunk Railway, teamsters at Windsor, Walkerville and Sandwich, and labourers at Victoria.

Strike of Miners at Cobalt, Ont.

A strike of miners in the employ of the Temiskaming Mining Company of Cobalt, Ont., occurred on April 28. According to the statement of the company the strike took place on account of the dismissal of two employees for alleged intimidation of one of their fellow workmen. The strike was called off by the union on April 30 on its being intimated that the company would allow all the men to return to work except the two discharged. One hundred and eighty men were affected by this dispute.

Strike of Carpenters and Machinists at Milltown, N. B.

A strike took place at Milltown, on April 6, of carpenters and machinists in the employ of the St. Croix cotton mill. No settlement of this dispute which followed a demand for an in-

crease in wages was reported to the Department at the end of the month.

Strike of Printers at Edmonton, Alta.

On April 2, a strike of eighteen printers occurred at Edmonton, Alta. Failure to reach an agreement involving scale of wages and recognition of the union was the reason given for this strike by the men's representative who also stated that the dispute terminated on April 12, when the men returned to work on promise of employers to have a joint committee from both sides formulate a satisfactory agreement. He further stated that an agreement was concurred in and signed by both parties on April 18.

Strike of Wire Drawers at Hamilton, Ont.

A strike among the employees of the Canada Screw Company of Hamilton occurred on April 25, the cause of the dispute being the employment of two foreigners who were given work in the wire drawing department. This dispute, of which no termination had been reported to the Department at the end of the month, affected thirty-seven employees.

Strike of Checkers and Freight Handlers at Brantford, Ont.

Following a demand for increased wages a strike occurred among men employed in the freight department of the Grand Trunk Railway Company at

Brantford, Ont., on April 17. Some of the men were taken back at the former rate and the places of the others were filled. Thirty men were affected by this dispute which terminated on April 22.

Strike of Maintenance-of-way Employees.

A strike of trackmen in the employ of the Grand Trunk Railway Company between Merriton and Niagara Falls and also between Port Colbourne and Port Dalhousie occurred on April 15. It was stated that the men sent a demand for higher wages to an official of the company at Hamilton and on the refusal of this demand stopped work. No settlement of this dispute was reported at the end of the month.

Strike of Teamsters at Windsor, Walkerville and Sandwich.

Following a demand for increased wages fifty teamsters in the employ of various building companies at the above mentioned points struck work on April 22. No settlement of this dispute was reported at the end of the month.

Strike of Labourers at Victoria, B.C.

A strike of three hundred and fifty labourers occurred at Victoria, B.C., following a demand for increased wages. The strike was terminated on April 20 when many of the strikers returned to work and new men were engaged to fill the places of the others.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during April, 1912:

MANITOBA REPORT.

Agriculture and Immigration.

Report of the Department of Agriculture and Immigration of the Province of Manitoba for the year ending December 31, 1911. King's Printer: Winnipeg, 1912.

THE report shows that the year of 1911 saw the harvesting of the largest crop in the history of the province in grain as well as in other products. Dairying shows a large increase, the output of both dairy and creamery butter being much larger than in any previous year. The following table shows the total production of

the grain crop, the number of acres given to each class of grain and the average yield per acre in bushels:—

District.	Area in crop.	Average yield.	Total yield.
Acres.	Bushels.	Bushels.	
Wheat	3,389,072	18.29	61,058,786
Oats	1,628,562	45.3	73,786,688
Barley	759,977	31.5	23,999,239
Flax	85,836	14.	1,205,727
Rye	6,167	22.	136,067
Peas	2,250	20.4	45,985
Cultivated Grasses.....			254,892 tons.
Total Grain Crop			160,232,487 bushels.

This total is nearly treble the crop of twelve years ago and is by far the largest the province has ever harvested.

BRITISH REPORTS.

Trade Unions.

Report on Trade Unions in 1908-1910, with Comparative Statistics for 1901-1910. London: Wyman & Sons, 1912. Price 1/0.

The total number of separate workmen's trade unions in the United Kingdom at the end of 1910 was 1,153, with a total membership of 2,435,704, as compared with 1,221 with a total membership of 2,419,816, at the end of 1907. During the three years 1908-1910, 79 new unions were formed, 106 unions ceased to exist, and 41 others were amalgamated with larger bodies. During recent years there has been a tendency for smaller unions to be absorbed by larger ones in the same trades, and since 1896 the total number of trades unions which had then reached 1,337, has steadily declined. While the total membership (2,435,704) of all trade unions was distributed among 1,153 unions, most of the unions were comparatively of small importance.

Of the main groups of trades that with the largest trade union membership is mining and quarrying, which accounts for 730,000, or 30 per cent. of the total membership of all trade

unions. Unions in the textile trades have 380,000 members, (or 16 per cent. of the total), the metal, engineering and shipbuilding trades 370,000 (or 15 per cent.), the transport trades 240,000 (or 10 per cent.), and the building trades 156,000 (or 6 per cent.). These five main groups account for 1,876,000 members, or 77 per cent. of the total for all trades.

During 1908, 679 of the 1,058 unions, representing 78 per cent. of the total membership of the 1,058 paid some kind of unemployed benefit the total paid being £1,258,000. Sickness and accident benefits amounting to £528,000 were paid by 482 unions (52 per cent.) in the same year.

The total income of the 100 principal unions for the three years 1908-10 was £8,001,000 as compared with £7,057,000 in the previous three years and £6,295,000 in the three years 1902-04. The total expenditure of the 100 principal unions in 1908-10 for all purposes showed a great increase compared with the two previous three-year periods. In 1902-04 the total was £5,758,000 and in 1905-07 it was £6,081,200. In 1908-10, however, it amounted to no less than £8,522,000. At the end of 1910 Superannuation Benefit was being paid by 39 of the 100 principal unions, with a membership of 688,969 or 47 per cent. of the total membership, of the 100. The form taken by Superannuation Benefit is almost invariably that of a weekly payment.

Railway Accidents.

Returns of accidents and casualties as reported to the Board of Trade by the several railway companies in the United Kingdom during the year ending December 31, 1911. London: Wyman and Sons. Price, 4d.

The following table shows the number of persons killed and injured on railways in the United Kingdom in the course of public traffic, during the year ending December 31, 1911, as reported to the Board of Trade, with comparative figures for the year 1910:—

	Total for the year 1911.		Total for the year 1910.	
	Killed	Injured	Killed	Injured
Passengers :—				
From accidents to trains, rolling stock, permanent way, etc.	14	468	23	1,111
By accidents from other causes.	92	2,257	96	2,210
* Servants of companies or constructors :—				
From accidents to trains, rolling stock, permanent way, etc.	5	115	9	113
By accidents from other causes.	385	5,196	374	4,605
Other persons :—				
From accidents to trains, etc.		8	2	7
Persons passing over railways at level crossings.	84	38	75	35
Trepassers (including suicides).	462	124	442	136
Persons on business at stations, etc., and other persons not coming in above classifications.	28	139	41	125
TOTAL.	1,070	8,345	1,062	8,352

*Of contractors' servants 11 were killed and 31 injured.

In addition to the above, the Railway Companies have reported to the Board of Trade the following accidents which occurred during the year upon their premises, but in which the movement of vehicles used exclusively upon railways was not concerned, namely:—6 passengers, 56 servants of contractors or companies, and 27 other persons killed, and 767 passengers, 22,537 servants, and 609 other persons injured, making a total in this class of accident of 89 persons killed, and 23,913 injured as against 2 passengers, 39 servants, and 20 other persons killed, and 759 passengers, 20,419 servants, and 590 other persons injured in 1910, a total of 59 persons killed, and 21,768 injured.

During the year, six fatal and 56 non-fatal cases of injury to their servants were reported by Dock Companies and Harbour Authorities as having occurred on railway lines belonging to them, 24 of which, including 3 fatal cases, did not occur during the movement of vehicles. These are not included in the figures given above.

NEW SOUTH WALES REPORT.

Operations of State Labour Bureau.

Sixth annual report of the Director of Labour of the State Labour Bureau of New South Wales for the year ending June 30, 1911. Sydney, 1912.

The report gives a general idea of the work of the State Labour Bureau

whose activities include, besides other functions, a free registry office with several branches to assist men in search of work and employers requiring labour to obtain their requirements, operations being conducted at the cost of the State. There is also an agricultural training farm for training city lads for farm work. The product of this farm during the year was sold for £2,710 and nearly £900 was spent on buildings, etc., to increase the accommodation for students. A pig, poultry, vegetable and flower farm is also administered by the State Bureau, where men are given lodging, food and a small allowance in exchange for labour or anything they are set to do. In the year ending June 30 last, more than £2,000 was received for the produce of these establishments. The Bureau also collects and distributes by means of the press and other ways information concerning labour conditions in all centres of population in the State. The general aim is to render aid primarily and where possible locally, not to attract men to the city but to spread them about the country wherever there is a chance of their obtaining employment. No interference has at any time been made with wages rates, the efforts of the Bureau being directed to bringing labour into touch with those who need work done.

According to the report, the year un-

der review was a good one. Prices throughout ruled high for all primary products. It is estimated that Australia exported wool during the year to the value of £28,000,000, and that the production of wheat was worth some £17,000,000. Frozen meat, butter, preserved meats, tallow and skins also increased substantially both in quantity and value. Unskilled labourers were well employed throughout the year. Twelve strikes and lockouts were recorded during the year. On the occurrence of any labour trouble, the Bureau holds strictly aloof and preserves an entirely neutral attitude until such differences come to an end.

UNITED STATES REPORT.

Mediation and Arbitration in Railway Labour Disputes.

Department of Commerce and Labour. Bulletin No. 98 of the Bureau of Labour, by Chas. P. Neill, Commissioner of Labour. Washington, 1912.

The scope, application and utilization of the Erdman Act, which provides a means for the mediation and arbitration of controversies affecting railroads and employees engaged thereon are dealt with in Bulletin No. 98, issued by the United States Department of Commerce and Labour.

The provisions of the law apply only to those classes of employees actually engaged in train operation. During the past five years there has been no serious strike involving any class of these employees where the machinery of the Act has not been invoked by one or other of the parties to the controversy.

The history of the law shows two distinct periods; the time from its passage in 1898 up to 1906, during which time its provisions were invoked only once; and the period from 1907 up to the present day in which it has been used in nearly sixty controversies. In the case of about one-third of these, applications for intervention were received jointly from the companies and the employees; the other two-thirds show

a slight majority in the case of applications received from employing companies compared with those from employees.

Mediation proceedings provided for in the Act are purely voluntary as far as concerns either party to the controversy, and provision is only made for appeal to the chairman of the Interstate Commerce Commission and the Commissioner of Labour to bring about an amicable adjustment. The mediators have no authority to intervene upon their own initiative. The law also provides that in the event of failure to reach an agreement through mediation the mediators shall try to induce the parties to submit their differences to arbitration. One arbitrator is selected by each party to the controversy, the two thus chosen select a third, provided they agree upon such third arbitrator within five days after the first meeting. In the event of their failure to agree upon the third arbitrator, he is named by the presiding Judge of the Commerce Court and the Commissioner of Labour acting together.

In only three cases between January, 1907, and the present time have the two arbitrators respectively elected by the parties to the controversy been able to agree upon a third arbitrator within the time accorded by the law.

In no case has there been a repudiation by either side of the award of the Board. In some instances, as is inevitable, there have been different interpretations placed on certain sections of the award and there has been consequent friction in some of these instances; but the awards, as a whole, have been accepted and lived up to by both sides.

Child Labour and Factory Inspection Laws.

Twentieth annual report of the Bureau of Statistics and Information of Maryland, 1911.

The report of the Bureau of Statistics of Information of Maryland for the year ending December 31, 1911, treats of the results obtained from the

enforcement of the Child-Labour and Factory Inspection Laws, the activities of the Free Employment Bureau, information regarding strikes and lockouts occurring in the State, prices and cost of living, agriculture; imports and exports. The greatest amount of work and responsibility imposed upon the Bureau is involved in the enforcement of the Child-Labour Law, which prohibits the employment of children under 16 years of age for more than ten hours in any one day, the employment of children under 16 years of age on the stage, etc., and the employment of children under 14 years of age by telegraph, telephone or messenger companies. The number of children applying for permits for employment during 1911 was 8,867, or 974 less than in 1910, while the number of refusals was 1,021 or 90 less than in 1910. There were two arrests made in 1911 for violation of the law, as compared with two in 1910; four in 1909; nine in 1908 and 42 in 1907. The enforcement of the Factory Inspection Law assists in encouraging the manufacture of clothing, etc., in factories and shops where there is ample light and ventilation and to discourage the making of these articles in dwellings where they come in contact with the families. The report states that conditions in this respect show continued improvement and that less than 5 per cent. of the men, women and children employed in the manufacturing of these articles are employed at their homes, which insures better sanitary conditions surrounding the manufacturing of wearing apparel. There was only one arrest for violating the Factory Inspection Law in 1911 as compared with nine in 1910, one in 1909 and eleven in 1908.

In regard to the operation of the Free Employment Bureau there were 80 applications for employment filed during the year and 245 applications for assistance. Out of this number 64 positions were secured. This is a decided increase over 1910, both in the number of applications for employment

and help, while the number of positions secured were about double.

The number of strikes and lockouts in the State during the year was 7, as compared with 9 in 1910, 13 in 1909, and 16 in 1908. The number of persons affected by such disputes in 1911 was 670 as compared with 1,031 in 1910, 4,852 in 1909, and 2,522 in 1908. The estimated loss in wages in 1911 was \$12,110, as compared with \$99,060 in 1910; \$317,600 in 1909 and \$41,424.40 in 1908.

Current prices of grain by months during the year and the average price for the year are shown in the report; also extracts from the reports of the canning industries in the State and comparisons made with other States and previous years.

Employers' Liability and Workmen's Compensation.

Message of the President of the United States transmitting the report of the Employers' Liability and Workmen's Compensation Commission. Vol. I. Washington, 1912.

The commission was appointed in 1910 for the purpose of making a thorough investigation into the subject of Employers' Liability and Workmen's Compensation. The investigation covered the actual accident experience of the railroads of the country during the three calendar years, 1908, 1909 and 1910. Schedules were sent to the railroads to be filled out to show the number of employees killed during that period, the number of injuries causing permanent partial disablement, and the number of temporary injuries. Information was also sought in regard to the amounts paid for injuries. The railroads to whom these blanks were sent comprised 95 per cent. of the mileage of the country, and the information sent in to the Commission showed that the operation of these roads resulted in the death of nearly 12,000 workmen and that the total cost paid for these deaths was \$14,500,000. Two hundred employees lost both feet and eighteen lost both hands; fourteen

were rendered totally blind; fifty-four lost one foot and one hand, while two hundred and seventy-two were totally disabled for life by other injuries. For these accidents the sum of \$2,500,000 was paid. On completing its investigation the Commission submitted the recommendation of a bill entitled "A Bill to provide an exclusive remedy and compensation for accidental injuries, resulting in disability or death, to employees or common carriers by railroad engaged in interstate or foreign commerce, or in the District of Columbia and for other purposes." The Bill works out compensation for accidental injury to such employees on the theory of insuring each employee against the results of injury received in the course of employment without reference to his contributory negligence. The only cases in which compensation is not provided for by the Act are where the injury or death of the employee is occasioned by his wilful intention to bring about the injury or death of himself or of another, or where the same resulted from his intoxication while on duty. The Bill also provides for medical and hospital service for injured men, for the fixing of recovery by agreement by an official adjuster. The amount of recovery is to be in proportion to the wages received, specific provision being made for particular injuries in so far as they can be specified. Compensation is to be made in the form of annual payments for a number of years or for life. Statistical investigation appears to show that under this Act the cost to the railroads for compensation would be perhaps 25 per cent. more than the total cost which they now incur.

Labour Statistics of New York.

Annual report of the Bureau of Labour Statistics of the State of New York for the year ended September 30, 1910. Albany, 1911.

The report of the Commissioner of Labour for the State of New York deals with the state of employment, wages and earnings, hours of labour, and the condition of the labouring classes in the State.

organizations in the State. The monthly returns of idleness from representative unions indicates that the year 1910 was in general a year of better demand for labour than 1909, but that the difference in favour of 1910 was a distinct diminishing one as the year progressed so that most, if not all, of it had disappeared in the last months of the year.

The number of persons reported by Trade Unions to have been affected by increased wages was 125,141, involving a total weekly increase of \$307,732.97. Two hundred and nineteen men had their wages decreased during the period under review, the total weekly decrease amounting to \$113.38. About 4 per cent. of the members of trade unions who were benefited by the increased wages were engaged in the clothing and textile trades, whilst more than 20 per cent. were employed in transportation.

The changes in hours of labour affected 86,227 persons, the total reduction in hours per week being 298,223½. No increases in hours were reported. Out of the 86,227 persons whose hours of labour underwent an increase 74,268 were engaged in the clothing and textile trades, from which is seen the dominant influence of the dispute of cloak and suit makers in July and August.

There were 2,457 labour organizations in the State on September 30, 1910, as against 2,368 one year before. The net increase was due to the formation of 243 new organizations, the disbanding of 130, and the amalgamation of 24 with existing organizations.

Co-operation and Cost of Living.

Message of the President of the United States transmitting data on co-operation and cost of living in certain foreign countries. Washington, 1912.

The result of an inquiry conducted by the Department of State, through the consular officers, into cooperative societies in several European countries in their relation as between producers and consumers. The object of the inquiry was to determine the extent to which such societies were able to secure for their members a better return for their labour than was obtainable in the open market.

as a basis of practical suggestions for communities in the United States, allowing for differences in environment, in industrial and social conditions, and in the scale of living. Tables were transmitted by the various consuls which seemed to show that the cost of food stuffs was generally increasing and living conditions seriously affected by the continued rise in such commodities.

Important notice is given to the collective growth of cooperative societies in the United Kingdom. In 1862 there were 400 societies with a membership slightly in excess of 90,000. The value of the sales was £2,300,000 and the net profits £165,000. In 1908 the number of societies was slightly in excess of 3,000, with a membership of 2,701,000. There were in England and Wales in 1910, 411 distinctively agricultural societies. Some of these were for the supply and sale of produce, some were egg and poultry collecting depots, some were agricultural credit, some dairy, some fruit-grading societies, and some for miscellaneous purposes. Opposition on the part of non-cooperative tradesmen is now less intense than in the earlier stages of the movement according to the reports of the consular officers. The attitude of cooperative toward non-cooperative stores is generally reported to be that of indifference.

Immigration.

First Annual Report of the Bureau of Industries and Immigration of New York for the twelve months ended September 30, 1911. Part of the eleventh report of the Department of Labour. Albany, 1912.

The immigration policy of New York State, comprising the regulation of distribution agencies, the protection of unemployed immigrants, transit conditions in camps and colonies, public and private works, are extensively dealt with in the report of the recently formed Bureau of Industries and Immigration. The Bureau has endeavoured to accomplish the state policy of preserving the American standard of living and protecting the American workman in four ways:

(1) By assuring to every admitted alien, handicapped by unfamiliarity with the language, country, laws and customs, remote from friends or relatives, a hearing in which he may state, in his own language if necessary, his complaint or difficulty, and have an impartial inquiry made into the matter. It was also contemplated that the Bureau should act as a mediator in bringing aggrieved parties together for the purpose of settling matters in dispute, and where this method failed, that, through existing authorities, the State should act on behalf of the alien.

(2) By obtaining the enforcement of existing laws, designed to prevent crime, fraud and exploitation, and by securing the enactment of further legislation necessary to this end.

(3) By undertaking studies and investigations of living and labour conditions, and submitting as the result of such studies, recommendations for improvements.

(4) By publishing and distributing information which will facilitate assimilation.

The Commission, in its report, clearly defined its belief that there was a field for State activity which would in no way conflict with or duplicate the powers or activities of the Federal Government, and recommended that a co-ordinating and protective Federal Bureau be established with ample powers of investigation and adjustment. Such a Bureau would, in the opinion of the Commission, further the establishment in other states of similar bureaus to that of New York, would supplement the work of existing bureaus, and would deal with questions of distribution, protection and assimilation which affect the states jointly.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

ONTARIO CASES.

Master and Servant. Injury to Servant.

IN connection with the case noted on page 821 of the February issue of the *Labour Gazette* the judgment rendered by Chief Justice Mulock was reversed in the Divisional Court to which an appeal was made and which held that a person in "superintendence" need not necessarily exercise superintendence directly over the workman injured, nor that the workman should be acting under the immediate order of the superintendent. It was enough if the superintendent and the workman were both employed in the furtherance of a common object to the employed, although each might be occupied in district departments of that common object. Judgment for plaintiff was entered for \$1,800 damages with costs of trial and appeal. (*Darke v. Canadian General Electric Company.*)

Master and Servant.—Workman's Compensation Act.

The administrator of the estate of one Delyea brought action against the White Pine Lumber Company to recover \$2,300 damages for the death of the said Delyea, alleged to have been caused by the negligence of the defendants. The deceased was a young man employed as a teamster at the defendants' lumber camp and was killed by the falling of a derrick in the construction of a log jamming machine. The Hon. Mr. Justice Clute gave judgment for \$1,300 to be divided equally

between deceased's father and mother, and costs. An appeal to Divisional Court was heard by Hon. Sir Glenholme Falconbridge who held that, having in mind the risks of life and the possibility of the marriage of the deceased, the damages should be reduced to \$950, subject to this, the appeal should be dismissed with costs.

MANITOBA CASE.

Injury to Servant.—Negligence.

Appeal to the Court of Appeal by the plaintiff from the judgment of Chief Justice Mathers in favour of the defendants, in an action by the plaintiff for damages for injuries sustained while employed in the defendants' works, by reason of the negligence of the defendants' or the plaintiff's fellow servants.

The plaintiff was doing work as a carpenter for the defendants upon the roof of a building. A joist upon which he was working in the performance of his duty broke in the middle and he was thrown to the ground and seriously injured.

Chief Justice Mathers held that the method of placing the joists adopted by the defendants was a reasonably safe measure of procedure, that there was no negligence on their part, and dismissed the action.

The Court held that the defendants were negligent in not furnishing scaffolding or ladders to enable the plaintiff to reach safely the work assigned to him and in not providing a reasonable system of inspection of the joists, when it was known to the defendants for what purposes they were to be used. The judgment was set aside and verdict rendered for the plaintiff for \$7,000 damages, with costs of appeal and trial. (*Lafvandal v. North Foundry Company.*)

SASKATCHEWAN CASES.

Master and Servant.—Injury to Servant.

(Gordon vs. Canadian Northern Railway Company.)

The plaintiff was hired by a conductor of one of the defendants' freight trains to assist in digging a train out of the snow, the conductor undertaking to convey the plaintiff from his home to the place where this train was snowbound and to bring him back. After completing his work the plaintiff went into the van of the freight train by invitation of the conductor, where he was severely injured as a result of a passenger train of the defendants' colliding with it. An action to recover damages was brought against the Company and the case was heard before a jury. Judgment for \$10,000 damages was given, the jury finding that the collision occurred through the negligence of the defendants or their servants, the crew of the passenger train.

An appeal to the Supreme Court was made by the defendants who sought to set aside the judgment rendered under the contention that the plaintiff could not recover damages unless he was in the employ of the defendants at the time the accident occurred. Mr. Justice Lamont held that the plaintiff was in the van by the express invitation of the defendants and was, therefore, lawfully on their property, not as a guest, nor yet as a mere licensee, but in consequence of his contract of employment with the defendants. He stated the law as follows:—

If the plaintiff is a bare licensee—that is, one who is permitted to go upon premises of another solely for his own interest, convenience or gratification—he takes the property as he finds it, with all the risks incident thereto, subject, however, to this, that he must not be led into danger by anything in the nature of a trap, nor must he be injured by any wrongful act on the part of the

company or their servants amounting to gross negligence:

But if the plaintiff is not a mere or bare licensee but is lawfully on the company's premises by the company's invitation, on a matter of common interest, or in the exercise of a right, the company owe him the duty of taking reasonable care that he is not injured through the negligence of their servants; and, if he is thus injured, the company are liable to him in damages.

Another ground on which the judgment appealed from was sought to be set aside was that the damages awarded were excessive. The only limit placed upon the amount that might be awarded was, in the opinion of the judge, that it must be reasonable. The plaintiff, as a result of his injuries, was in the hospital between sixteen and seventeen weeks and necessarily suffered much pain; the disfigurement of his face was an element of danger which the jury had taken into consideration and which could not be appraised by the Court to which the appeal was made. The evidence showed that the jurors were in a good position to estimate the plaintiff's earning capacity and with this in view the judge dismissed the appeal with costs.

Tobin vs. Canadian Pacific Railway Company.

An appeal to the Supreme Court by the defendants from the judgment of Chief Justice Wetmore, in favour of the plaintiff, for the recovery of \$12,097.50, in an action for damages for personal injuries sustained by the plaintiff by reason of the alleged negligence of the defendants. The plaintiff was injured by one of the wings of a machine for spreading gravel coming down on him with great force and the evidence went to show that the engineer in charge of the machine touched with his knee the lever which opened the valve by which the air pressure was applied to the wing, as a result of which it descended rapidly and injured

the plaintiff. The jury, before whom the case was heard in the lower court, found: (1) that there was actionable negligence on the part of the defendants or their servants which contributed to the injury to the plaintiff; (2) that the negligence consisted of the fact that the engineer in charge endeavoured to inspect the guage without a light at a time when a light was necessary, and in so doing, touched the valve that caused the accident; (3) that the plaintiff's damages were \$12,097.50; (4) that the evidence showed that the valve was moved by contact with the engineer's knee; and it must have been done while he was endeavouring to climb up on the tank in trying to get near enough to the guage to ascertain what pressure registered on it.

In the notice of appeal to the higher tribunal the following grounds were set up by the defendants: (1) That the Chief Justice should have non-suited the plaintiff at the close of his case; (2) That in his charge to the jury and in the questions submitted to them the judge threw out the suggestion that the engineer might have touched the valve with his knee in attempting to climb up the tank to get a nearer view of the guage, when no suggestion appeared in the evidence; (3) that the damages awarded were excessive.

The Court of Appeal held that the trial judge rightly refused a motion for a non-suit, considering that a plaintiff could not be non-suited if there was any evidence from which a jury might properly infer negligence on the part of the defendants of the character alleged in the statement of claim. It was an established rule for a judge to say whether any facts were established from which negligence might be inferred, and if so it was for the jury to say whether or not from these facts negligence ought to be inferred (*Metropolitan Railway Company v. Jackson*, 3 App. Cas. 197.) It was also held that the suggestion of the trial judge, in his charge to the jury and in his questions submitted to them, with re-

ference to the engineer in charge having touched the valve with his knee, was warranted by the evidence. The contention that the damages awarded were excessive was not sustained by the higher Court which held that on this point no interference of the Court of Appeal was warranted. The appeal was dismissed with costs.

BRITISH COLUMBIA CASE.

Injury to Servant.—Damages.—Settled out of Court.

An interesting settlement of a claim for damages was recently made in Victoria. The plaintiff was seriously injured in a blasting accident and entered an action against the employing company for \$25,000 damages, or in the alternative, \$2,700 loss of wages under the Employers' Liability Act. Before any judgment had been rendered in the Supreme Court counsel for defendants and plaintiff conferred together and the terms of settlement were agreed upon. The settlement was for \$4,000, a guarantee of two years' employment of the plaintiff by the defendants at a wage of \$75 per month, and a contribution of \$200 toward the hospital expenses incurred by the plaintiff as a result of the accident.

ENGLISH CASES.

injury to Workman not received in course of employment.

A fireman in the employ of a railway company while eating his midday meal at his own house cut his finger with an ordinary table knife. He bound up the finger and returned to work, having to walk a short distance along a high road to reach the sheds where he was employed. His duties were to keep certain boilers going by shovelling coal and clean engines. While engaged in this work, grease, coal-dust and other harmful matter worked through the bandage and got into the cut, causing the wound to be sore and painful. When he got home in the

evening he took off the bandage, washed the wound clean and applied a poultice. Subsequently poisoning of the wound set in and the finger had to be amputated. He claimed compensation and the County Court Judge made an award in his favour.

The railway company appealed on the ground that there was no evidence on which the judge could find that the accident was one arising out of and in the course of the employment. The Court of Appeal held that there was no evidence to justify the decision of the judge, and that to attribute the poisoning to the employment was merely "surmise, conjecture, or guess" as was said by Lord Halsbury in *Barnabas v. Bersham Colliery Company*, there being many possible sources of infection. The appeal was therefore allowed.

Fatal Accident.—Compensation to Dependents.

A miner was killed by accident, giving his dependents a right to compensation. He left a widow and several children. A committee was then in existence representative of the Mine Owners' Association and the Miners' Association, and by an award of this committee a sum of £292 was payable as

compensation in certain proportions to the dependents. Some time afterwards the widow died intestate, and at the time of her death the trustees still held the sum of £73 of her share of the compensation. Two of the children then applied to the committee to vary their former award so that the £73 should be proportioned among the surviving dependents as the committee should think fit. In opposition to this application it was objected that the committee had no power to make any such order as proposed, as each dependent was entitled to have his share ascertained and awarded, but on the death of any dependent any unpaid portion of his share must go to his legal representative. The committee stated a case for the opinion of the County Court judge as to what their powers were. The judge decided that the undisposed of share of the widow belonged to her legal representative, and that the committee had no power to make a fresh apportionment. The dependents appealed.

The Court of Appeal held that the County Court judge was wrong in his opinion, and that the committee had power to make the order of re-apportionment if they thought fit. (*Ivey v. Ivey. Court of Appeal.*)

THE LABOUR GAZETTE

JUNE, 1912.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF MAY, 1912.

1.—GENERAL SUMMARY.

INDUSTRIAL activity was pronounced during May and showed a marked improvement over the previous months of the year. Reports from all parts of the Dominion show that industries generally are in a very healthy condition. Agriculture was adversely influenced by the heavy rains during the month, seeding being somewhat hindered thereby; a good hay crop, however, is assured. An inadequate supply of farm help was reported all over the country in spite of the heavy immigration movement. Weather conditions interfered slightly with mining operations; notwithstanding this good outputs are recorded in the Nova Scotia collieries. Labour commanded a higher price generally than last year. On the expiration of agreements at the end of April a tendency towards higher rates was noticed, the building trades being particularly affected by such conditions. Unskilled labour was practically all absorbed by the call for men to perform work on railway construction and civic improvements. The extensive building operations under way in all parts of the country caused a demand for men for which the supply was not enough; skilled labour was in good demand at the various industrial establishments. These were nearly all busy during May and reports of orders received predict a busy season for manufacturing concerns. The immigration continued to maintain its volume and

was absorbed immediately. Generally speaking the outlook is for a prosperous season in the leading branches of employment.

In regard to 250 articles selected as representative of production and consumption the index number of the Department which is designed to reflect general industrial and trade activity as well as cost of living rose still higher during May and stood at 135.9 as compared with 135.4 in April. In May a year ago it was 126.1. The present figure is the highest in the record of the Department.

Interruptions to Industry.

The number of disturbances of industrial conditions through trade disputes in existence during May was considerably greater than during the preceding month. Few strikes of importance occurred during May, two only directly affecting more than two hundred employees and these two did not last longer than a week. A number of stoppages of work took place pending the arrangement of new wages schedules; in most cases these were not of long duration and, generally speaking, conditions in this respect can be said to show an improvement over those of the same period of 1911.

Among industrial establishments, etc., destroyed by fire or through other causes during May, as reported in the

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

press of the Dominion, the following may be mentioned:—

New Brunswick. — Hotel and stables, loss \$3,000; undertaking establishment at Fredericton, loss \$4,000; chocolate factory at St. Stephen damaged by bursting of sprinkler system, loss \$5,000; dry goods establishment at St. John, loss \$10,000; also business block, loss \$40,000; and shops and dwellings, loss \$7,000.

Quebec. — Sawmill at Cookshire, loss \$5,000; paper mill at Crabtree Mills, loss \$70,000; ice-houses and 24,000 tons of ice at Hudson, loss \$80,000; four stores and residence at Hull, loss \$35,000; bronze powder works at Montreal, loss \$6,000; also hardware stores, loss \$4,000; 2 stores at Shetford Mines, loss \$5,000.

Ontario. — Hotel and outbuildings at Berlin, loss \$2,500; lumber mill at Bobcaygeon, loss \$5,000; binder-twine factory at Brantford, loss \$75,000; two sawmills at Byng Inlet, loss \$200,000; unused woolen factory at Garden Hill, loss \$10,000; at Hamilton:—glass factory, loss \$25,000; gravel crushing plant, loss \$4,000; stock of cotton, loss \$3,000; explosives (cheddite) factory at Haileybury, loss \$10,000; Steamer *Ionia* burned at Kingston, loss \$20,000; hotel at Oakville, loss \$3,000; sawmill and plant at Owen Sound, loss \$150,000 (125 men affected); sawmills at Penetanguishene (70 men affected); salt works at Port Huron, loss \$150,000; at Toronto:—restaurant and garage, loss \$30,000; iron bed and bedding factory, loss \$20,000; electrical supply store, loss \$2,500; lumber yard, stock and sheds, loss \$35,000; stained-glass and varnish factory, loss \$4,000; wall of ice-cream factory collapsed, killing two and injuring 15 employees; cheese factory at Row's Corners, loss \$7,000; business block at Sturgeon Falls, loss \$3,000; business block at Sudbury, loss \$100,000; woodenware factory at Stratford, loss \$4,000; flour mills at Welland, loss \$30,000; business block at Windsor, loss \$10,000.

Manitoba. — Two elevators at Brandon, loss \$50,000; elevator at Broomhill struck by lightning, loss \$10,000; flour mill at Millwood collapsed, due to overflow of Assiniboine River; at Winnipeg:—photo studio and tailor shop, loss \$7,000; machine shop, \$25,000; storage house, \$45,000; millinery shop, loss \$3,200.

Saskatchewan. — Newspaper plant at Herbert, loss \$2,500; power-house plant at Moosejaw, loss \$100,000; foundry at Prince Albert, loss \$21,000; bakery at Saskatoon, loss \$5,000; business centre of Wainwright, loss \$50,000.

Alberta. — Surface plant of coal mining company at Clover Bar, loss \$40,000.

British Columbia. — Round-house at Eholt, loss \$40,000; tailoring establishment at Nelson, loss \$5,000; construction camps at Resplendent destroyed by forest fires; boat building factory at Vancouver, loss \$6,000; two business blocks at Vancouver, loss \$80,000; sawmill at North Vancouver, loss \$75,000; sawmill and plant at New Westminster, loss \$1,000,000; also business block, loss \$50,000.

Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes, concerning which a report was made to the Department during May, 1912:

Agriculture.—Farm help was scarce and the wages offered show a substantial increase over those of last year.

Building. — Painters and decorators (50) at St. John, N.B., received an increase of fifty cents per day on May 1; carpenters and joiners (40) in Brockville were given an increase of five cents per hour for laying hardwood floors, the change going into effect on May 1; bricklayers and helpers (40) in Orillia on May 1 commenced working nine hours a day instead of ten as before, the change involving a reduction in wages of \$2.40 a week; bricklayers (60) in London were given an increase of two and a half cents per hour on May 1; plasterers in Moose Jaw were given an increase of five cents per hour on the same date; bricklayers (150) in Hamilton were given an increase of five cents per hour on the 8th of May; carpenters (2,000) had their wages raised by three cents per hour at the beginning of the month; plasterers (100) at Hamilton received an advance of five cents per hour on May 1; bricklayers (100) in Brantford were given an increase of two cents per hour on the same date; brickmakers (96) in Hamilton were given an increase in prices of two cents per thousand bricks; mechanics (16) in the building trades at Kingston were given an increase of \$2.40 per week; carpenters (400) in Saskatoon were given an increase of five cents per hour on May 4; painters (100) in the same city were granted an increase on May 6 and electrical workers (120) on May 10, carpenters and joiners at Sherbrooke were given an increase during the month.

Building.—Carpenters in New Westminster were given an increase during the month; plumbers at Sydney received an increase of five cents per hour; carpenters in the same city had their wages advance two and two-third cents per hour.

Metal trades. — Machinists, moulders, and coremakers (300) in Hamilton were given an advance in wages on May 8, the minimum being raised from \$2.25

to \$2.75 per day; sheet metal workers (52) in the same city were granted an increase of two and a half cents per hour on May 1; moulders in Ottawa were given increases by some of the firms.

Printing trades. — Printers (67) in Hamilton were given increases ranging from \$2.00 to \$5.00 per week.

Clothing trades. — Tailors (16) in Berlin were given increases in wages, on May 13, eight men receiving an advance of \$3.00 per week and eight women having their wages increased by five cents per hour.

Food and tobacco preparation. — Brewery workers (117) in London had their wages increased after an agreement which provided for an advance of six per cent. for the first year, four per cent. for the second and two per cent. for the third. A reduction in working hours was also granted of three and a half hours per week for the six months from April to September and seven hours for the other six months, the changes going into effect on May 1; tobacco workers (155) in Hamilton were given an increase of five per cent. on May 1.

General transport. — Teamsters (60) in Hamilton were given an increase in wages on May 4; team owners (50) in Walkerville and Windsor were given an increase of \$3.00 per week with a reduction in working hours from ten to nine per day.

Railway service. — Three thousand men at the Grand Trunk workshops at Point St. Charles resumed full hours of work in May after several months of short time — starting on a fifty-five hour week in place of forty; engineers on the Grand Trunk Railway were given an increase during the month.

Municipal employees. — Stokers (12) in the employ of the Light, Heat and Power Department at St. Thomas were given an increase of \$1.00 per week, the change going into effect on May 1; civic labourers (15) in Brockville were given an increase of five cents per day; labourers (500) employed by the city

of Victoria were given an increase of twenty-five cents per day on May 1; members of the police force (380) at Toronto were given increases as also were other civic employees in the same city.

Agriculture.

Generally speaking, favourable reports as to the condition of the crops have been received from nearly all parts of the Dominion. The Ontario crop conditions, as reported to the Department of Agriculture during the middle of the month, however, showed that fall wheat was in worse condition than has been known for many years, the weather in the early part of April having been fatal to a considerable portion of it. The wet weather somewhat hindered the farmers in their seeding operations, which were completed rather later this year than usual. A lack of sufficient labour proved a hindering influence in this respect as well as the high wages which were demanded for farm help. Referring to the question of the difficulty of securing farm labour, the Department of Agriculture of the Province of Ontario has sent out circular letters to farmers applying for help through the Bureau of Colonization containing suggestions as to how to solve the labour problem with which they are confronted. In Alberta, seeding was carried out under favourable circumstances and prospects look good for a bountiful yield. There appears to be very little reduction in the acreage of wheat sown and a decided increase of land under other grains. Grass is making phenomenal growth and prospects for a very heavy crop are good. Reports show that live stock wintered well and maintained a high average standard.

The first fruit crop report of the Department of Agriculture issued on May 15 states as follows:—

At this date the Fruit Crop Report is confined almost exclusively to the conditions under which the trees and plantations have come through the winter, determined partly by the summer and autumn conditions of 1911, and partly by the winter and spring weather of the present year. The dry weather of the summer of 1911 had a tendency to ripen the fruit

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the of employment in the several trades and industries throughout the Dominion. The table has reference only to phenomena treated under separate headings in *The Gazette*. TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the of employment in the several trades and industries throughout the Dominion. The table has reference only to phenomena treated under separate headings in *The Gazette*. In tabulating the information in question, the tions were favourable or unfavourable, as follows: (1) fair, active and very active; (2) quiet and very

[illegible]

present issue and is intended to present, in brief and accessible form, a generalized statement as to the state of the amount of employment prevailing, no account being taken as to wage changes, trade disputes and kindred matters. Terms employed are divided into two groups, the order indicating in each, the degree to which general conditions are quiet.

somewhat early, and it was feared that there had not been a good bud development. The early ripening was undoubtedly a good feature, as the buds and wood went into the winter in a thoroughly dormant and matured condition. A severe frost about the middle of November, in British Columbia, was the only adverse feature to be noted in the early part of the winter. In nearly the whole of Eastern Canada there was a liberal snowcovering from December to the first of March. Nowhere was the snow excessive nor in drifts that worked any harm. The months of January and February were particularly cold. In the fruit districts of Eastern Canada, the thermometer frequently ranged from 15 to 30 degrees below zero for several days at a time, and not for one period alone, but during several successive cold waves. These months in British Columbia were relatively much milder, and no harm whatever was done to the fruit crop there.

Spring is ten days or even two weeks later than usual in the early fruit districts. In the late fruit districts it is probably not more than a week later than usual. The growth during the first two weeks of this month (May) has been particularly vigorous, and the weather has been quite warm, but a cold wave is now passing from West to East and some damage is anticipated.

In the Niagara Falls district fruit tree and vine planting has been very extensive and the acreage devoted to tomatoes, peas, corn and other vegetables for canning will be much greater than before. Several new canneries are also being built in that district and extensions have been made to those that were previously running.

Fishing.

Fishermen had a fair month. Large catches of gasperaux and shad were reported in the Maritime Provinces and a few salmon were also caught although it is somewhat early in the season. Lobster fishing was fairly good. The return of the drift ice early in the month hindered operations in this respect, as also did rough weather towards the end of the month. Cod, herring and salmon were scarce. The outlook for the seal fishing industry in Newfoundland, judging from the latest reports, will be the lowest on record. In British Columbia fishing has been rather slack. There was a very small catch of salmon in the Fraser river, due partly to the fact that the water was not high enough to work nets. With the approach of more favorable weather the whalers operating on the west coast of Vancouver Island made fair catches including some sperm whales.

Lumbering.

Lumbering operations were actively carried on during the month. Saw mills have commenced work at a good many points and expect a season of heavy cutting. In Quebec, the larger sawmills have not yet commenced sawing owing to high water and in some cases heavy losses have been sustained by reason of the floods.

The second annual report of the directors of the Canadian Western Lumber Company was issued and showed that more than one hundred million feet of lumber were manufactured during 1911. The profits for the year were \$877,911.62 and market conditions during the year were reported as satisfactory. Prospects for a prosperous year were looked forward to with confidence.

Mining.

Coal mining operations in the east were very actively carried on. The Dominion Company's collieries in Nova Scotia were especially active, the output during April being the best in the company's history. All the Sydney mines were working steadily during May, though the return of the drift-ice hindered shipping for a few days. Prospects for a good summer appear good and there will probably be large outputs and heavy shipments by the St. Lawrence route.

The Cobalt mines were working steadily and good outputs were recorded. Reports state that the asbestos industry in the Province of Quebec is showing signs of increased activity.

Manufacturing.

With very few exceptions manufacturing establishments in all parts of the country were exceedingly busy during May. In nearly all cases they were running to full capacity, and in some, additional hands were taken on, the supply of those being insufficient in many places.

The annual report of the Dominion Textile Company was issued recently

and showed the past year to have been a good one for the textile trade. There was a substantial gain in profits, the total being the largest in the history of the company. Actual sales for the year were somewhat smaller than during the preceding year, amounting to \$9,038,463 compared with \$9,470,270. Raw material, however, has been cheaper and the cost of manufacture consequently less. The report shows profits to have been more than thirteen per cent. larger than during last year, standing at \$1,257,897 as against \$1,110,030. The company employs more than 7,500 hands, and the mill wages paid last year amounted to more than two million dollars.

According to the Financial Post a large party of representatives of many of the largest and most important manufacturing and business corporations of Great Britain will shortly visit Canada. The party will make an exhaustive tour of the Dominion from coast to coast, visiting all the chief cities and industrial centres with a view of ascertaining the opportunities that exist in the Dominion for the establishment of branch factories, the openings for capital in industrial undertakings, and the possibility of extending the market for British made goods.

The annual report of the Montreal Light, Heat and Power Company for the year ending April 31, 1912, shows a large increase in both gross and net earnings. Gross revenue was \$4,969,254, compared with \$4,404,126 the year before. Net earnings were \$2,844,015, an increase of \$267,625. After payment of all fixed charges, \$2,358,268 remained, equivalent to over 13.87 per cent. on the common stock, compared with 12.37 earned last year and 11.25 earned the year before.

The annual report of the Canadian Westinghouse Company, Limited, shows net profits for the year 1911 to amount to \$1,010,153, an increase of forty-five per cent. over 910, the year of previous maximum. The volume of output increased approximately forty per cent. over the previous year.

Railway Construction.

A season of almost unprecedented activity in railway construction has opened up in the country. Particularly in the West is this true. In the Edmonton territory construction is proceeding on the main lines of the Grand Trunk Pacific and the Canadian Northern Railway to the west, on the Peace River Branch of the Canadian Northern Railway to the northwest, on the Canada Northern Athabasca Landing Branch to the north, on the Canadian Northern Branch to Pakan and also on the Grand Trunk Pacific line to Calgary.

The Canadian Northern have resumed operations to the south of Ottawa and are carrying on extensive work.

A meeting was held at Aylmer at which representatives of the municipalities of St. Thomas, Aylmer, Yarmouth and Malahide were present, together with representatives of the London and Lake Erie Railway System from St. Thomas to Aylmer was discussed. The consensus of opinion favoured the extension of the line connecting St. Thomas with Aylmer by traction line. It is estimated that it would cost in the neighborhood of \$20,000 per mile, the total cost of construction and equipment being placed at rather more than \$240,000.

The British Columbia Electric Railway Company are making considerable extensions to their lines and are employing an increasing number of men.

General Transport.

Activity in railway traffic was well maintained during May and increased earnings of the important railway companies were noted. The opening of navigation caused a renewal of activity in the various ports and longshoremen had a busy month. Several new steamers have been added to those already running, the heavy freight and passenger traffic rendering these additions necessary.

At the half-yearly meeting of the shareholders of the Grand Trunk Railway Company, the chairman stated that

they were able to show a great improvement over the first part of the year.

The total amount of grain shipped from Fort William and Port Arthur by vessels to Canadian and American

ports for the period from opening of navigation to May 14, 1912, is given in a weekly report of the Department of Trade and Commerce under date of June 4 as follows:—

	Wheat Bush.	Oats Bush.	Barley Bush.	Flax Bush.	Totals Bush.
Canadian ports	6,178,509	1,969,729	22,303	117,187	8,287,728
American ports	9,716,853	912,159	278,938	761,637	11,669,587
Grand Total	15,895,362	2,881,888	301,241	878,824	19,957,315

The Trades.

Building. — With the large amount of building projected in addition to that already under way in all parts of the country there seems to be no doubt about the activity of workmen in the building trades for some time to come. Permits issued during April amounted to in value to nearly half as much again as those issued during April of last year. All classes of workmen were well employed during May; a few interruptions occurred during the negotiations in regard to new wages agreements, but these for the most part were settled without much time being lost.

Metal and woodworking trades. — An improvement was seen in these industries and skilled men were well employed.

Printing and allied trades. — Employment was steady in these trades with no special activity noted.

Clothing trades. — Unrest continued among a number of garment workers; activity, however, was fairly well maintained. Boot and shoe workers were not as busy as during last month.

Textile trades. — Activity continued in cotton and woollen establishments. Employment was generally good in the parts affected by these industries.

Food and tobacco preparation. — Workers in these lines were actively employed during the month.

Leather trades. — Active conditions prevailed in the leather trades during May.

Unskilled labour. — Railroad construction and work on civic improvements absorbed a great amount of un-

skilled labour and there was practically no unemployment. Reports from the West indicate that there was an almost unprecedented demand for men, and that nothing but absolute incompetence kept men from obtaining employment.

Canadian Trade and Revenue.

Foreign and Imperial Trade. — During April, 1912, there was an increase of \$13,309,566 in the total value of imports entered for consumption into the Dominion of Canada over the corresponding month of 1911. The total value of domestic exports during April, 1912, showed an increase of \$2,733,757 over April, 1911. During April there were increases of the domestic exports of the products of mines, agriculture, manufactures and miscellaneous merchandise, and decreases in the domestic exports of the products of fisheries, forests and animals and their produce.

The weekly report of the Trade and Commerce Department issued under date of May 13 contains an interesting report upon the trade of British West Indies for the year 1911 and the share of it which Canadian exporters enjoy. There was an increase in imports from Canada to the value of £36,296, the total amount from the Dominion being £188,281 and only exceeded by that of the United Kingdom and the United States. Last year nearly all the cheese imported came from Canada; a great quantity of the lumber imported was also Canadian product. The Trade Commissioner reports that merchants in the hardware trade state that they have never seen samples of Canadian manufacture in this line and would welcome repre-

sentatives of Canadian firms. Canada supplied more than one-half of the oats imported last year, the amount being a great advance on former years.

The report of the Trade Commissioner of New Zealand shows that total imports from Canada to that country for

the year ended March 31, 1912, were \$1,506,690, an increase of \$98,065 over the previous year.

The accompanying table contains the latest official summary of Canadian foreign trade:—

Canadian Trade, April, 1912.

TOTAL IMPORTS ENTERED FOR CONSUMPTION IN THE DOMINION OF CANADA,

	ENTERED FOR CONSUMPTION.			
	Month of April		12 Months ending	
	1911	1912	191	191

Grand Total Exports	10,943,232	934,468	13,676,989	1,803,351				

Domestic trade. — Indications from all parts point to the fact that trade is in a very satisfactory condition. The movement of merchandise has been well up to expectations and prices of staple articles have been firm with payments

generally satisfactory. Wholesale trade continued good but the unfavourable weather caused a falling off in retail business. Reports from the West show that progress continues firm in that part of the country. Bank clearings,

building returns and custom receipts which evidence in a degree the prosperity or otherwise of a country continue to show a decided increase over those of last year. Present indications, in fact, give reason to believe that the year 1912 will be an exceptionally prosperous one for the country.

The bank statement for April showed a decrease of \$8,033,999 in paid-up capital from the previous month, the total at the end of April being \$112,038,900. Notes in circulation amounted to a value of \$95,145,371, a decrease of \$773,033 from the previous month. Deposits in Canada, payable on demand, amounted to \$345,365,183 as compared with \$331,896,238 for March. Current loans in Canada amounted to \$833,242,621 an increase of \$17,294,313 over the previous month.

Some important banks issued their annual statements during the month. The profits of the Banque Nationale for the year ended April 30, 1912, were \$293,564, as compared with \$262,513 for the same period last year. Dividends at the rate of 7 per cent. were paid and amounted to \$140,000. \$100,000 were added to the reserve fund and \$5,000 to the officers' pension fund, leaving a balance of \$92,091.77 carried forward to the account of profit and loss. The total assets of the bank at the end of April were \$21,697,731 an increase of \$3,956,698 or 22 per cent.

The thirty-seventh annual report of the Imperial Bank of Canada was issued during May. The profits of the year were at the rate of 16.93 per cent. as compared with 15.18 per cent. over the corresponding period of 1911. The

actual profits after the usual provisions and deductions were \$1,004,340, which figures show that the bank enjoyed the best year in its history. The total gain in deposits and circulation has been from \$51,052,453 to \$60,631,738.

For the half year ended April 30, 1912, the profits of the Bank of Montreal amounted to \$1,236,339, compared with \$828,945 in the corresponding period of 1911. In addition to regular profits this year there were \$815,737 realized as premiums on new stock issued, making the total profits \$2,051,076 for the half year.

A review of banking progress in Canada during 1911 as given in a recent number of the Bankers' Magazine shows the progress for the year to have exceeded that of the preceding one at nearly every point. The demand for loans and discounts continued strong throughout the year. Rates of discount showed a tendency to rise, particularly in the West, causing the keenest demand for credit. A large increase took place in the resources of the banks. The increase in current loans and discounts during the year amounted to about 98,000,000 and was slightly less than the increase of the deposits, which enable the banks to maintain their strength in quick assets during the year. The profits for the year show a large increase over these of the preceding year, the amount of the increase being \$2,458,006. Increases were general, twenty-five banks out of twenty-seven reporting increased profits. No bank failure occurred in the Dominion in 1911.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST.

SESSIONS of the Ontario Commission on Workmen's Compensation were held in Hamilton during May, when further views from employers and employees were received.

A statement of the views of the labour interests of the Province of On-

tario on what should be the basis of the new compensation act has been forwarded to the Commission. The recommendations contained in the statement have been agreed to by representatives of the Dominion Trades and Labour Congress, Toronto Central Labour Council, the Building Trades Council of Toronto, and

the Metal Trades Council. It is proposed:

1. That the act cover all employments, the employees of the Province, county or other administrative body in the Province to be covered the same as employees in industries.
2. Compensation for all injuries arising out of and in the course of employment.
3. Compensation for being disabled or other injuries arising out of or the result of a specified occupation, the said disablement or injuries being in the nature of occupational diseases.
4. The entire cost of compensation to rest upon employer.
5. In the case of injuries, resulting in death, the dependents as outlined in the British Act and State of Washington Act shall be the beneficiaries, with the expenses of the funeral as outlined also.
6. The doctrine of negligence on the part of employee or employer, fellow-servant or otherwise, shall have no place in the new legislation.
7. State insurance in connection with the Compensation Act.
8. The creation of a Provincial department of insurance with three commissioners for the purpose of administration of the Act.
9. Compulsory insurance of employers in the State Department by a yearly tax levied upon the industry or occupation covering the risk of the particular industry or occupation.
10. The tax roll shall be on the yearly wage roll.
11. No employer shall attempt to pay by deduction of wages of employee, by agreement or otherwise, such action to be regarded as a gross misdemeanor as provided for in the State of Washington legislation.
12. The schedules of payment under the act to be based upon the payments under the British act with the proportional increases due to the difference in the wages in Ontario, reflecting the difference in the cost of living.
13. The Provincial Government shall provide revenue for the creation of the Department of Insurance.

Presidency of District 18, U.M.W.A.

Mr. A. B. Powell, President of District No. 18, United Mine Workers of America, covering the coal fields of eastern British Columbia and southern Alberta, has resigned from the office of president, the resignation taking effect from April 30. Mr. Powell succeeded to the office on the death of Mr. F.

H. Sherman. The group of locals included in this district is a large and influential body, including approximately 8,000 members. Mr. C. Stubbs, vice-president of the District Association, has been elected to succeed Mr. Powell.

Steel Workers' Benefit Association.

The sixth annual report of the Dominion Steel Workers' Mutual Benefit Society of Nova Scotia shows that for the year ended April 30, 1912, five hundred and fifty-one cases of illness were reported to the Society; in respect to which claims for benefit arose in three hundred and fifty-five cases. A considerable number involved no claim on the funds and the remainder were dismissed as invalid. The amount disbursed for sick and mortuary benefits was \$8,117.17. One thousand and forty-seven cases of accidental injury were reported; a large number of these were of a trifling nature and involved only expenditures for surgical treatment. Nine hundred and seventy-one claims were paid; the direct outlay to injured members amounting to \$14,094.55. Five members died during the year as a result of accidental injury and six suffered the loss of a limb. Surplus funds at the end of the year amounted to \$7,402.21.

Montreal Employment Bureau.

The operations of the Montreal Free Employment Bureau established by the Government of Quebec are shown for the month of May in the following table:—

	Male.	Female.	Total.
No. of applicants for situations	595	21	616
No. of situations offered.....	752	36	788
No. per cent. of persons placed	85	80	84.6

II.—REPORTS OF LOCAL CORRESPONDENTS.

NOVA SCOTIA.

Sydney.

Active conditions prevailed throughout May, and labour, though abundant in all classes, was well employed. The

weather, though cold, was favorable to outdoor work, and employment was given to nearly all surplus labour which had not been active during the winter season. The larger industries such as steel and coal were active, and con-

tinued to add to the increased output gained during the first four months of the year. All other works such as foundries, factories, cement works, etc., were active, and prospects bright in all of them.

The steel works at Sydney had a good month, all departments being busy. Four blast furnaces were in continuous operation and the fifth one will be blown in early in June. This will be the first time that five furnaces have been producing together at these works. The wire mill began drawing wire about the middle of the month, and by the first of June a sufficient quantity of wire will be on hand to begin the making of nails by the nail mill. Nearly all the construction work is finished and the other mills being set up will be operating within a short time. Large shipments of steel rails were sent up the St. Lawrence to Port Arthur, Fort William, Quebec and Montreal. Limestone and iron ore shipments have begun.

The Sydney Mines steel plant had a fairly good month. The blast furnace, which for some weeks has been down for repairs, was blown in, which insured a better supply of molten material for the Open Hearths. Other departments of these works were active.

The coal industry continued active, and, with the exception of one or two idle days at a few of the Dominion Collieries owing to the return of the drift ice by unfavorable winds, all the collieries worked steadily and large outputs were obtained. Prospects in the coal trade are very bright and heavy shipments will be made by way of St. Lawrence during the summer.

The building trades were active during May, although in Sydney the foundation work of some of the larger buildings was not sufficiently advanced to cause any unusual demand for carpenters. The outlying districts were more backward and carpenters were not so well employed. Shipping was fairly heavy and transportation by rail a little lighter than in April. The wholesale and retail trades were brisk and had a good month.

The fine though cold weather was favourable to agriculture and much preparatory work was done on the land. The season is later than last year, and very little seeding was done until the end of the month.

Westville.

All lines of industry showed marked activity during May, with large demands for labour, which could not be obtained, the shortage being caused by the development of the coal areas and the large emigration to the West.

Building operations were brisk, many homes for workers being under construction. The Acadia Coal Company are erecting fifty double tenement houses in Stellarton and twenty-five private dwellings are also under construction. Negotiations are being conducted for a site and tax exemptions, for a woollen mill to cost \$350,000.

Seeding is practically concluded in the farming districts, the season being almost two weeks earlier than the spring of 1911. Growth is now very rapid and the indications are that the hay crop will be a large one. The banks have had a good month with easy collections and wholesale and retail merchant report trade brisk.

The collieries are rushed to keep pace with their orders and all manufacturing concerns are busy in this district.

Halifax.

The labour market for May showed increased activity compared with that of April and an improvement over the corresponding month of 1911. Work on several contracts—old and new—were pushed forward with much vigour; and promoted increased industrial activity.

Work along the water front has maintained an activity unequalled for a long time, particularly when the lateness of the season is considered, and the stopping of the fortnightly boats, several of which now go up the St. Lawrence. Activity in the transporta-

tion branch of the port's business is also evidenced by the congestion of freight at the freight sheds, which almost equals the amount handled during the busiest seasons.

The movement by which a number of grocery stores and practically all butcher shops close at 12.30 on Wednesday afternoons was inaugurated the second Wednesday in May, and will be carried out during June, July and August. Beginning in June other lines may join in the movement which was put into effect last July and August—and proved beneficial to the employees engaged in retail trade.

Amherst.

Labour conditions during May improved greatly. With the advent of the season the building trades showed great activity, and towards the end of the month many large contracts were undertaken.

Financial conditions, wholesale trade, and transportation were satisfactorily reported. There is an unsatisfied demand for small cottages for rental. Agriculture operations were very active, and farmers have their seeding well advanced.

Several large real estate transactions have taken place during May.

PRINCE EDWARD ISLAND.

Charlottetown.

The general condition of trade appears to have improved somewhat since April. Carpenters, painters and paper-hangers were very busy, and the artisan, in general, seems to be well provided with work.

The weather was fairly favourable to the farmers and many have their planting well under way.

The market is well supplied with fresh fish—cod and haddock. Conditions in the oyster industry will be improved in the near future, and already an engineer is here who will handle the preparation of new beds for the advancement of this valuable branch of the

industry. The lobster catch is fairly good.

NEW BRUNSWICK.

Moncton.

The various classes of labour have shown a marked increase in activity and volume of employment during the month. Building operations are quite brisk. In the city thirteen building permits were issued in May with a valuation of \$19,700.00. In the suburbs and local towns much building is in progress and the demand for all classes of building artisans is good. The Havelock Mineral Water Bottling Company have commenced the erection of a concrete building and will transfer their manufacturing plant from Havelock as soon as it is completed. The Eastern Amusement Company have also began the erection of a new building. The installation of natural gas by the Moncton Tramways Electricity and Gas Company is being actively proceeded with. About twenty-five hands are employed, and the gas has this month been installed with satisfactory results in the Record Foundry plant, the Globe Laundry, and some private residences. The Maritime Oilfields Company, Limited, have resumed the work of development in their oil and gas areas at Coverdale. Work in the Grand Trunk Pacific terminal yards has also recommenced. About seventy-five are employed. The grading is nearly completed and the work of laying the foundations of the turntables, roundhouse, etc., is in progress. It is expected that over one hundred men will be employed here all the season. All local manufacturing plants are running full time. Retail trade is active and wholesale trade healthy and progressive. The customs returns for the Port of Moncton for April shows imports value \$87,697 and duty \$8,303, as against imports value \$36,648 and duty \$5,633 for April, 1911. The New Brunswick Telephone Company held their annual meeting May 18th. The number of telephones installed last year

was 1,197 as compared with 989 the previous year. The total number of telephones in the Province of New Brunswick is 11,171, and the earnings for the past year \$355,029. In the Government railway shops the Saturday afternoon holiday came into observance the first of the month.

The farmers had an active month, but seeding operations have been somewhat retarded by backward weather and much remains yet to be done. Farm help is in good demand, but supply is very limited, and operations are much restricted by the scarcity and high cost of help. Much interest has been developed by the establishment of orchards and it is estimated that over 60,000 apple trees will be set out this spring. A farming demonstration Special Team under the auspices of the Provincial Government will tour the province commencing June 8th.

St. John.

The labour market during May was an excellent one for the building trades, there being a great demand for brick-layers. When work is started on the Courtenay Bay developments, labourers will be in great demand. Work on the new armoury is progressing favourably; the contractors for the Simms brush and broom factory at Fairville have a large gang of men at work preparing for the foundation; excavation is about completed on the site of the new warehouse for the Ames-Holden-McCreedy Company; and several dwellings are in course of construction.

The winter port business closed May 13, and according to the official returns 120 cargoes were sent forward, valued at \$29,969,800, made up as follows: Canadian goods, \$17,915,675; foreign goods, \$12,054,125. There were also shipped by express furs and silver valued at \$3,480,000, which, added to the total of the Customs figures, make a grand total in value of the goods sent forward \$33,449,800. The total exports show an increase of \$7,991,428 over last season. The grain shipments for 1911—

1912 were 7,967,766 bushels, as compared with 7,292,869 for 1910-1911. The deal shipments were 17,198 standards, as compared with 19,369. The passengers carried were 41,242, against 40,799 for the previous year. The new service to Hamburg and Rotterdam carried exports of more than \$400,000, and the service to Australia and New Zealand showed an increase of a quarter of a million. Out of a total of 7,967,766 bushels of grain passing through St. John by the various steamers, no less than 1,693,596 bushels were taken on at the Intercolonial Railway elevator, an increase of over half a million bushels for the season of 1911-12.

Hampton.—A number of farmers of Kings County are applying for incorporation as the Farmers' Dairy and Produce Company, Limited, with a capital of \$9,000, and head office at Hampton, to establish and carry on a general wholesale, retail and manufacturing business in milk, dairy products, farm products, and farm supplies in all its branches.

St. Stephen.—The St. Croix Soap Manufacturing Company, of St. Stephen, and John Taylor & Company, of Toronto, manufacturers of toilet soaps and perfumes, have amalgamated, and will be known as Canadian Soaps, Limited. Its capitalization is \$2,000,000, and a majority of the shares is held by the St. Stephen interests.

Fredericton.

There was an improvement in the labour situation since last month, and at the present time there is little unemployment, especially for unskilled labour, the various large railway enterprises which have been commenced in the vicinity giving work to all who require it. There is considerable activity in the building trades, while the boot and shoe workers are reported busier than they have been for years, with a largely increased daily output, which is principally disposed of in the western provinces. The various factories, mills and manufacturies are also working

full time and the prospects for a good summer look exceedingly bright.

Agricultural operations have been a little backward on account of the cold weather this spring, but during the last half of the month the farmers have made good progress with their seeding and look forward to another prosperous year. Many new orchards have been planted in this district, and as the soil and climate is very favourable to the raising of choice apples, it is probable that a few years will see a great advancement in the fruit industry of the St. John Valley.

The lumbermen have been generally successful in their stream driving operations, and the logs are now running into the booms, giving employment to a large force of men in the work of sorting and rafting. The saw mills have also opened up for the season with large forces.

Work has been commenced on the St. John Valley Railway, which is to extend from St. John to Grand Falls, and on the Gibson and Minto Railway, which is being constructed to allow an outlet for the large coal industry carried on in Queens County. The latter is to be finished by the fall, and its effect on the fuel and power question, will probably prove beneficial to the people of Fredericton.

QUEBEC.

Quebec.

Labour conditions were good during May. A few days of rain and cold weather interfered with outside work in the building trades; apart from this activity was generally shown in these lines. A dispute between painters and decorators and employers began at the beginning of the month and was not terminated at its close. Some of the smaller employers conceded the demands made by the men for higher wages, but the larger ones have nearly all refused. This dispute has resulted in the work being carried out not quite so expeditiously as would otherwise have been the case. Some of

the men have left the city to secure work elsewhere.

Farmers were busy seeding and are rather later this year than usual, the cold weather and rain having retarded operations. Railroad construction was continued on all of the new lines in the district. In the lumbering industry the big saw mills in the outlying parts have not yet begun their cut for the season, the water in the river having been too high. Several of the companies have suffered heavy losses through broken booms and logs having gone adrift.

Sherbrooke.

Labour was well employed during the month. This applies to both skilled and unskilled. There was a good demand for machinists, iron workers, mill hands and labourers, and the supply was sufficient to supply it. The machine shops have been very busy, and overtime has had to be put in to keep up with the orders on hand.

Work has been commenced on the new shops for the Jenckes Machine Company which, when finished, will employ about three hundred extra hands. The Canadian Shoe Brake Company are also ready to start the erection of their new building. The Cosmopolitan Clothing Company will have their machinery running during June. With the commencement of these new industries, together with the increased capacity of older established industries, there should be a large influx of workers before the end of the summer.

All trades are active and there is a steady advancement along all lines. Towards the end of the month men were wanted to clear out certain coal cars, and a sufficient number could not be had, although twenty cents an hour was offered.

Since the season opened about two hundred emigrants have been sent to the Eastern Townships. An active campaign will be inaugurated under the auspices of the Federated Eastern Townships Board of Trade during the fall with the view to securing more immigrants from Great Britain.

Three Rivers.

Conditions during May showed a marked improvement over the preceding month and the demand for labour was heavy.

The contractors have started the excavation for the construction of the new factories for the St. Maurice Cotton Company, Limited. There are still several hundred men working at the building of the Wayagamack Pulp and Paper Company and installing machinery in the buildings completed.

The contractors Messrs. MacDonald & Dibblee are also constructing several sidings in the island for the above company and connecting them with the Canadian Pacific Railway who have just completed a swinging bridge to the island.

The building trades were exceptionally active during May.

Navigation opened in the first part of the month and has been active every day. Railway traffic has also been very active.

Wholesale and retail trade reports a good month.

Rates of wages and hours of labour are still the same being of a good standard.

There is no report of strikes or lock-outs in this district.

Cost of living has undergone no change since the 15th.

St. Hyacinthe.

The condition of the labour market during May was very good. There was much activity in the building trades, several buildings having been put up and others started during the month. The demand for men in that line exceeds the supply, and many people who proposed to build this year have been prevented from doing so on account of the shortage of hands. Wages in this trade are fairly high, carpenters and joiners getting \$2.50 for a 10 hour day and bricklayers 50 cents per hour. All the manufacturing establishments have been working full time and some have

added to their staff. According to present indications, industrial activity will exceed that of last year. The city is employing a large number of labourers repairing streets and building new sidewalks and sewers, and has some difficulty in finding enough of them to have the work done quickly. Business both wholesale and retail was good. Banks had a good month, with easy collections. Relations between employers and employees were cordial.

Weather conditions during the month were not favourable to farm work. Too much rain and cold weather has delayed the growth of the crops, and in many places farmers had to suspend seeding operations. They also complain of being obliged to buy feed, whereas at this time last year pastures were in excellent condition. Potatoes sell for \$1.40 per bushel and it is said the price will go still higher before the next crop is ready.

St. Johns and Iberville.

The condition of the labour market during May was very active in St. Johns and Iberville. Labourers are in great demand. The erection of the new jewelry factory, costing \$15,000, has been started. An addition, one hundred feet by forty, to St. Johns' College will be ready next fall and the institution will be able to take in two hundred additional pupils. The Cluett-Peabody Company, shirt manufacturers, had to import workers from Troy, N.Y., being unable to secure here the number of hands required to fill their orders. About two hundred women and girls could find employment in that establishment. The Canadian Pacific Railway is actively pushing the double tracking of its road between St. Johns and Farnham. A large number of American ships have passed through the harbour since the opening of the Chambly canal. Banks report a good month. Business, both wholesale and retail, was very active. Farmers are busy seeding. Fishing is very active and fish is plentiful on the market.

Sorel.

There was a marked improvement in every branch of industry and, as a consequence there have been an insufficient number of hand to allow the industrial establishments to answer satisfactorily to the demands made upon them. There was an increase in the building trade activity, and a number of permits were granted.

Navigation having opened, quite a number of men left the various shanties in the county, and especially in the city of Sorel, to become captains, engineers, firemen or sailors, either on the Government boats or those of the Richelieu and Ontario Navigation Company, the Sincennes-McNaughton Line, and others. Notwithstanding that, however, those shanties have been kept sufficiently busy, with hundreds of skilled and unskilled hands receiving good wages.

A number of municipalities in the County of Richelieu, the City of Sorel included, intend to profit by the law called "The Good Roads Law" enacted by the Provincial Government of Quebec, and it is expected that the roads in the aforesaid county as well as the streets in the towns and the City of Sorel will be greatly improved in the course of the present summer and during next fall, which will mean a considerable increase in trade and commerce generally. Farmers, in spite of the bad weather of the beginning of the month, have been actively engaged, and most of the sowing has been done under fairly satisfactory conditions.

Montreal.

Great activity prevailed in practically all lines of industry in the city and district of Montreal throughout May. The opening of navigation caused a general renewal of active operations, and gave employment directly and indirectly to thousands of men. The building trades have also been exceptionally busy all through the month, which condition is likely to be maintained until next winter. Manufacturing was carried on briskly, and com-

mercial activity has been very remarkable. In practically all lines of industry there is reported a great scarcity of labour, both skilled and unskilled. This is especially true of the building trades, the printing trades and cigar makers. Unskilled labour is very scarce, and thousands of men are being called for, both for work in the city and to go West to the railway construction camps.

The commercial activity is strikingly shown in the customs and inland revenue collections, May proving a record month in both. Custom's collections exceeded those of the next highest month, which was last March, by over a quarter of a million, and the corresponding month of last year by \$416,527.58. The figures are: May, 1912, \$2,144,476.16; May, 1911, \$1,727,948.58. The inland revenue returns for the month are \$20,000 more than for last November, the highest month, previously and are \$185,246.40 more than for May, 1911. The comparative figures are: May, 1912, \$847,347.10, and May, 1911, \$662,070.70.

The bank clearings for May also show striking evidence of the commercial activity. For the month they totalled \$248,675,889, compared with \$222,790,180 in April and \$209,494,401 in May, 1911. This shows an increase of almost \$40,000,000 for May this year and nearly \$26,000,000 over April of this year.

It is estimated by the Builders Exchange that the present year will be a record breaking one in construction work. It is figured out that the work contemplated at the present time will cost somewhere around \$50,000,000. After making every allowance for change of plans, labour troubles, etc., an estimate of \$30,000,000 for this year is regarded by the Builders' Exchange as quite conservative. During the month building permits were issued for structures to cost over two and a quarter million dollars. This is a million dollars in excess of the figures for the corresponding month last year.

In addition to the important con-

struction programme for the port of Montreal already announced, plans were made public during the month for work which will effect a complete transformation of the western end of the harbour basin. The work will be begun this season and the cost will be from \$1,500,000 to \$2,000,000. The plans provide for the building of a 1,200 foot concrete pier out into the river, while the entrances will be moved over in their entirety to a new point; and also include the deepening of basin No. 1 and the construction of a new concrete wharf there, while the King Edward, Alexandria and Jacques Cartier piers will be made 300 feet longer.

A commencement was made toward the end of the month on the work of cutting the Canadian Northern tunnel into Mount Royal, 500 men being started on preliminary operations.

Maisonneuve. — A great amount of building has been commenced in Maisonneuve during the month. A number of factories are under construction, and several flats are going up to accommodate the steady influx of people settling in the town, drawn there by new industries. Four miles of street paving work will be carried out in the course of the summer.

Lachine and Rockfield. — The big industrial establishments in Lachine and Rockfield have been exceptionally busy all month. Many flats and tenements are under construction at Lachine. During the month an order came to Rockfield for 2,000 box cars and 250 refrigerator cars for the Grand Trunk Railway.

Outremont. — The Outremont town council has awarded contracts for \$100,000 worth of work on sewers and street improvements to be carried out this summer. A considerable amount of building is going on.

Westmount. — Westmount's new post office will be a handsome building, costing \$100,000, and will be erected this summer. Many new residences are under construction, especially on the upper level.

Verdun. — There is exceptional building activity in the town of Verdun. Several hundred tenements, flats, self-contained dwellings and stores are under construction. Many new people are settling in the town.

Hull.

Labour conditions have improved since April. Men in the building trades were actively employed. There was a good demand for labourers and log drivers, and high wages were paid. Men employed in sorting logs were also getting good wages, some of them being paid as much as eleven and twelve dollars weekly. They are, however, working ten hours a day instead of nine as previously. Saw mills, pulp factories, etc., were working full time and will probably work overtime in the near future if sufficient hands can be secured.

Trade, retail and wholesale, was active. Bank business was reported good in the district.

ONTARIO.

Ottawa.

Labour was exceptionally well employed in Ottawa during May. The final coming of spring weather brought an increase of activity in practically every trade. The situation was much better than during the previous month, and also better than during the same month last year. Every trade reports activity, printers and pressmen, builders, carpenters, masons, iron workers and bricklayers being particularly busy.

Work has been started on the large subsidiary plant which the Ottawa Gas Company will erect in Ottawa East. Upwards of seventy-five men are employed on the new Government bridge over the Rideau canal, which is going ahead rapidly. All the local lumber mills have opened their cutting seasons. The new Chateau Laurier, where many were employed, has been completed, and finishing touches are being put to the Grand Trunk Central station. Summer

operations have been started on the extensive works of the Ottawa Improvement Commission, and traffic has also begun on the Ottawa river and the Rideau canal. Extensive private building operations are employing every available builder in the district.

Retail trade received an impetus through the annual "shopping week" held during the week beginning May 13, when the annual Horse Show attracted large crowds to the city. Merchants report excellent trade, despite some wet weather. April customs receipts were record-breaking in extent, and bank clearings showed a satisfactory condition of commercial progress.

An increase in the price of meat and potatoes over April was the feature of the cost-of-living situation. Scarcity of the articles was given as the cause. Dairy butter dropped in price, owing to increased activity in dairying operations. Eggs showed a slight drop only.

Brockville.

All classes of labour were well employed during May, especially in the building trades; unskilled labour was also in good demand, considerable employment being given in the laying of a new ten inch gas main on King street, and also by the enforcement of a by-law making it necessary for persons owning property and having sewer connections to put in flush closets.

Railway and steamboat traffic was brisk, more especially the latter, as the summer holiday season is approaching. Traffic on the river promises to be good in the near future.

Seeding was well under-way when the long spell of rainy weather started, which has put farmers to a standstill in this line.

Kingston.

The coming of settled weather served to brighten things generally in the labour market. Employment was plentiful, the demand being greater than the supply.

The work on the new dormitories at

the Royal Military College was started a couple of weeks ago, but has been delayed by a shortage of masons and bricklayers who are very busy.

Many dwelling houses are being built, but the shortage of brick is keeping quite a number back.

The building permits for April were estimated at \$95,625 as against \$37,795 for April, 1911.

Activity prevailed along the water front. Coal men have been very busy making up for lost time, on account of the late start on the water. The grain boats have begun their mission bringing the grain down to the elevators. Passenger boats are doing very little yet on account of the cool weather. The inland revenue for April totalled \$7,501.92. The exports for April were valued at \$40,627.90, an increase of \$23,955.07 over the corresponding month of last year.

The farmers have all got their seed in and things look favourable, although some of the low lands are swamped with so much rain. On the whole there is not much complaint.

One of the biggest electric generators in Eastern Ontario has been installed in the Canadian Locomotive Company power house. A new air compressor with a capacity of 2,000 cubic feet is also shortly to be installed. The company will expend not less than \$600,000 within the year.

Belleville.

There was a good demand for labourers during May and the prospects are that this will in the near future be increased, as much building will be done in the city during the year. Work was commenced on the new foundry plant of the Marsh & Henthorn Company of this city. This plant will be on an extensive scale and will give employment to many men. The Canadian Pacific Railway line will soon be running through the city, the Railway Board having sanctioned that railway's request to run over the right of way of the Canadian Northern Ontario Railway.

The Canada Steel Company plant and the two cement plants are at present busily engaged in the production of their wares. The various other industries in the city are not only working full time but in some cases overtime.

The agriculturalists in this section have been retarded in their operations owing to incessant wet weather. In some cases no grain has yet been sown and many fields sown are under water.

Peterborough.

There was an increase in the activity of labour during May as compared with the month of April. Owing to the season opening late it was about the middle of the month before there was any great demand for outside labour. Now that the weather conditions are favourable there is a good demand, especially in the building trades. Contracts have been awarded for the reconstruction of the police station, the amount of the contract being \$5,031. All the factories are very busy at present and Peterborough's output of canoes will be more than usually large this summer.

Farmers are very busy. The recent rains have been a boon to the crops and there is a good outlook for a prosperous season.

The progress made by the lumbering men in bringing the drives down from the back lakes is if anything more advanced than at this period last year. The proprietors were highly pleased with this season's operations so far.

The Labour Educational Association of Ontario held their tenth Annual Convention at Peterborough on the 24th of the month, over one hundred delegates being present. They endorsed the recommendation of the executive committee to publish the Industrial Banner as the official organ of the Association.

Port Hope. — The work of installing the machinery for the International Tool Steel Company is being proceeded with, and it is expected that the factory will be in operation in a few weeks.

Orillia.

May was a busy month in Orillia. The factories have been running up to full capacity, general business has been good and labour conditions satisfactory. Building operations were somewhat retarded by the continued rain, and by the continued lack of brick. Nevertheless a good start has been made, and there are prospects of a brisk building season. Messrs. J. R. Eaton & Sons, whose planing factory was destroyed by fire a short time ago, have applied to the Town Council for a site for a new factory in the factory district and intend to cut their present yards into building lots, and erect from ten to twenty houses thereon. Houses are being erected in all parts of the town and a number of new subdivisions, comprising upwards of 1,000 building lots, have recently been placed on the market.

The plant and stock of the Sylvester Company have this month been transferred from Lindsay to Orillia, where they become part of the Tudhope-Anderson plant.

The assessment roll shows Orillia's population to be 7,123, an increase of nearly 650 over last year's returns. The assessment increased about a quarter of a million dollars.

Farmers have been much retarded by the heavy rain. A considerable amount of low land is flooded, and it is now feared it will not be available for crops this year.

Toronto.

Labour conditions during the month were generally satisfactory, and all classes of workers well employed though the unusually heavy and continued rain-storms during the earlier part of the month, interfered considerably with out-of-door employments. Building permits were issued in April to the number of 1018, representing an approximate value of \$2,842,995, as against 912 permits, representing a value of \$3,272,818, in April, 1911. The total approximate value represented by permits issued during the first four

months of the year is \$6,508,825, a falling off of \$402,933, as compared with the corresponding period of last year. The decrease is accounted for by the lateness of the season and the unusual number of large contracts taken out early last year. Building was very active especially in the outlying parts of the suburbs, where nearly twice as many houses are being put up as last season. The City Council on the 13th adopted a by-law prohibiting the construction of apartment houses in residential districts which had the effect of suspending a number of projected undertakings of this character, and a strong agitation has been set on foot to have it rescinded, which would result in greatly stimulating the building trade.

On the 23rd the Canadian Railway Commission issued orders approving the plans submitted by the Grand Trunk Railway for the construction of a new down-town Union Station on Front Street at a cost of \$2,500,000, and for the erection of a viaduct and the elevation of the track along the water-front at a cost of \$6,500,000, and ordered the work to be proceeded with as soon as possible. The joint grade separation plan of the Canadian Pacific and Canadian Northern Railways for the northern part of the city was also approved, which will involve the construction of a Union Station in North Toronto to cost \$2,000,000, and the outlay of a like sum in viaducts and improvements. The carrying out of these plans will necessarily create an active demand for labour.

Work was begun early in the month on the Toronto and Eastern division of the Canadian Northern electric line, just west of Bowmanville.

Nearly all manufacturing plants are busy with a good number of orders in hand. The metal and engineering trades have plenty of work. The Massey-Harris Company are completing a large addition to their foundry and will shortly erect a four-storey warehouse 270 by 110 ft. to accommodate their increased out put.

Niagara Falls.

May was an active and satisfactory month, although wet weather still delayed some lines of work. Practically all working people were employed.

The Pollard Company, which will erect a steel-working plant here, has commenced business in temporary quarters. The American Cyanamid Company commenced extensive building operations. It is said that \$400,000 will be spent in enlarging the works and 175 more men employed. A sum of fifteen thousand dollars was voted for a new gymnasium at the Collegiate Institute. It is reported that the Toronto & Niagara River Company will duplicate its power transmission line from Niagara Falls to Toronto.

Every local manufacturing concern of which information was available was reported to be busy. Planing mills are rushed to supply the demand for builders' materials.

Bridgeburg. — The new marble works will be running in June. Twenty-five men were added to the working force at the foundry. The Tuttle & Bailey Company will erect five concrete factory buildings for their ornamental metal work business. Twenty men are employed by them at present. A chemical works and a drug factory 65x75 feet in size are to be erected. Many dwellings are being built. The new sewers are nearly completed.

Port Colborne. — A contract for 600 feet of cribwork on the lake front was let. This is the first work for the new steel plant. The cork factory, lately damaged by fire, was being rebuilt and good progress was made in doubling the cement works. Harbour contractors commenced the season's work and the government grain elevator was very busy. The Maple Leaf Milling Company are establishing a line of steamers to carry flour from their mill here to Montreal.

Welland. — Work was commenced on the new Goodwillie canning factory. A rubber tire factory will be built here. Brick paving was commenced in the

town and work was started on the county good roads system just outside the limits. A new wing to the Industrial Home will cost \$7,000. The annual assessment shows large increases in valuation and population.

Fort Erie. — Some small manufacturing concerns are to be established. Electric line extensions to Erie Beach for light and traction purposes were commenced.

Crystal Beach. — Many men have been employed in laying sewers and building houses. The opening of the summer season gives employment to hundreds in hotels and places of amusement. Last summer 10,000 people were in residence here. This season 13,000 can be accommodated.

St. Catharines.

Industrial conditions continued active and labour generally was well employed. All branches of the building trade were taxed to their full capacity and had difficulty in coping with the increased amount of work. The city has secured another factory known as the Stone, Logboot and Axe Factory from Warren, Pa.

Merriton. — Conditions in regard to employment of labour were favourable.

Thorold. — The labour market was active during May.

Hamilton.

Owing to the wet weather which prevailed during the greater part of May and strikes in several branches of industry, conditions were not as favourable as those existing during the corresponding month a year ago. There is a large amount of work ahead of the building trades and local factories are working full time. A great number of men were employed on civic works and some of the city's big undertakings are well under way.

From \$250,000 to \$300,000 will be spent on the harbour here during the next few months, as well as on the extension of the present government revetment wall for a length of 466 feet

and the construction of a wharf at Wellington street, dredging and other necessary work.

Owing to the growth of the city it has been found necessary to add a number of mail carriers to the local staff.

Debenture by-laws have been passed, authorizing the city to borrow a total sum of \$154,903.93 for asphalt, roadways, cement sidewalks, local improvements, etc.

The street railway receipts for the quarter just ended amounted to \$118,810.33 and the city's percentage of this is \$9,504.82. The earnings were the largest of any quarter in the company's history.

The Steel Castings Syndicate a new company capitalized at \$300,000, will locate here and erect a large plant costing \$100,000, which it is expected will be ready for use by September. The new company will make large and small castings for the trade and will employ about 400 men.

An early closing by-law was passed by the City Council and took effect on May 22. The following sections of the retail trade are affected: Retail men's furnishing shops, retail ready-made clothing shops, retail dry goods shops, retail boot and shoe shops. They are to close at or before six o'clock in the afternoon of every business day except Mondays, Fridays and Saturdays and days immediately before public or Municipal holidays and days of the week immediately preceding Christmas day.

There is a scarcity of experienced farm and garden help in this locality. Fall wheat and hay both promise to be a light crop.

Dundas. — The assessment roll shows an increase in value of about \$1,000,000. The total assessment of the town is \$2,126,000 as against \$1,364,530 last year. The population has increased to 4,326. The heavy rains during the month caused several dams to break and manufacturing in some lines has been hampered as a result.

The Cataract Power Company is

planning some big improvements here which will be a decided improvement to the town.

Brantford.

Labour generally was exceptionally well employed during May; conditions were better than during April, and compared favourably with the corresponding month of last year.

The building trades were busy, and many new buildings are under way, including several large factory additions. The only drawback to great activity in these trades is the shortage of brick, which is already being felt; this is partly relieved by the use of sand lime brick, which can be made ready for use from the raw material in 48 hours. There are two factories making this brick, which is in great demand.

The iron trades in most cases were busy, though in the agricultural implement factories there was not the briskness of last year. Activity was also seen in the fabric mills and operatives were in steady demand.

Guelph.

The general conditions of the labour market were more favourable than those of the previous month. The building trades were very active, but towards the end of the month outdoor workers lost considerable time on account of wet weather.

The corner stone of the new Y.M.C.A. building was laid during May. A large staff of men are at work on the building, and good progress is being made. Contractors are rushing work on the new factories of the Guelph Stove Company and Rubber Tire Company. Building permits for the month of April amounted to \$33,786, an increase of \$12,736 over the same month last year, the majority of permits issued being for workingmen's houses. A busy season for labourers is assured as the Board of Works Commission have let tenders for the paving of several streets and subways.

The Guelph Carpet Mills Company

are making another extension to their plant, tenders now being asked for a large three-storey warehouse.

Manufacturers generally had a good month, an increase in the staff being necessary in some cases. The Guelph Culvert Company have doubled their capacity, running night and day shifts.

Customs returns for April amounted to \$20,510.95, an increase of \$3,062.63 over the same month last year. The Merchants' Bank have located a branch office in Guelph. Wholesale and retail merchants report trade good for the month. The retail clerks are petitioning the merchants for the Thursday half-holiday during the months of July, August and September.

Farmers have finished seeding, but owing to the continued wet weather towards the close of the month farming operations were almost at a standstill. It is feared that the rains will injure the fruit crop, but the outlook for hay is very good.

Berlin.

Labour conditions were better than during April especially in the case of bricklayers, stone masons, builders' labourers and street labourers. This was largely due to the fact that the weather was more favourable. Freight and passenger traffic was heavy during the month and bank and custom trade increased, the latter shows receipts for last month of \$34,684.85 an increase of about \$10,000 over the corresponding month of last year. Wholesale and retail trade was also good. Wood working and furniture industries were very busy during the month and help is wanted in finishing departments. Tanneries are also busy and there is a demand for curriers. Work on the extension of Canada Furniture Company's factory was commenced a number of extra men will be wanted for fall trade as soon as this work is completed. Heavy rains handicapped the farmers with their spring ploughing and seeding in this locality; they all however report the outlook good so far;

the heavy rains have helped the grass crop. Fruit growers are also looking for a good crop if no frosts set in from now on. Rubber factories report trade very good.

Woodstock.

Industrial conditions were on the whole satisfactory. Most of the leading factories report business to be good and the immediate outlook promising. The building trades were active and spring work on the farms in the district is unusually well advanced for this time of the year.

There seems to be a considerable scarcity of farm help. How serious this scarcity is is indicated by the wages offered. Farmers are offering for married men \$350 a year with free house, garden and milk. For unmarried men the rate is \$300 a year with board. Even at these figures men are hard to get, and farmers are glad to take on inexperienced hands, who show ability and willingness to work.

There is a good demand for skilled labour, notably cabinet makers, upholsterers and moulders. Indeed there is some complaint of a scarcity of unskilled labour; but, generally speaking, the factories are well supplied in this respect.

Stratford.

Labour conditions were good during May especial activity being shown in the building trades. Permits issued during April amounted to \$56,564, an increase over the corresponding month of 1911. The rain of the last two weeks hindered operations in the building trades and all outdoor work.

Tenders were asked and contracts awarded for the construction of sidewalks and the paving of streets which will give employment to a number of men and teams. The manufacturers were all busy and in some cases additional hands were taken on. Wholesale and retail merchants report trade very good.

Goderich. — Work has started by the

Canadian Pacific Railway Company on a floor storage building on the docks at Goderich to cost about \$20,000. The building will be constructed entirely of wood and a large force of men have been engaged to rush the work through so that it will be completed by the middle of July.

London.

May showed a marked improvement over the previous month in nearly every line of business. A shortage of brick hampered bricklayers and some were idle from this cause, but there will be work for all shortly. A large number of residences are being erected. In the foundries and factories business is better than for the same period last year. On the railroads activity prevailed, and the men were extremely busy.

About 75 men have secured work in the brick yards for the summer months. Female help is in great demand, and all factories using this class are in need of more.

A scarcity of help on the farms is proving serious, and the rural population of the surrounding country is decreasing, large numbers having gone West. Seeding is all completed, and the heavy rains are helping the crops.

St. Thomas.

The general condition of the labour market during the month of May did not show the activity of the corresponding month of last year. The number of building permits issued was few compared with May of 1911. Thirteen permits were issued amounting to \$14,270. At the commencement of the season it was supposed from the number of inquiries which were being made by prospective builders that the contractors would have a busy season, but so far the permits issued have not justified the predictions.

Unskilled labour was slightly in excess of the demand. Traffic employees employed on the Pere Marquette and Michigan Central Railways reported a quiet month. Traffic employees on the

Wabash Railway were actively engaged. Michigan Central and Pere Marquette Railway shop employees were busy. Local industries reported an active month.

The By-law submitted to St. Thomas ratepayers, whereby \$23,500 was to be expended in purchasing three new cars and equipment to add to the local street railway equipment, and \$6,500 to be used in extending the lines of the street railway, was carried by a large majority.

The question of Wabash trainmen being removed from Windsor to St. Thomas was discussed by a committee representing the municipality of Windsor and the Wabash officials. The removal was advocated so as to make St. Thomas the home terminal. Because of opposition shown to this movement by the Windsor representatives, it was finally decided to lay the matter over until a later date. The point at issue appeared to be the question of terminal detention time; the Wabash officials being prepared to allow the men to reside in Windsor provided the men would forego the privilege of putting in detention time while in St. Thomas.

Peaceful conditions prevailed in labour circles in the city and district.

Farmers throughout the district have completed seeding. The fall grain is shown to have wintered well. While it is early to make predictions as to the fruit crop, it is said that the prospects for the apple crop are very bright, and that the yield of all varieties promises to be exceptionally large. The peach crop has apparently suffered by reason of the severe weather.

Aylmer. — The large establishments in Aylmer, The Aylmer Canning Company, Ltd., and The Aylmer Condensed Milk Company, Ltd., show figures which indicate the importance of these two concerns to the County of Elgin.

It is reported that from April, 1911, to March, 1912, The Condensed Milk Company handled from the farmers of Malahide 11,764,990 pounds of milk, for which the farmers were paid in cash \$145,317.33. It is expected the factory

will handle during the month of May this year over 11½ million pounds of milk, and as a result in the neighborhood of \$200,000 will be paid the dairy-men of Malahide. Fifty hands are employed in the factory. The monthly payroll goes above the \$2,000 mark.

The Aylmer Canning Company during last year's canning season paid to the farmers for produce in the neighborhood of \$56,989.

During the season of work 225 hands were employed by the Company.

Chatham.

Labour conditions during May continued active. Building material being more plentiful contractors were able to proceed with a number of large contracts.

The building permits issued for May numbered 24, and amounted to \$30,210.00.

Customs returns for May were the largest in the history of the port and amounted to \$35,800.24.

All factories with the exception of the International Harvester Company were running to their full capacity.

Wholesale and retail merchants report sales brisk.

Windsor.

Labour in the locality was well employed during May. Eighty-four building permits were issued during April amounting in value to \$141,025. Operations in the building line were actively carried on and a scarcity of builders' labourers was reported. The supply of skilled mechanics was also inadequate to satisfy the demand.

Farmers had a busy month in the carrying out of seeding operations.

Cobalt.

Conditions in this section remain unchanged in any material manner from those of the preceding month.

Navigation opened on Temiskaming lake and all the streams and rivers in the north country, during the first two

weeks of May and prospectors are already leaving for their summer's prospecting. Farmers have their seeding practically completed. A severe snow storm hindered operations for a few days, but at the same time proved beneficial to the crops that were in the ground. The lumber companies have commenced their drives and report a good cut of timber during the winter. Railroad construction on the Elk Lake Branch and Nipissing Central extension of the Temiskaming and Northern Ontario Railway is progressing rapidly.

A revival of the building boom throughout the Temiskaming district will be seen shortly, and already many large buildings have been projected in the various towns. The announcement making Haileybury the judicial seat of the district was made during the month. The Energite Explosives Company will erect a much larger factory to replace the one destroyed by fire two weeks ago, which will give employment to nearly one hundred hands. New Liskeard, Cochrane, Poreupine and other towns all report a bright outlook for summer building operations. With the opening of navigation considerable commercial activity has been created with the Quebec side opposite Haileybury.

Port Arthur and Fort William.

Labour has been steadily employed during May.

The opening of navigation at the beginning of the month accelerated all work and caused considerable activity at the docks.

The various coal docks are again commencing operations and although not working to their full capacity a great number of men are busy.

The water front presents a busy appearance in all departments, and as there have been a number of boats in with western freight, the freight sheds are all very active.

Farmers in the district were busy clearing, plowing and seeding.

All the manufacturing industries are

steadily employed. One industry at Port Arthur, a stone cutting business, which has been a busy plant for the past four or five years has shut down. The waggon works at Port Arthur have commenced operations and although the number of men employed is not large there is likely to be an increase shortly.

Many men were sent out from both cities to railway construction work, and Fort William and Port Arthur are letting important contracts for public work, both for road, sewer and water construction and public buildings, this, during the summer will employ a large number of men.

The great event of the month was the launching of the first freight vessel built by the Western Dry Docks Company on Saturday, May 25th.

This company has large orders for several vessels both in building and repair work and is now employing some 300 men with likelihood of increase as the summer advances.

A by-law has been carried at Port Arthur for the establishment of a car works and a by-law for a similar industry is to be voted on by the citizens at Fort William during June.

The building trades have just begun to feel the effect of the busy season, many foundations are being prepared and some work is being pushed ahead, but all trades are not yet fully employed.

Bricklayers, masons, carpenters and joiners, lathers and plasterers are all partially employed and as work increases are steadily finding work. There is no dearth of men in any of the trades, neither in the unskilled trades.

All other workers in the district are steadily employed.

MANITOBA.

Winnipeg.

All classes of workpeople were well employed during May. The demand for labour was very much keener than during the previous month and also

compared favourably with that of the corresponding month of last year.

The absorption of more labour is not due to activity in any particular industry but to general activity. If one industry more than another is particularly active it may be building. The permits issued in Winnipeg were larger for May than for any previous month in the history of the city, amounting to \$3,030,020 covering 802 buildings, as compared with \$2,374,550 covering 660 buildings for last May. For the first five months of the present year the building permits amounted to \$8,060,730 covering 2,175 buildings as compared with \$6,060,730 covering 1,755 buildings in 1911.

Business has been exceptionally active during May. Bank clearings for the month aggregated \$139,362,002 as compared with \$99,142,864 in 1911. The large increase is due to navigation opening somewhat later, which usually affects the volume this year.

The City of Winnipeg proposes to utilise some of the vacant property it owns, to the extent of three and a half acres for the erection of factory buildings which will be equipped with electric motors, lifts and other appliances common to factory buildings. These will be rented to manufacturers at a rent that will not be more than enough to cover interest and depreciation charges. The object of erecting these buildings is to encourage manufacturers to locate in Winnipeg.

The City has taken preliminary steps for the extension of the high pressure water service used exclusively for fire protection service. The outlay necessary for these extensions will be in the neighborhood of \$500,000.

It is reported that the shops of the National Transcontinental Railway at Transcona will be put into operation during June.

Brandon.

Labour generally was well employed during May and conditions show a great improvement both over those of April and those of May, 1911. Excep-

tional activity was shown in the building trades especially in the carpentry and woodworking branches.

The paving of the centre of the city is progressing rapidly and the contractor announces his decision to employ night shifts in order to complete the work. The laying of street car tracks is being rushed and it is hoped that there will be sufficient laid in order to use the system by the time of summer fair. The city council has decided to retain the street car franchise and run the system by a commission under the Public Utilities Act of Manitoba.

The standard lighting system has been put in commission and the city had decided to extend it to other portions of the city.

The Maple Leaf Milling Company are going to construct a \$60,000 elevator to replace their two elevators destroyed by fire earlier in the month.

The winter fair board will commence immediately the erection of a \$75,000 arena for the fair purposes.

With the exception of an increase in the price of potatoes there were no changes in the cost of living during May.

SASKATCHEWAN.

Regina.

Generally speaking, conditions in Regina were more favourable to labour than during the preceding month, but compared unfavourably with the corresponding period of last year.

Although a large number of high class buildings in the form of business blocks, hotels, warehouses, etc., are to be erected, still, the promoters have delayed taking out the permits.

One noticeable feature of this year's building permits in the low percentage of residences; this appears to affect the carpenters somewhat, as in past years the larger proportion have looked to the smaller buildings for employment.

At present there is ample labour for all trades.

Work was resumed on the Trunk sewer, now in the course of construc-

tion; such a large undertaking, naturally involves slow progress.

Both wholesale and retail trade continue to maintain an active standard.

With ideal weather prevailing farmers have been actively engaged in seeding operations and about ninety per cent of seeding is completed.

Threshing last year's grain is still in progress, there being in the neighborhood of ten per cent. last year's grain yet to be threshed. It is reported in many places in the province, that the grain threshed this spring yielded more per acre and slightly superior grade, than that threshed last fall, thus proving that it had not suffered by exposure during the winter.

Moosejaw.

Labour was well employed during May and owing to the great number of public buildings under construction the demand for unskilled men was considerably greater than that of the corresponding month of last year. There was also great activity in the building trades. Transportation operations were extensively carried on; the railway companies were busy hauling wheat eastward and a good amount of merchandise was brought in from the east. Farmers were busy seeding, operations having been carried on successfully in this respect through the land being in excellent condition. Farm labourers were in good demand and this state of things seem likely to continue for some time. There were no changes in the rates of wages and no unrest in labour circles.

Saskatoon.

Labour conditions showed an improvement during May. Building activity was pronounced; there was, however, a good supply of labour. Industrial disturbances were a feature of the month in this line and several men were out of employment for a time, pending the arrangement of new wage schedules. The weather was fairly favourable to agriculturists and the outlook for the season is good. There have been small shipments of cattle and dairy prices continued firm.

ALBERTA.

Edmonton.

The condition of the labour market during May was exceedingly active, both for skilled and unskilled labour. Demand and supply were well balanced. The building trades were busy and the planing mills are behind with orders.

It is probable that June will open with more work in progress than was done in the entire season of last year. Buildings now in progress include five wholesale warehouses. The returns for the month of April are as follows:

	April 1911	April 1912	Increase
Bank Clearings.....	\$8,836,436	16,335,539	84 %
Customs Returns.....	50,780	148,160	191 %
Building Permits.....	359,027	2,102,770	200 %
(Strathcona)	30,450		
Post Office (Stamps only)	7,988	12,631	47 %
(Strathcona)	600		
Street Railway—			
Passengers Carried.....	452,950	782,646	73 %
Revenue.....	\$19,014	32,158	69 %
Homestead Entries....	866	698	

TOTAL FOR FIRST FOUR MONTHS.

	1910	1911	1912	Increase 1912 over 1911
Bank Clearings.....	\$19,202,982	\$32,884,038	\$64,872,739	97 p.c.
Customs Returns.....	103,951	197,378	435,573	120 "
Building Permits.....	592,001	758,077	3,384,732	398 "
(Strathcona)		92,300

Homestead Entries.....	1,270	1,752	1,817	3½ "

The Great Northern Tannery has commenced production with a good equipment and favourable prospects.

General business conditions appear satisfactory. Not only is there phenomenal expansion in volume but wholesalers and others report that retail merchants throughout the district are meeting their obligations satisfactorily. Seeding is nearly over and seed has gone into the ground under ideal conditions.

Lethbridge.

Compared with April the month of May was a very busy one. There was a great demand for labour but the supply was equal to it. City improvements gave employment to many men, five hundred being on its pay roll. Building operations were actively carried on in every part of the city. The street railway is well in hand and the school board has let contracts to the amount of \$117,000, two of these are undergoing execution at present. The Board of Trade are extending their offices at an outlay of from \$3,000 to 4,000. There is a good demand for men on the railways, also on the irrigation system.

Wholesale trade is very active in the city, the outlying towns are considered rather dull.

Farmers are all very busy. Seeding is almost finished for the season with a large increase. This spring is considered the best yet and in view of the fact that there was no plowing last fall the farmers have done well.

BRITISH COLUMBIA.

Nelson.

There was an improvement in all conditions of labour during May. Contractors are busy with a full force of men; the city also has a large number of men employed. There are some large blocks under construction also a number of dwellings. The real estate market is in a prosperous condition, many sales of land have been made to

new settlers coming in. Miners are well employed. Some old mines were opened up and made a good showing.

Ranchers are very busy. There is more cultivating and more trees are being planted than in previous years.

The mill of the Yale Columbia Lumber Company, which was burnt will be rebuilt by the Dominion Sawmill Company in time for cutting logs next year.

New Westminster.

The prospects for a busy season have materialized during May, workers in all lines having no trouble in finding employment. The building trades have been especially active, the building permits for the month exceeding \$150,000. A disastrous fire in the Royal City Mills forced about 300 men out of employment temporarily, mostly Chinese and Japanese. This fact coupled with a temporary breakdown of another large mill caused a scarcity of lumber and a short period of enforced idleness to the building trades. With the exception of three or four rainy days the weather has been fine during the month. Street grading and sewer work is giving employment to a large number although road building in the adjoining municipality of Burnaby has been held up for lack of funds. The British Columbia Electric Railway are putting in several extensions to their system and are employing an ever increasing number of men. A provincial penitentiary building, to cost several millions, was begun this month and will give employment to a large number of men for two or three years. It will be of re-enforced concrete and steel, and a temporary structure to cost \$70,000 has already been begun.

Victoria.

There was little change in the labour situation from that of the previous month. All classes of labour were steadily employed, with comparatively few idle men, except carpenters and unskilled labourers. A number of these were unemployed owing to an un-

usual quantity of arrivals from outside points.

Building operations of all kinds continue brisk. For the month of April 151 building permits were issued aggregating in value \$514,850, for the same month a year ago 86 permits were issued, the value of which was \$280,110.

The city assessor has announced that the total assessed value of land for the year 1912 will be \$71,635,710, and \$16,974,910 on improvements, making a total of \$88,610,620. The increase is more than twenty-eight millions over that of last year, when the figures were \$46,516,205 on land and \$13,491,780 on improvements. The assessed value of property in Oak Bay is \$4,320,352, compared with \$2,585,143 for last year. In these two municipalities taxes are levied on land values only.

The British Columbia Telephone Company have moved into their new building, which has been erected and equipped at a cost of \$260,000.

The Canadian Pacific Railway Company awarded contract for grading and bridging the first ten miles from McBride Junction to Courtenay on their island branch. Work will be commenced at once.

Nanaimo.

Conditions in the labour market showed a favourable advance over those of last month and there were few men out of work, clearing land, building and general improvement works giving employment to many. While there has been no great activity in any special class of labour there was a very healthy tone in all the different branches of work in the district. In commercial circles a steady increase of trade was noted. The merchants wholesale and retail report business as very good. In transportation there has been a new and larger boat put on making two trips to Vancouver daily instead of one as before, the number of travellers and amount of freight causing a demand for such service.

The coal mines of the district were working full time in most cases, as also were the saw mills. Not much activity was shown in the quarries.

Prince Rupert.

There was no special activity in the general labour market and a number of men who either came into or remained in Prince Rupert anticipating a good demand for their services were disappointed. Two large grading and construction contracts in connection with the Grand Trunk Pacific viz., the depot site and the dry dock and ship yards have been prepared for, but the main start of these works has not yet been made and they have not occasioned the expected demand for general labour.

Municipal undertakings were not brisk, men having been laid off in almost all branches owing to retrenchment measures adopted by the city council. There was, however, a gradual increase of activity in building many new residences are going up, and the trades affected are thriving. Two sash and door factories are working full time employing some fifty men. Constructural work continues on the provincial government dock, and on the large building of the Canadian Coal Storage Company where pipe and machine fitting is being carried on, with other work. Trade shows a tendency to become firm for the summer. Wholesale houses have large shipments to make to the interior, and are growing busier with local trade. Steamships arrive from and depart for Vancouver more frequently and their incoming passenger lists are full. No changes in rates of wages or hours of labour have so far taken place and labour is reasonably well settled. Prospects for the comers are good, but careful enquiry is advisable before skilled labour should vacate permanent employment elsewhere in favour of Prince Rupert prospects.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907. — PROCEEDINGS DURING MAY, 1912.

THE Department of Labour received on May 8 an application for the establishment of a Board for the adjustment of differences between the Canadian Northern Coal and Ore Dock Company, of Port Arthur, Ont., and the coal handlers in its employ at that place. The number of employees affected at the time of the application was 90. The number employed by this Company during the summer is, however, about 200. It was stated that the dispute grew out of the employees' request for recognition of the Coal Handlers' Union and their further demand for a yearly conference with the representatives of the Company to discuss terms and rates of wages to govern their employment. A Board was established on May 14, Messrs. Geo. F. Horrigan and Frederick Urry, both of Port Arthur, being appointed members thereof on the recommendation of the Company and of the employees concerned, and His Honour Judge McKay, of Port Arthur, being appointed by the Minister as Chairman, in the absence of any recommendation from the Com-

pany's and employees' nominees.

The Department received on March 9 an application for the establishment of a Board for the adjustment of differences between the Ottawa Electric Railway Company and its employees, comprising conductors, motormen, shopmen, shedmen and linemen to the number of 425, said to be members of the Amalgamated Association of Street and Electric Railway Employes of America. It was understood that the dispute related to wages, and hours, and conditions of employment. A Board was established on May 10, Messrs. Travers Lewis, K.C., and P. M. Draper, both of Ottawa, being appointed members thereof on the recommendation of the company and employees concerned. In the absence of any joint recommendation from the foregoing, the Honourable Mr. Justice J. M. McDougall, of Aylmer, Que., was appointed by the Minister as Chairman. The Board entered upon its disputes at once, but at the end of May had not as yet concluded its labours.

SETTLEMENT OF DISPUTE BETWEEN CANADIAN NORTHERN RAILWAY COMPANY AND TRAIN SERVICE ORGANIZATIONS.

REFERENCE was made in the May number of the *Labour Gazette* to the establishment of a Board of Conciliation and Investigation to adjust certain differences between the Canadian Northern Railway Company and its train service employees. This dispute grew out of the alleged action of the Canadian Northern Railway Company in leasing running rights over its tracks between Winnipeg and Emerson to the Midland Railway of Canada, and the anticipation that certain Canadian train employees would thereby be replaced by American crews of the Great Northern and Northern Pacific Railway

Companies, with which the Midland Company is closely associated. The number of train service employees concerned in the dispute was given in the application as 2000. Messrs. R. Max Dennistoun, K.C., and Thos. J. Murray, of Winnipeg, were appointed members of the Board on behalf of the Company and employees respectively, the latter being later replaced by Mr. L. L. Peltier, of Fort William. Whilst proceedings for this reference under the Industrial Disputes Investigation Act were under way, an order was issued by the Board of Railway Commissioners, notifying the Canadian Northern and Mid-

land Railway Companies that the running rights agreement above mentioned had not been submitted to the Board for approval under Section 364 of the Railway Act, that the same was accordingly in contravention of the Railway Act and that an order would issue imposing a penalty if the conditions of operation which existed prior to the agreement were not immediately restored, pending submission of the agreement to the Board for approval. At the same time negotiations were in progress between the railway companies and the employees affected for a settlement of the dispute in so far as the complaint of the train service employees of the Canadian Northern were concerned.

On May 16 the Department of Labour received a telegram in the following terms, announcing the conclusion of a satisfactory settlement of the dispute, from Mr. W. B. Best, of Winnipeg, representing the employees:

"Winnipeg, Man., May 16, 1912.

"F. A. Acland,
Deputy Minister of Labour,
Ottawa, Ont.

"Satisfactory settlement has been arranged between Canadian Northern Railway Company and train service employees.

W. B. Best."

This information was confirmed two days later by the following message from the members of the Board of Conciliation and Investigation:

"Winnipeg, Man., 18th May, 1912.

"Deputy Minister of Labour,
Ottawa.

"We are informed by the parties to the dispute between the Canadian Northern Railway Company and train service men that they have arrived at a settlement, particulars of

which have not been furnished to us. We are satisfied there is no present need of organize a Conciliation Board.

L. L. Peltier.

R. Max Dennistoun."

A communication in the following terms was also received by the Minister of Labour from the employees' representatives on May 20:

"Federated Board, Canadian Northern Railway.

"Winnipeg, May 16th, 1912.

"Hon. T. W. Crothers,
Minister of Labour,
Ottawa, Ont.

"Hon. Sir:--

"At a meeting of the Federated Board, the following resolution was unanimously adopted:

"Resolved, the Federated Board representing the four Train Service Organizations on the Canadian Northern Railway, desires to express its appreciation of the efforts made on our behalf by the Hon. R. P. Roblin, Premier of Manitoba, and also by the Federal Government officials at Ottawa, resulting in a satisfactory adjustment having been arrived at in connection with the controversy which arose over the displacement of Canadian Northern crews by the crews of the Northern Pacific and Great Northern Railway.

"And be it further resolved, that a copy of this resolution be sent to Hon. R. P. Roblin, Hon. Robert Rogers, Hon. T. W. Crothers, the press, and all lodges on Canadian Northern system.

(Sgd.) W. B. BEST,
Chairman.

(Sgd.) W. F. METCALF."
Secretary.

**LABOUR ORGANIZATION IN CANADA—SPECIAL REPORT BY
DEPARTMENT OF LABOUR.**

THE Department of Labour at Ottawa has issued a special report on this subject, the general nature of which is set forth in the opening sentences of the introductory chapter. 'The aim of the present report,' it is here explained, 'is to present in concise and convenient form a statement showing the details of labour organization in Canada. The subject is one that has not perhaps in the past received the attention it has merited. The extent and variety of interests concerned, and the elaborate system of organization which has been evolved, are little realized by the public in general, and are not closely appreciated, in all probability, by many of those who are themselves sometimes participating in the work here indicated formally in facts and figures. The information presented will be of particular value to employers and employees of all classes, and will also be of deep interest in other circles. Labour organization is today attracting a closer attention than perhaps at any previous time, whether in Canada or elsewhere. Associated with the question of labour organization, growing sometimes, in fact, out of some aspects of those industrial problems which are becoming more and more the subject of research on the part of publicists, journalists and all students of affairs. The one matter bears closely on the other, and the facts which have been here assembled will, it is believed, of material value from this point of view. It is not intended that this record should be considered as in any way either an advocacy or a condemnation of trades unionism. An effort is made simply to state freely and clearly the facts gathered, and thus to show as precisely as the limits of an official publication will permit the general situation in Canada today.'

The report is of necessity largely statistical, but includes a general statement as to methods of organization. As

the report shows, the relations as to labour organization between the United States and Canada are closely interwoven, and the statistics printed include sufficient information bearing on this international aspect of the subject to permit a comprehensive view of the whole.

Extent of Organization.

Briefly, it may be stated, that there are 1741 local unions in Canada, of which 1531 are international in character and the remainder are associated with central bodies having no affiliation outside the Dominion. Ontario bulks largely in trade unionism, claiming 700 local unions out of 1,741 in Canada. British Columbia comes second with 234 local unions, and Quebec is third with 205. The other provinces divide the honours as follows: Alberta 153, Nova Scotia 138, Manitoba 118, Saskatchewan 84, New Brunswick 73, Prince Edward Island 7. These figures as to provinces include all local unions whether international or otherwise; in Prince Edward Island there are respectively three international and four national bodies. The special strength of unionism is necessarily in the larger cities in Canada comprise between them about one-fifth of the local unions, proportioned as follows: Toronto 105, Montreal 95, Winnipeg 79, Vancouver 76. Other cities rank in number as follows: Hamilton 48, Ottawa 47, Quebec 42, Victoria 42, Calgary 40, London 35, Edmonton 33, St. Thomas 28, Fort William 28, Lethbridge 28, Port Arthur 27, Halifax 22, Moose Jaw 21, Saskatoon 21, St. John 20. It is interesting to note in these figures the prominence taken by western cities and how far in some cases they have, relatively speaking, outstripped the older eastern cities in labour organization.

Membership.

The total estimated membership in

Canada of trade unions is 133,132, the Canadian international roll reaching 119,415, the remainder belonging to purely Canadian unions. Of the latter class the membership is no doubt actually larger than these figures indicate, but precise reports have not been received. The international bodies represented in Canada show a total membership, mostly in Canada and the United States, of 2,340,865 members comprised in 27,418 unions; there are besides, it will be remembered, a considerable minority of trades organizations in the United States without branches in Canada, the membership of which in the United States will increase the total considerably. The total union membership in the United States is placed at 2,625,000 for 1910, a somewhat greater strength relatively than in Canada, having regard to the respective populations.

Labour Organization Abroad.

The report includes an interesting statement of the totals of trade union membership as to various leading countries of Europe, and including

Canada and the United States, respectively, the figures being as follows:

	Total Membership.	Percentage membership to total population.
Austria.....	400,505	1.
Belgium.....	138,928	1.
Denmark.....	131,563	4.
France.....	977,350	2.
German Empire.....	2,688,144	4.
Hungary.....	85,266	
Italy.....	167,256	
Netherlands.....	143,850	2.
Sweden.....	148,649	
Switzerland.....	110,749	3.
United Kingdom.....	2,426,592	5.
United States.....	2,625,000	3.
Canada.....	133,132	2.

Canada, it will be noticed, is less highly unionized than many European countries. Germany has the largest union membership, exceeding even the figures of the United States, with its greater population, but Great Britain shows the highest percentage of union to population, Denmark being second, Germany third and the United States fourth.

The report serves also as a Trade Union Directory, including as it does the names and addresses of secretaries for 1912 of all Canadian trades organizations.

PRICES, WHOLESALE AND RETAIL, CANADA, MAY, 1912.

I. WHOLESALE PRICES.

THE rapid advance in wholesale prices which has been in progress since the beginning of the year continued during May, the Department's index number standing at 135.9 as compared with 135.4 in the preceding month and 126.1 in May of 1911. The numbers, it will be understood, are percentages in each case of the average price level prevailing during the decade 1890-1899, the period selected by the Department as the standard of comparison throughout its investigation into wholesale prices. Some 250 articles carefully selected to represent Canadian production and consumption are included in the calculation.

The chief increases during the past

month were in grains and fodders, and in meats, fruits and vegetables there being considerable decreases in dairy products and fish. The chief features in the rise during the past year occurred in grains and fodders, and in meats and meats, dairy products, fish and fruits and vegetables, miscellaneous groceries and provisions, hides and leathers, metals, and fuel, there having been considerable decreases only in textiles.

The following table of the Department's index numbers arranged by groups of commodities into which the investigation has been divided shows the average price level for May, 1912, compared with that of the preceding month and with that of the corresponding month last year:—

TABLE SHOWING INDEX NUMBERS BY GROUPS OF COMMODITIES FOR MAY, 1912.
APRIL, 1912 AND MAY, 1911.
(Average prices 1890-1899=100).

		Number of Commodities	Index Numbers		
			May, 1912.	April 1912.	May, 1911.

Sundries.....		6	108.5	109.4	104.8
All.....		16	181.9	184.9	171.0
Commodities		254	135.9	135.4	126.1

More detailed information as to the price movement during May as compared with the preceding is as follows:—

Grains and fodders.—Manitoba wheat was upward on account of bullish United States crop reports, but the receipt of heavy Argentine shipments in England toward the end of the month had a weakening tendency. Western barley receded under light demand, oats were weaker due to heavy sales in the United States and to the good pasturage. Flax was somewhat weaker as linseed oil mills were reported to be feeling competition from English grinders, but tightness at Duluth at the end of the month strengthened the market. Ontario grains were all fairly steady except winter wheat which is reported to be quite scarce and some is being used for feed. Barley was weak, while corn and oats averaged a little higher than in April, but weakened with the opening of lake navigation. Baled hay rose from \$15.50-16.00 to \$17.50-18.50 at Montreal and from \$16.00-16.50 to \$20.00 at Toronto. Buyers from United States have been competing with dealers for supplies. The English market is also reported better since the recovery from the coal strike. Bran and shorts advanced \$1.00 per ton but dropped toward the close of the month on account of the good pasturage. Baled straw at Toronto rose from \$8.00-9.00 to \$11.50-12.50 per ton.

Animals and meats.—The rapid advance of these commodities to unprecedented levels continued. Western cattle advanced under good demand and choice butchers rose steadily at Toronto in spite of fairly heavy receipts at times. In the United States some are predicting 10c cattle during the coming summer. Buyers from United States have been active in Canadian markets. An unusual feature of the market is that all low grades have advanced as steeply as the choice grades. Dressed beef maintained the steep advance at the end of April and was up again at the end of the month. Veal was unchanged. Hogs rose from \$8.15-8.25, a record price, at Toronto to \$8.50-8.65.

The severe winter is reported to have been very unfavorable for young pig and high prices for hogs are expected to prevail. Dressed hogs, bacon, ham, pork and lard advanced to record prices. Sheep rose from \$5.50-7.35 the first of May to \$5.50-8.00 in the middle of the month but dropped to \$5.50-7.00 later. Dressed mutton advanced from \$8.00-10.00 to \$10.00-14.00. Fowls and turkeys were steady.

Dairy produce.—Butter continued to decline at Toronto but at Montreal advanced toward the end of the month. Cheese was moving upward slightly after the spring decline. Summer prices for milk came into effect at Montreal and Toronto on the first of May, but at higher prices than last year. Eggs were steady at Toronto but at Montreal were upward at the end of the month.

Fish.—The feature in this group was a general tendency downward. The catch in Norway has been very heavy and they are unloading their old stock at low prices in Portugal, the West Indies and in United States. Stocks in Scotland are also heavy on account of the slack demand during the coal strike. Canadian dealers are losing heavily on their high priced stocks, some buyers having cancelled their orders. Dry cod, haddock and salted herring have dropped ½c. Fresh halibut fell from 12c to 10c. Frozen white fish were steady but fresh caught lake trout and whitefish came on the market unusually late in the season on account of the heavy ice. Fresh lobsters dropped from 15c to 12c as compared with 9c in May last year. Canned lobster and Sockeye salmon were steady.

Fruit and vegetables.—The feature of the market has been the continued advance in potatoes as well as in turnips and beans. On the other hand canned vegetables declined, the high price having curtailed demand seriously. Peas fell from \$1.30 to \$1.25-1.30 and corn and tomatoes were 10c per dozen lower, but still much higher than at the same time last year. Winter apples, bananas, lemons, currants, and evaporated apples, were steady, while orange

and prunes were lower, but Sultana raisins rose from 11-12c to 12-14c.

Miscellaneous groceries and provisions.—A general advance in flour was the feature in this group, winter wheat flour being up 15c per barrel and Manitoba flour being 10c per barrel higher. Winter wheat is still very scarce in Ontario and the lower price for millfeed removed the profits in that line which made it possible to keep down the price of flour while wheat was steadily mounting. Export demand disappeared under high-priced conditions here but the home demand has been good especially in the West. Oatmeal advanced 5c per bag. In Ottawa it was proposed to raise the price of the 1½ lb. loaf 1c and the price of the 3 lb. loaf 2c. However, the price of both sizes was raised only 1c. The Attorney-General's department, Toronto, is reported to be investigating an alleged combine of bakers in Ottawa. Sugar has been steady but reports have been bearish. Syrup and molasses were lower but the crop is reported to be not very large. The maple crop was small on the whole, the season having been very short in most districts and some of the product was partially spoiled in flavor by sudden budding. Glucose advanced again in sympathy with the high price of corn.

Textiles.—Wool and woollens were steady. Cottons were steady. Cottons were higher. Raw cotton was upward and reports of planting in the Mississippi valley were very unfavourable for 1912 crop on account of the floods. Grey cottons, prints and coloured cottons were advanced. Jutes and Hessians were lower. Silk was firmer under a fairly active demand and the crop in Japan is expected to be short. Flax products and oilcloths were steady.

Hides, leathers, boots and shoes.—A general advance in box calf, gun metal and velour calf boots of all kinds went into effect in May. Hides and leather prices have been steadily rising, stocks of leathers and of manufactured goods have been low. Great difficulty has been experienced in getting supplies

and having orders delivered in full or on time all the way through from tanners to retailers. Demand has been heavy and steady, especially from Western Canada. Other lines are firm and upward. Hides were firm, tallow advanced, sole leather was higher while harness leather was slightly lower.

Metals and implements.—Iron and steel markets were steady and firm, United States plants were in full operation and stocks in England were low as a result of the coal strike. Pig iron was very scarce in Montreal and supplies from England and Scotland arriving on the opening of navigation were sold before arrival. Prices were \$2.00 higher than in 1907. Demand is good owing to extensive building and railroad construction. United States consumption of steel is greater than ever before. Copper reached the highest level yet attained and some low grade mines were reopened. Brass rose 50c and all brass goods were put up 10%. Lead advanced from \$4.60 to \$5.05 at Toronto and the arrival of some English lead at Montreal averted a famine. Lead sheets advanced 30-35c. Spelter was very scarce but a shipment from Belgium relieved the situation and the price fell. Aluminium advanced slightly, quicksilver was lower, silver was upward, solder bar rose from 26½ to 27c. Tin rose from \$46.00 to a record price of \$50.00. Consumption is steadily increasing and production is stationary.

Fuel and lighting.—Nova Scotia bituminous coal at Montreal dropped to the summer price on the opening of navigation, but anthracite coal was higher owing to the suspension of mining in Pennsylvania. Connellsville furnace coke advanced still further and an embargo was placed on shipments to Canada. Consumers in United States are buying on a hand to mouth basis on account of the high quotations.

Building materials.—Lumber prices were steady. Quotations for southern pine were raised so that the keen competition was lessened. Lath was scarce and strong. The hemlock cut was ex-

pected to be less, spruce was in great demand, birch was strong, while a large amount of carbuilding created a good demand for all hardwoods and soft elm advanced \$2.00 at Toronto. Sash cord and hempen rope were raised 10%. Linseed oil was $\frac{1}{2}c$ higher, as flax was so scarce that some mills had to close down for a time. Relief came with the opening of lake navigation. Prepared paints and putty were very strong under great demand and advances are predicted when raw materials are so high. Turpentine was 1c higher, owing to strength in Savannah. White lead was 15c higher and still firm, owing to the scarcity of lead and oil. Glass has been firm for some months; the advance was caused by underproduction during the British coal strike.

House furnishings, drugs and chemicals were steady.

Miscellaneous.—Furs were firm to upward. Canadian hops were 5c lower, British Columbia hops were 2c lower at the coast, but Bohemian hops were higher. Pulp, ground wood mechanical, was \$2.00 higher, sulphite was lower, but firm, raw rubber was lower the market being quiet under little demand.

Course of Prices in Canada, Great Britain, and the United States.

The following table which includes the latest findings available of the most authoritative index numbers of prices

in Great Britain and the United States will enable a review to be made as to recent movements and tendencies in prices in these countries as compared with Canada:—

It will be seen that while Canadian and United States prices are still upward, English prices were downward during April on account of the fall in prices of coal to the level of March, while the index number for the end of April is higher than in March. "The cause" says the *Economist* (May 4, 1912) is the high price of metals and textiles used in our staple trades and the firmness of some foodstuffs." During the last month there was an increase in prices of cereals and meats, but other food and textiles were lower. Bradstreet's index number as of May 1 is \$9.2746 a figure exceeding any previous one in the history of the numbers since they were first compiled in 1892. "This marks a gain of 1.9 per cent. over April 1, of 9.7 per cent. over May 1, a year ago, and nearly half of one per cent. above the previous record made on Jan. 1, 1910. While higher prices of food products have had an important effect in bringing about this latest and most notable advance it is worth noting that eleven out of thirteen classes of commodities are higher than a month ago, and that nine out of thirteen groups are higher than the high levels of January 1, 1910. For the higher prices of food products, deficient yields last year, the very severe winter, and the cold, wet, backward spring are chiefly responsible."

II. RETAIL PRICES.

THE feature of the month was a general decline in prices of butter, due to the advance of the season and good pasture. Scarcity of feed is still, however, a great factor in market conditions, hay, bran, shorts and feed grain being at high prices and very scarce in some localities. All meat prices are still upward, especially hog products, animals being scarce on account of heavy marketing in the latter half of

	Canada	Great Britain		United States	
	Department of Labour	Economist	Sauerbeck	Bradstreet	Gibson
1911	127.3	2,549	79.7	8.7,132	109.2
1912					
Jan.	131.4	2,613	81.8	8.9,493	112.4
Feb.	134.3	2,667	82.9	8.9,578	112.2
Mar.	134.2	2,791	84.4	8.9,019	115.7
April	135.4	2,693	85.0	9.1,010	120.5
May	135.9	2,687		9.2,746	122.7

1911, when scarcity of feed developed. Eggs on the whole were still declining, but the tendency was upward in some cities, particularly in Western Canada. Summer prices for milk came into effect in several cities. Potatoes continued to mount throughout the country. Sugar declined in several cities, wholesale markets having been weak for some time. Rentals were reported higher in nine cities of Canada.

Notes on Retail Prices.

Beef. — Both sirloin steak and chuck roast advanced in price at Sydney, N.S., St. Hyacinthe, Que., at Ottawa, St. Catharines, Stratford, London, St. Thomas, Chatham, and Cobalt, Ont. Sirloin steak alone was higher at Halifax, N.S., Fredericton, N.B., Sorel, and Hull, Que.; Woodstock and Owen Sound, Ont.; and at Edmonton, Alta. Chuck roast alone was higher at Kingston and Guelph, Ont., and Winnipeg, Man., but declined at Montreal, Que. Scarcity and high prices for cattle resulted in higher prices for meat, especially sirloin steak.

In the early part of May a rise in the price of sirloin steak at Sydney, N. S., resulted in an enquiry by the City Council as to the cause. The only reason that could be ascertained was an advance in wholesale prices. It was reported that meat was being shipped to Italy. This called attention to the fact that the Nova Scotia Steel and Coal Company was selling meat at as near cost as possible in the meat department of its general store for employees, the price of sirloin steak being 16c as compared with 25c in the butcher shops.

Veal. — The price of veal increased at Sydney, N.S.; Ottawa, Orillia, St. Catharines, Guelph, Stratford, London, St. Thomas, and Cobalt, Ont.; at Moose Jaw, Sask., and Lethbridge, Alta. The price fell at Quebec, Three Rivers, and Montreal, Que.

Mutton was higher at St. Hyacinthe, Que. and at Ottawa, and St. Catharines, Ont., but was lower at Montreal.

Pork, fresh. — Increases in price oc-

curred at Sydney, N.S.; Three Rivers, St. Hyacinthe, and Montreal, Que.; Belleville, St. Catharines, Hamilton, Guelph, Woodstock, London, St. Thomas, Chatham and Owen Sound, Ont.; Edmonton and Lethbridge, Alta.

Pork, salt. — The price advanced at Sydney, N.S.; Three Rivers, and St. Hyacinthe, Que.; Ottawa, Belleville, St. Catharines, Woodstock, London and Cobalt, Ont.

Bacon was higher at St. John, and Fredericton, N.B., St. Hyacinthe, Que., Ottawa, Brockville, Belleville, St. Catharines, London, St. Thomas, Cobalt, Port Arthur and Fort William, Ont.; Edmonton and Lethbridge, Alta.

Fish. — Advances occurred at Ottawa and London, Ont.; Saskatoon, Sask., and Edmonton, Alta., and prices declined at Halifax, N.S., Montreal, Que., and New Westminster, B.C.

Lard. — The price increased at Fredericton, N.B., Sherbrooke, Sorel, St. Hyacinthe, St. John's, and Hull, Que.; Ottawa, Belleville, Orillia, Toronto, St. Catharines, London, and Cobalt, Ont.

Eggs. — Fresh eggs declined in twenty-four of the cities, and packed eggs in six. Fresh eggs advanced at Winnipeg, Man., Saskatoon, Sask., Edmonton, Alta., New Westminster, and Victoria, B.C. The advance of the season is the chief cause for the changes in supply and demand.

Milk. — Summer prices for milk came into force in Sorel, St. Hyacinthe, and Montreal, Que., and Ottawa, Toronto, and Niagara Falls, Ont.

Butter. — Both dairy and creamery butter were lower in thirty-one of the cities, and creamery alone was lower in six cities. Both dairy and creamery butter advanced at Amherst, N.S., and creamery alone increased in price at Cobalt, Ont., and Victoria, B.C.

Cheese. — Both old and new cheese declined at Sydney, N.S., Hull, Que., Ottawa, Toronto, and St. Thomas, Ont. The price advanced at London, Ont., Winnipeg, Man., and Edmonton, Alta. New cheese was lower at Belleville and Hamilton, Ont. More cheese factories

RETAIL PRICES OF STAPLE ARTICLES

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the into the cost of living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a quarter of each locality usually occupied by workmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and in order that the statistics may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* quoted, etc., from the Department.

10. Jack pine.

11. In British Columbia a bag of potatoes is usually 100 lbs.

12. Delivery 75c-\$1.50 extra.

are commencing operations and the supply of milk increases as the season advances.

Bread. — The price was advanced to 6c per 24 oz. loaf at Paris, Ont., and to 5½-6c at Ottawa.

Flour was higher at Moose Jaw and Saskatoon, Sask.

Rolled oats advanced in price at St. John, N.B., St. Catharines, Ont., and Saskatoon, Sask., declining at Sherbrooke, Que.

Rice was higher at Saskatoon, Sask.

Beans increased in price at Sydney, N.S., Berlin, Ont., Saskatoon, Sask., and Edmonton, Alta. The wholesale price of beans has risen considerably on account of scarcity.

Apples, evaporated. — The price advanced at Hull, Que., Toronto, Ont., Saskatoon, Sask., and Victoria, B.C. Apples are reported rather scarce and stocks of evaporated are not large.

Prunes advanced at Hull, Que., Berlin, London, and St. Thomas, Ont., and at Lethbridge, Alta.

Sugar. — Both granulated and yellow sugar declined at Fredericton, N.B., Hull, Que., St. Catharines, St. Thomas, and Cobalt, Ont.; Winnipeg, Man., and Edmonton, Alta. Increases occurred at Sherbrooke, Que., Berlin, and London, Ont., while at Ottawa, Ont., granulated sugar declined. Wholesale prices of

sugar have been weak the past few weeks in sympathy with New York quotations as a result of a good crop in Cuba.

Tea and coffee were steady.

Potatoes. — The price of potatoes advanced in twenty-four of the cities and declined at Montreal, and Hull, Que., and at Moose Jaw, Sask.

Vinegar and starch were steady.

Coal. — Anthracite coal was lower at Halifax and Montreal on the settlement of the labour disputes in Pennsylvania. All coal was higher at St. Hyacinthe, Que., in anticipation of a strike.

Wood was higher at Montreal, on account of scarcity and car shortage and at Saskatoon, the demand being greater with the approach of warmer weather. Hemlock was higher at Orillia. At Winnipeg, Man., and Port Arthur, Ont., wood was cheaper.

Coal oil was steady.

Rentals. — Higher levels for rent were reported from Moncton, N.B., Sherbrooke, Que., Orillia, Berlin, Chatham, Port Arthur and Fort William, Ont., and at Saskatoon and Edmonton. Scarcity of houses prevails in all these places. At Moose Jaw a great many houses have been built for lower rentals.

DOMINION LEGISLATION AFFECTING LABOUR, 1912.

THE first session of the twelfth Parliament which assembled on November 15, 1911, was closed on April 4, 1912, by His Royal Highness the Governor-General of Canada. Fifty-seven public bills received the royal assent at prorogation.

In the Speech from the Throne at prorogation reference was made to the satisfactory state of the revenues for the year, a large increase being recorded with a good prospect of this increase being maintained. With regard to in-

dustrial and trade conditions in Canada the address contained the following statement:

The advantages that would result from a wider exchange of products between the various countries of the Empire are undoubted, in view of the wonderful variety and extent of those productions, and negotiations have been opened for improved trade arrangements with the British West Indies and British Guiana, which should prove advantageous to those colonies as well as to this Dominion.

The following reference to the intention of the Government to enact legislation for the improvement of agricultural

conditions was made by His Royal Highness the Governor-General:

It is essential to recognize that, in a country possessing so great an area of fertile land as that with which this Dominion is happily endowed, the great basic industry is agriculture. My advisers are convinced that the time has come when greater aid and encouragement should be given to those who are engaged in the cultivation of the land. To this end, a measure will be introduced under which it is hoped that there may be co-operation between the Dominion and the various provinces, for the purposes of assisting and encouraging our farmers to secure the best results in production, and at the same time preserve the fertility of the soil.

The session which terminated in April was not productive to a marked extent of legislation affecting labour. The Act concerning agricultural advancement to which reference was made in the Speech from the Throne was assented to on April 1, and provided for the granting to any province of a subsidy which should be voted by Parliament for that purpose, and that the Minister of Agriculture should, with the authority of the Governor in Council, make an arrangement with the Government of any province, prescribing the conditions under which such grant should be made and the purpose for which it should be expended.

Payment was authorized to the Colliwood Shipbuilding Company of a subsidy for twenty years, the amount being equal to three per cent. of the cost of the construction of a dry dock by the Company in the harbour of Colliwood.

Railway Legislation.

An Act was passed authorizing the granting of a subsidy to the Canadian Northern Pacific Railway Company to aid in the construction of a railway from Yellowhead Pass to Vancouver and the mouth of the Fraser River. Conditions of the granting of the subsidy provided that the Company should lay the railway with rails and fastenings made in Canada, and should purchase all materials and supplies for use in construction of the railway from Canadian producers, if such equipment were procurable in Canada of suitable quality and upon terms as favourable as elsewhere,

judgment in respect of this to rest with the Minister of Railways and Canals.

Subsidies were authorized in aid of the construction of several railways by the passing of the Railway Subsidies Act. An Act was also passed to aid the construction of certain bridges on the railway of the St. John and Quebec Railway Company, and to confirm an agreement between the Company and Governments of Canada and New Brunswick.

The time for completion of the Western Division of the National Transcontinental Railway was extended. An amendment to the National Transcontinental Railway Act was made providing that the construction of the Eastern division and the operation thereof should be under the charge and control of one Commissioner; provision was also made by the amendment for payment of claims and accounts for work done in the construction of the Eastern Division.

The following Transportation Companies were incorporated by special Acts:

The Montreal and Lake Victoria Railway Company.

The Northern Territorial Railway Company.

The Ottawa and Lake McGregor Railway Company.

The Pacific Trans-Canada and Hudson Bay Railway Company.

The Prince Edward and Hastings Railway Company.

The Quinze River and Ottawa Railway Company.

The Western Dominion Railway Company.

An Act was passed ratifying and confirming certain agreements between the Temiskaming and Northern Ontario Railway Commission and the Grand Trunk Railway Company, by which the latter were granted running rights over the Temiskaming and Northern Ontario Railway, in consideration of which the Grand Trunk Railway Company agreed to assume a fair share of the cost of the maintenance of the road and to pay the sum of \$300,000 per annum as rental, such sum representing half the interest of the total cost of the line.

Fishing.

An Act was passed creating a Biological Board of Canada to be composed of three members who would have charge

of all biological stations in Canada and would have the conduct and control of investigations of practical and economic problems connected with marine and fresh water fisheries.

The Fisheries Act was amended by a section providing for the authorization by the Government of any province to grant leases in such waters of the province as the government of the province considers suitable for the production of oysters, and that any persons to whom such leases were granted, should, subject to the fishery regulations of Canada have the exclusive right to the oysters produced on the beds within the limits of their respective areas.

Legislation Introduced.

Three important bills from the point of view of labour were introduced in the House on January 29. An amendment to the Lord's Day Act in respect to the prosecution of musicians for playing on Sunday at funerals and public parades was read the first time, the same bill also providing for a day's holiday to waiters and waitresses working in restaurants and hotels.

An amendment to the Railway Act

also passed first reading, providing an addition to the powers of the Railway Commission by giving it jurisdiction over the length of sections and the number of men required to work on a section. The Railway Commission, supposing it had such power, had dealt with matters of that kind, but on appeal it was found that the Act did not give it such jurisdiction.

With reference to the Industrial Disputes Investigation Act, an amendment to which was introduced as a private measure, the mover of the amendment said:

"This Act at present prohibits a strike or lockout pending negotiations where there is a labour dispute. There is an additional subsection preventing anyone from aiding or assisting an employer or employee during that period. The courts have construed that section to prohibit any aid or assistance being given to the men by any labour union during that time. They have held that where the strike condition exists, but the strike has not been declared and the conciliation board had not reported, it is unlawful for anybody to give assistance to the striker or a man prepared to strike. That would prevent the ordinary benefits payable by labour unions from being distributed to the men during that time. I do not believe that the Act was ever intended to bear that meaning. Such an interpretation would prevent anyone from giving charity to a striking employee. The amendment makes it permissible for the funds of a benefit society or a trade union to be paid to its members during that period without incurring liability and laying itself open to the penalties of a criminal offence."

SPECIAL REPORT ON IMMIGRATION.

Special Report dealing mainly with Co-operation between the Dominion and Provincial Governments and the movement of people from the United Kingdom to Canada, by Arthur Hawkes, Commissioner. Ottawa: King's Printer.

IN view of the fact that the growth of Canada depends largely on the expansion of immigration, and bearing in mind the record of the country in its assimilation of non-native people, it is evident that immigration to Canada is the crucial economic factor in the progress of the Dominion. The need of continuous immigration as a fundamental constructive necessity of government, a survey of conditions existing for the promotion of the movement of immigration and suggestions

for the betterment of such conditions are set forth in the report on Immigration by the special Commissioner appointed by the Hon. the Minister of the Interior to investigate matters in this connection in the latter part of 1911.

A special difference between immigration from the United Kingdom and the United States is that the former scatters all over Canada and is largely composed of wage-earners; the latter is chiefly confined to the prairie provinces and is predominantly composed of farmers accustomed to prairie life. Eastern manufactures depend largely upon operatives from Britain;

and agriculture, in Ontario for example, had and has great need of British labour. While it can be seen that the experience and ready adaptability of the American immigration to the West is invaluable, it is not, nor is it likely to become common to the whole of Canada; the desirability of immigration, however, to the Eastern provinces is just as obvious as, and is more complex than, immigration to the comparatively empty Western provinces.

A survey of conditions in the nine provinces of the Dominion shows all of them to have instituted movements for the attraction of immigration to their lands, but makes it clear that not only should the expansion of each province engage the attention of those interested in the movement but that the method of settling the people should be worked out by a directing force for the whole Dominion.

Immigration must be secured and directed for the immediate production of commodities from Canadian natural resources, as distinct from and more necessary than its employment for the expenditure of capital brought in from outside. The towns are more largely supported than the country upon capital expenditures; for the continuance of their success they must look to increasing the number of original producers. Immigration is a national advertisement and makes it possible to pay interest upon private and public investments in the Dominion. The cost of immigration movements is very little compared with the amount of money brought in by the immigrants, in comparison also with the amount of money the investment of which can be attributed to their coming. Plans for placing and employing new population in each province should be made and carried out on provincial bases in sympathetic conjunction with the Dominion. Immigration and railway building are interdependent upon one another. Provincial subsidies are given to railway builders and it would be a policy not likely to suit modern conditions to assume the ultimate liability for a railway's success and to leave the actual

settlement of large localities to chance immigration. Inquiry made by public-spirited persons in all the provinces leads to the proposal that in each province there should be an immigration and land settlement organization whose executive head should be in co-operation with the Dominion. Such an organization would be responsible for collecting data to attract settlement, enlisting the help of public spirited bodies, working out plans for the settlement of special localities and receiving and distributing immigration of all kinds.

The report recommends that the element of chance in respect of immigration be eliminated by the appointment of a Board under the presidency of the Minister of the Interior, consisting of the chief officers of the Immigration Department of the Dominion, a nominee of the Minister of Finance, and a representative of each Province who would be the principal local executive immigration officer in the province but paid by the Dominion. The Board would decide the general lines of policy, subject to confirmation by the Minister or Order-in-Council, and its participation in each provincial work would be delegated to a Committee consisting of the Chairman, the Superintendent of Immigration, and the provincial member, which would act with such provincial body as might be constituted.

To further the progress of immigration to Canada very excellent methods have in the past been adopted in Great Britain. Special literature has been distributed, lectures have been delivered, advertising in the press and displays of Canadian products have helped to show prospective immigrants the desirability of settling in the newer country, sympathetic co-operation between the Immigration Department and the various transportation companies have facilitated movement from one country to the other. These methods of appeal were effective, in the opinion of the Commissioner, chiefly as incidental to the passing condition of the individual. If they can be based upon a permanent

need of the community, their drawing power will be increased and a large step forward in Canadian immigration, and in Canadian influence upon the Empire will have been secured. The report states that the Dominion has long been opposed to assisted emigration as a Canadian measure. In view of the fact that Australian States make a five weeks' trip to Australia cheaper than a five days' trip to Canada, that assisted emigration is provided for by Act of Parliament as a relief for unemployment in Britain, and that Canadian provinces are advancing money towards the transportation of farm labourers,

it is probable that successful co-operation between the Dominion and the provinces would be attained by the Dominion giving consideration to the methods which the provinces have found to be effectual.

The report of the Commissioner gives an adequate impression of the desirability of extensive and permanent migration to Canada of natives of the British Isles, demonstrates the necessity for foresight, breadth and independence in administration, and exhibiting immigration as a means of attaining the primacy of Canada among the Britannie nations.

TRADE DISPUTES DURING MAY, 1912.

THE number of trade disputes in existence during May shows an increase over that of April, but compares favourably with that of May, 1911. Few disputes occurred during the month affecting a great number of workers, the only ones involving more than two hundred employees being those of asbestos miners at Asbestos and carpenters at Saskatoon. As neither of these disputes lasted for more than a week it will be seen that the strike situation generally was much more favourable than during May, 1911, in which month seven disputes commenced which threw out of employment more than two hundred men, besides nineteen involving a smaller number of workmen. Numerous disputes commencing during May were the result of a failure to reach a new agreement as to rates of wages, and in many cases the stoppages of work were only of short duration. Towards the end of the month normal conditions were gradually resumed and the outlook for the future is comparatively good.

Trade Disputes during May.

Number and magnitude. — The number of trade disputes reported to have been in existence in Canada during May was twenty-nine, being ten more

than in April and five less than in May, 1911. About two hundred firms and four thousand employees were involved in these disputes of which about one thousand and eight hundred employees were affected by the disputes which commenced during the month.

Loss of time in working days. — The loss of time to employees through trade disputes during May was approximately 60,000 working days, compared with a loss of 150,000 working days during April and a loss of 299,400 during May, 1911.

Trades affected by new disputes. — The following table shows the trades affected by new disputes and the number of employees in each group of trades.

TRADES	No. of disputes	No. of employees
Mining.....	1	450
Building.....	9	998
Metal.....	3	155
Railway Service.....	2	64
Clothing.....	1	55
Food and Tobacco Preparation.....	2	83
Total.....	18	1,805

Localities affected by new disputes. — The new disputes of the month took place in the following provinces:—

Province.	No. of disputes.
New Brunswick.....	1
Quebec.....	3
Ontario.....	12
Saskatchewan.....	2
Total	18

Causes of disputes. — The following were the principal causes of the disputes of the month:—

CAUSE	No. of disputes
For increase in wages	13
For shorter hours.....	1
For recognition of Union and other changes..	1
Objection to increase given to newly hired man	1
Against reduction of shifts.....	1
Total.....	17

Methods of settlement. — Of the twenty-nine disputes in existence during May a definite termination was reported in the case of seventeen. No settlement was reported in the case of six, in most of the remainder the strikers' places were filled from time to time and conditions ceased to be affected.

Results of disputes—Eleven of the disputes which were definitely terminated resulted in the men's demands being wholly or partly acceded to. In three cases the men returned to work unconditionally.

Disputes Beginning Before May.

The trade disputes in existence during May which began in previous months comprised strikes of carpenters and machinists at Milltown, N.B., moulders at Moneton, N.B., Montreal and Hamilton, machinists and boiler-makers at Westfort, Ont., and Edson, Alta., maintenance-of-way employes between Merritton, Niagara Falls, Port Colbourne and Port Dalhousie, cloak and garment workers at Toronto, tailors at Toronto, teamsters at Windsor, Walkerville and Sandwich, wire drawers at Hamilton, railway construction

labourers between Hope and Kamloops, B.C., painters and paperhangers at St. Catharines.

Iron Moulders, Moncton, New Brunswick.

After being in existence for more than three months this strike was terminated on the 17th of May when work was resumed upon the wage schedule in operation from July to December, 1911. By this arrangement the employees received a twenty per cent. increase over former rates.

Iron Moulders. Montreal.

No change in conditions was reported to the Department in regard to a strike of iron moulders in the employ of the Record Foundry and Machine Company, at Montreal. Forty men were involved in this dispute, which commenced on February 5.

Moulders, Hamilton.

No definite termination, according to reports received in the Department, occurred in the case of strike of thirteen iron moulders in the employ of the Bowes Jamieson Company, of Hamilton. The majority of the strikers have secured employment in other foundries.

G.T.P. Machinists.

No definite termination of this dispute was reported to the Department during the month.

Maintenance-of-way Employees on the G.T.R.

In regard to a strike of trackmen on the Grand Trunk Railway lines between Merritton and Niagara Falls and also between Port Colbourne and Port Dalhousie which occurred on April 15 no definite settlement was reported to the Department. It was stated, however, that the strikers' places had been filled by other men.

TABLE OF TRADE DISPUTES DURING MAY 1912.

Occupation	Locality	Alleged Cause or Object	No. of Firms or Establishments affected		Approximate No. of Employees affected.				Date of commencement	Date of termination	Result
			Directly	Indirectly	Directly		Indirectly				
					Males	Females	Males	Females			
DISPUTES BEGINNING BEFORE MAY.											
<i>Building Trades—</i> Carpenters and Machinists..... Painters and Paper- hangers.....	Milktown, N.B.....	For increase in wages.....	1		15				April 6		No settlement reported at the end of the month
	St. Catharines.....	For increase in wages.....	8		31				April 1	April 22	Increase granted
<i>Metal Trades—</i> Moulders..... Moulders..... Moulders.....	Moncton, N.B.....	Against reduction of wages.....	1		30				Jan. 27	May 17	Work resumed upon wage schedule of July to Dec., 1911
	Montreal.....	Sympathetic.....	1		40				Feb. 8		No settlement reported at end of month.
	Hamilton.....	Against reduction of wages.....	1		13				Mar. 1		No settlement reported at end of month.
<i>Railway Service—</i> Machinists and Boilermakers.....	Westfort, Ont. and Edison, Alta.....	Failure to reach agreement.....	1		300				Oct. 10/11		Company claim strikers' places filled, men claim strike still on
Maintenance of Way Employees.....	Merrittton, Niaga Falls, Port Colborne and Port Dalhousie.....	For increase in wages.....	1		19				April 15	May	Strikers' places filled
<i>Clothing Trades—</i> Coat and Garment Workers.....	Toronto, Ont.....	Against changes in method of finishing garments.....	1		504	288			Feb. 14		Fifty-five strikers had returned to work at the end of the month
	Toronto, Ont.....	Failure to reach new agreement.....	21		200				Mar. 4		No settlement reported at the end of the month
Tailors.....											
<i>General Transport—</i> Teamsters.....	Windsor, Walkerville, and Sandwich.....	For increase in wages.....	5		30				April 22		No settlement reported at the end of the month
<i>Misc. Trades—</i> Wire drawers.....	Hamilton.....	Objection to employment of foreigners.....	1		40	600			April 24	April 29	Employees returned to work unconditionally

DISPUTES BEGINNING DURING MAY.

Industry	Location	Dispute re proposed rates of pay	For increase in wages	1	25	450	May	1 May	6
<i>Mining—</i> Asbestos Miners	Asbestos	Dispute re proposed rates of pay	For increase in wages	1	26	450	May	1 May	Men given increase and returned to work
<i>Building Trades—</i> Painters and Decorators	Quebec	For increase in wages		26		140	May	1	Ten firms had signed agreement at end of month and only 30 men were out
Plasterers	London	"	"	5		8	May	1 May	Men returned to work. Master plasterers inc. pay voluntarily
Bricklayers	Hamilton	"	"			150	May	1 May	Increase granted in agreement for three years
Carpenters	Saskatoon	"	"	30-40		325	May	1 May	Increase granted
Builders Labourers	Wesley, Preston and Galt	"	"	14		140	May	1 May	Seventy-five per cent. returned to work, having been granted half the increase demanded
Brickmakers	Hamilton	"	"	3		36	May	11 May	Increase granted
Bricklayers—Stone masons & Plaster's	Hespler, Preston and Galt	"	"	14		71	May	20	No termination reported at the end of the month
Plumbers	Kingston	For higher wage & short hrs. For recognition of union, 9h. day and inc. of min. wages		8		28	May	1 May	Part increase granted, hours reduced
Painters	Saskatoon			30		100	May	1 May	Recognition of union and 9 hour day granted; wages compromise 40 cents min. per hour until Sep. 1; afterwards 45 cents
<i>Metal Trades—</i> Coremakers	St. Catharines	Demand for discharge of girls in core room		1		26	May	9 May	Some men returned to work; the maj. either left the city or obtained work elsewhere
Moulders and Core-makers	Hamilton	For increase in wages		1	25	40	May	8 May	Increase granted to moulders; part inc. demanded to coremakers
Moulders	Peterborough	For shorter hours		4		59	May	13	Two of the firms granted men's demands
<i>Railway Service—</i> Railway Employes, Machinists and Helpers	Sackville, N.B.	For higher wages		1		25	May	1 May	On May 3 the majority of the men had returned to work
	Ottawa	"		1		39	May	21 May	Men returned to work pending settlement. Inc. of 10 per cent granted to skilled men, 7 to unskilled
<i>Food and Tobacco Preparation—</i> Bakers	Montreal	Against reduction of shifts		7		60	May	1	Employers state men's places were filled
Cigar Makers	Stratford	For increase of wages		1		12	May	6 May	Increase in wages granted
<i>Clothing Trades—</i> Garment Makers	Toronto	Objection to hiring of new man at higher wages than discharged employé		1	17	38	May	16	No settlement reported at end of month.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention, moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

**Cloak and Garment Workers,
Toronto.**

The Company at the end of the month stated fifty-five of the striking employees had returned to work at that time. Details are given in the accompanying table.

Tailors, Toronto.

No change in conditions was reported to the Department in the case of a strike of tailors which occurred at Toronto on March 4.

Wire Drawers, Hamilton.

A strike occurred on April 24 in the wire drawing department of the Steel Company of Canada, Limited, at Hamilton. In a communication received from the Company during May it was stated that the strike, the cause of which was the objection of the English speaking operators to the employment of foreigners, terminated on April 29, when the employees returned to work unconditionally, the firm maintaining the right to employ whomsoever they pleased.

**Painters and Paperhangers, St.
Catharines.**

A dispute was reported to the Department during the month as having occurred among painters and paperhangers at St. Catharines on April 1. The men were receiving thirty cents per hour and demanded an increase of five cents. A lockout occurred and work was not resumed until April 22, when the Master Painters' Association signed up an agreement for a minimum rate of thirty-five cents per hour for one year.

**Railway Construction Men, British
Columbia.**

No official information was received in the Department regarding a strike of railway labourers in British Columbia, as reported in the May issue of the *Labour Gazette*. Press reports, how-

ever, state that the dispute has come to an end.

Disputes Beginning During May.

The new disputes of the month comprised strikes of iron workers at Hamilton, carpenters and joiners at Saskatoon, miners at Asbestos, Que., plasterers at London, building trades at Hamilton, painters and decorators at Quebec, brickmakers at Hamilton, builders' labourers at Galt, Preston and Hespeler, coremakers at St. Catharines, moulders at Hamilton and Peterborough, Railway employees at Saskville, N.B., machinists and helpers at Ottawa, bakers at Montreal, cigarmakers at Stratford, garment workers at Toronto, painters at Saskatoon, and plumbers at Kingston.

Iron Workers, Hamilton.

Forty iron moulders and coremakers in the employ of the Kerr and Coombs Foundry Company, Limited, Hamilton, struck work on May 8, on the refusal of the Company to grant an increase in wages demanded by the men. The strike terminated on May 13 when the Company acceded to the demand of the employees and granted a minimum wage of \$3.00 per day for moulders and \$2.75 for coremakers.

Carpenters, Joiners, Saskatoon.

A strike involving three hundred and twenty-five men in the building trades occurred at Saskatoon on May 1. Carpenters and joiners demanded an increase of wages to the amount of five cents per hour and on the refusal of the contractors to grant the increase the men stopped work. The strike ended on May 4, the efforts of the Provincial Labour Bureau assisting in an agreement being reached by which the men were granted the increase they demanded.

Miners, Asbestos.

Following a disagreement as to proposed alteration in rates of pay four

hundred and fifty men in the employ of the Asbestos and Asbestic Company, Limited, struck work on May 1. A termination of the strike occurred on May 6, when the men returned to work, the quarrymen having been granted an increase of twenty-five, and the millhands ten cents per day.

Plasterers, London.

Eight plasterers at London stopped work on May 1 on account of the refusal of the master plasterers to grant an increase in wages from thirty-seven to forty-five cents an hour. The men returned to work on May 4 without any agreement having been signed; the master plasterers, however, increased their wages to forty cents an hour.

Building Trades Employees, Hamilton.

A strike of one hundred and fifty employees in the building trades at Hamilton occurred on May 1. On the expiration of their agreement the men demanded an increase in wages which the members of the master builders association refused. The increase demanded was at the rate of five cents per hour for the first year, two cents more for the second and an additional three cents for the third year. Several men were taken on by employers other than those of the association and at the end of the strike which took place on May 7 there were only about one hundred and twenty men out of work. The men got an increase of five cents per hour and signed an agreement for three years.

Teamsters, Hamilton.

Sixty teamsters in the employ of the City Corporation of Hamilton struck work on May 1 following a refusal to grant an increase in wages. The strike ended on May 3 when the teamsters accepted the offer made by the city which provided for an increase of rather more than half of that demanded by the men.

Painters and Decorators, Quebec.

Following a demand for an increase of five cents per hour and a nine hour day about one hundred and forty painters and decorators struck work at Quebec on the 1st of May. In a communication to the Department the secretary of the union stated that ten of the employing firms had signed an agreement at the end of the month and that one hundred and three men had returned to work under conditions demanded by the union.

Brickmakers, Hamilton.

A strike of thirty-six brickmakers occurred at Hamilton on May 11, the cause being given as the refusal of employing firms to grant an increase in wages demanded by the men. The strike was terminated on the 18th of May the men having been granted an increase of two cents per thousand bricks.

Builders' Labourers at Hespeler, Preston and Galt.

Following a demand for increased wages a strike of one hundred and forty labourers in the employ of building contractors at the above mentioned places occurred on the 1st of May. The strike terminated on the 18th of May when seventy-five per cent. of the men returned to work with wages increased by half the amount demanded. The rest obtained other employment.

Bricklayers, Stonemasons and Plasterers, Hespeler, Preston and Galt.

A strike occurred among workmen in the building trades at the above places on May 20. The men wanted a new agreement involving an increase in wages, which the employers refused. No termination of this dispute, which affected seventy-one men, had been reported to the Department at the end of the month.

Coremakers, St. Catharines.

A strike of coremakers in the iron foundry of the MacKinnon Dash Company at St. Catharines took place on May 9. Twenty-six coremakers presented a petition that unless the company discharged the girls in the core room they would stop work. The company stated that at the end of the month a few of the men had returned to work, but that the majority of them had either left the city or obtained other employment.

Moulders and Coremakers, Hamilton.

A strike of the employees of the Kerr and Coombes Foundry Company, occurred at Hamilton on May 8. The men demanded a minimum wage of \$3.00 for moulders and coremakers, and declined an offer of \$2.90 and \$2.65 respectively. The men returned to work on May 13, the company agreeing to give a minimum of \$3.00 per day for moulders and \$2.75 for coremakers. Forty men were involved in this dispute which affected several establishments indirectly.

Strike of Iron Moulders, Peterborough.

A strike affecting fifty-nine moulders directly and thirty indirectly took place at Peterborough on May 13. The dispute was caused by a demand for a nine-hour day at the same minimum wage as formerly. On the 21st of the month two of the four firms had agreed to the terms of the men.

Railway Employees, Sackville.

It was reported in the press that a strike of employees on the New Brunswick and Prince Edward Island Railway occurred on the 1st of May on account of the refusal of the company to grant higher wages. Twenty-five men were reported to have struck, the majority of whom returned to work in the course of a day or two.

Machinists and Helpers, Ottawa.

At the beginning of the month a demand was made by the men in the locomotive and car repairing shops of the Ottawa and New York Railway Company for a ten per cent. increase in pay. Negotiations commenced on May 7 and the demands were modified, the men asking for ten per cent. for skilled labour and seven and one-half per cent. for unskilled labour. On May 21 the men stopped work, but resumed on the 23rd pending a completion of negotiations. This took place on May 23 when the men were granted an increase of ten per cent. in the case of skilled workmen and seven per cent. in that of unskilled. Thirty-nine men were involved in this dispute.

Bakers at Montreal.

A strike of Jewish bakers occurred at Montreal on May 1, by which seven firms and sixty employees were affected. According to a statement of the manager of one of the bakeries the union demanded that higher wages be paid and that the price of bread should be raised to cover this increase. The higher wages were paid but the consumers would not pay the higher prices and accordingly bought bread from Gentile bakers to such an extent that trade was reduced so that it was necessary to run only one shift a day instead of two. The union demanded that two shifts be run as previously and struck work on the refusal of the employers to do this. The Department's informant also stated that the places of the men have been filled.

Cigar Makers, Stratford.

A strike of cigarmakers occurred at Stratford on May 6 following a demand for an increased bill of prices. Thirteen employees were directly, and ten indirectly affected by this dispute which terminated on May 7, the employer agreeing to raise the price by \$1.00 per thousand cigars.

Garment Workers, Toronto.

A strike of garment workers occurred in the employ of Messrs. Rosminsky and Stein at Toronto on May 16. The company stated that the cause of the dispute was that they hired a man to fill the place of an employee who had left giving him an increase in wages over that received by the latter who had only been in the employ of the company for six or seven weeks. Fifty-five persons were directly affected by this dispute, no termination of which had been reported to the Department at the end of the month.

Painters, Saskatoon.

A strike of about one hundred painters occurred at Saskatoon on May 1. The men demanded recognition of the union and changes involving decrease in working hours, an increase of five cents per hour in wages and limitation of the number of improvers and apprentices. The strike continued until

May 4, when an arrangement was made by which the union was recognized by the master painters and the nine hour day went into effect. In regard to the demand for increased wages a compromise was effected by which the men were given a minimum wage of forty cents per hour until September 1, 1912, after which they will receive forty-five cents per hour.

Plumbers, Kingston.

A strike of twenty-eight plumbers occurred at Kingston on May 1. The men struck for an increase in wages and reduced hours, making a demand for \$3.00 per day instead of \$2.55 and for eight hours per day instead of nine. A compromise was effected and the strikers returned to work on May 27. The arrangement provided for an increase in wages to \$2.75 per day of eight hours until May 1, 1913, when \$3.00 per day will be paid for a day of eight hours until May 1, 1914.

RECENT INDUSTRIAL AGREEMENT.**Agreement between the Builders' Exchange of Edmonton and the Local Bricklayers, Masons and Plasterers' International Union.**

From May 1st, 1912, and May 1st, 1913.

Hours and wages. — The regular work day shall be eight hours, between the hours of 8 a.m. and 5 p.m. except on Saturday, when it shall be four hours, between the hours of 8 a.m. and 12 noon.

The minimum rate of wages shall be seventy cents (70c) per hour.

Foremen's wages shall be at least ten cents per hour above the minimum journeyman's wage.

On all sewers and underground work the minimum wage shall be eighty-two and one-half cents (82½c) per hour.

Overtime shall be paid for at the rate of time and one-half, with double time for Sundays, New Year's Day, Do-

minion Day, Labour Day and Christmas Day.

All wages shall be paid fortnightly at noon either in currency or by marked cheque.

Specification of work. — Bricklaying masonry shall consist of the laying of bricks in, under or upon any structure or form of work where bricks are used, whether in the ground or over its surface, or beneath water, in commercial buildings, rolling mills, and iron works, blast or smelter furnaces, lime or brick kilns, in mines or fortifications, and in all underground work such as sewers, telegraph, electric and telephone conduits, and all cutting, cleaning and pointing of brick walls; fire-proofing, block-arching, terra-cotta, cutting and

setting and the laying of all tile, plaster, mineral, wood and cork block or any substitute for the above material, and the cutting, rubbing and setting of all kinds of brick and the setting of all cut stone trimmings on brick buildings, is bricklayers' work.

Stone masonry.—Stone masonry shall consist of laying all rubble work with or without mortar, setting all cut stone cut in yards and quarries, by stone-cutters, when the same is covered by stone; cutting all shoddies, including all broken ashlar, jambs, corners, ring-stones, and the laying of same and the cleaning and pointing of stone-work. This to apply to all work on buildings, sewers, bridges, railroads or other public works, and to all kinds of stone, particularly to the product of the locality where the work is being done, and the same is considered stone-masonry.

Artificial Masonry.—The cutting, setting of cement blocks or artificial stone and plaster block partitions, where substituted for brick or tile shall be done by members of the B. M. & P. I. U.

Fireproofing shall consist of the fixing and placing of all tile, block, or slab used in fire-proof construction, and shall be done by members of the B.M. & P.I.U.

Arbitration.—There shall be a standing committee of five members from

each organization who shall form an Arbitration Board.

It being understood the representative of the Builders' Exchange shall be representative of the Mason and General Contractor divisions of that organization.

All matters of dispute shall be referred to this Committee for adjustment, and shall be considered by it within a period of twenty-four hours after notice of dispute.

This Board shall have full power to act and any decision made by it shall be final and binding upon both parties.

In case of any dispute, work shall continue until such time as this board has met and considered the matter, provided that such consideration takes place within the time heretofore specified.

Signed on behalf of the General Contractors' Association of the Edmonton Builders' Exchange:

THOS. H. MILLER.

R. E. FOOTE.

J. A. GOLDSMITH.

H. G. MACDONALD.

J. DUNLOP.

IMMIGRATION AND COLONIZATION.

A HEAVY incoming of immigrants continued during May. The showing up to date is that a larger amount of immigration has come both by way of the boundary line as well as by ocean ports than in the same period in any previous year of the immigration movement. Not alone is the increase confined to numbers, but also the value of effects and the cash brought into the country shows

a corresponding increase. Immigration from the United States through the Manitoba ports has been very heavy through the last few months. While the greater portion of the new settlers are taking up land in Alberta and Saskatchewan, Manitoba is receiving more attention than it has in previous years. The latest official returns of the Immigration movement are as follows:—

IMMIGRATION TO CANADA DURING THE MONTH OF APRIL, 1912, COMPARED WITH THAT OF APRIL, 1911.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF MAY, 1912.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of British Columbia, to the office of the factories inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 331 individual work people in Canada during the month of May, 1912, were recorded by the Department of Labour. Of these, 90 were fatal and 241 resulted in serious injuries.

In the preceding month there were 62 fatal and 227 non-fatal accidents recorded, a total of 289, and in May, 1911, there were 52 fatal and 121 non-fatal accidents, a total of 173. The number of fatal accidents recorded in May, 1912, was, therefore, 28 more than in the preceding month, and 38 more than in May, 1911. The number of non-fatal accidents recorded in May, 1912, was 14 more than in the preceding month and 120 more than in May, 1911. Altogether there were 42 more industrial accidents reported in May, 1912, than in the preceding month and 158 more than in the same month of the preceding year.

The following is a record of the accidents of the month by industries and groups of trades:—

Record by Industries and Groups of Trades.

Agriculture. — There were eight fatal and six non-fatal accidents recorded during May, 1912, as compared with five fatal and six non-fatal accidents during April, and seven fatal and seventeen non-fatal accidents during May, 1911. Two each of the fatal accidents were caused by falls and falling material, and one each by live stock, by being run over, asphyxiation, and lightning. Of the non-fatal accidents, three were caused by live stock, and one each by being run over, crushing, and a fall.

Fishing and hunting. — There was one fatal accident recorded during May, compared with none in April and four fatal accidents in May, 1911. The fatality was caused by the overturning of a boat.

Lumbering. — There were one fatal and five non-fatal accidents recorded during May, compared with four fatal and ten non-fatal accidents during April, and seven fatal and four non-fatal accidents in May, 1911. The fatality was caused by lightning. Four of the non-fatal accidents were caused by contact with saws and one by a falling car door.

Mining. — There were five fatal and eleven non-fatal accidents recorded during May, compared with ten fatal and eleven non-fatal accidents during April, six fatal and fourteen non-fatal accidents in May, 1911. Two of the fatalities were caused by falling rock, and one each by machinery, mine cars, and asphyxiation. Seven of the non-fatal accidents were caused by mine cars, three by falling material, and one by machinery.

Railway construction. — There were six persons killed and three received serious injuries during May, as compared with eight killed and seven injured in April, and eight killed and three injured in May, 1911. Of the fatal accidents, two persons were killed by being run over, two by falling material, and two by asphyxiation. Of the non-fatal accidents, two were caused by explosion of dynamite and one by being run over.

Building trades. — There were five fatal and twenty-two non-fatal accidents recorded during May, compared with five fatal and eight non-fatal accidents

in April, and one fatal and six non-fatal accidents during May, 1911. Of the fatal accidents, one each was caused by the collapse of a scaffold, electric shock, explosion of varnish, asphyxiation, and falling material. Nine of the non-fatal accidents were caused by falling material, seven by falls, five by falls due to defective scaffolds, and one by electricity.

Metal trades. — There were seventeen fatal and sixty-six non-fatal accidents recorded during May, compared with two fatal and seventy-five in April, and four fatal and twenty-eight non-fatal accidents during May, 1911. Of the fatal accidents, five each were caused by machinery and falls, and two each by falling material, electric shock, flying material and one by molten metal. Twenty-two of the non-fatal accidents were caused by falling material, fifteen by machinery, twelve by falls, four each by molten metal and electric shock, three by flying material, and two each by tools, rolling stock, and explosion of gas.

Woodworking trades. — There were nine non-fatal accidents during May, compared with fourteen non-fatal accidents during April, and one fatal and four non-fatal accidents in May, 1911. Eight of these non-fatal accidents were caused by contact with machines, and one by flying material.

Printing and allied trades. — There were three non-fatal accidents during May, compared with none in April, and none in May, 1911. Two of the accidents were caused by machinery, and one by falling material.

Clothing. — There was one non-fatal accident during May, compared with none in April, and one fatal accident during May, 1911. The accident was caused by machinery.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MAY, 1912.

Trade or Industry.	Locality.	Date.	Number	Cause of Fatality.
<i>Agriculture :—</i>				
Farmer.....	Brampton, Ont.....	May 23	1	Runaway, fell under wheels
".....	Lachute, Que.....	" 28	1	Struck by lightning
".....	Viking, Alta.....	" 8	1	Overcome by well-gas

Textile. — There were two non-fatal accidents during May, compared with eight non-fatal accidents during April, and none in May, 1911. Both accidents were caused by contact with machines.

Food and tobacco preparation.—There were two workpeople killed and nineteen injured during May, compared with one killed and five injured in April, and seven non-fatal accidents during May, 1911. The two fatalities were caused by the falling of a factory wall. Eleven workpeople were injured by the collapse of a factory wall, two accidents each were caused by street cars, machinery, and fires, and one each by a railway train, and a fall.

Leather. — There were no accidents recorded during May, compared with two fatal and one non-fatal accidents in April, and one non-fatal accident in May, 1911.

Steam railway service. — There were nineteen killed and twenty-nine employees injured during May, as compared with twelve killed and twenty-seven injured during April, and eight killed and sixteen injured during May, 1911. Six of the fatalities were caused by being run over, three each by falls from handcars and by being struck by trains, two each by crushing between cars and falling material, and one each by collision, jumping from engine and a fall. Of the non-fatal accidents, eleven employees were injured in collisions, five each by being run over, and in derailments; two each by falling material and falls from handcars, and one each by a fall, burning, by being struck by a train and crushing.

Electric railway service. — There were one fatal and one non-fatal accident during May, compared with two non-fatal

accidents in April, and one fatal and five non-fatal accidents in May, 1911. The fatality was caused by a car motor falling on victim.

Navigation. — There were three fatal and four non-fatal accidents during May, compared with three fatal and five non-fatal accidents during April, and three fatal and two non-fatal accidents during May, 1911. Two of the fatalities were caused by falls overboard and one by a fall into the hold of a vessel. Four longshoremen were injured, three by falling material and one by a fall.

Miscellaneous. — There were six fatal and fifteen non-fatal accidents during May, compared with two fatal and nine non-fatal accidents during April, and three fatal and eight non-fatal accidents during May, 1911. Three of the fatalities were caused by falls under vehicles, two in runaways and one in a collision with a street car. Of the non-fatal accidents, four were caused by collisions, three each by live stock, run over and falls, and one each by runaway and by being struck by a vehicle.

Public employees.—There were seven fatal and twenty-one non-fatal accidents during May, compared with one fatal and sixteen non-fatal accidents during April, and six non-fatal accidents during May, 1911. Two of the fatalities were caused by machinery, and one each by being run over by railway train, upsetting of a boat, fall, asphyxiation, and by being shot by outlaws. Of the non-fatal accidents nine persons (firemen) were partially suffocated, three were injured in collisions with street cars, two each by falls, and falling glass; and one each by the overturning of a wagon, shooting by outlaws, struck by vehicles, collision with pole, and a cave-in.

Miscellaneous skilled trades. — There were three fatal and nineteen non-fatal accidents during May, compared with five fatal and six non-fatal during April, and four fatal and six non-fatal accidents during May, 1911. One each of the fatalities was caused by a fall, a premature explosion, and machinery. Six of the non-fatal accidents were caused by machinery, three each by the explosion of blasting powder, gas, and fires, two by falling material, one each by flying material and tools.

Unskilled trades. — There were six fatal and five non-fatal accidents during May, compared with two fatal and seven non-fatal accidents during April, and three fatal and two non-fatal accidents in May, 1911. Two of the fatalities were caused by the collapse of a trestle, and one each by rolling stock, electricity, and machinery. Of the non-fatal accidents, three were caused by falling material and one each by being run over and explosion.

Nature of Fatalities and Accidents.

There were three disasters during the month of May, each of which involved the death of two or more workmen. The worst disaster of the month was the collapse of a wall of an ice-cream factory at Toronto on May 4, by which two of the factory employees were killed and thirteen injured, among whom were two workmen working on the construction of the building. The accident, as a result of an investigation, was said to have been due to too hasty construction of the building, which was not completed at the time of the accident.

Three men were killed on May 17 at Bassano, Alta., when a trestle over which a work train was passing broke, precipitating the train to the ground forty feet below.

Two labourers were overcome by gas on May 31, while working in a tunnel on construction work near Yale, B.C., on the line of the Canadian Northern Railway.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF MAY, 1912.

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals and the Department of Marine and Fisheries, which has received the signatures of both parties, together with the fair wages schedules inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

INTERIOR FITTINGS. PUBLIC BUILDINGS AT MEGANTIC, QUE.

Interior in public building at Megantic, Que. Names of contractors, Paquet and Godbout, St. Hyacinthe, Que. Date of contract, April 16, 1912. Amount of contract, \$1,114.

Fair Wages Clauses.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in

payment of any money owing in respect of wages of any machanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the Contractor.

The Contractor shall post in a conspicuous place on the works under construction the general clause above mentioned for the protection of the workmen employed.

The Contractor shall keep a record of payments made to workmen in his employ, and the books, documents, containing such record shall be open for inspection to the Minister of Labour to have the same inspected.

INTERIOR FITTINGS IN PUBLIC BUILDING AT CAMPBELLTON, N. B.

Interior fittings in public building at Campbellton, N.B. Name of contractor, Edw. Bates, St. John, N.B. Date of contract, April 24, 1912. Amount of contract, \$2,300.

INTERIOR FITTINGS, PUBLIC BUILDING, HARRISTON, ONT.

Interior fittings in public building at Harriston, Ont. Name of contractor, The J. T. Schell Company, Alexandria, Ont. Date of contract, April 25, 1912. Amount of contract, \$1,213.

FITTINGS FOR POST OFFICE, ARTHABASCA, QUE.

Fittings for post office at Arthabasca, Que. Names of contractors, Paquet and Godbout, St. Hyacinthe, Que. Date of contract, May 1, 1912. Amount of contract, \$970.

FITTINGS FOR POST OFFICE, PORT COLBORNE, ONT.

Fittings for post office at Port Colborne, Ont. Name of contractor, A. E. Augustine, Port Colborne, Ont. Date of contract, May 10, 1912. Amount of contract, \$375.

DAM AND SLUICeway, MAPLE RAPIDS (QUINZE LAKE, QUE.)

Dam and sluiceway at Maple Rapids on Quinze Lake, Que. Names of contractors, Morrow and Beatty, Peterborough, Ont. Date of contract, April 29, 1912. Amount of contract, \$233,850.

Fair Wages Clauses.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life and property or in case of other emergencies. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or

other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the Contractor.

The Contractor shall post in a conspicuous place on the works under construction the general clause above mentioned for the protection of the workmen employed.

The Contractor shall keep a record of payments made to workmen in his employ, and the books, documents, containing such record shall be open for inspection to the Minister of Labour to have the same inspected.

EXTENSION TO PUBLIC WHARF AT STEWART, B. C.

Extension to present public wharf at Stewart, B.C., (head of Portland Canal). Name of contractor, W. G. Gillett, Vancouver, B.C. Date of contract, April 26, 1912. Amount of contract, \$4,627.

Fair Wages Schedule.

Trade or Class of Labour.	Rate of Wages. Not less than the following :	
Foreman carpenter.....	\$5.50	per day of 10 hours
Carpenters	5.00	" 10 "
Engineman for pile-driver	5.00	" 10 "
Blacksmiths	4.50	" 10 "
helpers	3.75	" 10 "
Ordinary labourers.....	3.00	" 10 "
Driver with 1 horse and cart..	7.00	" 10 "
Driver with 2 horses and wagon	10.00	" 10 "

PIER, UPPER SALMON RIVER, N. B.

Pier at Upper Salmon River, B.C. Names of contractors, Warren and Oscar Downey, Curryville, N.B. Date of contract, April 26, 1912. Amount of contract, \$5,386.

Fair Wages Schedule.

Trade or Class of Labour.	Rate of Wages. Not less than the following rates:	
Foreman carpenter.....	\$2.50	per day of 10 hours
Carpenters.....	2.00	" 10 "

Post Office Department.

During the month of April orders were given by the Post Office Department for the supplies below mentioned, subject to the Regulations for the Suppression of the Sweating System and the securing of payment to the working men and working women of fair wages, and the performance of the work under sanitary conditions.

Nature of orders.	Amount of Orders
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 889 86
Making and repairing rubber dating stamps and type, also other stamps...	77 95
Supplying stamping material and wooden boxes, and repairing stamping pads.....	1,381 35
Making and repairing Post Office Scales	188 00
Supplying mail bags.....	180 00
Repairing mail bags.....	2,433 04
Making and repairing mail locks and supplying mail bag fittings.....	759 30
Repairing Portable letter Boxes, parcel receptacles and Railway mail Clerks' tin travelling boxes.....	65 95
Making and repairing miscellaneous articles of Postal Stores.....	32 25
Making and supplying articles of official uniform.....	6,399 20

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during May, 1912:

DOMINION REPORT.

Department of Railways and Canals.

Canal Statistics for the Season of Navigation, 1911.
Ottawa: King's Printer, 1912.

THE aggregate volume of freight moved through all the canals amounted to 38,030,353 tons, which was a decrease of 4,960,255 tons as compared with the year 1910. This decrease is more than accounted for by the decline in traffic at Sault Ste. Marie, applicable almost wholly to American ore. An increase of 211,399 tons through the Welland Canal and of 344,956 tons through the St. Lawrence canals, would point to satisfactory growth as far as strictly Canadian business was concerned. The development of business through the canals of Canada is shown to have expanded by more than 400 per cent. in the last ten years, the aggregate volume of freight moved through the canals in 1902 being 7,513,197 tons.

With the development of the Western provinces there has been a steady growth in the volume of waterborne wheat, and the amount brought down through the canal at Sault Ste. Marie in 1911 was more than sixty-three million bushels, the highest figures ever recorded for this waterway. In addition to this amount which passed through the Canadian canal at Sault Ste. Marie nearly two million bushels of Canadian wheat passed through the United States canal at that point.

Detailed information by canals, relating to both tonnage and commodities, is given in tables constituting the body of the report.

BRITISH REPORTS.

Conciliation.

Ninth Report by the Board of Trade of Proceedings under the Conciliation (Trade Disputes) Act, 1896, for the year 1911. London: Wyman and Sons, 1912.

The report of proceedings under the Conciliation Act for the year 1911 shows the year to have been characterized by considerable industrial unrest, the number of work people involved in disputes causing a stoppage of work being the highest of any year since statistics dealing with this matter have been compiled by the Board of Trade. The unrest was very marked in the transport trades, in which industry during the months of June, July and August strikes broke out in most of the principal ports of the United Kingdom. In August a national strike of railwaymen also occurred. Disturbances arose in a number of towns in connection with these disputes, and in some cases the employment of the military was necessary in addition to the increased police force.

The number of cases in which action was taken under the Conciliation Act (1896) during the year under review was ninety-two, a number considerably greater than during any previous year since the Act came into force. The increase, as compared with 1910, previously the highest year, is partly accounted for by the strikes in the transport trades in which about 350,000 work people were affected by disputes occurring during the year. Of the ninety-two cases, fifty-seven were disputes involving a stoppage of work affecting altogether about 565,000 work people.

Of the ninety-two cases dealt with in 1911, thirteen arose in building trades, nineteen in the metal, engineering and shipbuilding trades, four in the mining and quarrying industries, eight in the boot and shoe trade, twenty-one in transport trades and nine in the textile trades.

The total number of Conciliation Boards in existence at the end of 1911, so far as known to the Department, was 293, of which 277 were Boards dealing with particular trades and sixteen District and General Boards, including both these registered under the Concil-

iation Act and those not so registered. Nearly all of the disputes of the year were finally settled as a result of the intervention of some person appointed as conciliator or arbitrator.

National Insurance for Out-Workers.

Report of the Committee appointed to consider and advise with regard to the application of the National Insurance Act to Outworkers. Volume I. London: Wyman and Sons, 1912.

The present report deals with the subject of outworkers in England, Scotland, and Wales in which countries fifty-five witnesses were examined, including representatives of the leading Federations of Employers and Employed in all the most important trades in which outwork is prevalent. Evidence was taken also from three ladies specially qualified to speak regarding the conditions of labour of large numbers of outworkers and from two Home Office Officials, Inspectors of Factories in England and Scotland.

Of the employers' representatives, who numbered thirty-three in all, thirteen were cordially in agreement as to the desirability of including all outworkers under the act. Three only expressed views definitely opposed to the inclusion of any outworkers. Twelve of the representatives of the employers, while welcoming the inclusion of outworkers generally, were either doubtful on the point, or antagonistic to the principle, in respect of women who are the wives of insured persons, and are not wholly or mainly dependent for their livelihood on their earnings as outworkers.

The committee, after weighing the evidence very carefully, considered that if an outworker is fully employed for one employer, the contributions should be the same as for an inworker. In respect of outworkers who are only partially employed, it does not seem practicable to recommend that full contributions should be collected for what amounts only to part of a week's work as is provided for by the Act in regard to inworkers, and under no circumstances could the committee recom-

mend the payment of contributions for all outworkers and inworkers on exactly the same lines. The following recommendations in regard to the inclusion of outworkers under the scope of the Act were made by the committee: (1) That all outworkers whose estimated average earnings for a full week's work exceed 30s. in the case of the men, or 17/6d. in the case of women be treated exactly as inworkers, that is to say, a weekly contribution shall be payable in respect of each week in which such worker is employed; (2) that in regard to outworkers whose estimated average earnings for a full week's work do not exceed 30s. in the case of men, or 17s. 6d. in the case of women, it shall be permissible to adopt a method of determining contributions by reference to work done.

FRENCH REPORTS.

Report on apprenticeship in the clock and watch making industry, published by the Department of Labour, France, 1911.

This report on apprenticeship in the clock and watch making industry is the third of a series published by the French Department of Labour, the first two dealing with the printing and furnishing industries. It is stated that most of the production in that line is the result of machine-work and apprentices are found mainly in the repair shops, where a full knowledge of the business is required. The time to be served varies from a few weeks for machine-work to three, four and even five years for hand-work, according to specialties. About two-thirds of the apprentices, it is stated, are the sons of workers in the same industry, and much of the work is done at home. Paying for piece-work applies to about two thirds of those employed in the industry and is considered as giving less facilities for forming good workmen. Apprentices are also tending to disappear, parents not caring much for any professional training provided their child receives at an early date some retribution for his work. Workmen themselves are not

very willing to train apprentices, among whom they find competitors even during the time of their apprenticeship, and it is stated in the report that many employers have not a sufficient knowledge of their trade to teach it. As far as teaching in the professional schools, to replace learning the trade in the shops, is concerned, both employers and workmen, the report says, consider it as inefficient. They state that the young men instructed in these schools are not willing to work in the shops, they are lacking in practice and their work is too slow. Only about two per cent. of the apprentices in the industry follow a professional course.

Report on the Signs of Economical Crisis and on the Financial Measures likely to decrease unemployment resulting from such Crises in France. Paris: National Printing Office, 1912.

A commission was appointed in April, 1908, by the President of the French Republic, to enquire into the "signs of Economical Crisis" and to report on the same and on the "Financial measures likely to decrease unemployment resulting from such crisis." The commission presented its report last year and the same just been published. The commission starts from the principle that economical crises are not "exceptional events arising suddenly from accidental causes," but are "phenomena which may be called normal and subject to a certain periodicity."

The commission, after careful research, has decided on eight "signs" of approaching crisis, namely: (1) the movement of bills and acceptances of the Banque of France; (2) that of the same bank's cash box; (3) prices of raw materials, food products and products as a whole; (4) France's foreign trade; (5) coal consumption; (6) price of pig iron; (7) railway traffic, and (8) industrial unemployment. Financial signs, however, the report says, would not be of themselves sufficient to give a true insight into the situation, and the movement of prices has to be taken into account. Index numbers have been established according to

Sauerbeck's method, and the commission recommends the organization in France of a periodical publication of Index Numbers and that the signs relating to railway traffic should be made more complete by issuing statistics prepared more uniformly and at shorter intervals. It is also pointed out that the lowering of prices, being concomitant with the various phases of depression, do not appear in time to allow of useful conjectures, and that attention must bear on the inflation of prices, which, on the contrary, is anterior to the crisis.

As to the remedy, the report suggests a more liberal use of the appropriations for public works in times of economical crisis and the creation of special reserve funds to be used in the various industrial services when their receipts decrease on account of a crisis.

UNITED STATES REPORTS.

Labour.

Connecticut Labour Bulletin, 1911.

The Labour Bulletin of the State of Connecticut for the year 1911 contains information regarding labour organizations in the state and strikes which occurred during the year ended October 31, 1912. The Labour Laws of the state are also set forth together with the various amendments to the same.

During the twelve-month period ended October 31, 1911, there were thirty-four industrial disturbances in the state, one of which was a lockout. There were 2,602 persons involved in these differences and 29,240 days time lost by reason of failure to effect an immediate settlement. The cause of fifteen disputes was for an increase in wages, in seven cases it was objection to new working rules, and in two instances the change in measuring system. The cause of three disputes is given as the discharge of certain employees. The result of the thirty-four controversies may be summarized as follows: Striking employees were successful in their contentions in twelve

instances, five being partially successful. In fourteen cases the workmen were unsuccessful in their contentions, two of the difficulties were amicably adjusted and one remained unsettled at the close of the report. A brief description of the causes and results of the most important strikes is given in the Bulletin.

Wages.

Report of the Commission on Minimum Wage Boards of the Commonwealth of Massachusetts. Boston, 1912.

A resolve of 1911 provided for the appointment of a commission to study the matter of wages of women and minors and to report on the advisability of establishing a board or boards to which shall be referred inquiries as to the need and feasibility of fixing minimum rates of wages for women or minors in any industry. The commission appointed gathered wage schedules from 6,900 persons and a certain amount of personal data from 4,672 persons. Employees in ninety-one establishments in eighteen localities were investigated and the result of the investigation is detailed in the report of the secretary of the commission. The investigation showed that out of 1,986 employees under eighteen years of age 753 were earning less than four dollars per week, 491 between four and five dollars, 326 between five and six, 204 between six and seven, 87 between seven and eight, and the remaining 125 more than eight dollars per week. In regard to the number of employees over eighteen years of age, out of 11,859 cases investigated, 1,170 were earning less than four dollars per week, 1,348 between four and five dollars per week, 2,093 between five and six, 1,941 between six and seven, 1,576 between seven and eight, and the remaining 3,731 were earning more than eight dollars per week.

From the foregoing figures it is seen that a large number of women of the age of eighteen years and upwards are employed at very low wages; it is an undisputed fact that a great part of

them are receiving compensation that is inadequate to meet the necessary cost of living.

The commission was directed to report on the advisability of establishing a board or boards to which should be referred inquiries as to the need and feasibility of fixing minimum rates of wages or minors in any industry. Such a system of legislation has been in operation in the State of Victoria, Australia, since 1896, and in Great Britain since January, 1910. In Victoria, at the instance of either employers or employees, or of the minister of labour, the Legislature may authorize the creation of a special board, which is empowered to fix a minimum wage for a given trade. Employers and employees are equally represented upon such a board, and a non-partizan chairman is selected by the two parties interested, or, in case of their failure to agree, by the minister of labour. In 1910 twenty new boards were instituted, and at the end of that year ninety-one industries were under the operation of the act, affecting 5,362 factories in which 83,053 workers were employed.

In England the industries in which the system may be applied are named by Parliament, but the Board of Trade may provisionally extend the application of the act to other industries, subject to subsequent continuation by parliament. The wage boards are composed of representatives of employers and workers in equal numbers, elected by their respective organizations, and of other members appointed by the Board of Trade. The determinations of these boards are made obligatory by an order of the Board of Trade, but the Board of Trade may suspend the operation of such order. Minimum wage orders determined in this manner apply to both men and women, and they may apply universally to the trades, or to any special process in the work of the trade, or to any special class of workers in the trade. The act has not been long enough in operation to judge of its ultimate success.

Legislation of a similar character,

the commission believes, should be established in Massachusetts. The need of it is great, and the possibilities of its successful administration in the compact population and well-established mercantile and industrial institutions are promising. The administration of the plan proposed by the commission is vested in a permanent commission of three members, to be known as the Minimum Wage Commission, who would be paid only for the time spent in the service of the Commonwealth. It would be the duty of the commission to enquire into the wages paid to the female employees in any occupation in the Commonwealth if the commission has reason to believe that the wages paid to a substantial number of such employees are inadequate to supply the necessary cost of living and to maintain the worker in health. This investigation, may, at the request of the commission, be conducted by the Bureau of Statistics. If after such investigation the commission is of the opinion that in any employment the wages paid to a substantial number of female employees are inadequate to supply the necessary cost of living, the commission shall establish a wage board and transmit to it the information it has acquired, such board to be essentially a board of inquiry and arbitration.

Factory Inspection.

Annual Report of the Factory Inspector of the State of Pennsylvania for the year 1911. Harrisburg, 1912.

For the year ending December 31, 1911, the returns made to the Department of Factory Inspection indicate a decrease in the industrial activities of manufacturing establishments, especially in those where iron and steel are the products. These establishments which in 1910 reported a total of 390,610 employees, have, for the year under review, reported a total of but 368,084 employees, a decrease of 22,526. This decrease was in the rolling mills and blast furnaces principally; the small shops where the by-products of iron and steel are manufactured or repair-

ed, showing no material loss or gain.

The textile industries show an increase of 2,285 employees, an increase to be accounted for by a more thorough inspection of shops in which clothing is manufactured in whole or in part. New places of this kind, to the number of 270 were inspected. None of these are of the "sweatshop" class, and but few of them employ many operatives, the average being less than ten persons per shop.

The number of industrial and mercantile establishments inspected was 15,560, a gain of 767 over the preceding year. The increased number of inspections is due, in greater part, to visits made to mercantile establishments and to small shops where garment workers are employed. Notwithstanding the increase in the number of establishments inspected, the aggregate of employees was 7,901 less than for the year 1910. This showing is in accord with the generally prevailing sentiment that during the last year there was a falling off in business activities.

Notwithstanding the efforts made to guard machinery and other dangerous appliances, the killing and maiming of employees continues, and in the year covered by the report there were 176 fatal accidents, 493 serious ones and 2,878 of slight consequences.

The number of minors between the ages of sixteen and fourteen years who were found employed in the industrial and mercantile establishments was, males, 16,994 and females 17,481, a total of 34,475. Of this number 1,020 were dismissed for lack of employment certificates, nineteen for illiteracy and fifty-eight for lack of sufficient proof of age qualification. Many of those dismissed for failure to have employment certificates on file had had certificates issued to them but had failed to obtain them from other establishments in which they had been employed and where the certificates are on file. The returns show that the number of minors employed has not decreased for the past year.

Railroad Accidents.

Accident Bulletin No. 42. Railroad accidents in the United States during October, November and December, 1911. Washington, 1912.

The number of persons killed in train accidents during the months of October, November and December, 1911, as shown in reports made by the railway companies to the Interstate Commerce Commission under the "accident law" of May 6, 1910, was 242 and of injured 4,706. Accidents of other kinds, including those sustained by employees while at work, by passengers in getting on or off cars, by persons at highway crossings, by persons doing business at stations, etc., by trespassers, and others, bring up the total number of casualties, excluding "industrial accidents," to 22,682 (2,726 killed and 19,956 injured.)

The total number of collisions and derailments in the quarter under review was 3,346 (1,426 collisions and 1,920 derailments), of which 244 collisions and 215 derailments affected passenger trains. The damage to cars, engines, and roadway by these accidents amounted to \$2,893,948.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

QUEBEC CASES.

Master and Servant. Injury to Servant. Workmen Compensation.

THE application of the Workmen's Compensation Act was exemplified recently in Montreal when a case was heard before Mr. Justice St. Pierre in which the plaintiff was seriously injured by having his hand badly scratched while employed in a shoe factory. Blood poisoning set in and he was forced to spend a considerable time in the hospital. He claimed a pension equal to one-half of his weekly wage, such pension to continue until a full sum of \$2,000 had been paid by his former employer. The judge, however, decided that according to the terms of the Act the \$2,000 mentioned therein applied only in the case of permanent disability arising from accidents occurring in industrial establishments. As the statements of physicians had proved that the injury was only temporary the plaintiff could not under the terms of the Act claim the full amount of the indemnity. Judgment was rendered providing for a weekly or fortnightly payment of an amount equal to one-half of the salary he was earning at

the time of the accident, such payments to continue only until the plaintiff was able to resume his work.

Life Insurance Claim After Withdrawal from Organization.

That the payment of a premium on a life insurance policy is simply a fulfilment of a contract was established by Mr. Justice Greenshields in the Superior Court at Montreal recently in a decision against a claim entered by Dame Rosa Cousins against the Brotherhood of Locomotive Firemen and Engineers.

The circumstances of the case as shown in the court were as follows: William H. Walker, the deceased husband of the plaintiff, had entered the Brotherhood in the early part of 1908, being insured for the sum of \$1,500. In November, 1910, he applied for a withdrawal card, announcing his intention of entering another organization. All his dues were paid up to the 31st of December, but on the 10th of that month he was killed in a fatal accident on the Grand Trunk Railway line between St. Hyacinthe and St. Rosalie. The contention of the plaintiff was that all dues were paid up to the close of the year the deceased remained insured, in spite of the fact that he had applied for a withdrawal card. The defendant organization in return stated that, ac-

ording to the constitution, immediately a member applied for such a card he ceased to be a member, and could not lay claim to any benefits in virtue of a policy which he might have held in the organization. This condition was accepted by the deceased when he took out the policy.

In answer the plaintiff referred to the Quebec Insurance Law, wherein it was stated that no conditions could be accepted as influencing a life insurance policy unless such conditions were specifically mentioned on the face of the policy itself. In the case of policies issued by fraternal organizations a special provision was made that any clauses or articles of the constitution affecting the policy should be designated, not generally but by section numbers. The counsel for the defendants maintained that the insurance law was not retroactive and that as the policy had been written before the passing of such law, it could not be said to fall under the Act. To this the plaintiff made a counter contention to the effect that the payment of the premiums or assessments had the effect of renewing the policy, but this claim was disposed of by the court and the case was dismissed. (*Cousins v. Brotherhood of Locomotive Firemen and Engineers.*)

ONTARIO CASES.

Non-Payment of Wages.

In the Hamilton Police Court a painter and paperhanger preferred a charge against his employer for alleged non-payment of wages due to him for work performed. The evidence showed that the plaintiff had been employed to paper a room on his own assurance that he was capable of doing it satisfactorily, the agreement being that no payment should be forthcoming if he failed to do so. After working for some time the man was discharged and claimed \$6.50 in payment of work done. An experienced paperhanger gave his opinion of the work which showed it to be so unsatisfactory as to necessitate the room being done over again. The

magistrate dismissed the claim saying that the man should not have represented himself as a first class workman when he could not do first class work.

Master and Servant. Injury to Servant. Negligence.

An interesting case exemplifying the view of the Divisional Court as to the strictness with which employers of labour should be held to the observance of duties prescribed by statute for the protection of their employees was recently heard before Chief Justice Sir William Meredith. The case arose out of an appeal by the defendant from a judgment rendered by Mr. Justice Britton for \$1,000 damages for injuries sustained by the plaintiff in the course of his employment. The evidence showed that the injuries were caused by the plaintiff's being near a revolving shaft which caught his clothes and threw him on to a moving pulley, inflicting serious bodily damages. His proximity to the shaft was due to his having removed the top of the guard covering it in order to apply to the belt a mixture necessary to prevent its slipping around the pulley. He stated that for the purpose of performing this operation it was necessary for him to step inside the guard, although he knew the unguarded condition of the screw.

When the case was heard in the lower court the jury held that the defendant was guilty of negligence in not having the machinery guarded otherwise than it was guarded when the plaintiff was injured and that the plaintiff could not by the exercise of reasonable care have avoided the accident.

The grounds of appeal chiefly relied on by the defendant's counsel were (1) That there was no evidence of negligence to warrant the case being submitted to the jury, and if there was any negligence it was that of the plaintiff, who failed in his duty of foreman, within the meaning of section 6 of the Workmen's Compensation Act: (2) That the evidence established contributory negligence and that the finding of the jury on that question was per-

verse; (3) That the maxim *violenti non fit injuria* applied and that the fact that the plaintiff appreciated the danger of the work at which he was employed entitled the defendant to a judgment dismissing the action in the lower court.

The Divisional Court held that the defendant was guilty of a violation of the Factories Act and absolved the plaintiff of contributory negligence. In regard to the applicability of the maxim *violenti non fit injuria* in relief of a defendant guilty of a violation of a statutory duty such as is imposed by the Factories Act the court held that the question was settled by a Divisional Court in England and the decision had also been followed by the courts of Canada. Mr. Justice Street delivering a judgment in the case of *Rogers v. the Hamilton Cotton Company* said "The principle *violenti non fit injuria* has been held not to apply when the accident has been caused by the defendant's breach of a statutory duty. And even if applicable the knowledge of the workman of the existence of the defect has been considered to be merely an element in the question of contributory negligence." The appeal was dismissed with costs. (*McClement v. Kilgour.*)

Alleged Infringement of Union Label.

The plaintiffs, an international body, asked by the writ for an injunction restraining the H. A. Britton Company from using the new label which was alleged to be an infringement. This was a motion to compel the secretary of a new union calling itself "The United Garment Workers of Canada," to produce its books for examination. The counsel for the plaintiffs maintained that the newly formed organization was a bogus union started with a membership of thirty-five or forty of the Company's employees after the United Garment Workers had withdrawn its label from the defendant company. It was further stated for the plaintiffs that the organization was promoted merely to get a label and they moved

for a committal of the secretary, or for an order directing him to attend for re-examination and compelling him to produce the books of the union. The defendant company maintained that the case was an attempt to attack the Canadian union and that the motion was unnecessary. It was held by the court that the secretary of the organization was within his rights in refusing to produce the books at this stage of the proceedings and the motion was dismissed with costs. BRITISH COLUMBIA CASES.

Master and Servant. Injury to Servant. Negligence.

The plaintiff, a brakeman employed by the defendant, while standing on the ladder of a box car attached to a moving train, struck against a water stand pipe and was injured. In an action for damages for his injuries the jury found that the defendants were negligent in having the stand pipe too near to the track. Notwithstanding the findings of the jury, the judge dismissed the case and an appeal to the Court of Appeal followed.

An interesting point in connection with the case was raised in the fact that an order of the Board of Railway Commissioners, dated the 2nd of February, 1910, approved the defendants' plan of water stand pipes placed at not less than seven and a half feet from the middle of the track; but a general order of the Board dated the 9th of November, 1910, provided that "water stand pipes shall be not nearer than 2ft. 6 in. from the widest engine cab." It appeared that the pipe which caused the plaintiff's injury was less than that distance from the widest engine cab. The plaintiff contended that the order of November overruled the one of February, while the defendants maintained that the order of February, being a special, and that of November a general one, the later order had no application to the stand pipe in question.

Chief Justice Macdonald in the higher court sustained the contention of the defendants and held that they were not negligent in having the stand pipe where it was, as the order of the Board had the effect of a statute. (*Clark v. Canadian Pacific Railway Company.*)

Master and Servant. Injury to Servant. Negligence.

The plaintiff was injured by an explosion of dynamite into which he stuck his pick while employed as a mucker in the defendants' tunnel. The case was dismissed by Mr. Justice Gregory and in an appeal to the Court of Appeal the judgment rendered in the lower court was sustained. The court held that there was no proof as to how the dynamite came to be there nor was it shown that it could have been discovered by careful inspection before blasting. It was also held that the defendants could only be responsible if they were negligent in respect of its being there. In view of the evidence it was, in the opinion of the court, essentially a case for relief under the Workmen's Compensation Act.

**Accident to Foreign Workman—
Compensation Recoverable.**

An important case showing the applicability of the Workmen's Compensation Act was recently settled by the Privy Council after an appeal to the Court of Appeals had proved successful—decision establishes the right of foreign relatives of workmen in British Columbia to benefit under the provisions of the Workmen's Compensation Act.

The plaintiff, Kraus, was a miner in the employ of the Crow's Nest Pass Company and met his death by a mine accident. His relatives who claimed compensation under the Act lived in Austria and the main argument in the defence was that the Act did not apply to dependents outside the Province. The case was taken up by the Miners' Federation and argued in the Supreme Court, where a judgment was rendered

in favour of the miners. An appeal by the defendants to the Court of Appeal followed where their contention was upheld and the judgment of the trial court reversed. A further appeal to the Privy Council was then decided upon by the Miners' Federation with the result that the original judgment of the Supreme Court was restored. (*Kraus v. Crow's Nest Pass Company.*)

ENGLISH CASES.

Coal Mines Regulation Act. Refusal to Work. Offence.

Under the provisions of the Coal Mines Regulation Act, 1887, in every mine special rules must be made for the conduct and guidance of the persons acting in the management of such mine and of those employed in the mine, such as according to the circumstances of the mine may appear best calculated to prevent accidents and provide for safety and discipline. Any person acting in contravention of, or failing to comply with any of such special rules is guilty of offence against the act and is punishable.

Among the special rules relating to a colliery there was one at the end providing generally that all persons employed in the mine should be under the control of the manager, under manager, or deputies, and should at all times obey their lawful commands. Certain boys (known as trammers) employed in the colliery, after being at work in the pit for three and a half hours, refused to work any longer and demanded to be brought up. The reason they gave for their conduct was that they were unable to get sufficient tubs. The under-manager ordered the boys to resume their work, but they refused; and in consequence the men working at the face of the coal were obliged to stop. The colliery owners then took proceedings before magistrates against the boys for disobedience to the special rules. The magistrates convicted the boys, finding as a fact that sufficient tubs had been provided for them, and stated that they convicted them in the interests of dis-

cipline with regard to what was necessary to the safety of those employed in the mine. They stated a case for appeal.

It was argued on behalf of the boys that although the particular order by the under-manager to do a particular act in the course of the employment might have come within the rule, what the boys had done here was to go on strike and to put an end to their employment altogether; and the magistrates had convicted them for going on strike. The High Court held that the boys were properly convicted. The rule in question was added to the other rules to make provision for some unforeseen thing that might happen in the mine and not be covered by any particular rule. Here the boys put their judgment against that of the under-manager. It was of the utmost importance that discipline and authority should be maintained in mines and the High Court sustained the decision of the lower court and dismissed the appeal. (*Colbeck v. Whitwham.*)

Minimum Wage in Coal Mine— Abnormal Place.

An agreement was made between colliery owners and the miners employed at a certain colliery by which it was provided that the minimum wages for colliers working in abnormal places, or unusually hard or difficult places, should be fixed at 4s. a day together with certain percentages which raised the minimum to 6s. a day. A dispute arose between the miners claiming to have been engaged in an abnormal

place and the employers as to the amount of wages payable under the agreement. A case was brought by certain of the miners in the County Court by way of settling the dispute. On the evidence given the County Court judge found as a fact that the men had been working in an abnormal place, and gave judgment in their favour. But instead of awarding them the difference between what they had been paid and the minimum of 6s. a day, he gave them the difference between what they had received and what they would have earned if they had been working in a normal place which latter sum he fixed at 5s. a day. He also deprived the plaintiffs of costs on the ground that they had allowed so long a time to elapse before bringing their action that the defendants had a difficulty in calling evidence as to the nature of the place in which the plaintiffs had been working. The men appealed against this decision. For the employers it was pointed out that the result of the agreement was extraordinary in this case, as the 6s. minimum in relation to work in abnormal places turned out to be greater than the average weekly earnings of 5s. in normal places. The court held that the judgment appealed against could not stand, since it had the effect of making a new contract between the parties and that the County Court judge, ought to have given the plaintiffs the 6s. a day which was their under the agreement—less the amount they had been paid—and allowed the costs. The appeal was therefore allowed. (*Jones and others v. Phoenix Colliery Company.*)
